

NOSES OF STATESMEN.

WALTER WELLMAN WRITES ON THIS IMPORTANT SUBJECT.

It has been a man of the Washington Photographic Gallery who has been the first to make a careful and scientific study.

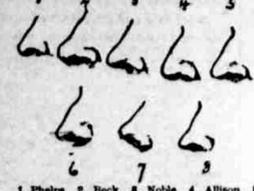

WASHINGTON, Aug. 29.—At Bell's famous photographic gallery in this city an old fellow spends several hours daily closely inspecting the pictures of statesmen, making sketches from them and turning them this way and that toward the light as if he expected to derive some deep physical or psychological study.

1. Everts, 2. Davis, 3. Blaine, 4. Blackburn & Tracy, 5. Quay, 6. Miller (Justice), 7. Don Cameron, 8. Sherman, 9. Blodgett, 10. Cleveland, 11. Porter, 12. Morton, 13. Cullum, 14. Edmunds.

CLASS A. tion of sending him the result of my labors. There is no country in which the nose can be studied to better advantage than in the United States. Here we have all types of noses in the mixture of races and blood, without any all prevailing type to confuse our ideas or set up for us a false standard of character.

CLASS B. "Subdividing this type into minor classes is not so easy. I am free to confess, however, that the greatest nasal organ I have ever seen is that of Senator Everts, which clearly belongs, along with that of Justice Miller's, to that subdivision of Professor Thompson's nose which he terms 'the nose of a statesman'."

1. Phelps, 2. Beck, 3. Noble, 4. Allison, 5. Washburn & Fuller, 7. Ingalls, 8. Callahan.

CLASS C. Ination and penetration, undaunted courage and even temper. Such noses are very rare, and I am sure Professor Thompson will be delighted to have a sketch of so perfect a specimen as Senator Everts'.

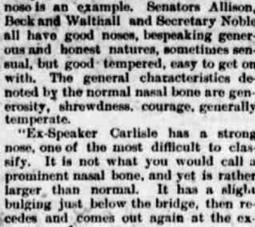

NATIONAL GROUNDS, NORWICH, CONN. ture of lawn and fine sand, sprinkled and rolled until it is almost as hard and smooth as a floor. The grounds have been compared to the billiard table of the great billiard hall, and the game that is played on them, the enthusiasts say, is quite as scientific and acquires quite as much skill to be properly played as billiards.

SHIP SIGNALING AT SEA.

SOMETHING ABOUT THE COMING CONFERENCE AT WASHINGTON.

The Art of Communicating Between Vessels on the Ocean Has Been Brought Down to the Very Fine Point, and It Will Be Still Further Improved.

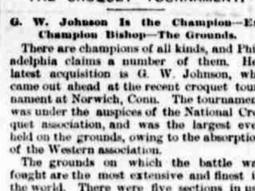

NEW YORK, Aug. 29.—"Practically it is entirely safe to go to sea in a first class steamship today," says Ensign Blow, of the United States hydrographic office, the other day, "excepting for one thing. The danger of fire is substantially done away with, for the appliances are so perfect that with a large crew there is no difficulty in subduing any conflagration that may start. The ships that are built nowadays will outlive any storm, even a hurricane, and there is no danger of a leak from any ordinary leak. The one peril which is not yet avoided is that of collision. Nothing that has yet been contrived enables the most careful navigator to rest free from anxiety on that point."

1. Harrison, 2. Hoar, 3. Attorney General Miller, 4. Windom, 5. Vest, 6. Hisscock.

CLASS C. tremity. Until I have made greater progress in the science I shall not attempt to fix its indications, but will say that it belongs to Professor Thompson's third subdivision in class I and class 2. The first of these is defined as 'zealous, discontented, uncertain, sometimes firm and exacting, decision of character, intellectual, and the second is thus described: 'Though not very symmetrical in shape, this nose usually accompanies a generous and honest nature, rather sensual, but good natured, courageous and true.' It is obvious that it will require the art of a master like Professor Thompson to read the nose of the ex-speaker. In our public life and who certainly has one of the most complex of characters.

"In C the types are more unmistakable than in the one we have just been talking about. The general characteristics indicated by the receding nose are obstinacy, irritability, pugnacity. President Harrison has a good type of this nose. Senator Hisscock has a good deal the same sort of a nose, and it is not a pretty nose, either—not so pretty as you would expect to see upon the face of a senator from New York."

1. Phelps, 2. Beck, 3. Noble, 4. Allison, 5. Washburn & Fuller, 7. Ingalls, 8. Callahan.

CLASS B. Ination and penetration, undaunted courage and even temper. Such noses are very rare, and I am sure Professor Thompson will be delighted to have a sketch of so perfect a specimen as Senator Everts'.
