Stock Market
BRINGING UP FATHER
 as seen by
Bulls & Bears

Reported by H. B. Lake & Co.
 New York, June 23.—The initial trading in today's stock market was featured by a sharp upturn in the Pan American issue, which was easily the most active of the day. The balance of the market was inclined to be steady during the session, with some active selling for a while during the third hour. Among special issues U. S. Inland, reflecting improved business of the company. The shares of the major houses displayed buoyant tone, the strength there being traceable to the encouraging statements of the industry. May issued by some of the foregoing concerns. Better export sales of copper were also mentioned among the news items of the day. In the rail department of the list a steady tone was maintained throughout, particular strength being based on the expectation that an increase in the dividend will be announced sometime during the year. The list as a whole may display some irregularity for a while but it would not be surprising to see a strong upward movement develop in the railroad shares more particularly if the news of the next few days touching on the railroad labor difficulties be of a favorable nature.—Logan & Bryan.

THE GUMPS—SOCIETY LEADERS, TAKE NOTE

DUMPELL DAN—By STANLEY Mac GOVERN

Where Do They Get That "Love" Stuff?

New York Market

FINANCIAL.
 New York, June 23.—Trading in the stock market Friday languished perceptibly, probably as a direct result of the proposed official inquiry into the recent remarkable maneuvers of Mexican Petroleum. Sales of 700,000 shares represented the smallest full session in many weeks.
 Additional restraints were imposed upon speculative operations by the firmer tone of money rates. Call loans gradually rose to 5 per cent in the final hour.
 Mexican Petroleum opened at a fractional advance at 154, that figure being its best for the session. After declining to 175 at mid-day, it made a temporary recovery, but slid back at the end to its previous minimum, or of a net loss of 7 1/2 points.
 Pan-American Petroleum issues assumed early market leadership, the 4 1/2 shares making an extreme rise of 6 points and the "B" advancing 7 1/2 points, but these gains were cut in half later. Buying of Pan-American was attended by reports that the company, which already controls 80 per cent of the templated actual absorption of the latter.
 Other foreign and domestic oil, especially General Asphalt, Royal Dutch and California Petroleum trailed along with the new leader. These, too, were materially impaired by the afternoon tentative realising sales of the afternoon, with motors, shippings and prominent specialties.
 Rails were the sustaining features of the day, although advances in the investment division were confined to one or two points. The Chicago Central, Atlantic Coast line and several of the trans-continental and coalers as the most conspicuous issues.
 Stealing bills were off another cent to 441 for demand bills. French and Italian remittances were effected to the same extent, losing points each. The marks shaded to within the smallest fraction of 600.

Chicago Market

CORN AND PROVISIONS.
 Chicago, June 23.—Anxiety over heat and drought, together with predictions that the winter crop yield would be well below the June estimate, led to a steady market for corn Friday. The week's price movement has been upward, and the food index has advanced. Futures are slightly higher than at the close of last week, but the advance over June a year ago is of comparative insignificance.
 Indeed, except for short periods in the autumn of last year and of 1920, reports on all classes of grain, generally steady, are about the same. The week's price movement has been upward, and the food index has advanced. Futures are slightly higher than at the close of last week, but the advance over June a year ago is of comparative insignificance.
 Best trade reports come from the west, with mail order houses making a steady business of the week. They have held their own well, despite some complaints of dry weather.
 Weekly bank clearings, \$7,381,672,000.
