New York Market

FINANCIAL
 New York, Nov. 16.—Continued ease of money signs of pronounced improvement in industrial conditions and the strength of British exchange were potent factors in today's active, broad and generally higher stock market, sales approximating 1,000,000 shares.
 Events at Washington were followed with absorbing interest, but the speculative elements, which was driven to cover, appeared to have reached the conclusion that eventually the disarmament proposals would prove a bullish argument.
 Loans opened at 4 1/2 per cent for the first time in nearly a month and that quotation again was reduced to 4 per cent in private negotiations, slight concessions also being made for accommodations extending into the coming year.
 Trade reviews reported a broader demand for railroad equipment and structural steel and the labor situation in its relation to the proposed cut by the transportation system of the country, seemed to be less acute.
 Oils of the domestic type, especially the standard Oil group, featured the trading at extreme gains of 2 to over 10 points. Royal Dutch was the one striking exception, showing heaviness on reports that dividends are to be paid in stock instead of cash.
 Equipment, steel, coppers, shippings and an unusual number of specialties participated in the advance at substantial gains and rails of all descriptions added variably to their recent gains.
 Frequent realizing sales were without marked effect, a strong tone ruling at the close.
 Sterling exchange crossed 400 for the first time in nearly six months, representing a gain of about six cents to the pound from the week's low. French, Italian, Belgian and Dutch bills also were irregularly higher and German marks displayed more stability.
 Appreciable gains were made by Liberty issues, and the bond list almost as a whole, including leading international, was inclined to strengthen. Total sales, par value, \$17,750,000.

Chicago Market

GRAIN AND PROVISIONS
 Chicago, Nov. 16.—Decided upturn in the price of wheat took place today, owing more or less to a rise in foreign exchange. The finish in wheat, although unsettled, was 2 1/2 to 2 3/4 cents per bushel higher, with December \$1.06 1/2 to \$1.07 1/2, and May \$1.04 1/2 to \$1.05 1/2. Corn gained 1/4 to 1/2 cent, and oats 1/4 to 1/2 cent. In provisions, the outcome varied with fluctuating figures to 15 cents decline.
 With sterling exchange above \$4 for the first time this year, wheat had an upward slant throughout the day, except about the middle of the session, when large selling orders from the east forced a temporary sharp setback. Strong commission houses absorbed the offerings, however, and news favored the bulls, advice telling of better export demand at the gulf and of Germany taking flour at the Atlantic seaboard. Gossip was also current that a power banking interest was working on a loan to Germany. Strength in stocks and cotton tended further to stimulate buying.
 On the other hand, the fact that absence of moisture continued in the southeast was overshadowed by predictions of general rain or snow. Announcement that some Canadian grain would go to Europe by way of Vancouver received considerable notice.
 Active demand from the east, together with scantiness of receipts here gave wheat a bullish interest was working on a loan to Germany. Strength in stocks and cotton tended further to stimulate buying.
 Provisions at first were firm, reflecting the action of hogs and grain, but packers' selling of lard brought about something of a reaction.
 The prices of futures ranged as follows:
 Wheat—Open. High. Low. Close.
 Dec. \$1.04 1/2 \$1.07 1/2 \$1.03 1/2 \$1.06 1/2
