SHE CAUGHT 15 BASS

A Fair Fisher in a Great Quarry. They Must Wait a While for Good Fishing.

WAS NOT FISHING FOR BASS And the Hungry Denizens of the Lake Persisted in Swallowing the Hook.

It is all about that horrid lake against catching bass before June 1," writes a young woman who believes in keeping within the bounds of the law, but here, in the most unintentional way, I find myself an accessory after the fact to booking a bass out of season. It all happened this way:

A friend and myself went out to lake yesterday at the opening of the season to catch fish not under the ban. Having in mind that to catch bass would be a trespass, we laid out plans accordingly with every disposition not to lead the bass into temptation. In fact, we kept clear of the spots in the lake known as the congregating points for bass, and chose only such stretches of water as were known to be the favorite resorts of pickerel, pike and crappies.

Caught Many Bass. Will you believe it—even though our bait was intended to discourage the forbidden fish—we caught fifteen beauties, and each one was a bass. In strict compliance with the law, our first and most natural impulse was to throw the poor things back into the lake. Investigation showed that each of them, being caught in the same manner, had been swallowed by the hook in that case, as you knew. Warden Fullerton's instructions are that the fish must be kept. The law doesn't say anything about doctored baits, and we were sure that the fish would recover. To keep the fish from spoiling we had to cook them, and some are even now frying in the kitchen.

shorter than the specifications called for. The government being very particular as to details, refused to accept the boat when bought, and Commodore Zimmerman compelled her at a snap bargain, afterwards sending to the building contractor. She was built for speed and the builder had that idea uppermost in mind in constructing her.

BIG TROUT ANGLERS They Must Wait a While for Good Fishing. Dell Rudd, who knows "some" about fishing, explains why wise trout anglers will not go fishing just at present. "It's a sheer waste of ammunition to go after trout—I mean big trout especially—during present climatic conditions," says Mr. Rudd. "Wait for a rainy day—that's my tip. Big trout are much more wary than smaller fry of that ilk. Their favorite haunts are deep, murky pools where they are abundant without being easily spotted from the bank. There has been so little rain this season that the pools are so shallow or the water too clear. Your big trout won't play unless he can see you with a sense of security. He won't frequent the dark holes unless the water is muddy enough to conceal him. Under such conditions trout will be found in abundance where they ordinarily are not. I am aching for another go at the speckled fellows, but the short trip I took a week ago has persuaded me to wait for rainy day."

MINNESOTA SECOND In College "Fifty" Competitive Strength Tests. Harvard concedes that Roy Wint Allis of the University of Minnesota takes precedence over Herbert, who has hitherto been recognized as the college strong man. A disclaimer from Boston says that Herbert's record of 1,869 kilograms is his limit. Arthur Tyng is the second strong man at Harvard. He made 1,733 kilograms on Monday. Herbert will leave Harvard soon and Tyng is looked upon as the coming man. Herbert did not participate in the recent trials.

In strict compliance with the law, our first and most natural impulse was to throw the poor things back into the lake. Investigation showed that each of them, being caught in the same manner, had been swallowed by the hook in that case, as you knew. Warden Fullerton's instructions are that the fish must be kept. The law doesn't say anything about doctored baits, and we were sure that the fish would recover. To keep the fish from spoiling we had to cook them, and some are even now frying in the kitchen.

Will you believe it—even though our bait was intended to discourage the forbidden fish—we caught fifteen beauties, and each one was a bass. In strict compliance with the law, our first and most natural impulse was to throw the poor things back into the lake. Investigation showed that each of them, being caught in the same manner, had been swallowed by the hook in that case, as you knew. Warden Fullerton's instructions are that the fish must be kept. The law doesn't say anything about doctored baits, and we were sure that the fish would recover. To keep the fish from spoiling we had to cook them, and some are even now frying in the kitchen.
