

Disfigured Skin

Wasted muscles and decaying bones. What have! Scrofula, fat alone, is capable of all that, and more.

Hood's Sarsaparilla

Which expels all humors, cures all eruptions, and builds up the whole system, whether young or old.

600 additional men. The Six Mile Ferry plant is an independent union mill.

At the Monongahela plant of the American Tin Plate company, the fishers were notified that the company would be compelled to close down the department in two or three days, on account of lack of sheared material.

American Federation Aid

National Organizer Thomas H. Flynn, of the American Federation of Labor, came to Pittsburgh from Washington this morning and after a conference with the officials of the Amalgamated Association, pledged the support of the federation in the strike.

Not So Fast

A rumor that gained considerable circulation to-day that the strike had been, or would be, settled within forty-eight hours, was promptly denied by President Shaffer.

Idle Engineers

Mining Operations in the Lackawanna Valley Tied Up.

Scranton, Pa., July 17.—There was an almost complete cessation of mining operations to-day in the Lackawanna valley because of the strike of the stationary firemen.

Doesn't Like the Losses Undergone

New York Sun Special Service. New York, July 17.—J. Pierpont Morgan is said to be badly worried over the steel strike.

John Burns' Interpretation

London, July 17.—The steel strike in America is attracting much attention in England generally.

Tin Plate Workers "Stand By"

Elwood, Ind., July 17.—It was announced this morning that the Tin Plate Workers' Protective Association will stand by the Amalgamated Association and refuse to work plates Henry's steel trust.

Considerations on the Control of the Supply of It.

A CAST OF THE TOPOGRAPHY

Good Attendance at the Tri-State Drainage Association at Fargo.

KITTREDGE RESIGNS

He Will No Longer Act as Attorney for Railroads.

HARD TO BREAK.

But the Coffee Habit Can Be Put Off.

"I was a coffee user from early childhood, but it finally made me so nervous that I spent my days in sleepless nights, starting at every sound I heard, and suffering with a continual dull headache.

The first trial, the Food Coffee was flat and tasteless, and I thought it was horrid stuff, but my friend suggested I try again and let it boil longer. This time I had a very delightful beverage, and I was again enjoying it ever since, and am now in a very healthy condition of health.

My brother is also using Postum instead of coffee, and a friend of ours, Mr. W., who was a great coffee user, found himself growing more and more nervous and was troubled at times with dizzy spells. His wife suffered with nausea and indigestion, also from coffee. They left it off and have been using Postum Food Coffee for some time and are now in a perfect condition of health.

Put a piece of butter in the pot, the size of two peas, to prevent boiling over.

GOOD ENOUGH IN TWO.

Devils Lake Says Wheat and Flax Never Looked Better.

AND MANITOBA IS HAPPY, TOO

Reports From Other Sections of the Northwest, Some Good, Others Bad.

Special to The Journal. Devils Lake, N. D., July 17.—The past week has been fine for the growing crops.

The wheat of this section promises to be the largest in the history of the country. Harvesting will be in full blast within three weeks and there will be a big demand for farm hands throughout this section.

Wages will run from \$2 to \$3 per day and board. It is estimated that wheat will yield in this county, and flax from 10 to 25 bushels. The late sown flax will produce the best.

Special to The Journal. Bismarck, N. D., July 16.—Director Bronson of the North Dakota section of the weather bureau reports on the crops as follows for the week ending June 15:

The past week has been a very favorable one for all crops. The fore part was cool, with light showers, followed by the latter part by hot, dry weather, just what was wanted for all vegetation.

Wheat still maintains its good condition, and has still further improved during the week; it is heading in all parts of the state, and in the southern portion slightly; the heads are generally reported as slightly shorter than usual, but with few exceptions they are filling well.

Other small grain has also improved during the week; some barley is nearly ready for harvest in Ramsey county; oats are not as good as crop as a whole, but the best of the crop has been done there by worms and insects earlier in the season, from which they have not recovered.

Corn has made rapid growth in all sections, as all it wanted was warm weather; flax has improved some, but the general opinion is that the crop at best, with the most favorable weather from now on, will not amount to much.

While some grain has been damaged in portions of the Red river valley by water standing on it, yet the amount of damage, as compared with the crop of the state, is very small.

The hay crop, both wild and tame, was never better, the growth being excellent. Haying has commenced in many parts of the state.

Manitoba.

Special to The Journal. Brandon, Man., July 17.—The intense heat is having a good effect on the crop which has had very heavy rains of late but not given the crops a much needed shower.

South Dakota.

Special to The Journal. Clark, S. D., July 17.—The hot weather last week did very little damage to crops in Clark county. A long drive yesterday showed very good crops of wheat and corn.

Eureka, S. D., July 17.—Fine rains have fallen here and are doing good work. Bowdle, S. D., July 17.—Considerable rain fell which will help to save damaged crops.

A prairie fire devastated thousands of acres in Folk and Edmunds counties Sunday. It swept eastward, destroying everything in its path. Several large ranches lost hundreds of dollars worth of hay.

Wisconsin.

Special to The Journal. Milwaukee, Wis., July 17.—Unless there is a soaking rain in the southern tier of Wisconsin counties within a short period the result to farmers will be serious, for the grass and ordinary crops are being killed out of the ground.

In many sections, according to all reports received here, a rain even now could not save the pastures, although it would be of great benefit to the corn and other crops that need water. On the whole, however, it is believed that the crops in Wisconsin have suffered no worse from drought this year than they have in the past.

The difference is that the drought has come earlier this year than usual. It is believed that outside of the dairymen, there is no class of farmers who are not suffering from the drought.

La Crosse, Wis., July 17.—The terrible heated spell under whose throes La Crosse and vicinity has been suffering for the past few days, is being relieved by a terrific rain and electrical storm this morning.

The temperature has ranged between 83 and 97 degrees for a week. The rain will be a great benefit to crops in this vicinity, which were on the verge of ruin owing to the dry, hot spell.

Iowa. Des Moines, Iowa, July 17.—Rain failed to make its appearance in Iowa last night and there is every indication that it will not appear to-day. Reports received by the local weather station show a slight trace at Estherville, in the northern part of the state. This is the fourteenth day without rain since the drought started in Iowa, with the exception of several slight rains in isolated sections. Crops are suffering, but it is still maintained by experts that if rain comes within two days the corn crop will be saved. This morning there was every promise of another scorcher. The temperature at 9 o'clock was 83, with a stiff breeze blowing.

SAME BOGGSB PROBABLY

A Watertown, S. D., Pastor Is Charged With Plagiarism.

A special dispatch from Watertown, S. D., says that a council representing the Northern Congregational association is considering the case of Rev. E. B. Boggs, charged with plagiarism.

Although the minister on trial at Watertown does not bear the same initials as the Mr. Boggs who was, in 1892, pastor of Lowry Hill Congregational church, it is believed by some of the members of that society that he is the same man. If so, the present is not the first time that the Rev. Mr. Boggs, who came to Minneapolis from Wisconsin, was followed from Wisconsin by unsavory stories and a rather serious charge of plagiarism.

He was awarded damages amounting to \$7,000. A subsequent trial resulted in a smaller judgment, which was paid.

When Mr. Boggs left Lowry Hill church, the congregation was seriously divided, condition which the common sense administration of Rev. Alex. MacGregor eventually remedied.

Minneapolis Dry Goods Co. A Day of Bargains. Certain lines are still too full. We name some of them below, with a few Clearance and other special prices. Watchful eyes are the ones that discover opportunities.

Undermuslin Dept.

Cambric Drawers, umbrella style, with deep lawn flounce tucked and trimmed with torchon lace. Pair 39c

OMAHA FOLK TALK AGAN Continued From First Page. familiar, and that is the case of the state of Iowa. Years ago conditions there as respects Chicago competition were about the same as they are here.

State Electro-Medical Institute. "I cure stricture without cutting or dilating thus avoiding the horrors of surgery." My original and strictly modern treatment for Stricture cures the disease. It is the only treatment that should ever be used, and the only one recommended by the legions of men who have recently been cured by it. It acts immediately and directly upon the Stricture, dissolving it completely and dislodging all diseased tissue, which comes away in strips or shreds like fibra, leaving all irritation and inflammation entirely free from obstruction and in a sound, healthy condition.

MASTER SPECIALIST. We Also Cure to Stay Cured Varicocele, Contagious Blood Poison, Nervo-Sexual Debility, Rupture, Kidney and Urinary Diseases, and all associate diseases and weaknesses of men. We charge nothing for private counsel, and give each patient a LEGAL CONTRACT to hold for our promise. Is it not worth your while to investigate a cure that has made life anew to multitudes of men?

CONSULTATION FREE AND CONFIDENTIAL. Office Hours—8 a. m. to 8 p. m. Sundays—10 a. m. to 12 m.

State Electro-Medical Institute 301 Hennepin Avenue, Minneapolis, Minn.
