THE WELLINGTON BANK BORBERY.-At the FINANCIAL & COMMERCIAL.

MCHOAT EVENUES, Sept. 11, 1865, Money circles here continue firm and close, and Bankers report to essential change from the con-dition as stated by us for a w-sk pust. The demand for currency accommodations is not so press-ing as was shown during the earlier part of last week, but the duliness pervading commercial cir-ties keeps down the balances of this class of depos liors, whi o the large amount of measy employed in Eastern purchases by Dry Gonds, Boot and Shos and Grossy houses, is not yet being returned, and homes the market finds no material case in supply from the reduced demand. It is probable, he over, that this situation will soon be reserved, as the money sevanced to farmers upon produce will begin to find its way into the interior Banks, who will renew their balances with the city Banks, while the Dry Goods dealers and others, who have about completed their purchases Kast, will soon begin to realing upon their fall stocks, and replace their loss and balances. The deposit line with the Banks was probably never lower than at present, and it is probable the turning point is about reached. Exchange remains heavy at the old rates of ½ disecuat buying and par solling.
In Cincinuati the supply of currency is reported

ample for all legitimate purposes, but there is no mar, in for an extension b-youd. The demand from resular sources is only moderate Exchange from at 50g75 premium buying and 1-10 premium sell-Gold continues stoody, and outside of the regular customs domand there seems to be no especial re-quest for it. This, however, continues so strong as to maintain procession, and but for the curb held upon the market by the liability of the Govern-

ment becoming at any time a seller of coin, the price would undoubtedly materially advance. Fo long as the customs demand continues as at pres-ent, the value of gold comon permanently decline, but after this much the wants of importers willbe largely reduced, and a fall to 140, or perhaps loss, will not be an imp obable event. The closing price to day was 141%.
In our general markets we are still compelled to report Etradarest dell. Some of our city militars represent a good trade with them in Flour, but in the aggregate there was sourcely ever less doing, the demand being a m at raclusively from the interior and least assume or two of the city military advanced their prices to day 16 % bbl, the others maintainers the old forces. maintaining the old figures, and we quote the range as thes made. There was no movement in Wheat to-day that we could hear of, and we were mable I fo reviving Tonic is required in such cases, as cancer ion from the prices of Saturday to effect that the dying fisme of an empty ismp requires to sales, but there were no buyers laquiring.
