

PREMONITION DESTROYED FOURTEEN HUNDRED LIVES

Destroyed Fourteen Hundred Lives Daily During the Past Month.

Four-fifths of These Deaths Due to Carelessness in Selecting Treatments for Coughs, Catarrh and Bronchitis.

THESE DISEASES EASILY PREVENTED.

It would seem that any sensible person, after reading the reports of the Bureau of Vital Statistics published by the Government, would think twice before experimenting with remedies and treatments which these reports prove have been practically worthless in curing or preventing Pneumonia and Consumption.

During 1886 these reports show that eighty-two thousand persons died from these diseases, and that the death rate increased every year until 1896, when it reached the terrifying total of 254,331; this from Pneumonia and Consumption alone.

Now, during this whole period, Ten Years, every drug known which could be taken in the stomach, every germicide which could be employed in sprays, vapors or atomizers, were used, and yet medical records do not show one single case of Consumption cured.

To be sure, thousands of persons afflicted increased their strength and flesh by stomachic tonics, deadened their cough with strong drugs in form of vapors and sprays, and even gave their testimonials, as cured, to the manufacturers of such treatments; but as statistics prove, the germs of consumption remained in the lungs, and death claimed its victim in the end.

Now let us return to the Reports of the Bureau of Vital Statistics. They show that for the first time in history the increase in death from Pneumonia and Consumption stopped in 1896; they show a slight decrease in 1897. In 1898 and 1899 a still further decrease, and in 1900 the deaths from these diseases were 23,905 less than in 1899, a fact which brought hope and joy to thousands of physicians who for years had been battling in vain against these terrible scourges.

The question then arose, "What has brought about this wonderful change?" In most cases, where so vital a question is to be decided, there is a diversity of opinion. But in this case, Physicians and the United States Health Reports all agreed, and Health statistics proved that this reduction was due to the use of the new dry air germicide, HYOMEI, and sanitation. They go still further, and say most emphatically that no other treatment or remedy had anything to do with bringing about this reduction.

To say that HYOMEI cured 23,905 persons of Pneumonia and Consumption does not give it the credit due, for nine-tenths of the victims of these diseases are recruited from persons afflicted with coughs, catarrh and bronchitis, and in order to reduce the death rate from Consumption and Pneumonia, 23,905, it must also have cured at least two hundred thousand weak lunged people of coughs, catarrh and bronchitis.

HYOMEI first came into general use in 1896, and according to statistics furnished by the government, the increase in deaths from Consumption stopped then. Why? Because HYOMEI is the only germicide known which can be inhaled in the air we breathe, and it is through this air alone that the germs causing Consumption, and located entirely in the lungs, can be reached.

Herein lies the secret of HYOMEI—success in curing respiratory diseases. No stomachic medicine in the world can reach these germs, no sprays or vapors can pass the epiglottis at the entrance of the windpipe, HYOMEI, and HYOMEI alone, can be carried to the diseased parts. Inhaled in the air we breathe, it penetrates to the minutest air cells, and there destroys the germs causing the disease. Coughs, Catarrh, Bronchitis and Consumption cannot exist where it is used.

Having given the true facts about different treatments, we leave the rest to you. On the one hand you have stomachic medicines, sprays, vapors, and an increased death rate; on the other, HYOMEI, the only germicide permitted by nature to enter the lungs, the endorsement of physicians, the United States Health Reports, a 30 per cent. reduction in the death rate, and a guarantee to refund your money in every case of failure to cure. Which will you use?

HYOMEI is sold by all druggists or sent by mail. Complete Outfit \$1.00. Trial Outfit 25c. Five days' treatment sent free to any address.

THE R. T. BOOTH COMPANY, Ithaca, New York.

MEN LACKING VITALITY

Suffering from the effects of youthful follies or indiscretions, or from loss of vigor caused by overwork, or from any other cause, you will find it difficult to find many doctors or kinds of medicine they may have tried without relief.

By special treatment a permanent cure is, in most instances, effected in a surprising manner. This treatment is reported to cure all kinds of blood, kidney, and private diseases, and for 15 years have been located in present offices.

Irregular, nervous, and permanently restores them to health. Free Consultation. Call or write for list of questions. Home treatment safe and sure.

DOCTOR WYATT, 230 Hennepin Avenue, Minneapolis, Minn. Office Hours—9 a. m. to 8 p. m. Sunday 10 a. m. to 12.

TRADE REPORT ENCOURAGING

Gains in Bank Reports and Railway Earnings.

New York, March 2.—Bradstreet's says: The trade reports from distributive centers at this time continue encouraging, while such measure of trade volume as bank clearings and railway earnings indicate a considerable gain in business over a year ago.

The strength of iron and steel this week equals the boom of 1899. It is probable, too, that the broad and strong consumptive demand and the active export trade will result in a steady advance.

Practically all markets report iron and steel higher, but special activity is noted at Pittsburgh, Birmingham and Chicago. St. Louis alone reports foundry iron consumers in-

different. At Pittsburgh bessemer pig is 75 cents higher and at Chicago southern pig is 10 cents higher. Steel billets now sell at \$3 over the pool price for prompt delivery. Stocks of pig and billets are reported small.

One price has not yet been fixed, and the improvement in iron may result in higher prices for the remainder of the year. The feature is the Advance of 40c per ton in steel sheets at Pittsburgh and Chicago. It will result in a higher price for orders, despite the fact that export orders for steel materials particularly is small. A sample of this is the order for 40,000 tons of sheet piling for the Panama canal.

Orders for railway material from Australia and Africa. Since traders are active at all markets and manufacturers are busy. The rush of western buying is on the wane at Boston, but new orders are being secured a busy time from now till October. Leather is advancing and corn being reported lower in a dull market. Corn is rather in better demand, but rumors of a "deal" at the Chicago market have been reported. Cuban sugar crop prospects are responsible for the slight weakness shown in raw sugars this week. Lumber is strong in price, pending the resumption of general building operations. Western orders are especially active. Chicago has done the heaviest business week since the beginning of the year. Stocks have been broken badly by the active demand which has advanced prices 1c to 1 1/2c. The market is expected to be rather slow to respond, however, and are still undecided, not to say weak. Copper is less active in export demand, but holds firm, while tin is again lower on weaker foreign demand.

Wheat (including flour) shipments for the week aggregate 5,232,313 bu. against 3,424,302 bu. in the corresponding week of 1900, 5,815,587 bu. in the corresponding week of 1899. From July 1 to date this season crop exports are 132,157,423 bu. against 134,380,598 bu. last season, and 168,714,574 bu. in 1898-99.

Corn exports for the week aggregate 4,153,449 bu. against 3,297,669 bu. last week, 4,532,720 bu. in this week a year ago, 5,794,983 bu. in 1899 and 6,044,894 bu. in 1898. From July 1 to date this season crop exports are 132,157,423 bu. against 134,380,598 bu. last season and 168,714,574 bu. in 1898-99.

Business failures in the United States for the week number 108, against 221 last week, 178 in this week a year ago, 170 in 1899, 232 in 1898 and 282 in 1897. Canadian failures for the week number 28, against 24 a week ago, 29 in 1899, 37 in 1898, 27 in 1897 and 51 in 1896.

Weekly Bank Clearings. New York, March 2.—The following table, compiled by Bradstreet, shows the bank clearings at principal cities for the week ended Feb. 28, with the percentage of increase and decrease as compared with the corresponding week last year:

Table with columns: City, Amount, Inc. Dec. Rows include New York, Boston, Chicago, Philadelphia, St. Louis, Pittsburgh, Baltimore, San Francisco, Cincinnati, Kansas City, St. Paul, Minneapolis, Portland, Des Moines, Omaha, Dallas, Spokane, Fargo, Sioux Falls, Helena.

CANNIBALS ON BOARD PROTESTANTS BUILD

Solomon Island Native Added to the Abaramda's Crew. Ground Is Broken for First Church in the Philippines.

COMMANDER TILLEY SAVES HIM IT WILL BE FOR THE METHODISTS

Man Is Afraid to Go Home for Fear He Will Be Killed and Eaten. Family of Charles Knox Give \$30,000 and a Native Donates the Site.

Washington, March 2.—Commander Tilley, the naval governor of Tutuila, reports to the navy department under date of Auckland, Feb. 1, that as an act of humanity he has added a native cannibal to the crew on the United States steamship Abaramda. He says:

I have on board the Abaramda for protection a Solomon Island native, who was found in the woods of Tutuila, where he had been a fugitive for more than twelve years. The man is a savage, is very black and does not speak any language which can be understood by the Abaramda crew.

Through an interpreter at Apia I learned from him that he was brought from the Solomon Islands to work on the German plantation in Upola a long time ago, he was badly treated, and that he, with his two companions, ran away and got over to Tutuila on a raft. The Samoans were trying to kill him and I took him on board ship to save his life.

His people are cannibals and he does not wish to return home for fear that after his long absence he has been forgotten and will be killed and eaten.

He is very industrious and useful on board ship, doing willingly all kinds of menial work. I have issued a ration to him and recommend that he be allowed to remain on board some of the navy until he can take care of himself.

POPE LEO IS NINETY-ONE

HE CELEBRATES HIS BIRTHDAY He Is Said to Be in Good Health—Narrow Escape From Accident at Mass.

New York, March 2.—The pope will celebrate his ninety-first birthday to-day, says a Rome dispatch to the World. Dr. Mazzoni says:

"His holiness is in marvelous health. He shows no sign of diminishing vigor—a miraculous thing in a man of his age." It is said that the pope had a narrow escape from a serious accident while celebrating mass Wednesday through the falling of a heavy brass candlestick, which had been insecurely placed on the altar.

SAMPSON WRITES A BOOK

ADMIRAL AT WORK ON MEMOIRS Spanish War From His View Point—Sobley-Sampson Controversy.

New York, March 2.—According to a special to the Press from Boston, it is reported at the Charlestown navy yard that Rear Admiral W. T. Sampson is at work upon a volume of memoirs.

The Sobley-Sampson controversy, it is said, suggested the plan to the admiral. The work will include a history of the Spanish war from the admiral's viewpoint.

MILWAUKEE MAN BUNCOED

He Tried to Beat the Pool Rooms, and He Loses. New York, March 2.—Detectives from Milwaukee, assisted by Constable Goodrich, made a raid on a suite of offices in the Imperial building, at 262 Clark street, and captured a wagon load of telegraphic instruments, wire and other stuff, alleged to have been used by "fake" wire tappers.

Some days ago a merchant of Milwaukee, while standing about a Chicago hotel lobby, was accosted by a dapper young man, who unfolded a plan to beat the pool rooms by tapping race track wires, by holding back the race returns until the "faking" party had made bets.

Not wishing to trust to the local police, he secured the services of Milwaukee detectives. The "fake" wire tappers were not found.

ABOLISH SWEATING

Movement Is to Extend All Over the United States. New York, March 2.—"The greatest movement for the abolition of the sweating system ever known in this country has now been started," said Henry W. Taft, leader of the Brotherhood of Tailors.

"The United Garment Workers of America will back us up in this movement. It is now being carried on in all large clothing centers. We shall be able to avoid a big strike of 40,000 clothing workers in this city."

Bishop Potter, President Gompers, Professor Felix Adler, Henry White, general secretary of the United Garment Workers of America, and others will be asked to help.

DEBT TO DEMOCRATS

Senator-Elect Mitchell of Oregon Declares His Position. Portland, Ore., March 2.—Senator-elect J. M. Mitchell, who will leave for Washington to-day, was given a reception last night by the Commercial Club. In a brief address he said:

I am a republican, as you all know, in politics, but I dare to say, and I don't care who knows it, that I owe much to the democrats, and I go to Washington to represent, not so far as the whole people of the state, irrespective of party.

The published statement that I am opposed to the Nicaragua canal is false. I have always been in favor of the canal.

RECRUITS SUBDUED

Matiny in Texas Was Caused by Too Much Liquor. Ennis, Texas, March 2.—The matiny among the recruits going to the Philippines has been quelled. The volunteers left for San Antonio under guard of regulars from Fort Sam Houston.

The recruits had liberty for a few hours here and several got drunk. The officer in charge tried to use his authority, but most of the recruits refused to obey and fell to fighting among themselves. Several were badly hurt.

HARRIS DYER'S DEATH. Harris H. Dyer, the son of W. Dyer of Excelsior, died Feb. 28 of consumption, at Walker, Minn. He leaves a wife and three children. The funeral will be held at Excelsior, probably Sunday afternoon.

NEW PATENTS. Washington, D. C., March 2.—(Special.)—The following patents were issued this week to Minnesota and Dakota inventors, as reported by Williamson & Merchant, patent attorneys, 323-95 Guaranty Loan building, Minneapolis, Minn.:

Edward Anderson, Hunter, N. D., marker for planters. Otto and F. E. Anderson, Stillwater, Minn., combination match-cut and cigar-cutting. Harry W. Chapman, Minneapolis, Minn., merchant's short-account case. David France, Hawley, Minn., fax separator. John L. Owens, Minneapolis, Minn., grain separator. Edith E. Shogren, Vermillion, S. D., lawn mower. John W. Stevens, St. Paul, Minn., automatic flushing tank. Joseph C. Therien and A. E. Groen, Minneapolis, Minn., mould box or form for conduit joints. Geo. E. Thompson, Willmar, Minn., station indicator. Charles L. Travis, Minneapolis, Minn., elevator. Alexander George Medford, Minn., artificial limb.

THE DANGER OF WINTER IS CATARRH

Three Public Men Tell How Pe-ru-na Has Promptly Eradicated Catarrh.

YOU HAVE chronic catarrh, have you? You have had it some time? And could not find a cure? Well, there are thousands more like you in this country. If the slightest vestige of the catarrh remains over from the warmer season it will make itself felt now. If you want to really get cured do so as the following people did:

Chronic Catarrh. S. I. Nance of Robeson Fork, Tenn., writes as follows: "I will state that I am entirely well of this dreadful disease, catarrh. I was afflicted with it for fifteen years, and it was a very aggravated case for the last five years. No one can possibly realize the value of Peruna until he tries it for himself. It will certainly cure the worst case of chronic catarrh. I had as bad a case as I ever saw. I have taken seven bottles of Peruna and every one was worth \$100 to me. I haven't the language to express my gratefulness to you for your kindness to me and the interest you have taken in my case.—S. I. Nance.

Res. It is following words of the worst case of chronic catarrh. I had as bad a case as I ever saw. I have taken seven bottles of Peruna and every one was worth \$100 to me. I haven't the language to express my gratefulness to you for your kindness to me and the interest you have taken in my case.—S. I. Nance.

Perhaps the average length of time it takes to cure a genuine case of catarrh is three months. Some get cured much sooner than this. Stubborn cases may require longer treatment. Time or trouble ought to be no barrier to one afflicted with this dreadful disease.
