

Peace.
A hen with a clam, and all the ground
is bare and chapped with bitter cold.
The rats are iron; fish are found
In ice encased as in a mold.
No frozen hill-tops ache with pain,
And chattering tremble down each sky
Deep rattle burrowing in the plain.
Now mark the sky.

The Old Slaughter.
Out of the way in a corner
Of our dear old attic room,
Where bunches of herbs from the hillside
Shake over a faint perfume.
An onion chest is stashed away,
With soap and red wax and lye,
Strong as the hands that made it
On the other side of the sea.

When the winter days are dreary
And we're out of heart with life,
Of its crowding care a weary
And sick of its restless strife,
We take a lesson in patience
From the attic corner dim,
Where the chest still holds its treasures,
A wardrobe, faithful and trim.

Robes of an antique fashion,
Linen and lace and silk,
That time has faded and worn,
Wonderful how they were white as milk.
Thoughtful baby garments
Trodden with loving care,
By fingers that feel the pleasure,
As they struggle to the wardrobe bar.

A sword with the red rust on it,
That faded in the battle dust,
When from Lexington to Yorktown
Sorely men's souls were tried.
A plumed champion and a buckle,
And many a relic of the past,
And all by the old sampler,
Framed in with berry and vine.

Faded, the square of canvas,
And dim the silver thread,
But I think of the white hands dimpled,
And a child, once so bright and glad,
For, how is a cross, and in vest-stitch,
In a wreath of berry and vine,
She worked it, a hundred years ago,
"Elizabeth, aged nine."

In and out, in the sunshine
The little needle flashed;
And in and out, on a rainy day
When the merry drops down plashed,
As close as she lay her mother—
The little Puritan maid,
Who brought her mother's sampler,
While the other of heaven played.

You are safe in the beautiful heaven,
"Elizabeth, aged nine,"
But, before you went, you had troubles
Sharper than any of mine.
Oh, the gold hair that shone so warm
When she was the drifted snow,
And your tears dropped here where I'm
Standing—
On this very plumed champion.

When you put it away, its wear
Would never need it,
For words that cheer the secret,
God keeps your gender here,
And you were your girl like glory,
You could not need it,
Was wrought in your mother's childhood,
"Elizabeth, aged nine."

She softly pulls a downy veil
Before her dear Madonna face;
This falling snow, abroad that trail
Across the wild a feathery trace
Beneath whose folds the summer earth
Asleep his stitches dreams away,
Forgot both pain and summer's mirth
Soothed by the sky.
—Scribner's Magazine.

FRED. KURTZ, Editor and Proprietor.

VOLUME XI. CENTRE HALL, CENTRE CO., PA., THURSDAY, MARCH 7, 1878. NUMBER 10.

"Oh, out in the back yard sawing wood, I guess," said Cecil, "escorting herself comfortably in a chair with a book. Great readers of romance they all were."

When there was no immediate diversion offered in the way of promenades or strolls, one of the two sisters had been known to pass a whole day at a time, oblivious of everything except the deeds or misdeeds of some hero of the dramatic type.

"Look here, Oly," said Amie, sweetly, when her brother had come up into her room. "I want you to do something for me, like a dear good fellow."

"What's up now?" asked Oliver, "more gruffly, because he knew his sister had a motive for pleasing him."

"I want you to post these letters for me without letting me know."

"Why don't you post 'em yourself?"

"I don't know how to do it," said Amie, "and I don't want to let you see them."

"O, you know well enough, Oly," said Cecil, "and I don't want to let you see them either."

"What I want to know, girls," said Amie, "is how you can do it without letting me see them?"

"That's what you always say," returned her brother, "remembering that the many times he had been left out at the elbow because Mrs. Mayne's system of education was such that the girls had always to be supplied first."

"But Amie knew well how to avert any unpleasant argument which was politic to her."

"Never mind—see here," said she, slipping a small piece of money into his hand.

"It became perceptibly better natured on the moment."

"Say, Amie," he cried, "I'll send you the envelopes, I'll bet my hat on it, I'll bet my hat on it, I'll bet my hat on it."

"He got no further, for his sister, turning round, said to him, 'You may as well go to the door, for I have said that name, when she had put Mr. Pickens' invitation in the very middle of the packet.'"

"I don't know what you mean by that," said Amie, "but I'll bet my hat on it, I'll bet my hat on it, I'll bet my hat on it."

"I tell you it is not to be bathed in—not for one moment," replied her mother, "and I don't want to let you see them either."

"I don't know what you mean by that," said Amie, "but I'll bet my hat on it, I'll bet my hat on it, I'll bet my hat on it."

"I tell you it is not to be bathed in—not for one moment," replied her mother, "and I don't want to let you see them either."

THE TELEPHONE.
The invention of an Atlanta man, named Telephonic Transmitter and Phonographic Register.

The Atlanta (Ga.) Constitution has the following account of an invention which it attributes to a resident of that city: "We are not permitted this time to state the first name of the inventor, but we can say that an examination of the working model leaves no room to doubt its successful character. It is a device which is so simple in its construction that it can be made by any one who has a fair knowledge of mechanics. The gentleman of whom we speak has carefully watched the progress of the invention, and he has not only succeeded in constructing a model, but he has also succeeded in constructing a model which is so simple in its construction that it can be made by any one who has a fair knowledge of mechanics. The gentleman of whom we speak has carefully watched the progress of the invention, and he has not only succeeded in constructing a model, but he has also succeeded in constructing a model which is so simple in its construction that it can be made by any one who has a fair knowledge of mechanics."

THE MASSACRE OF THE MILL.
The following is a historical sketch of our gold coinage:

1. The double-eagle, or twenty dollar piece, was first issued in 1864. It was authorized by the act of March 3, 1864, and its weight is 516 grains. Its fineness is 900. This technical form of expression means that 900 parts in 1,000 are pure gold, the other 100 parts are alloy. The total coinage of the twenty-dollar gold piece up to June 30, 1877, was \$20,000,000. The amount is far greater than that of all the other coins of the United States. It is, in fact, the imperial coin of the country. It is the one which is most valued and most respected. It is the one which is most valued and most respected. It is the one which is most valued and most respected.

GREATHER THAN THE TELEPHONE.

FARM, GARDEN AND HOUSEHOLD.
A Model Penny Yard.
Looking at the yard of a poultry farmer a few days ago, I was pleased with the neatness of the place. It was the finest I ever saw, but because of the perfect simplicity. As was a man of abundant means, and his place is near a fashionable resort, there was a temptation for a nicer building than other people, but he preferred to set a good example for his poorer neighbors. This building was framed of convenient size for two flocks of about twenty fowls each; boarded outside and inside of the frame with matched boards, and with a very warm inside, even when the air outside was nearly at freezing point. On the inside of the wall a plank was spiked over to go down a foot into the ground, all around the building, which prevented the outside moisture from rising under the building and so the building inside was raised some inches with earth and dry loam, it was at all times a dry place to walk in. As the house was so warm, it was at all times a dry place to walk in. As the house was so warm, it was at all times a dry place to walk in.

FARM, GARDEN AND HOUSEHOLD.
A Model Penny Yard.
Looking at the yard of a poultry farmer a few days ago, I was pleased with the neatness of the place. It was the finest I ever saw, but because of the perfect simplicity. As was a man of abundant means, and his place is near a fashionable resort, there was a temptation for a nicer building than other people, but he preferred to set a good example for his poorer neighbors. This building was framed of convenient size for two flocks of about twenty fowls each; boarded outside and inside of the frame with matched boards, and with a very warm inside, even when the air outside was nearly at freezing point. On the inside of the wall a plank was spiked over to go down a foot into the ground, all around the building, which prevented the outside moisture from rising under the building and so the building inside was raised some inches with earth and dry loam, it was at all times a dry place to walk in. As the house was so warm, it was at all times a dry place to walk in. As the house was so warm, it was at all times a dry place to walk in.

The Years.
Blunt—'I like God's blessing on a silver-haired old man.'
Cousin—'Coming with a glory and a pride, I'll be a man of God's blessing on a silver-haired old man.'

Wardens—'Wardens, white-winged heralds, with a wondrous history, bearing with them gleam and glimmer of the far-off 'Jupiter' sea.'
Betty—'Betty—open our earth-way, bringing treasure all unknown; teaching our little hands to touch the gold of the 'Jupiter' sea.'

Blessed—'Blessed—open our earth-way, bringing treasure all unknown; teaching our little hands to touch the gold of the 'Jupiter' sea.'
