

LOCAL AND PERSONAL

The motorist registered 16 degrees below zero on Monday morning.

Johnston church, one of the oldest in the city, was the scene of a service of prayer for the sick on Sunday.

Miss Maudie, visited friends in the city on Thursday.

Samuel Truxell, one of the city's most prominent citizens, was a visitor in the city on Thursday.

One of the largest lumber and timber land deals in the history of Pennsylvania has just been consummated in Johnston.

It involves the timber right to 3,000 acres of land in the vicinity of Friendsville, Somerset county, and 21,000 feet of lumber.

The purchasers are John W. Clark, of Cash Corners, Warren county, Pa.; Hiram F. Andrew and Clinton F. Morris, of Garland, N. Y.; Alfred D. Neal and Dr. F. A. Stonestreet, of Marietta, Pittsburgh; James Johnston, of Champlain, N. Y.; and Harry E. Clark, of Green Campbell, Indiana county, Pa.

A branch of the Bando railroad, fourteen miles in length, will be run from the main line in Somerset county to the timber tract.

The Election in Ebensburg

The election in Ebensburg on Tuesday passed off very quietly with the usual result. The vote was as follows:

Borough at Large. Auditor, Schuyler Davis, R., 153; M. D. Beator, D., 87. David's majority, 66.

High constable, David Williams, R., 129; Frank Krue, D., 53. Williams' majority, 76.

East Ward. Auditor, Schuyler C. Davis, R., 65; M. D. Beator, D., 15. David's majority, 44.

Frank Krue, D., 12. Connelman, William Williams, R., 67; J. R. Donny, D., 10.

Constable, Jonathan Lloyd, R., 64; William Byrne, D., 15.

W. H. H. Robertson, F. C. Jones, R., 68; Robert McCrean, D., 9.

Judge of election, John D. Evans, R., 67; George C. K. Zahm, D., 11.

Inspector, Nathaniel Davis, R., 67; Harry Blair, D., 10.

West Ward. Auditor, Schuyler C. Davis, R., 88; M. D. Beator, D., 74.

High constable, David Williams, R., 79; Frank Krue, D., 71.

Connelman, George L. Frederick, R., 87; John L. Slough, D., 82.

Constable, E. W. Humphreys, R., 100; John Maloney, D., 61.

School director, T. W. Dick, 83; Ed. J. Lester, D., 77.

Judge of election, Hosen Evans, R., 32; James C. Murray, D., 67.

Inspector, Samuel Thomas, R., 80; Thomas J. James, D., 20.

The Mozart Symphony Club at the Opera House on Saturday evening.

Low Rates to Washington, D. C. The next of the series of low-rate excursions to Washington, D. C., via Pennsylvania railroad, will leave Pittsburg, March 5, 1908.

Excursion tickets, permitting of stop-over in Baltimore in either direction within limit, will be sold at rates quoted below, good for use on special train mentioned below, or on train No. 4 leaving Pittsburg at 8:10 p. m., returning on any regular train except the Pennsylvania Limited. Special train for parlor cars and day coaches will be run on the following schedule:

Train No. 4. Rate, 10:00 A. M. \$7.25

Cresson, 10:20 A. M. 7.25

Altoona, 11:20 A. M. 7.25

Washington, Arrive 7:30 P. M.

Should the number of passengers not be sufficient to warrant the running of special train, the company reserves the right to carry participants in this excursion on regular train.

Tickets on sale in Pittsburg at Union ticket office, Fifth avenue and Smithfield street, and Union Station, and stations mentioned above. For full information apply to agents or Thomas E. Watt, 110 Fifth avenue, Pittsburg.

Marriage Licenses

The following marriage licenses were issued by the Clerk of the Orphans' Court for the week ending Thursday, February 19, 1908:

Augustus W. Burzgraf and Daisa Erna, Barnesboro, Pa.

Thomas H. Willerts, Barnesboro, and Mame Cunningham, Glen Campbell.

Robert D. King, Huntington Furnace, and Elizabeth Koels, Bensenville.

Steve Sest and Mary Savoy, Bensenville.

Charles C. Conners, and Nancy Beck, Bensenville.

Daniel Fitzpatrick and Anna L. Kough, Johnstown.

John McDermott and Kate Gray, Johnstown.

R. E. Owens, Johnstown and Kate E. Michaels, Belsano.

R. J. Simpson, Branchton, Pa., and Lulu W. Wilson, Hastings.

William Sess and Clara Taylor, Lilly.

Arthur Lee and Mary Terry, Johnstown.

Martin L. Logo and Amy L. Piper, Tunnell.

Harry W. Springer, Coersdale, and Annie S. Wadsworth, Somerset county, Pa.

Charles Sauters and Maggie Naylor, Johnstown.

William Fisher and Clara E. Wyatt, Conemaugh.

Charles Ed. White, Cambria township, and Emma M. Davison, Ebensburg.

Mozart Symphony Club

A cultured audience was highly entertained at the Pythian Opera House last night, the occasion being the appearance of the Mozart Symphony Club, one of the best musical organizations that has come South this season.

The program was indeed a treat to the lovers of music and the general public, and the performance was a credit to the managers of the presenting society, a classical entertainment to their patrons. Jackson, Tenn., Press.

At the Opera House, Ebensburg, Saturday evening, February 22nd.

Fire in Summerhill

On Thursday afternoon of last week a fire, supposed to have been caused by a defective fuse, broke out in the residence of Stephen Dimond, of Summerhill, and so rapidly was the progress of the flames that the building and all the household goods were consumed. A house adjoining, owned by Mr. James Plummer and occupied by Lewis White was also destroyed. Owing to the prompt work of the neighbors, most of the household goods of Mr. White were saved, but some in a damaged condition. There was \$600 insurance on the property destroyed, which will not begin to cover the loss.

The Farmers' Institute

At the farmers' institute held here on Thursday of last week, the following is the most important part of the proceedings.

The question how to abolish Canada whistles was answered by Col. Woodward, who said the proper way is to cut them off continually—deprive them of their lungs.

Mr. Joseph Farabaugh advocated pulling the plants out with a pair of pliers.

Hon. A. A. Barker gave his experience, detailing how he had endeavored to dig them out, burn them off, and put salt on them and finally gave up.

Mr. Thomas L. Jones, who bought the farm from Mr. Barker, is the president.

Mr. McCormick said he had known them to be killed by covering with straw and letting it remain for several years.

Dr. Rothrock has known them to be killed near the level by going over the path frequently with a lawnmower; but in high altitudes he believes it is harder to keep them under.

Secretary Edge cautioned people to burn straw in which fruit trees had been treated frequently with a lawnmower; but in high altitudes he believes it is harder to keep them under.

Mr. Wertz had killed them by salting the sheep on the patch frequently.

"What is the cause of blasted oats?" Dr. Rothrock explained that this is propagated by spores and mold, and is an embryo. All smuts come from infected seed—following up the stem from the root, and breaking down the kernel. Soak oats for twenty-four hours in a vessel of sulphur (one to one and one-half pounds) in twenty-four gallons of water in a wooden vessel, stir frequently; three bushels of oats can be placed in this. This can be used three times for nine bushels of oats. For stinking smut, pass through water and through a strainer, and use of 122 degrees. This is beneficial for the oats, and increases the production.

A query with regard to blueweed was answered by Dr. Rothrock, who cautioned people to dig them out and pull it out.

The yellow daisy was mentioned by Dr. Rothrock as a little sunflower. Mr. W. R. Gregg, of Fallen Timber, says he killed the plant by covering it with coal tar.

"Does continued cutting of potatoes cause them to rot?" Dr. Rothrock said he does not believe that potatoes are running out. Potatoes are not roots; they are tubers.

A question relative to the slacking of lime—Is slacking by air the same as by water?—was answered by Prof. Hamilton that the effect is the same. If left exposed too long, it becomes carbonate of lime. He prefers to blow lime under, but it will work down.

Mr. Anselm Weakland had plowed lime down in the fall, 100 degrees, and on the ground in the spring, and got no corn.

On clayey soils slacked lime will have a tendency to keep the particles apart; but in sandy soil it may cause it to adhere.

The effect on vegetable matter is to render it insoluble, which may have been the case with Mr. Weakland's crop; but the lime will eventually act. Lime without something to act on is useless. The best lime is to test a small portion of the soil, and if it is found beneficial, he can then apply it. Get pure lime. All lime is not pure—some contains carbonate of magnesia, which is injurious. This is produced from limestone containing cement.

At the afternoon session Colonel Woodward explained the Chautauqua Course of Reading.

Secretary Edge repeated his talk of Wednesday on the analysis of fertilizers.

Professor Hamilton talked on clover—common and crimson. Clover is one of the cheapest of fertilizers. A gentleman dried at a temperature of 212 degrees the product of an acre of ground, and had 1,318 pounds; the roots dried, weighed 1,418 pounds. This would represent an amount equal double the weight of air-dried product. Clover takes carbon from the air and places about as much in the soil as it leaves above the ground.

Clover also absorbs free nitrogen from the air—a power which no other plant possesses. Nitrogen is worth from fifteen cents to eighteen cents per pound. After taking off two crops of hay the roots on an acre will contain one hundred pounds of nitrogen, and as the last crop would contain one hundred pounds, if you turn down the clover the second year, you place in the soil for plant food \$30 worth of nitrogen. Crimson clover is a plant you can sow in June and July, and it will ripen in May. It is an annual, and has to be sown for each crop. Crimson clover sown in cornfields at last working will cover it in the winter. Some people sow in stubble fields. Seed must be only one year old or it will not grow.

Prof. Hamilton, in reply to a query as to Canada peas, said he believed it a splendid plant. Sown with oats it makes a splendid food for cattle.

Being asked about pasturing crimson clover in the fall, he said he would not do so, although it could be done. He does not believe in pasturing. He keeps his cows in the stable.

Mr. Thomas gave a flattering account of his experience with crimson clover sown in corn last summer.

Prof. Hamilton explained how clover may be made to "catch" by top dressing the ground with barnyard manure or other fertilizer.

Colonel Woodward spoke on "Barnyard Manure." Manure carelessly kept in the barnyard will fire-free. If put on the field it will not lose that cause.

Mr. E. E. Ulrich, of Monroe county, spoke on "Fertilizing." He said that he had seen a farmer who had used a fertilizer which he had bought from a peddler, and which he had used on his corn, and which he had found to be a very good fertilizer.

Mr. Ulrich, being asked how he liked Jersey cows, replied that he liked them well; but he had known Guernsey better. Test the milk of your cows with a milk tester.

"Has any one had experience with winter oats?" Mr. Ulrich said that he had once and only once. He did not think it could be raised in this high latitude.

He was asked about hollow horn and said that he did not believe there is such a thing as hollow horn, and that he had seen it cured by boring a hole in the horn and injecting a mixture of salt and black pepper, in equal parts, therein. The application of turpentine to the base of the horn is said to produce the same result.

The subject of delimiting cattle was next discussed pro and con.

"What kind of winter apples are the best to graft in this latitude?" was discussed at length. The Northern Spy, Baldwin, King of Tompkins county, Long Island Greening, and others were suggested as good keepers.

Mr. Ulrich, being asked what kind of cows paid him best in his experience of dairying, would not advise fancy prices for thoroughbred cattle, as often others were as good, seven-eighths blood being preferred.

Mr. Ulrich believed in applying lime by manuring the ground, spreading, plowing down, and applying lime on the top of the ground.

Mr. Thomas announced that if a proper place can be secured for holding it, another institute will be held in the south of the county.

Mr. McCormick said that Johnston people would welcome an institute, and he thought a suitable hall could be procured.

Mr. D. S. Yoder thought likewise, and agreed to look the matter up.

The lecture of Dr. J. T. Rothrock, in the court room in the evening, entitled "Beautiful Pennsylvania," was a highly instructive talk on a very interesting subject.

Death From Yellow Fever

RIO JAXIMO, Feb. 19.—The chief engineer and eight members of the crew of the Italian cruiser Lombardia have died of yellow fever. There were 40 deaths from yellow fever here in 24 hours.
