

CURE THAT GRIP TO-DAY

Thousands of people in this city suffering with colds are about to-day. To-morrow they may be prostrated with Grip or Pneumonia. Grip is spreading. Whole families are suffering. Many business places are crippled through sickness of employes.

I will guarantee that my Rheumatism Cure will speedily cure nearly all forms of rheumatism; that my Dyspepsia Cure will cure any case of indigestion or stomach trouble; that my Kidney Cure will cure any case of Bright's Disease, can be cured with my Kidney Cure, 57 cures for 57 ailments.

GRIP'S ARMY OF VICTIMS BIG ARMY AGAINST VICE

ONE-SIXTH OF THE NEW YORKERS VIGILANCE COMMITTEE OF 5,000

Rest Will Get It, Says Dr. Edson—Epidemic More Deadly Than Ever Before.

New York, Jan. 16.—Dr. Cyrus Edson says of the grip epidemic: Fully one-sixth of New York's population, at least one-tenth, have the grip; the others will get it.

The Ideal Roosevelt.

The Cincinnati Enquirer thinks Vice President Roosevelt will hardly be able to meet the expectations of the people of Washington unless he rides up the long west steps of the capitol on horseback.

Prevent Colds and La Grippe

Take Cascarine, the Grip Preventive.

VARICOCELE

THE DISEASE —An enlargement of the veins of the scrotum, causing a knotted or swollen appearance of the scrotum most frequently.

ITS CAUSE

—Often indigestion, but sometimes blows, falls, strains, excessive horseback or bicycle riding or excessive dissipation.

ITS EFFECT

—A dull, heavy, dragging pain in small of back, extending down through joints, low spirits, weakness of body and brain, nervous debility, partial or complete loss of vigor, and often failure of general health.

ITS CURE

—If you are a victim of varicocele, come to our office and let me explain to you my process of curing it. You will then not wonder why I have cured to stay cured more than 900 cases of varicocele during the past twelve months.

FLETCHER LEADS IT

Worried About Appropriation for River Reservoirs.

WESTERN MEN WERE AFTER HIM

But He Stood Guard and the Mississippi River Item Got Through Safely.

Special to The Journal. Washington, Jan. 16.—"Will the river and harbor bill become a law?" I asked Congressman Corliss of Detroit.

"Of course it will," he replied. "But you are opposed to the bill," I said. "Yes and no," Mr. Corliss said. "I am approved to cross extravagant and to reckless grab bag system which has underlain our river and harbor bills for years.

"I think that the government ought to do a certain important part of the work in providing rivers and other navigable waterways, but I oppose the system under which money is squandered by the millions every year in sections of the country where the public is not interested and from which it can never derive any benefit.

"I am opposed to the bill in its present form, and should do all that I can to defeat it; but it will pass, nevertheless, even though an organization of shippers, working through the League of National Associations, is pushing the Cullom bill, which aims to restore to the interstate commerce commission the power intended for it in the original act.

"The railroads would like legislation to authorize pooling under restrictions. There was a proposal at the last session to combine something of this kind with the Cullom bill, but at present the plan seems to drop both. The railroad managers are not anxious to have any pooling legislation by the cultivation of more friendly relations among themselves.

"The best thing for the League of National Associations to do is to look out for its interests after March 4 in the reorganization of the senate committee on interstate commerce.

Between 35,000 and 40,000 pension claims have been filed on account of services in the Cuban war and its sequel in the Philippines. There are also a number of very limited pension contingents. There are plenty of men disabled, of course, but most of them go into hospital on the spot and come out again in good health.

"I don't think he will come out," I said. "Why?" asked Loomis. "It so happened that I had been in the gallery a short time before and had heard several of the members from, irrigation states of the far west getting after Mr. Fletcher's item of \$300,000 for completing the reservoir work."

"It was while the excitement was at its height that Captain Loomis' card was handed to Mr. Fletcher. Hurriedly the Minneapolis member started for the lobby door. I was still telling Loomis about the things outlined in the foregoing paragraph. "Your uncle" came up hastily.

"Glad to see you, Loomis," he said; "glad to see you; you really must excuse me. The river and harbor bill is up, and some of those damned fellows from the wild west are getting after my reservoir item."

And before the words were out of his mouth he was back in the house, almost running to reach a point where he could read the debate on the lobby door. Nothing harmful to the reservoirs had happened while he was away.

Later he sent for Captain Loomis, and invited him to lunch. "Sit tight," said Fletcher, watching the debate between Congressman Morris, Eddy and Stevens from Minnesota, all of whom have interests in the bill. All cards sent to the senate in the afternoon of Jan. 15, 1901, as he was on his way to the senate of the capitol.

"I've got it fixed all right," were his words. "They tried to down me, but I was too much for them. We get the \$300,000."

Just before the vote was taken in the senate on the army canteen proposition, I had a talk with Senator Towne of Minnesota. He said:

I shall vote against the canteen, although I must admit that I am uncertain whether from the point of view of facts, the anti-canteen people have proved their case. They claim that the canteen is demoralizing in the army; other authorities claim that it is in the interest of sobriety and better morals.

Representative Spaulding of North Dakota "had 'em going and coming" on the reappointment bill. He secured a consensus from Chairman Hopkins of the census committee to the bill which would add an additional member, and then offered an amendment to the Burleigh bill which included an additional member from North Dakota in that measure.

Secretary Root has transmitted to congress a list of the civil engineers employed on river and harbor work during the past year with the salary paid each. Those who worked in the northwest are as follows:

W. A. Thompson, La Crosse, Wis., twelve months at \$300 a month on the Mississippi river between the Missouri river and St. Paul; A. O. Powell and R. Davenport, St. Paul, twelve months each at \$200 on lock and dam No. 2; Archibald Johnson, St. Paul, three months at \$200 on Lake Winnebago lock and dam; W. C. Weeks, Minneapolis, six months at \$150 on Lake Winnebago lock and dam; Balthus Smith, Sioux City, Iowa, four months at \$150 and eight months at \$125 on the upper Missouri; Edwin D. Vincent, Omaha, Neb., twelve months at \$150 at Pierre, S. D.; W. H. Wood, St. Paul, twelve months at \$150 at Mandan, N. D., and the following at Duluth: H. H. Darling, twelve months at \$200; Clarence Coleman and F. L. Dever, twelve months at \$175 each; H. H. Wadsworth, twelve months at \$150.

of the late campaign, nor discuss the leaders on either side of that great battle. His address will be made exclusively with politics in the highest and best sense of the word. He will call attention, it is likely, to what he thinks are some of the prevailing tendencies of the times, and that he will think these are used for all purposes in the city. Congress has taken up the question and proposes a thorough investigation of the two most approved methods of filtration. Every city in the country deriving its water supply from rivers or lowland lakes will be interested in the report, for it is the intention of the senate committee to call upon the best experts in the country and go into the question of purity of water supply very exhaustively.

LOOK OUT FOR NO. 1

Unexpected Opposition Develops to the Judges' Salary Bill.

SEWARD WOULD BE A CANDIDATE

Constitution Will Bar Him if the Increase is Made at This Time.

Special to The Journal. Pierre, S. D., Jan. 16.—The bill to increase the salary of the governor and the circuit and supreme court judges is likely to meet with a strong opposition in the house, and that from unexpected quarters. A certain number of economists are always opposed to any measure of the kind, no matter how momentous, but in this case good shippers are expected to will come from attorneys. One of these is C. X. Seward of Watertown, if current report may be relied upon. Where the bill of the senate increases the salary of the judges it will bar him from making a run for the place under the constitutional provision, which says that no member of the legislature can fill a position created by, or the salary of which was increased by, the legislature of which he was a member.

The bill relative to divorce which was presented by Mr. Pietz of McPherson county, provides that insanity shall be cause for absolute divorce. It is shown by certificates that the defendant has been an inmate of the insane hospital for three years or more.

The bill introduced by Representative Heath of Brookings county, virtually repeals the present pure food law and prescribes penalties for violating it. The man calls systemic catarrh. A person with systemic catarrh cannot stand exertion. He is all tired out. He is nervous and agitated. He is sallow and depressed. He has little zest for life and is unfitted for business.

It is announced that the date of the first excursion to the capitol under the new arrangement will be Jan. 24. A list will be given on that date and other amusements will be provided. If possible a herd of buffalo will be secured from the Caribou ranch across the river, and placed on exhibition.

A San Francisco photographer has a number of enlarged colored pictures on exhibition at the state capitol which he hopes to sell to the state for the sum of \$400. Among them are four pictures of the officers of the First regiment—Colonel Frost, Lieutenant Colonel Siroy, Major Charles A. Howard and Adjutant Lien. The pictures of Frost and Siroy are very good, but the other two are poor. Eighteen smaller pictures represent the First regiment in camp at Manila in 1898, in the grand review, and in various scenes in the Philippines. If the state purchases the collection it will probably be presented to the historical society.

Senator Newby of Deuel county has introduced a bill that will materially add to the taxes on the holding of personal taxes. It empowers the commissioners to take possession of any warrant issued in favor of the delinquent and to apply the same upon his taxes, or to deduct the amount of the taxes as the case may be.

Mr. Varnum's bill relative to the payment of taxes on the holding of personal taxes, is now learning by experience how it is to be the mark for such an embargo. Russia has proclaimed the embargo on the holding of personal taxes. The action seriously affects one of the principal industries of Brunswick, the manufacture of various kinds of sausage, and the chamber of commerce in Brunswick has addressed a protest to the department of the interior at Berlin.

The National Zeitung and the Vossische Zeitung in Germany are opposing the prohibition recently issued by the German government against the importation of foreign meats into Germany. It has given a weapon to Russia and other foreign countries, and the effort to promote the export of German meats. In regard to the argument that the Russia ignores the German inspection for trichinae, the Brunswick chamber of commerce says that Russia may appeal to the fact that Germany does not recognize the American meat inspections, although the Americans assert that these are thoroughly trustworthy.

Late advices from American consular agents in Canada are to the effect that lumber exports from that country are showing a decrease of about 60,000,000 feet for the present year as compared with 1899. The amount exported this year was 228,998,837 feet, as against 288,998,837 feet in 1899. The lumbermen are publishing in the last edition of that paper. These replies go to show that logging operations in Canada are unable to obtain a sufficient number of employees. Wages and food have advanced, and the chances are that the output of logs will be materially reduced. The lumbermen are claiming that the wages and food advanced in the United States has amounted to nearly 85 per cent during the past four years. And it is believed that there has been an almost equal advance in Canada. This increase in the cost of lumber cannot be disregarded by manufacturers, who must of necessity secure for their product a price sufficient to cover the higher cost of production, and the report adds:

The consumption of lumber for manufacturing purposes is likely to grow. In addition to a steadily growing home demand, the export trade in lumber and wood implements is increasing. It is not improbable that the United States and Great Britain will take from Canada next year fully as much, if not more, lumber than in the season now closing.

There seems to be a concerted movement among certain interested classes in the state to secure the removal of the seal of the existing duty on hides. Within the past week more than a dozen long petitions bearing on this matter have been presented to the legislature. The duty on both horses from Minnesota, Wisconsin, the Dakotas, Montana and Iowa seem to be the ones that have a monopoly of the business. There is no legislation on this subject during the present session, unless it should come through the pending bill to reduce the war revenues.

Stephen's Light Plant Ready.

Special to The Journal. St. Paul, Minn., Jan. 16.—The electric light plant now being built by the city of St. Paul is now ready for business and the town expects to see things in a new light by to-morrow evening. The plant is a first-class one.

Crematory for Deer Creek.

Special to The Journal. Deer Creek, Minn., Jan. 16.—Forty of the leading farmers of this vicinity have organized a crematory association and expect to have a first-class plant in operation by April 1. The officers of the new association are: Charles Vargason, president; Peter Johnson, vice-president; H. R. Sankar, secretary; Gus Selinger, treasurer; William Rodeker, Swan Johnson, Aug. Koch, Fred Lesburg, Dan Anderson, Fred Anderson and William Gilen, directors.

May Die of Smallpox.

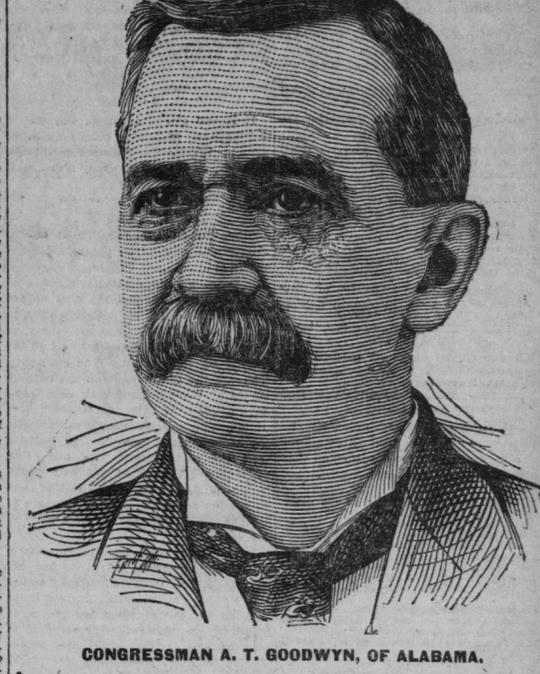

Special to The Journal. Fergus Falls, Minn., Jan. 16.—Sen. Steen, the young man who is ill of smallpox at an quarantine station in a remote critical condition. No other cases have developed in this city. The annual meeting of the Farmers' Association of this county was held last evening and the following officers elected for the ensuing year: Regent, Mrs. V. B. Brown; Secretary, Mrs. B. B. Kinley; Treasurer, Mrs. F. H. Gray; Secretary, Miss Elizabeth Underwood; Mrs. James A. Brown; Vice-president, Mrs. B. B. Kinley; President, Mrs. W. B. C. Evans; and Mrs. W. B. C. Evans, directors.

The remains were taken to Le Sueur county for interment.

MANY GREAT MEN

And Many Accomplished Women Recommend

Pe-ru-na for Chronic Catarrh.

CONGRESSMAN A. T. GOODWYN, OF ALABAMA.

Hon. A. T. Goodwyn, Congressman of Alabama, in a recent letter to Dr. Hartman, from Robinson Springs, Ala., says: "I have now used one bottle of Peruna and am a well man to-day. I could feel the good effects of your medicine before I had used it a week, after suffering with catarrh for over a year."

WHAT the skin is to the outside of the body, the mucous membrane is to the inside of the body. Every organ, every duct and passage of the body is lined with mucous membranes.

A general flabbiness of these mucous membranes constitutes what Dr. Hartman calls systemic catarrh. A person with systemic catarrh cannot stand exertion. He is all tired out. He is nervous and agitated. He is sallow and depressed. He has little zest for life and is unfitted for business.

It is through its operation upon the nervous system that Peruna has attained such a world-wide reputation as a sure and reliable remedy for all phases of pelvic catarrh known as female ailments. It is the best, if not the only, internal remedy for pelvic catarrh ever devised by the medical profession.

Peruna strengthens and restores the activity of every nerve in the body. Through the use of Peruna the weakened or overworked nervous system resumes their natural strength and the blood vessels at once begin to regulate the flow of blood according to nature's laws. Congestions immediately disappear. All phases of catarrh, acute or chronic, are promptly and permanently cured.
