

MEMPHIS APPEAL

TUESDAY, OCTOBER 26, 1875.

IMPERILED MISSISSIPPI.

The elections occur in Mississippi one week from today. The future destiny of the State is bound up in the next seven days. The liberty, the prosperity, the peace, the tranquility, the property, the very existence of the people are jeopardized, and they are working with the energy of despair. With anything like a fair election the taxpayers will triumph over the tax-eaters. On the day of election Tennessee must aid her struggling sister, not by the importation of voters, but by thwarting the attempt to inject fraudulent votes at the precinct contiguous to the Tennessee line. Marshall county will give a large majority for the Democrats, if the effort to prevent the importation of colored voters from Shelby and other counties in West Tennessee succeeds. At the Mississippi elections the Tennessee line an effort will be made to color a large number of Tennessee voters. The people of Memphis, or our Democratic executive committee, should hold a meeting and appoint a committee of citizens living near the State line, with instructions to attend each voting place and point out every man living in Tennessee who proposes to cast his vote in Mississippi. We owe this much to our sister State struggling for deliverance, and whose success will greatly contribute to the prosperity of Memphis. The circulation of the APPEAL is so large in Mississippi that we feel as much interest in the pending election as if it were in our own State. The prosperity of Memphis is so inseparably connected with that of Mississippi that our business men are looking to the result of the election which comes off one week from today with the anxiety as they did when their own State was struggling for enfranchisement and freedom from slavery. The fight which the taxpayers of Mississippi are making for that peace and quietude which pervades Arkansas, Texas, Alabama, Georgia, Virginia and Tennessee since their deliverance from carterage rule commands the sympathy and admiration of the whole south. We have an abiding faith in the success of the tax-paying people. The issues involved, and they are aroused, determined to triumph. Nothing can make them turn upon themselves and their great interests to follow the profligate flag of Ames and his infamous gang of corrupt placemen. The battle in Mississippi is not simply between Republicans, Democrats and Conservatives. It is not a conflict for any of the long-settled issues of the war. It is not to determine whether slavery should have been abolished a decade ago, or whether the reconstruction acts were wise. It is a battle for the present, for the issues, the vital living, life and death issues of today; for the trial of those who seek to perpetuate a power which alienate the people and prevents the return of prosperity. It is a battle between corrupt, profligate power on one side, and the tax-paying people on the other. It is to decide whether carterage domination shall be perpetual, or whether its shameful reign shall give place to law, order, economy, honesty and reform. It is to decide whether the profligate industry of Mississippi, occasioned by a hostility of races, and high taxes, shall continue to languish, or whether it shall be quickened and fostered by rigid economy, wholesome legislation and harmonious relations between the white and black, whose interests are identical. The long-continued extravagance and reckless abuse of power of the Radicals, their success in arraying the blacks against the whites, have been the fountains of all the evils that beset Mississippi. The honest masses, white and black, see that there can be no healthy energy and prosperity so long as the State is rent by hatred, antagonisms, the prolific source of riot and outlaws. The same economy and enthusiasm which has animated the tax-payers of Mississippi for the past three weeks, if continued until Tuesday next, will give them a glorious victory, and thus save their property from confiscation. Thousands of colored voters have struck hands with the whites in a noble and patriotic effort to secure peace and prosperity to the State. This plan would have been brought about years ago, but for the interference of the office-seeking adventurers, who flocked to Mississippi, and by appeals to the passions and cupidity of the blacks managed to get control of the affairs of the State government, which they systematically proceeded to rob. The story of their crimes and their misdeeds will some day make a page in history shameful to those who have risen and made the State a pandemonium. It has been one long fight since the carterage men assumed control of Mississippi. They have never sought to rebuild the land ruined by the war. That would have kept up a hostile feeling between the two races, they prospered. So long as they had the aid of Federal bayonets they carried elections by fraud. But happily Mississippi is about to be redeemed, regenerated. Honest, sensible colored men are now the most energetic to plundering carterage, and have joined the whites in an effort to drive them from power. This will be done on Tuesday next, when better men will take their places; men who will seek to do justice to all; and who will restore the disordered State to a peaceful, prosperous condition.

THE Springfield (Mass.) Republican, a national bank organ, maintains that "a national bank cannot break. If it does, its paper becomes more valuable than before." This is not true, as our contemporary, the American, shows. The State of Tennessee knows that a national bank can break, for she does not suffer from the breaking of Rutter's national bank at Memphis? And ought not Rutter and Judge Poland, Republican members of congress, and others who are liable, be made to pay what is due to the State from Rutter's bank? And did not Clark's national bank at Washington break? And did not Ex-President Andrew Johnson lose thousands of dollars by its collapse? The Springfield Republican ought not to forget to remember when it treats of the responsibility of national banks. We can't down this way.

A DISPATCH from Washington yesterday announces that it is understood that among the prominent features of the forthcoming report of the treasurer of the United States, is the following recommendation, affecting the redemption of the national bank notes, will be made: First, that the national bank

reimbursement agency be made a separate bureau in the office of the secretary of treasury, under the charge of a superintendent, who shall give bond for the faithful discharge of the duties. Second, that the five per cent. redemption fund shall be kept in the treasury, but subject to the checks of the superintendent, and that they be payable in currency or drafts on New York, Boston, Chicago, St. Louis or other sub-treasuries. Third, that banks or other sending national bank notes for redemption be required to prepay the express charges to Washington, and that for all other expenses of this agency the national banks shall be allowed to deduct from their next semi-annual return of tax on circulation the amount of any assessment that may be made in their next return the amount of assessment heretofore made. In all this there is an apparent continuance of the jobbing that has always characterized Grant's administration.

THE Arkansas legislature will meet next Monday in adjourned session. The principal business to be brought before it will be an amendment to the present financial law which will admit of the State's hypothecating its bonds in order to raise money necessary to defray the ordinary and current expenses of the government. It seems that the capitalists of New York, who have been approached upon the subject of a State loan, prefer to advance on hypothecated bonds rather than purchase bonds outright. There will also be a railroad bill introduced for the purpose of compelling railroads to pro rate, and to punishing all attempts at discrimination against the interests of the people of the State. These measures will call for the most careful and demand all the ability that members can command, in order to satisfy the public. There is to-day no more peaceful and industrious people in the Union than those of Arkansas, and if they can but enjoy a few years of close economy they will be able to raise themselves out of the present financial rut and into the clear condition of solvency and light taxation.

AN EXPRESSION of Charles L. Frost, of New York city, derogatory to Governor Houston, of Alabama, having gone the rounds of the press, we deem it due Governor Houston to publish the following letter from Mr. Frost, which we take from the Limestone (Ala.) News: Hon. George B. Houston, Governor of the State of Alabama: DEAR SIR—Our mutual friend, Butler Dunbar, of this city, has called my attention to a "receptive" report of a meeting held in the city of the "Whites" and "Conservative" party, and of which I was chairman, in which the "Whites" and "Conservative" party were called upon to "stand up" and "show their colors." Now, my dear sir, I have the greatest pleasure in stating that the report of my remarks was not correct as reported. I was speaking of the co-governor of your State, Mr. H. B. Howell, who forced the Alabama and Chattanooga railroad into bankruptcy, and out of the present chief executive of the State. And I therefore disclaim any intention of casting reflection upon you in the business. Your high character would find the association of your good name with any of the wrong-doers who preceded you, most respectfully. CHAS. L. FROST.

Mr. Charles L. Frost's, we think, unhappy in his explanation and apology. Ex-Governor Lindsay occupies a high position in the popular esteem in Alabama, and is regarded as a gentleman above the possibility of such conduct as Mr. Frost intimates him guilty of.

THE Chattanooga Commercial (Republican) says Senator Key "will not be found raving like a lunatic against the national banks." To which the Nashville American rejoins that "his Democratic friends do not expect this of him, but they do expect to find him standing like a man of sense with the Democracy of the State, and advocating the abolishment of the odious system of national banks."

TO-DAY Foley's noble statue of Stonewall Jackson will be unveiled at Richmond. It is the gift of Englishmen, admirers of the heroic Virginian. The widow and child of "Stonewall" will be present as the guests of the State of Virginia.
