

WOMAN SUFFRAGE.

Close of the National Association at Tampa—The Platform and Officers.

TOPEKA, Oct. 23.—Yesterday, the third and last day of the National Woman's Suffrage Association, was one full of comfort to the members in the interest manifest, both in attention and attendance.

First—The American Woman's Suffrage Association, at its eleventh annual meeting, demands the ballot for women, not as a privilege or an expedient, but as the inalienable right of every citizen.

Second—The establishment of a representative government based upon universal suffrage being superior to all other issues, this association declares that the right of suffrage to women is the first and foremost of all political questions.

Third—The United States Congress has decided that "women are citizens and may be made voters by appropriate State legislation," a demand which is made by the National Association.

Fourth—In support of our demand we present to the attention of the nation the mutual regard and esteem of each sex for the other. We believe that a government of men and women, and that the equal co-operation of the sexes is essential to a happy home and a nation of peace and justice.

THE INDIANS. Annual Report of Commissioner Atkins—His Ideas as to What should be Done With the Red Man.

WASHINGTON, Oct. 23.—The Commissioner of Indian Affairs, J. D. C. Atkins, has just completed his annual report. He begins by calling attention to the unpalatable evidence of progress made by many of the tribes, and says: "The excellent temper, subordination and general amity which will be seen in the reports, have everywhere prevailed as a result of a most auspicious course of progress."

Considerable space is devoted to a discussion of the condition and future of the five civilized tribes in the Indian Territory. Referring to the attempts of boomers to encroach upon their reservation the Commissioner says: "It is not reasonable to expect that the Government will never tire of increasing its efforts to bring the Indians to a state of civilization."

After speaking of the failure of the Indians to sympathize with the Government in its effort to promote the taking up of allotments of land, Commissioner Atkins says that the best way for the Indians to divide their lands in severalty, allotting 160 acres to each head of a family, and 80 acres to each minor child.

The Commissioner expresses his conviction that the proposition to throw open Oklahoma to white settlement would be an experiment dangerous to all concerned. It is therefore recommended as a preliminary step to appropriate authority the department to appoint a commission to visit the Cheyennes and Arapahoes, and ascertain their views with reference to the subject of removal of land.

WASHINGTON, Oct. 23.—The Indian Bureau is a little skeptical over the alleged magnificent offer about to be made by a New York syndicate to the Cherokee for their lands in the Indian Territory. An official said today: "Three dollars per acre would certainly be a magnificent price for those lands, but I can not conceive that any firm would want such a quantity of land of one kind in one locality as 6,000,000 acres. My private opinion is that this story is a sensation lately put up by the Cherokees themselves to induce the Government to buy their lands at an early day for public use."

REPEATERS INDICTED. PLYMOUTH, Mass., Oct. 23.—In the Superior Court yesterday the grand jury reported an indictment against Peter McGee, of Lynn, and William P. Keefe, of Salem, for conspiracy against the firm of Charles Harrington & Co. This is a well-known boycotting case, in which the defendants, representing the State organization of the Knights of Labor, came to Plymouth and ordered out the men from the boot and shoe factory of Francis F. Emery, until he agreed not to use Harrington's leather. The case is the first one of the kind in the New England States.

FOREIGN MAILS.

The Superintendent of the Foreign Mail Service makes his Annual Report.

WASHINGTON, Oct. 27.—Hon. Nicholas Bell, Superintendent of Foreign Mails, has submitted his annual report to the Postmaster General, showing the operations of that office during the last fiscal year, which he says has been characterized by a great deal of discussion relative to compensating American steamship companies for the conveyance of the United States mails to foreign countries.

The American steamship companies declined to convey the mails after August 1, 1888, for the whole amount of sea and inland postage upon the ground of inadequate compensation, but Congress having failed to increase the rate of pay, the companies have all tendered their ships, and such of them as can be used to advantage for expediting the mails have been accepted.

The total weight of letters dispatched to foreign countries by sea was 500,197 pounds and of papers 2,367,538 pounds. The estimated total number of letters carried by the foreign mails was 37,002,883 and 30,465,547 were received, and 47,049,064 newspapers were sent and 28,700,000 received.

The cost of the sea transportation service during the year was \$257,445, as against \$231,903 last year. The estimates for the service next year are as follows: For transportation of mails, calculated on the basis of paying the full sea and inland postage to the United States, \$440,000; balances due foreign countries, \$100,000; total, \$540,000.

There are forty millions of people in the world who use opium alone, and there are also millions who use it in connection with other habits, such as drinking alcohol, and using tobacco. The habit of using opium is a very ancient one, and is now being revived in many parts of the world.

WASHINGTON, Oct. 27.—The President has directed the suspension of M. E. Benton, United States attorney for the Western district of Missouri, and of William A. Stone, United States attorney for the Western district of Pennsylvania.

DANGEROUS DRUGS.

How to Control Effectively All Such Harmful Habits.

A gentleman who has spent the summer abroad, and who reports that the thing which impressed him most of all was the absence of any habit of smoking alcohol and the little anxiety the people display in the conduct of business affairs.

"I have always been advertising extensively," says Mr. Warner, "and I have always heretofore closed our laboratory during July, August and September, but this summer we have kept it running day and night to supply the demand which has been three times greater than ever before in our history."

AN HISTORIC CANE.

A Newspaper Man Carries a Piece of the Old Frigate Constitution.

"Do you see that stick," said Mr. A. P. Cunningham, of the National Republican, as he held out a plain brown walking-stick for inspection. "Well, that stick is historical. Did you ever hear of the United States frigate Constitution? That cane is made from one of the original pieces of that vessel, which was built in 1775 by subscription from the women of Boston and Massachusetts."

"I have always been advertising extensively," says Mr. Warner, "and I have always heretofore closed our laboratory during July, August and September, but this summer we have kept it running day and night to supply the demand which has been three times greater than ever before in our history."
