

ELLINWOOD.

From the Advocate.

Next Sunday evening opens a protracted meeting at district No. 52, to be continued until every sinner in that district is converted.

Miss Francis Robinson left Monday morning for a visit among relatives in Mansfield, Ohio. Her father and brother accompanied her as far as Chicago.

J. H. Campbell brought in a branch of a sand hill plum tree holding good sized plums of second growth; they were just ripening. The limb was well filled, as thick as they usually are on first crop.

Harvey Scott is married. Was married Monday of last week and no one seemed to "catch on" until last Monday. We immediately proceeded to single Harvey out of the crowd and asked if it were so. He says, "That's what they say." The bride is Mrs. Neva West, age 32, daughter of A. G. Shoemaker, a prominent and wealthy citizen of Paola, Kansas. They were married at Kansas City, Kansas, by Probate Judge Alder, on Monday, Oct. 11th.

From the Leader.

The combined deposits of the three banks in the east end of Barton county aggregate over three hundred thousand dollars. Not bad for "bleeding Kansas."

The marriage of Jacob Gales and Ella Koet of this vicinity, is announced to take place at the Catholic church, this city, on Thursday, Oct. 28. The many friends of this young couple predict for them a happy married career.

W. B. Pickerill has bought the old Reif building just south of the Hardware store and is moving it onto his lots for a residence.

Mrs. Chatten and children arrived home Sunday evening from an extended visit with relatives and friends in eastern Kansas.

While moving a piano from Geo. Dotter's home to the house of John Weltmer last Friday evening, Will Schroeder received quite a bruise on the left foot by the piano falling on it.

Sam Stover, who has been delving into the bowels of Mother earth for the past year or two in Colorado came home Sunday morning for a visit. He says when he left, there was a foot of snow on the ground and still snowing.

Thieves broke into Stover's store last Friday night and stole considerable goods. Who the perpetrators were is not known, but it is safe to say that if it is attempted again some one is liable to crawl away with a load of buck shot in his anatomy.

School is progressing nicely now. The new books kicked a little at first, but where didn't they? Some few in the district were not aware of the new adoption and thought it all the teacher's fault. They know better now I suppose.

A RARE DISCOVERY.

A Real Mine of Surgical Treasure-Trove in Switzerland.

Our knowledge of the medicomilitary organization of ancient Rome owes not a few of its most distinctive details to Switzerland. Windisch, for example, the Vinodissa of antiquity, has proved to the Swiss archaeologist a real mine of surgical treasure-trove, lying as it does at the junction of the Aare and the Reuss, and commanding on the one side the two Italian highways (from the Great St. Bernard and from Como) and on the other the communications with the Rhine and Danube. Here was found the celebrated monument with inscription to Tiberius Claudius Hymnus, surgeon of the Twenty-first legion. Here, too, have been unearthed medicine chests, instrument cases, with pincers, scalpels, needles, catheters and such like in fine preservation.

Dr. Conrad Brunner, of Zurich, has based on these discoveries a highly interesting monograph, and the enthusiasm he has awakened in the medical branch of archaeological research bids fair to fructify in even more precious discoveries. Not long ago there was discovered at Badenim-Aargau a Roman house containing 14 apartments, varying in size, and with walls painted with designs of the highest interest for the classical scholar. When exposed to light of day there appeared about the structure a number of fibulae and vases, and in the apartments themselves, such a quantity of surgical instruments as to favor the conclusion that the house was neither more nor less than a hospital.

This is in many respects a novelty in medical archaeology. We have very clear notions as to what the valetudinaria or infirmaries for slaves on patrician estates were like; but a building for the wounded or ailing Roman soldier presents points of interest, as hitherto no such buildings have been found in their integrity. Moreover, when we add that never either in Switzerland or in any other scene of Roman military occupation has there been found so large an assortment of surgical instruments as in this newly discovered hospital near Baden, we have said enough to awaken scholarly and professional curiosity in the spot, and to lend additional attraction to the picturesque "Kurort," known since the first century A. D. on the banks of the Limmat.—Lancet.

A Horse's Teeth.

Every horse has six teeth above and below. Before three years of age he sheds his middle teeth; at three he sheds one more on either side of the central teeth; at four he sheds the two corner and last of the fore teeth. Between four and five the horse cuts the under tusks; at five will cut the upper tusks, at which time his mouth will be complete. At six years the grooves and hollows begin to fill up a little; at seven the grooves will be well-nigh filled up, except the corner teeth, leaving little brown spots where the dark-brown hollows formerly were. At eight the whole of the hollows and grooves are filled up. At nine there is very often seen a small bill to the outside corner teeth, the point of the tusk is worn off, and the part that was concave begins to fill up and become rounding; the squares of the central teeth begin to disappear, and the gums leave them small and narrow at the top.
