 Reported by H. B. Lake & Co.  
 New York, Aug. 28.—The tone of the stock market as a general proposition today was reactionary. News touching on the foreign situation and also the coal situation and rail strikes could not be interpreted as being conducive to bullish efforts. Consequently there was quite a little scattering liquidation and floor observers pointed out that there seemed to be a subsidence in the outside demand for securities. There seems to be a growing idea in some quarters that the recent eagerness of investment inquiry seems to have largely spent its force and with some distasteful influences confronting the market the opinion naturally is expressed that the present time, all things considered, does not seem to be an opportune one for buying operations. It would not be surprising to see a further setback in the market.—Logan & Bryan.
