LOWELL NEWS.

BY "ANON."

Thomas Smith of Timber Hill preached here Sunday. -o- Ira Kellogg lectured on "Mortgage and Usury" Tuesday evening. -o- Rev. Rorick of Columbus, county lecturer of the Farmers' Alliance, will lecture here next Thursday evening. -o- J. H. Morgan attended court this week. -o- F. M. Fulkerson went to Labette county Wednesday to buy wheat. -o- Mr. Simmons has bought the Harris property and moved into it. -o- F. S. Rounsavell went to Joplin Wednesday and brought back a load of goods. -o- Allen Dunbar was the guest of his aunt, Mrs. Morgan, Sunday. -o- Ark. Vickers took three couple of our young people to Lostine Saturday evening to the exhibition. -o- We understand Joshua Cox has bought a half interest in the Lowell mill and will take possession June 20. -o- Gottlieb Gester, a former resident of this city, now of Indian Springs, visited friends here this week. -o- Miss Grace Leggett came home sick with a cold Wednesday; her sister Blanche is teaching in her place. -o- Subject for prayer meeting Wednesday evening, "Seeking and Finding."

Epoch.

The transition from long, lingering and painful sickness to robust health marks an epoch in the life of the individual. Such a remarkable event is treasured in the memory and the agency whereby the good health is attained is gratefully blessed. Hence it is that so much is heard in praise of Electric Bitters. So many feel they owe their restoration to health to the use of the Great Alternative and Tonic. If you are troubled with any disease of kidneys, liver or stomach, of long or short standing you will surely find relief by use of Electric Bitters. Sold at 50c and \$1 per bottle at all Drug Stores.

Pig Feeding.

Gov. Hoard is reported as saying: There is a principle in feeding which we ought all to understand. At my creamery in Fort Atkinson we made some experiments in pig feeding, with a view of determining where the greatest points of profitable feeding were. We knew there was a principle in the business if we could get at it. We found that a well-fed pig at 50 pounds had reached its highest point of assimilation—the production of the most growth for the food consumed. To add the next 50 pounds required 10 per cent more food than to produce the first 50 pounds. The third 50 pounds took 17 per cent more than the first, and to add the fourth 50 pounds, bringing the hog to the 200-pound point, required 24 per cent more food, while to increase the weight from the 200 to the 300-pound point took from 34 to 44 per cent more food to produce a pound of gain than was required to make the first 50 pounds. This is where the food of support came in. Before any additional gain could be made at any stage the growth already made must be sustained. It has been clearly demonstrated that it requires proper food to the extent of 2 per cent of the live weight of an animal to sustain it, or two pounds of food to each 100 pounds of the animal's weight. Hence when a hog weighs 299 pounds it must have six pounds of food—food of support—to maintain that weight before the next pound can be added, and if it fails to get the six pounds of food it may lose a pound in weight and there will be two pounds to make before the 300-pound point is reached. This illustrates the importance of feeding for early maturity and selling hogs when they weigh from 150 to 200 pounds. It is a common practice all over the country to keep hogs until they are about fourteen months old and then feed and fit them for market. In my judgment the 150 pounds which they generally weigh at fourteen months, as ordinarily fed, has cost 5 cents a pound, and I fail to see what profit there can be in the hog when the next 150 pounds have been added.

The Pulpit and the Stage.

Rev. F. M. Shroul, Pastor United Brethren Church, Blue Mound, Kan., says: "I feel it my duty to tell what wonders Dr King's New Discovery has done for me. My lungs were badly diseased, and my parishioners thought I could live only a few weeks. I took five bottles of Dr King's New Discovery and am sound and well, gaining 26 lbs. in weight." Arthur Love, manager Love's Funny Folks Combination, writes: "After a thorough trial and convincing evidence, I am confident Dr. King's New Discovery for Consumption, beats 'em all, and cures when everything else fails. The greatest kindness I can do my many thousand friends is to urge them to try it." Ten-cent trial bottles at all Drug Stores. Regular sizes 50c. and \$1.00.

The cards are out announcing the program for the sixth annual commencement exercises of the Baxter Springs high school. William C. Martin and Miss Cynthia M. Pointer comprise the class of '90 and they will receive bouquets and other congratulatory manifestations on the evening of April 29. See program elsewhere.

In the Spring Months
Nature should be assisted when the system is changing from the full habit of the winter months to the lighter diet of the warm season. Nothing does this as well as S. S. S. It stimulates the sluggish blood and rids the system of heaviness and the feeling of languor. If there is poison in the blood it generally shows itself in the spring; and this is the season to help nature drive it out and be cured. S. S. S. beautifies the skin and makes the complexion rosy and healthy. S. S. S. gives elasticity to the step and buoyant spirits. S. S. S. makes the feeble and delicate strong and robust. S. S. S. is a tonic to the whole body and increases vitality. S. S. S. is a simple vegetable medicine, harmless to the most delicate, yet so powerful as to cleanse the system of all impurities. Treatise on Blood and Skin Diseases mailed free.

SWIFT SPECIFIC CO.,
Atlanta, Ga.

IRL E. HICKS' WEATHER PROPHECY.
The following taken from the "storm chart" for 1890 of Rev. Irl E. Hicks of St. Louis will prove interesting to many. Here are his predictions for APRIL.

April will open with softening temperature and showers—perhaps snow-squalls north. The first regular storm period for the month will be from the 5th to the 10th. The electric power of Venus, with the vernal equinox still in force, is almost sure to excite storms of rain, hail and thunder. About the 6th, 7th, 8th and 9th rapid fluctuations from warm to freezing will occur. About the 13th expect reactionary storms. From the 18th to 22nd April showers with some very hard rain storms are very probable. Watch the 19th, 20th and 21st and be prepared for the cold and frost that will follow in the track of the storms. Minor storms may be expected on the 25th and 26th. A regular storm period begins on the 29th and runs into May. Active storms will be in motion in the west on the 30th.

There is more catarrh in this section of the country than all other diseases put together and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies and by constantly failing to cure with local treatment pronounced it incurable. Science has proven catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly upon the blood and mucus surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address F. J. CHENEY & Co., proprs., Toledo, O. Sold by druggists, 75c per bottle.

Kansas City Globe: It is somewhat remarkable that in view of the wonderful strides that have been made in the manufacture of iron and steel rails on both sides of the Atlantic during the last twenty years, and the vast amount of iron ore within easy reach, that there is to-day, a scarcity of pig iron in the principal markets of the world, and that the demand for the manufactured article, in all its infinite variety of forms, is really greater than the supply. Within the last quarter of a century millions of men have left agriculture to work in the production of iron, and yet the world's supply of food exceeds the demand. The explanation of this new state of things is to be found in the fact that recent inventions in the form of labor-saving machines has endowed one man with the power to do the work of five on the farm. In no other industry has invention done more for the relief of human muscle than it has in the field of agriculture.
