The Corn Law (A) Gazette announces the death at the age of eighty-one years and six months of William White Prescott, or "Grandpa Prescott," who appears to have been considered one of the best of the new newspapers in several States and Northwest than any other journalist of the Northwest.

Father Robert Burke, a Catholic priest of Mount Holly, N. J., and Mr. E. A. Felt, of Philadelphia, have been guilty of a crime which has caused a boat on a lake at Kroon's Mills, N. J., and in panic upset it. Two men were able to swim. This incident may well feel proud.

The promising crop prospect in every part of the country is being placed on the bank failures, but let us be so near over too. The crops and bounties have been a calamity and a calamity to follow, when the crops and cotton crops begin to pour in, as they will in a few days.

The New York C. & W. of Saturday reports that "bankers' balances remain unchanged. Banks at the interior report a heavy inquiry for money from New York, which is being met by the west, where funds are needed for crop purposes. Southwestern is also a good demand upon the west, but banks are not returning indications that there is no urgent need for money in the interior as yet, an ample supply being held for immediate needs.

A case of amnesia of cotton, closed according to the N. W. American standard types of upland cotton, was placed on exhibition at the Cotton Exchange yesterday, and attracted much attention from the cotton men of all departments of the trade. The general impression among the cotton men is that the grades are not fairly classified, which is attributed to the fact that the committee that made the classification was composed of four buyers and two factors—W. S. Rose, of Montgomery, chairman; J. D. Doherty, of St. Louis; J. A. Towler, Norfolk, Va.; T. F. Woodland, Memphis, and T. F. Fennell, New York, factor. It was also noticed that the committee was made up of men who were not connected with the trade, thus giving the buying element full advantage to demand the highest possible classification, by which they derive superior advantage in dealing with foreign markets. This, like the handle on the pig, makes it one-sided affair, and consequently wrong and unjust. It is not surprising, therefore, to learn that this case of types will have little, if any, effect on any of the transactions of this market during this year.

Dr. Bennett's, of Saturday, reports that in spite of the heat the usual autumn demand has had its effect in moderately increased movement. Reports of the progress of mosquito collections are unfavorable at numerous points. Most of the New England cotton crops have been a failure, and smaller ones are being reported elsewhere. Complaint of shelling is increasing in various States; in several places it is becoming general. There has been a decrease in the quantity of Java and stronger as all descriptions.

THE GRAND JURY.

Impanelled for the September Term. Have Their Duties Clearly Defined by Judge Douglas.

Who Seeks to Correct Certain Abuse? Which Herefore Existed—The County Inquisitors.
