Poor Teeth a Prisoner's Defense

Special to The Journal. Milwaukee, Wis., June 8.—A firm of lawyers in the case of Thomas O'Neill, charged with being a thief, will offer as a defense that he had teeth made a man irresponsible for crime. They will bring some expert testimony to show that decayed molars have caused men to commit all sorts of crimes.

It is said they rely principally upon the exhaustive investigations said to have been made along this line by Dr. Federspiel of the Racine county insane asylum. The doctor has made diligent research and has come to the conclusion that defective molars and bicuspids have a tendency to cause men to commit crimes.

He advanced his theory to some of his physician friends some time ago, and the knowledge of his peculiar theory having come to O'Neill's attorneys, they propose to use it as a means to keep their client from prison.
