TOGETHER WITH WATER

Mr. Moody Tells How to Approach the Problem. NEW PUMPING STATION FIRST PUBLIC MEET DEMAND IT-CITY COUNCIL POWERLESS WITH PUBLIC SENTIMENT.

Through a deal made with the manufacturer, who has gone out of the business, we are enabled to offer the following sizes at about half the regular price.

Table with 3 columns: Brand, Price, and Quantity. Includes PRINCESS, LONDRES GRAND, REGALIA REINA, etc.

THE CITY

TOWN TALK

See Journal real estate Saturday for excellent opportunities in real estate. You need one of these new belts as well as the \$5 suit case from Barnum's trunk store.

Flowers for funerals and all other purposes shipped to all parts of the northwest. Mendall's florist, 87 1/2 Sixth street S.

Free! The beautiful gravure "Frightened Horses" (price \$2), free with 2x2x3 appropriate frames 2c (half price), to advertise Syracuse Easy Washer, 411 Hennepin.

Workers at the St. Paul boom, yesterday, recovered the body of little Mary Rosenfeld from the river. This is the third of the four victims of William Rosenfeld's murder, about two months ago.

The Flambau Club yesterday opened new quarters in the Bijou opera-house block. The new rooms are on the third floor of the building, and the suite comprises a reception hall, a large room for business sessions and a locker-room. The club now has a membership of 125.

Minneapolis presbytery last Monday granted the application of Oliver church for a grant from the board of church erection. The saving of Oliver church would have a salutary effect on the twentieth century movement toward the payment of the church debts in this city.

Two promotions in Battery B, M. N. G., were made last night. Sergeant Wilson was elected junior lieutenant, to fill the vacancy caused by the recent promotion of Lieutenant Pray and Harry Hansen. Corporal Harry B. Hadden was advanced to quartermaster sergeant in place of Harry Hansen, who has joined the First Regiment band.

An effort is being made to infuse new life into the Republican association, and as a beginning it is proposed by the club to give a smoke social Monday evening next in the rooms in the Bijou theater building. Short addresses and interesting musical numbers will be given. The rooms of the association have been thoroughly renovated and refurbished throughout.

It was Dan A. Soderberg's tailor shop, not Miller's clothing store at 125 Washington avenue N., which suffered such a heavy loss from burglars Tuesday night. Mr. Soderberg said yesterday that he was unable to fully estimate the loss or enumerate the amount of mink clothing which had been carried away. What he is probably not as large as at first estimated, Mr. Soderberg says it will not fall short of \$500.

Visitors, who just rang around, with no visible means of support, but who, nevertheless, secure a livelihood and, therefore, become suspicious characters, have been told to "vamoos" from Minneapolis, and the detectives of the police department have been instructed to see that they do it. Captain King is said to have issued a mandate that means the town will soon be rid of this class of loafers.

Zion Commandery, No. 2, Knights Templar, will make a pilgrimage to Lake City tomorrow afternoon, where it will take the orders of the Red Cross and Order of the Temple on a large scale. The party will leave the Milwaukee depot at 2 p. m., a second party going at 8:25, and will return to Minneapolis at 8:30 Sunday morning. Lake City knights are making great preparations for the reception of the visitors.

Weather Predictions. Minnesota—Generally fair Saturday, preceded by showers this afternoon and in northeast portion to-night; cooler in west portion to-night; variable winds. Wisconsin—Showers and thunderstorms this afternoon and to-night; Saturday generally fair; fresh southerly winds, becoming variable. Iowa—Generally fair to-night and Saturday; cooler to-night; variable winds. North and South Dakota—Fair to-night and Saturday; cooler to-night; westerly winds. Montana—Fair to-night and Saturday; slightly cooler to-night; westerly winds.

Weather Conditions. Rains have fallen during the past twenty-four hours in most of Minnesota, southern Wisconsin, the Dakotas, Montana, Manitoba and Saskatchewan, the western parts of New York and Pennsylvania and in Tennessee. The heaviest rains were 1.24 inches at Devils Lake, 1.08 at Knoxville and .90 at Rapid City. Yesterday's temperatures were high in the southern states, with 102 degrees at El Paso, 100 degrees at Abilene and Shreveport, and 96 degrees at Oklahoma, Memphis and St. Louis. The pressure is moderately low in North Dakota and high on the Atlantic coast and the north Pacific coast.

Maximum Temperatures. Maximum temperature for the twenty-four hours ending at 8 p. m. to-day: Upper Mississippi Valley—Minnesota... 78 La Crosse... 78
Davenport... 82 St. Louis... 96
Lake Region—Buffalo... 72 Detroit... 74
Marquette... 82 Sault Ste. Marie... 83
Escanaba... 80 Green Bay... 80

Buying Heavily. Minnesota Men Take Tracts of Oregon Timber Land. Minnesota men are buying heavily in Oregon timber lands, according to Portland dispatch to a New York paper a few days ago. The dispatch says that more sales have been made this year along the lower Columbia than for many years previous and that many more are likely to be consummated before the summer is far advanced. The sales have been made mostly to men who have been interested in lumbering in Minnesota and are familiar with the situation in the northwest, having had the land thoroughly cruised in previous years by their representatives.

Phone Bills Are Big. State Officials Have Already Exhausted the \$800 Appropriation. State officials have been using the telephone too freely. In consequence the state appropriation of \$800 has already been exhausted. Auditor Dunn has issued a notice to state officers that for the remainder of the year telephones must either be done away with or paid for out of the pockets of those who use them. The bill in the janitor's office amounts to \$400 and in the janitor's room, where the general public is accommodated, to \$400.

DR. RITCHIE HURT. By the return of his busy at the corner of Ashland and Dale street, St. Paul, yesterday, Dr. Harry P. Ritchie was thrown to the pavement and severely injured. Bad bruises were received about the limbs.

AND THIS IS THE FACT

Mayor Ames Considered a Puritan at Law Enforcer in Buffalo. Freight and Passenger "Hustlers" and "Community of Interest" THE FORMER FEAR THE LATTER

A CURIOUS NEWSPAPER ERROR The Centralization of Power May Result in a Large Number of Vacancies.

Law-and-Order Paper, Regrets That Pan-American City Hasn't Such a Mayor.

Mayor and Surgen-General A. A. Ames has been in Buffalo for almost a week, and from the tenor of the newspaper remarks it would seem as if he has already impressed his unique personality upon the bison community quite effectively. The editor of the Buffalo Enquirer, who has been in the city since the Buffalo reporters have waked up to a proper appreciation of what an easy mark the doctor is for the interviewer or who is out to fill space and prefer "dishing hot stuff," for they have seemingly failed to "get next," being satisfied to take someone else word for the greatness of the doctor's strenuous life, his administration. Here is the way the Buffalo Enquirer handles him in its issue of June 18:

Mayor Ames of Minneapolis is a beautiful specimen of the modern politician. I can tell you one thing, said a big, husky westerner, who hails from Mayor Ames' town, "we've got a mayor that is a mayor. He's not one of those 'corker' corkers." Out our way we need a man that's got a backbone made of steel. That's the way Ames is built. He used to belong to the same political party with me and we got out and hustled for the same cause; but he was too stiff a proposition for the democrats and they turned him down after his first term as mayor on their side.

"And what do you think he did then?" continued Ames' enthusiast.

"I'll tell you. He quit the party and became an out-and-out republican, was nominated for mayor and elected with a great majority. I supported him because he is the only one of his kind in the city."

"Then you don't have much trouble out your way so far as running the city is concerned?"

"Not a bit," Ames' brother in chief of police, and between the two of them we've got a city that can't be beat much."

When told of the way things were run here under the present mayor and police department, the big westerner burst out in an enthusiastic speech, in which he said: "By gosh, I wish Ames' old step into your mayor's shoes for about forty-eight hours and a work of that kind before the city would be complete half of this program, if no other means of revenue is provided than that of the net earnings of the department. The committee proposed this year to go about with the installation of a water filtration plant, but ran right up against a ruling of the city attorney that under the charter it had no right to anticipate revenues. Before that the committee, I believe, had the Hennepin delegation to get it to consent to a bill authorizing the issuing of \$400,000 of bonds for water supply purposes, but was turned down. Later the committee got through the council a resolution authorizing the city to raise revenues of the department for the erection of a new pumping station in Northeast Minneapolis. The site has been purchased, the necessary work on the forays in the river bank, and the city clerk is now advertising for bids for stone for the foundation, while part of the committee is east looking up pumps. It will take all of the \$50,000 to erect the station and a good deal more besides.

Without other means than the department earnings it will be two years or more before we can have the water filtration operation. When it is, there will be a plentiful supply of water from such a distance above the city as to assure absolute safety from sewage contamination. It seems to me that this is a splendid proposition. The present North Side station water is all right on this score, but the trouble is that there is not enough of it. That station cannot furnish sufficient water during summer months. At such times and in the event of accidents, we necessarily have to use the down town pumps, and there is where the mischief is done. When the new pumping station is in operation I believe it should proceed to the subject of filtration and expansion of the distributing system. But the first essential, in my estimation, and I think the committee are right in this, is a plentiful supply of up-the-river water for all seasons of the year and under all conditions. If the public insists upon having this and other things as well right away, it will have to jump in and use its influence to get the money to do it with. St. Louis, Chicago and other cities are spending vast sums of money to get better water supplies and Minneapolis has got to wake up to the necessity of similar action.

Relief Two Years Away. Without other means than the department earnings it will be two years or more before we can have the water filtration operation. When it is, there will be a plentiful supply of water from such a distance above the city as to assure absolute safety from sewage contamination. It seems to me that this is a splendid proposition. The present North Side station water is all right on this score, but the trouble is that there is not enough of it. That station cannot furnish sufficient water during summer months. St. Louis, Chicago and other cities are spending vast sums of money to get better water supplies and Minneapolis has got to wake up to the necessity of similar action.

CHILD LAY STILL. Three Engines Pass Over It Without Serious Injury. Three engines on the Milwaukee tracks at Thirteenth avenue 8 ran over little Tessie Took at 8 o'clock yesterday night. The child escaped with her life, suffering only painful bruises about the head. Tessie lives with her parents, Mr. and Mrs. John Took, at 509 Grand street. The child was on the railroad tracks. The little girl, who is 9 years old, was playing in the yard when the house of one of her playmates across the street was quarantined and a large placard announcing diphtheria was posted near the door. She asked her mama what the sign was and was told that she might run over and read it herself. This she did, and then turned back towards home, when she was struck by an engine which was pushing two "dead" engines to the roundhouse. The child was knocked down between the tracks and the three engines passed over her body. She did not attempt to rise, perhaps because of fright, but the fact that she remained quiet on the ground accounts for her escape from death. After the engine had passed little Tessie started to cry for her mother, who had been standing in the yard and had seen what she supposed was the killing of her child. She was nearly prostrated. Dr. de la Barre was called and he found that the injuries were not serious. The child's father is employed by the Union Railway Storage company.

TALKS FOR FRUIT GROWERS. Professor W. H. Cole, superintendent of public schools at Huntington, W. Va., spoke at the afternoon meeting of the Horticultural society yesterday on the progress of the northwest as viewed by an eastern man. Professors Snyder and Haeker of the experimental station, gave some interesting information on the growth of the dairy products of the state during the past year. Professor Reynolds in an address said that veterinary science had kept pace with medical science. E. Underhill, of the state fair grounds and asked the society for a big exhibit this fall. "The Army of Flowers" was the subject of a paper by Mr. Grimes.

Beautiful Lake Minnetonka, Round Trip Only 90c. You can leave Minneapolis via C. M. & St. P. railway at 9:30 a. m. (daily), 1:30 p. m. (daily), 6:00 p. m. (daily), and connect with steamers of Lake Minnetonka Navigation company for tour of the lake. Trains leave the lake returning at 1:00 p. m. (daily), 4:00 p. m. (daily), 6:00 p. m. (except Sunday), 10:45 p. m. (daily). Tickets, including tour of the lake, 90c each. Apply at "The Milwaukee" offices. You can leave Minneapolis on afternoon trains, take evening dinner and attend hop at Hotel St. Louis, Minneapolis, at 10:45 p. m. (daily). Minneapolis to Hotel St. Louis (Minnetonka) and return, 50c.

"Cottagers" can reach Minneapolis on afternoon and evening trains for the evening and return to the lake at 11:45 p. m. (daily). For full Minnetonka train schedule see time table in this paper.

It will take all of the \$50,000 to erect the station and a good deal more besides.

Without other means than the department earnings it will be two years or more before we can have the water filtration operation. When it is, there will be a plentiful supply of water from such a distance above the city as to assure absolute safety from sewage contamination. It seems to me that this is a splendid proposition. The present North Side station water is all right on this score, but the trouble is that there is not enough of it. That station cannot furnish sufficient water during summer months. At such times and in the event of accidents, we necessarily have to use the down town pumps, and there is where the mischief is done. When the new pumping station is in operation I believe it should proceed to the subject of filtration and expansion of the distributing system. But the first essential, in my estimation, and I think the committee are right in this, is a plentiful supply of up-the-river water for all seasons of the year and under all conditions. If the public insists upon having this and other things as well right away, it will have to jump in and use its influence to get the money to do it with. St. Louis, Chicago and other cities are spending vast sums of money to get better water supplies and Minneapolis has got to wake up to the necessity of similar action.

Relief Two Years Away. Without other means than the department earnings it will be two years or more before we can have the water filtration operation. When it is, there will be a plentiful supply of water from such a distance above the city as to assure absolute safety from sewage contamination. It seems to me that this is a splendid proposition. CHILD LAY STILL. Three Engines Pass Over It Without Serious Injury. Three engines on the Milwaukee tracks at Thirteenth avenue 8 ran over little Tessie Took at 8 o'clock yesterday night. The child escaped with her life, suffering only painful bruises about the head. Tessie lives with her parents, Mr. and Mrs. John Took, at 509 Grand street. The child was on the railroad tracks. The little girl, who is 9 years old, was playing in the yard when the house of one of her playmates across the street was quarantined and a large placard announcing diphtheria was posted near the door. She asked her mama what the sign was and was told that she might run over and read it herself. This she did, and then turned back towards home, when she was struck by an engine which was pushing two "dead" engines to the roundhouse. The child was knocked down between the tracks and the three engines passed over her body. She did not attempt to rise, perhaps because of fright, but the fact that she remained quiet on the ground accounts for her escape from death. After the engine had passed little Tessie started to cry for her mother, who had been standing in the yard and had seen what she supposed was the killing of her child. She was nearly prostrated. Dr. de la Barre was called and he found that the injuries were not serious. The child's father is employed by the Union Railway Storage company.

TALKS FOR FRUIT GROWERS. Professor W. H. Cole, superintendent of public schools at Huntington, W. Va., spoke at the afternoon meeting of the Horticultural society yesterday on the progress of the northwest as viewed by an eastern man. Professors Snyder and Haeker of the experimental station, gave some interesting information on the growth of the dairy products of the state during the past year. Professor Reynolds in an address said that veterinary science had kept pace with medical science. E. Underhill, of the state fair grounds and asked the society for a big exhibit this fall. "The Army of Flowers" was the subject of a paper by Mr. Grimes.

Beautiful Lake Minnetonka, Round Trip Only 90c. You can leave Minneapolis via C. M. & St. P. railway at 9:30 a. m. (daily), 1:30 p. m. (daily), 6:00 p. m. (daily), and connect with steamers of Lake Minnetonka Navigation company for tour of the lake. Trains leave the lake returning at 1:00 p. m. (daily), 4:00 p. m. (daily), 6:00 p. m. (except Sunday), 10:45 p. m. (daily). Tickets, including tour of the lake, 90c each. Apply at "The Milwaukee" offices. You can leave Minneapolis on afternoon trains, take evening dinner and attend hop at Hotel St. Louis, Minneapolis, at 10:45 p. m. (daily). Minneapolis to Hotel St. Louis (Minnetonka) and return, 50c.

"Cottagers" can reach Minneapolis on afternoon and evening trains for the evening and return to the lake at 11:45 p. m. (daily). For full Minnetonka train schedule see time table in this paper.
