

WAR ON DOPE GANG RESPONSE TO CALL FOR BUTTE CLEANUP

Judge Lynch to Go Limit With Drug Vendors; Shea Favors Abatement Action.

Butte, Oct. 8.—In reply to Alderman Callow, who made the remark at council meeting Wednesday night, that "gansters, bootleggers and girls of the underworld were running at large in Butte," Police Judge Shea stated that if any citizen would advise and inform the proper officials of such conditions, they would be thanked and it would give the authorities a chance to clean up the city.

"As to the charge that girls are resorting to prostitution in rooming houses, it means nothing to hale them into court and give them a fine," said the judge. "Such procedure simply acts as giving them a license to transact their trade. The only correction to this evil is to bring abatement proceedings against the owners of the buildings and this immoral practice will be checked in short order."

"As to bootleggers, it is difficult to get evidence against them and a court cannot find any guilty without evidence. This court is not run on a commercial basis, and I do not intend to maintain it as such."

At the time Judge Shea was telling about conditions, two admitted dope addicts were being tried before Judge Lynch in the district court. Judge Lynch sent both to jail and stated that he was going to make it hot for the sellers of narcotics and to do this he intended to send every person who came before him on a similar charge to jail. If they had marks on their bodies or were admitted addicts, they would be sent to jail.

"We will rid Butte of this menace," said the judge, "if I have to put every addict in the county jail, and I want to issue a warning to those who are selling drugs that they had better leave this community at once or it will go hard with them."

The sheriff and county attorney are working night and day in an effort to cure this evil, with the judge behind them.

The number has increased alarmingly since prohibition went into effect here.

Devil's Basin Shows Little Progress Now but Prices May Spur

Special to The Tribune.

Roundup, Oct. 8.—Little progress is reported from the Devil's Basin this week. Five wells are drilling in that field all of which are making progress, but no important developments have resulted.

The Alberta No. 2 is now drilling almost at the 1600-foot depth and less than a hundred feet should bring it to the second sand, which is expected to prove a commercial producer.

Monarch wells No. 2 and 3 are drilling, but owing to the difficult formations they are penetrating, new hole is being made slowly.

The Montana Central rig is also making some headway, and is at about 450 feet.

The Montell Monarch No. 1, Spokane Roundup, and Highland rigs are shut down, waiting further developments on the part of those now operating.

Statements were made last week that two wells would be drilled by the Van Duzen company on its own account, but these have not yet been started. One will offset the discovery well and is expected to prove a producer. The second is to be drilled in 5-11-24, west of the Monarch well.

The Tri City company also expects to start a well on section 9-11-24, which is declared by geologists to be located on the extreme top of the Devil's Basin anticline. The recent advance in crude oil prices is expected to act somewhat as a stimulant to operators.

New Hands at Helm of Two Belt Places

Special to The Tribune.

Belt, Oct. 8.—The local Hotel Waldo, until recently under the management of the Merkle Coal Co., has been leased to Mrs. L. Schroeder and daughter, of Conrad, who have assumed management. Mr. and Mrs. Charles Jennings, who have been running the hotel for the Merkle company, have taken a lease on the Cottage bakery in Belt, until now under the management of Mrs. C. L. Hartzel. The bakery has been set up again. The damage was not large and \$1,000 will cover the cost of setting up and repairs.

Baby Blinded from Eczema

"The child's head and face were almost a solid sore. The eyes perfectly blind. Doctor said the worst case he had ever seen. One sample of D. D. D. did wonderful work. A complete cure followed." Thos. J. Dorniney, Jemison, Ala.

You write, too, to the D. D. D. Company of Chicago for a sample and get immediate relief. Or, come in and we will tell you what D. D. D. has accomplished in your own neighborhood. Your money back unless the first bottle relieves you. 85c. 50c and \$1.00.

\$1000 DAMAGE BY WIND TO WINNETT OIL RACKS

Special to The Tribune.

Winnett, Oct. 8.—The loading racks of the Montana Independent Pipe Line company, which were tipped over by the heavy wind last week, have been set up again. The damage was not large and \$1,000 will cover the cost of setting up and repairs.

Montana Oil Field News

OHIO BIT CONQUERS CROOKED BIG WALL HOLE, REACHES 2100

Has 300 Feet More to Go, When Hopes Will Begin; Look for Oil at 2900 Feet.

Special to The Tribune.

Roundup, Oct. 8.—Considerable excitement has been caused by the report that filling has been resumed in the Big Wall structure by the Ohio Oil company and that the drills reached a depth of 2,400 feet, which is 300 feet deeper than when the cement was first put down some time ago.

For the past four months this company has been fighting a crooked hole and every effort has been made to get past the bend, but without success. The well was started last December and good progress was made until, after reaching 2,100 feet, a crook in the well defied their efforts to run a string of casing to shut off cement. The well was started last December and good progress was made until, after reaching 2,100 feet, a crook in the well defied their efforts to run a string of casing to shut off cement. The well was started last December and good progress was made until, after reaching 2,100 feet, a crook in the well defied their efforts to run a string of casing to shut off cement.

SOON TO SPUD WELL IN EXTENSIVE TEST OF HOWARD COULEE

Ohio Company Centering Efforts on This and Big Wall Structures as Final.

Special to The Tribune.

Roundup, Oct. 8.—The work of hauling material from Ragged Point to the new location of the Ohio Oil company in Howard coulee continues speedily and the crews will soon be ready to set up their rig. Drilling is scheduled to be started about the 15th of the present month, and will be continued with two towers until the well is completed. This structure is of considerable extent, although its outlines are virtually unknown, except to the Ohio company, which has made an exhaustive survey of the structure.

The well will start in the Claggett formation, which will compel some efforts on these two structures and have determined to make a thorough test of both of them. In the event that they contain oil, the Ohio will have a compact area of prospective oil land comprising some 20,000 acres, with the privilege of developing it along economical lines with little trouble from offsetting expenses.

Children Save Goods in Fire; House Burns

Special to The Tribune.

Pleasantwood, Oct. 8.—While Mr. and Mrs. Zeb Garneau were here last Sunday, leaving their children at home, their home was totally destroyed by fire.

The blaze caught in the ceiling but went beyond the control of the children, who did everything they possibly could to extinguish it. Failing in that, they all turned to and saved nearly all of the household goods and clothing, even getting out a big heavy range.

The children, who were all alone, showed rare presence of mind when, seeing that they could not have the building, they turned to and saved as much as they did of the household goods. Mr. Garneau reports that his home was covered by partial insurance.

Describes Refinery to Be Tried Saturday

Special to The Tribune.

Lewistown, Oct. 8.—T. T. Taylor, Jr., a director of the Arco Refining company, gave an address at the luncheon of the Kiwanis club Thursday, on the plans of his company, with a description of the refining plant, which will start up on a trial run Saturday, it is expected. At this luncheon the high school orchestra, under Mrs. E. L. Thielke, furnished music.

A machine designed to accompany music with harmonious lighting effects has been invented by an eastern artist.

MONDAY EVENING GRAND THEATER

JOINT RECITAL
MARIE SUNDELIUS
SOPRANO
METROPOLITAN
OPERA COMPANY

Marie Sundeius as "Ah Yoe" was a pleasure to the eye, and her singing was a veritable delight. Here, too, is a voice lovely in its crystalline purity, impeccable in pitch, warm and sympathetic in lyric moments, and used with an ease and finish that tell of excellent schooling. Her singing of the love music from Ah Yoe's window was one of the notably beautiful features of the performance.—(W. L. Hubbard) Chicago Tribune.

NICOLA ZEROLA

DRAMATIC TENOR
METROPOLITAN
OPERA COMPANY

"After his appearance last night as Manrico in 'Trovatore' there can be no doubt that Nicola Zerola is a sensation. He sang two high C's in the 'Di Quella Pira' air, which were extraordinary in their brilliancy, and he walked down to the footlights while he held them. In his repetition of the air he sang the high note three times. This tenor seems destined for a great popular success on account of his ability to sustain high notes, if nothing else."—New York Times.

This will be your last opportunity to secure season tickets for the biggest and best musical season in the history of Great Falls. Five master concerts, including eight of the leading artists of America's concert stage at five and seven dollars for the full season. Do it now. Advance sale, \$2.00 to 50c, plus tax.

Former State Dairy Inspector Back at Belt to Boost Herds

Special to The Tribune.

Belt, Oct. 8.—Mr. and Mrs. William Fluhr have recently moved to Belt from Helena, and Mr. Fluhr has assumed active management of the Belt Valley creamery, in which he is interested. The Fluhrs formerly lived in Belt, but moved to Helena several years ago, when Mr. Fluhr became dairy inspector, a position he resigned when the recent reorganization of the state agriculture department took place. Mr. Fluhr intends to devote much of his time in the near future to visits in the Belt valley for the purpose of inducing more farmers to take up dairy farming, recognized as the surest means of a steady income for farmers.

Baking Bread at 96, Delays an Interview on Her Trip to West

Billings, Oct. 8.—Mrs. Catherine McGuane, 96 years old, was baking bread Thursday, so a reporter who called to interview her about her recent trip alone from Minneapolis to Billings was forced to wait until a critical moment had passed. Mrs. McGuane is visiting her daughter, Mrs. George O'Donnell.

She was born in County Clare, Ireland, and came to America in 1854, when she was 24 years old. She lived for 50 years in Winona, Minn. She is a grandmother to 22 persons and a great-grandmother to 18.

Mrs. McGuane did not approve of suffrage before its advent, but now she believes it the duty of every woman to vote.

Treasurer to Boss Lewistown Job Bureau

Special to The Tribune.

Lewistown, Oct. 8.—City Treasurer W. W. Wheaton, who has been placed in charge of the municipal free employment bureau, has established a telephone service in connection with the bureau and will undertake to fill any requests telephoned to him for help of any sort.

BUSINESS MEN BOOST Y.

Special to The Tribune.

Billings, Oct. 8.—Teams of business men spent eight hours canvassing the city Thursday, and secured 161 new members for the local Y. M. C. A. and raised a total of \$3,600.

BLACKHEADS GO QUICK BY THIS SIMPLE METHOD

Blackheads—big ones or little ones—soft ones or hard ones—on any part of the body, go quick by a simple method that just dissolves them. To do this get about two ounces of calomite powder from your druggist—sprinkle a little on a hot, wet sponge—rub over the blackheads briskly for a few seconds—and wash off. You'll wonder where the blackheads have gone. The calomite powder and the hot water have just dissolved them. Pinching and squeezing blackheads only open the pores of the skin and leave them open and unsightly—and unless the blackheads are big and soft they will not come out, while the simple application of calomite powder and water dissolves them right out, leaving the skin soft and the pores in their natural condition. You can get calomite powder at any store and if you are troubled with these unsightly blemishes you should certainly try this simple method.

BACK FROM CALIFORNIA.

Chinook, Oct. 8.—George Putnam has returned from a year's absence in California, to look after business interests here.

Registered Autos Still 2000 Below '20

Special to The Tribune.

Helena, Oct. 8.—Automobile registration figures for July, August and September brought the total fees from this department up to \$587,618 for this year, according to Secretary of States Charles T. Stewart's quarterly report to Governor Joseph M. Dixon. The number of automobiles registered has now passed the 58,000 mark, more than 2,000 under last year's record. In July the receipts were \$29,176, in August the total was \$17,997.50, and in September it dropped to \$9,416. Filing fees on other activities of Mr. Stewart's office were as follows: Domestic corporations, \$10,850.50. Foreign corporations, \$1,073.55. Notary commissions, \$2,690. Certificates and certified copies, \$100.10. Railroad ticket agent licenses, \$30. Official bonds, \$149. Warrants and requisitions, \$20. Trade marks, \$99. Commissioner of deeds, \$10. Miscellaneous, \$1,008.20. Total, \$16,061.35.

CONCERT TRIO OPENS BELT LYCEUM COURSE

Special to The Tribune.

Belt, Oct. 8.—The Carolina Concert Trio was the first number on the local Lyceum course, given under the auspices of the local American legion, in the high school auditorium Thursday night. The next number in the course is the Romany Serenaders, a male quartet, scheduled to appear in Belt on November 17.

Little Loss by Snow, Threshing Reveals

Special to The Tribune.

Lewistown, Oct. 8.—County Agent Carl H. Peterson reports that threshing is about completed in Fergus county, one of the gratifying features being the very small loss resulting from the big snow storms which, some weeks ago, flattened out so much grain.

COMPLETING ROAD BY SURFACING LAST LINK

Special to The Tribune.

Anaconda, Oct. 8.—The commissioners of Deer Lodge county started work Thursday toward putting the stretch of road from the end of the concrete highway to the Silver Bow county line, a mile and a half, in first-class shape before snow flies. It is the intention of the commissioners to grade the stretch and then surface it with decomposed granite.

Special to The Tribune.

Roundup, Oct. 8.—The work of hauling material from Ragged Point to the new location of the Ohio Oil company in Howard coulee continues speedily and the crews will soon be ready to set up their rig. Drilling is scheduled to be started about the 15th of the present month, and will be continued with two towers until the well is completed. This structure is of considerable extent, although its outlines are virtually unknown, except to the Ohio company, which has made an exhaustive survey of the structure.

To Avoid Probable Disappointment

IN THE RESULTS OBTAINED FROM "FALSE
TEETH," HAVE YOUR PLATES MADE IN THE
EDMONSON DENTAL LABORATORY

Edmonson plate making has reached the highest degree of perfection, simply because the Edmonson Plate Specialist has made this branch of Dentistry a life study, and has had the advantage of constant practice in the work for years.

With him no move in the making of a plate, from the taking of the impression to the last fitting of the finished article to your mouth, is left to guess work—the school of experience has taught him exactly just what is needed to make a plate that will allow of the proper mastication of food, bring comfort and ease to the wearer, retain the contour of the face and give a pleasing appearance. It is not an uncommon thing for the Edmonson office to make plates for people who have discarded from one to three sets of teeth made elsewhere—sent here by friends who were wearing Edmonson plates. There's a reason. Edmonson Plates Cost Considerable Less Than Other Good Plates.

Free All This Week

This 10-Day Tube of Pepsodent. Simply present the coupon. This test will prove a delightful revelation. It will show you the way which millions have found to whiter, cleaner, safer teeth. This offer is for one week only. It means much to you and yours. Act now.

It multiplies the alkalinity of the saliva. That is Nature's neutralizer of the acids which attack the teeth.

It combats the film wherever it adheres. It leaves the teeth so highly polished that film cannot easily cling. Pepsin is also included.

See and feel it act

The results are not uncertain. You can see and feel them. Some are almost instant. A ten-day test is most convincing.

Present the coupon for a 10-Day Tube. Note how clean the teeth feel after using. Mark the absence of the viscous film. See how teeth whiten as the film-coats disappear. Watch the other good effects.

To millions this test has proved a revelation. It has shown them the way to prettier teeth, to cleaner, safer teeth. One does not return to the old ways when he sees what this new way does.

The methods are embodied in a scientific tooth paste. The name is Pepsodent. Its use is fast spreading the world over.

To let all know it quickly, a 10-Day Tube is being presented to anyone who asks. Thus thousands of new people daily are learning its delights.

Combines five effects

But Pepsodent does more than fight film. It fights the acid which is a great tooth destroyer.

Each use of Pepsodent multiplies the salivary flow. That is Nature's great tooth-protecting agent. It multiplies the starch digestant in the saliva. That is to digest the starch deposits which may otherwise remain and form acid.

The delightful results

One conspicuous effect is to beautify the teeth. Another is a feeling of cleanliness. Men who smoke will see great changes. It is film that absorbs tobacco stains.

But it is most essential to the children. Young teeth are most subject to film and starch attacks. Dentists advise that children use Pepsodent daily from the time the first tooth appears. Under old methods, very few children escape some tooth destruction.

To all this test is important. Cut out the coupon so you won't forget to make it. Present it this week.

Not for Women Only

To millions it is bringing whiter teeth

This new way of teeth-cleaning appeals to women. It brings them prettier teeth. But men also enjoy it, and children must use it to properly clean their teeth.

Millions now use it, largely by dental advice. The glistening teeth you see everywhere now show the results of its use.

Everyone needs it, as this simple test will show. See the results it brings in ten days and decide that for yourself.

You must fight film

Your teeth are coated with a viscous film. You can feel it with your tongue. It clings to teeth, gets between the teeth and stays.

The ordinary tooth paste does not effectively combat it. Your tooth brush has left much of it intact. And that clinging film may do a ceaseless damage.

Film absorbs stains, making the teeth look dingy. Film is the basis of tartar. It holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay.

Millions of germs breed in it. They, with tartar, are the chief cause of pyorrhea. Also of other serious troubles, local and internal.

Thus film causes most tooth troubles. And,

despite the tooth brush, all those troubles have been constantly increasing. Some have become so common as to be alarming.

Now ways to combat it

Dental science has for years sought ways to combat that film. The ways have now been found. Able authorities have amply proved their efficiency. Leading dentists everywhere now advise their daily use.
