THURSDAY, SEPT. 19, 1907.

ANNOUNCEMENTS.

We are authorized to announce the
name of E. R. Fouts as a candidate
for City Treasurer, subject to the Re-
publican primary election.

**CALL FOR
City Republican Convention.**

The Republican electors of the city
of Greenville, Ohio, are hereby called
to meet in mass convention at the City
Hall, in Greenville, O., on Wednes-
day, September 25, 1907, between the
hours of 4 p. m. and 8 p. m., for the
purpose of selecting the following candi-
dates to be voted for at the coming
November election:

One candidate for Mayor
One candidate for President of City
Council
One candidate for City Auditor.
One candidate for City Treasurer.
One candidate for City Solicitor.
Two candidates for Cemetery Trustee
Three candidates for Board of Pub-
lic Service.
Three candidates for Councilmen at
Large.

The names of the prospective candi-
dates shall be handed to the Secretary
of the Committee not later than Sat-
urday, September 21, at 6 p. m., and
the names of all the candidates will be
printed on one ticket under the direc-
tion of said committee.

The three candidates for Board of
Public Service receiving the highest
number of votes shall be declared the
nominees; and the three candidates for
Councilmen at Large receiving the
highest number of votes shall be de-
clared the nominees.

By order of the Republican City
Committee.

N. H. WRIGHT, Chairman.
ADELBERT MARTZ, Secretary.

Chief Pleasant Porter died re-
cently, but he left a long line of
progeny. You will find one on
every Pullman car—if you tip him
liberally.

A Wall Street paper has an-
nounced that "Money is easier".
We have noticed that with our
own money. It seems easier for
other people to separate us from it.

"Secretary Cortelyou is dis-
tributing the public funds a-
mong the national banks," says
an exchange. Wish we could
give a good imitation of a na-
tional bank when the Secretary
passes our way.

All of the would-be presiden-
tial candidates are finding politi-
cians to give interviews to the
press declaring that they will be
the candidate of the next nation-
al convention, but a majority of
political prophets seem to have
decided that Secretary Taft will
be the Republican and William
J. Bryan the Democratic nomi-
nee.

There are many indications
that the Philippine tariff will
constitute the most important is-
sue in the coming session of Con-
gress. This measure passed the
House last session, but was killed
in a Senate committee. The Presi-
dent is an earnest advocate of
the measure, as are Secretary
Taft, Representative John Dal-
zell, Speaker Cannon, and other
influential Republicans.

A good many people are indulg-
ing in much speculation as to
the future of Theodore Roose-
velt after he leaves the White
House. Some suggest that he be
made Governor of the Philip-
pines, others that he become
president of Harvard, others that
he become manager of a big met-
ropolitan newspaper, and so on.
But all these seem to overlook
the fact that the President has
very clearly indicated to his
friends, at least, that he knows
precisely what he wants to do,
and that is to come to the Senate
as [Senator from New York.
There is some question as to
whether Mr. Roosevelt can ac-
hieve his ambition, and some of
the political wisecracks of the Em-
pire State say he cannot, but once
it becomes known among the
rank and file of New York Re-
publicans that such is the Presi-
dent's ambition, accurate prog-
nostication will be easier. Sena-
tor Platt's term in the Senate ex-
pires on the same day that Presi-
dent Roosevelt leaves the White
House, and it would be the occa-
sion of the utmost gratification to
Mr. Roosevelt if he could drive
down Pennsylvania avenue to the
Capitol and take the oath of office
as a Senator without a moment's
interim in his public career.

The recent attack on Japanese
in British Columbia constitutes
an interesting event to lookers on
in the United States. There is
even more reason why British
subjects should treat the Japa-
nese with consideration than
should American citizens, for Ja-
pan and Great Britain are allies,
having entered into an offensive
and defensive alliance. What
the effect on Japan of the recent
riots will be cannot be foreseen,
but it is difficult not to regard
the situation with some degree
of complacency, especially as the
British press was singularly
frank in its criticism of this gov-
ernment when the San Francisco
riots occurred. Some of the Brit-
ish newspapers went so far as to
speak slightly of a govern-
ment which could not control its
own states, and now they have
the opportunity to contemplate
their own government unable to
control its own colonies. In Brit-
ish Columbia the cause of the
trouble is the same as in Califor-
nia, fear of the competition of
Japanese labor. If the British
should be compelled to sanction
the adoption of Canada and Brit-
ish Columbia of a Japanese ex-
clusion law, the home govern-
ment would, perhaps, realize that
the United States had done the
best it could, and been as friendly
to Japan as circumstances would
permit, in the face of a difficult
situation.

The silly talk of the visit of the
Atlantic naval fleet to the Pacific
constituting a menace and an af-
front to Japan is pretty effect-
ually set at rest by Ambassador
Aoki's announcement that if the
fleet, on its return trip, will visit
Japan it will go far to cement the
friendly relations of the two na-
tions. No plans have been made
for the return of the fleet as yet,
but there is food for thought in
the Ambassador's suggestion.
The jingo party in Japan is the
minority party which has sought
to utilize false stories of the
treatment of Japanese in the U-
nited States to make trouble for
the party in power. The men
who govern Japan have never
entertained any but the most
friendly relations toward the U-
nited States. The people, some
of them at least, have been suf-
fering from insufferable conceit
because of their victory over Rus-
sia, and it has made them too
ready to pick a quarrel. These
jingoos are the same people who

insisted that the peace of Ports-
mouth was a disgraceful surren-
der on the part of the Japanese,
for they were wholly ignorant of
the fact that the Japanese treas-
ury was empty and that Japan
could not have fought another
two months. They have not yet
realized the predicament of their
government, nor do they appre-
ciate the extent of Japan's pres-
ent indebtedness. To such peo-
ple as these the sight of the U-
nited States' great naval fleet
might prove a most salutary les-
son, and would doubtless go far
toward assisting the governing
body in its counsels of modera-
tion and peace.

Symptoms of Heart Trouble.

Is the skin blue?
Are the lips pale?
Is your step uncertain?
Is your pulse irregular?
Are the finger nails blue?
Do you have palpitation?
Are your ankles swollen?
Is there shortness of breath?
Do you have falling sickness?
Is there pain under left nipple?
Is there a feeling of suffocation?
Is action of the heart retarded?
Do you have pain around the heart?
Do you have neuralgia around the heart?
Do you have a dizzy sensation in the head?
Is the pulse slow, strong, rapid or weak?

If you have all or part of these sym-
ptoms you are suffering with heart
trouble and should consult a specialist at
once. Dr. Kutchin, a first-class spec-
ialist, visits your county every month.

Consultation, examination and ad-
vice free. Dr. Kutchin's next visit to
Greenville, O., will be on Thursday,
September 26, at the Turpen House.

SOME DAIRY NOTES.

**The Best Way to Get Good Cows—Al-
falfa and Soy Beans.**

At a farmers' institute which I at-
tended some one asked, "Which is the
better way to get good cows, buy them
or raise them?" says a writer in Na-
tional Stockman and Farmer. The an-
swer was: "Raise them. Buying cows
is a lottery. No one wants to sell his
best cows except at a fancy price, and
paying fancy prices for common cows
is not in the line of business dairying."
A farmer asked the dairy expert how
he kept his herd of grade Holsteins
up so that the milk would test as high
as required by law. He answered by
testing and culling out the poor ones,
adding that the butcher was a great
help in profitable dairying.

Some one asked if a milking machine
is profitable for a dairy of fifteen to
twenty cows. The expert said he
could not recommend them, and the
cost was too great for a small dairy.

Another farmer asked about the
cheapest form of protein on the market.
The answer was that if a man has the
ration and lacks protein only the cheap-
est way to get it is to buy cottonseed
meal. It has four times as much pro-
tein as cornmeal.

One farmer had been growing alfalfa
and soy beans. He told of his methods
and the results, saying in substance
that the soil for alfalfa must be taken
drained and care should be taken to
procure pure seed. He had made three
cuttings in a season, this within ten
miles of the St. Lawrence river. He
said that where a farmer's land was
not adapted to alfalfa he could plant
soy beans with his corn and put them
both into the silo.

By raising either alfalfa or soy beans
the farmer would secure a supply of
protein at less cost and more of it
from the same land than by growing
any other crop. Cows give more milk
when fed alfalfa than when fed red
clover hay.

The expert added that a farmer
would get more fats or carbohydrates
from the same land with alfalfa than
with any other crop.

The Flavor in Butter.

Pure butter—that is, pure butter fat
—has no "high flavor." It has a very
faint flavor, if any at all. Butter con-
tains some casein and whey, and they
impart to it some of their distinctive
flavor, but even these substances if
clean have no "high flavor." It is
morally certain that any very pro-
nounced flavor in butter indicates the
presence of some nonbutter matter.
The real flavor of milk, cream and
pure, fresh butter is very faint, says
the Farmers Advocate, so faint that
the majority of persons are not able to
perceive it.

Cause of Cheesy Butter.

Cheesy butter is said by the Kansas
experiment station to be due, first, to
the curdling of cream, either sweet or
sour, and, second, to a milky body. A
milky body is due, first, to butter milk
not separated from the butter or but-
ter not thoroughly washed, and, second,
to butter made from rosy cream.

THE VETERINARY.

The care of the teats should always
be observed by the milker, and when
they get hard and rough they should
be anointed with vaseline, as cracked
teats are an annoyance to the milker,
hurtful to the cow and have a ten-
dency to lessen the flow of milk. Long
finger nails are also a discomfite to

the cow, and the milker should keep
them well pared to avoid trouble.

Deranged Udder.

A cow will sometimes give thick
milk from one quarter of her udder.
This trouble is caused by a deranged
condition of the glands. Rub the quar-
ter well after each milking with a lit-
tle soap liniment.

Treatment for Indigestion.

A. E. C.'s cow died, and on being
opened a quantity of undigested hay
was found impacted in the narrow
part of the fourth stomach, so that
nothing could pass into the intestines.
The treatment, says Dr. Michener in
Farm Journal, should have been one
and one-half pounds of epsom salts,
two drams of fluid extract of belladonna
and one dram of fluid extract of
sax vomica at one dose.

Remedy For Caked Udder.

Give the cow one and one-half
pounds of epsom salts and one ounce of
ginger dissolved in water at one dose;
also mix two drams of iodine with
two ounces of vaseline and rub a lit-
tle of this on the affected part once
a day until the skin becomes tender.
If the hardening should again appear,
apply more of the ointment, and so on
until the udder becomes healthy.

Cure For Leaky Teat.

For a cow with a leaky teat get 5
cents' worth of colloidion and, after
each milking, dry the teat and touch a
drop of the colloidion to the orifice
where the milk will presently be leak-
ing out. It dries almost instantly
and draws the opening together, so
that no milk can escape. Some put
a rubber band about the teat and
claim that in time the weakness is
overcome.

Warts on Cows' Teats.

Smear the fingers with castor oil and
draw the teats through the fingers
for a few weeks. Rub the udder with
a little of the oil so that it will run
down the teats. It is said the warts
will disappear without any pain or
sore such as is caused by burning of
the teats by any of the harsher meth-
ods. This has been tried by many per-
sons, and they all report perfect suc-
cess in removing the warts if the treat-
ment is persevered in long enough.
Perhaps castor oil is no better than
any other grease.

CHOICE MISCELLANY

During an Attack.

Owing to the small caliber of the bul-
lets used during the Russo-Japanese
war many soldiers did not know that
they had been struck by them until the
frenzy of an attack had passed. Dur-
ing the battle of Mukden a company of
Japanese infantry, of a strength of
ninety men, attacked a Russian party
holding the opposite bank of the river.
The attack was carried through with
great spirit until the Japanese arrived

under the river bank, when the Rus-
sians evacuated the position, evidently
believing that their fire had been with-
out any effect.

It was only then that forty out of the
ninety Japanese discovered that they
had been wounded during the advance.
The company commander only made
the same discovery in his own case by
seeing the water of the river reddened
by his blood. There was apparent no
physical effect of the wounds so long
as the men had been sustained by the
fury and excitement of the advance.

But on seeing that they were wound-
ed all, from the officer downward, ex-
perienced the moral effect of their
injuries and all at once felt they could
advance no farther.—Chicago News.

FOR THE LITTLE ONES.

Blank and Ladder is a Lively Game to
Play Outdoors.

Blank and ladder is similar to the
familiar game of hi spy. A boy is
selected by the following counting out
rhyme:

"In came a little man with a white hat;
If you want a pretty girl, take that;
Take your choice of one, two, three;
If you want a pretty girl, pray take she."

Lad after lad being successively
excluded, the last one remaining is
"it." The others hide themselves
when "it" calls out, "Blank and
ladder!"

The searcher may summon the
fugitives to indicate their where-
abouts.

"Hello if you're far off; whistle
if you're nigh."

In Portland, Me., the shout of the
concealed party is, "Blank, blank,
Cornelia!" and in the western part
of the state of New York, "Blan-
calio!"

The searcher on discovering one
of the hidden players calls, "Hi
spy!" and tries to touch the latter
before he can reach goal, the rule
being that

Elbow and knee
Always go free.

PATENTS

Copyrights and Trade-Marks obtained, and all
patent business conducted for the Inventor.

Our Office is Opposite U. S. Patent Office,
and we can secure patent in less time than those
remote from Washington.

Send model, drawing or photo, with descrip-
tion. We advise, if patentable—no fee, free of
charge. Our fee not due till patent is secured.
A Pamphlet, "How to Obtain Patents," with
names of inventors in your line, e. county, or
town, sent free. Address,

C. A. SNOW & CO.
Opposite Patent Office, Washington, D. C.

DR. KUTCHIN
EX. U. S. EXAMINING SURGEON,
Specialist for the Treatment and Cure of all Long-Standing and Difficult Chronic Diseases
and Diseases of the Blood and Nervous System.

Will meet his many patients in this county every month for the next year, and
examine all afflicted free. Ohio office, Columbus, Ohio.

Dr. Kutchin has been visiting this County every four weeks for fifteen years.

This well known
Specialist in the
Treatment of all
Chronic Diseases
has consented to
visit this county
and meet his many
patients and
friends, and give
ALL AFFLICTED
opportunities to
consult him free of
charge, and to re-
ceive the latest
and best treat-
ment for such
diseases as the
regular family
physician is not
prepared to treat.

Dr. Kutchin will
visit this county
every month, thus
saving his pa-
tients the trouble
and expense of
visiting the city.
He is the only
physician in
this county who
carries his own
Diagrams to illus-
trate and make
plain to all af-
flicted the cause
of their disease.
He promptly visits
his own every
four weeks and
will continue
as long as God
spires him to the
afflicted.

CHRONIC DISEASES.

The Doctor treats no acute diseases, but makes a specialty of chronic and long-
standing diseases. Cases given up by other doctors and pronounced incurable he most
desires to see. Dr. Kutchin has treated many cases in Ohio in the last fifteen years,
many of which have been given up as incurable, some to be blind, others deaf, and
a Large Number to be Invalids for Life. Now they See and Hear, and many
are on the high road to Health.

The Doctor is surrounded with a fine collection of instruments for examining and
treating all chronic diseases of the Head, Face, Eye, Ear, Throat, Heart, Lungs,
Stomach, Liver, Kidney, Brain and Nervous System, Cancer, Tumors,
Gout, Piles, Swellings, Old Sores, Fits, Paralysis, Neuralgia, Rheumatism, Dropsy,
Gout, Sick Headache, Debility, Depression of Spirits, Diseases of Children, Hereditary
Diseases, etc., and, in fact, all long-standing and chronic diseases. All
surgical operations performed.

Whenever it is known that Dr. Kutchin is stopping at a place, many earnest
hills, and it is not to be wondered at when it is remembered that in diagnosing a
disease he describes the different diseases better than the sick can themselves. It is a
wonderful gift for anyone to possess, and Dr. Kutchin's diagnostic powers
have created wonder.

The following plan, which is peculiar to the large hospitals, and is not
and never has been the practice of country doctors, viz: he carefully notes the sym-
ptoms of the patient and ascertains the condition of the internal organs, all of which
he carefully records in his register for future reference. In this way he ascertains the
true nature of the disease and its cause. When sick people consult him, he readily
tells them whether he can cure or help them, or whether they are beyond hope.

HIS IMPROVED METHODS OF TREATMENT

Are mild and pleasant, agree perfectly with the most delicate Lady or Child, do not
reduce strength; can be used while at work and give the greatest possible benefit in
the shortest possible time. Patients can consult him or communicate with him as
often as they choose, during the whole time required for the cure, without regard to
where they may be, and without extra charge, thus rendering his services as suc-
cessful and satisfactory as though they were living next door to each other.

DISEASES OF WOMEN.

Such as have baffled the skill of other physicians and remedies. Dr. Kutchin
quickly cures Cancer, Tumors, Fibroid and Polyroid. Growths cured without the
use of the knife. No cutting, no pain, no danger.

A LIFE OF EXPERIENCE.

The Doctor has had a whole life of study and experience in his profession, and
enjoys advantages which fall to the lot of but few! After attending his Fall Courses
in the Medical College and graduating with the highest honors, he was not
content to stop there, but has since attended other Colleges, and several times re-
viewed the whole profession; has also traveled extensively for the purpose of improv-
ing his methods, and visiting the best Medical Colleges, Hospitals, Dispensaries, Eye,
Lung and other Medical and Surgical Institutions of Europe, improving every ad-
vantage within his command, and devoting the best-years of his life to become thor-
oughly familiar with his profession in all its branches.

LATEST DISCOVERIES AND IMPROVEMENTS.

There are many diseases which physicians in common practice do not usually treat
and are therefore seldom prepared with necessary and costly outfit to examine cor-
rectly, or treat with success. Such cases, therefore, would do well to call at once and
learn the true condition, and whether the doors of hope are yet open, or forever
closed against them.

DELAY IS DANGEROUS.

Are you afflicted? Your case may now be perfectly curable, but remember,
every moment of neglect brings you nearer its incurable stage, when, perhaps, the
most skillful physician can render you no assistance. The present is ours, the future
may be too late.

Free Examination of the Urine.—Each person applying for medical treat-
ment should send or bring 5 to 10 ounces of urine, which will receive a careful exami-
nation. Persons unwillingly treated by ignorant pretenders who keep
writing them month after month, giving poisonous and injurious compounds,
should call and see the Doctor.

Free Cases and correspondence confidential. Treatment sent C. O. D. to any part of
the United States. Correspondence with invisible solicited. All letters with stamps
enclosed answered free.

Call and be examined and at least learn the cause of your disease, and if it can be
cured. These Urines removed in from three to five hours without surgery. The
remedies for the whole course of treatment are furnished from the Office, all at once
or by the month.

America's Greatest Weekly.

THE Toledo Blade
Toledo, Ohio.

The Best Known Newspaper in the
United States.
Circulation 180,000
Popular in Every State.

In many respects the Toledo Blade is the
most remarkable weekly newspaper pub-
lished in the United States. It is the only
newspaper especially edited for National
circulation. It has had the largest circula-
tion for more years than any newspaper
printed in America. Furthermore, it is the
cheapest newspaper in the world, as will be
explained to any person who will write us
for terms. The News of the World so ar-
ranged that busy people can more easily
comprehend, than by reading cumbersome
columns of dailies. All current topics make
plain in each issue with special editorial mat-
ter written from inception down to date.
The only paper published especially for
people who do or do not read daily newspa-
pers, and yet desire for plain facts. That
this kind of a newspaper is popular, is pro-
ven by the fact that the Weekly Blade now
has over 180,000 yearly subscribers, and is
circulated in all parts of the U. S. In ad-
dition to the news, the Blade publishes short
and serial stories, and many departments of
matter suited to every member of the fam-
ily. Only one dollar a year. Write for free
specimen copy. Address
