

TO HANG UNTIL DEAD

Andrew Tapper Convicted and Sentenced at Chaska.

PASSES THE ORDEAL UNMOVED

Governor to Fix the Date of Execution-Sentence of Court Indorsed.

Special to The Journal. Chaska, Minn., Oct. 23.—Andrew Tapper, the convicted murderer of Rosa Miza, was sentenced by Judge Cadwell this morning to be hanged by the neck until dead. The courtroom was filled with people, and there was no cooler person present than Tapper himself.

When asked if he had anything to say why sentence should not be pronounced, Tapper kept silent and without show of malice or bravado, listened to the words which ordered him to the gallows. He was cool and collected and went back to his cell in the county jail without a word, and as if the impressive scene through which he had just passed was of no personal interest to him. It is almost impossible to believe that he realizes his situation.

The trial came to a close late yesterday afternoon when the jury brought in a verdict of guilty in the first degree, after being out less than an hour. The facts brought out by the testimony were that the girl was murdered at 5 o'clock a. m., June 3, 1901, her throat being cut. Several wounds were also found on her legs and arms, showing that a terrible struggle had ensued before Tapper succeeded in overpowering her.

PLYMOUTH CHURCH REMOVAL

The Matter Is Finally Referred to a Committee.

Plymouth Congregational church congregation discussed removal last evening at an adjourned meeting. Opinion was divided on the subject and after considering the question for two hours the matter was referred to a committee of seven: E. P. Walter, J. B. Bell, George R. Lyman, N. F. Hawley, Joseph R. Kingman, David Perry Jones and George W. Beach. The motion to allow this committee to select a new site and consider plans and bids for the old property was lost. Charles S. Hulbert, chairman, believed that the time was not ripe for the sale of the property as it might reach a value of \$2,000 a front foot.

COURT NEWS

COURT TERM NEARLY OVER

Cases Being Put Over Until the November Term. The November term of the district court is almost here. Attorneys wishing to get their cases on the calendar must file their notes of issue by Saturday. Criminal and civil cases of the September term are being continued in large numbers. Among the criminal cases continued yesterday were three against William Colvin and three cases against George Kent for the alleged selling of liquor without licenses, likewise the cases of Charles Wallace and Robert Weller accused of indecent assault, and John Stock indicted for complicity in the assault on Daisy Wolford.

OTHERS WERE OPEN

Peter Blar's Excuse for Opening His Saloon Sundays.

Peter Blar was fined \$25 this morning for keeping his saloon open on Sunday. He admitted guilt and his only excuse was that all the other saloons in the city were open that day. It was in Blar's saloon, at First and Nicollet, that Hogan shot Kolk while discussing anarchy.

BACK AT ST. CLOUD

Nelson Hanson Who Escaped From Reformatory in 1896.

Nelson Hanson who escaped from the St. Cloud reformatory in 1896, has been returned to the institution. He went east after leaving his state, but was caught in one of his crimes and sentenced to five years in the New Jersey penitentiary.

Alexander's Books O. K.

The books of the jail, kept by Captain Alexander, have been examined by Deputy Public Examiner H. C. Koerner, who is checking up the accounts of the sheriff's office, and have been found O. K.

Notice Served Improperly.

Failure to serve notice of foreclosure proceedings on a proper party has lost a case for the Connecticut Mutual Life insurance company. The statute requires that if neither the owner nor occupant of the mortgaged premises are at home the notice may be served on any person of suitable age who is a resident therein. In proceedings against Daniel and W. D. Gallagher, the notice was left with a servant girl who was visiting her sick sister. She was also acting as substitute for her sister, and it was contended that she was practically a resident of the house. The jury found for the Gallaghers, however.

Waterspout on Old Michigan

Special to The Journal. St. Joseph, Mich., Oct. 23.—The first waterspout on the east shore of Lake Michigan was sighted between South Haven and Saugatuck. Tons of water in the form of a round column shot up into the air fully fifty feet. The little steamer Alebar, which operates between Saugatuck and South Haven, suddenly encountered the waterspout. Tons of water fell upon her decks and for a few minutes it was thought the boat would sink under the terrible pressure and weight of water. Several times the little craft swayed rail-deep on either side. The crew ran to the life preservers but the boat righted herself as the waterspout broke. No sea prevailed and the steamer continued on her journey to South Haven.

BACON IN THE NORTH

Sees Nothing but Prosperity for Iron and Steel Trade.

1902 A BIGGER YEAR THAN 1901

President of the South's Greatest Iron Makers Concerned Visits Duluth.

Special to The Journal. Duluth, Minn., Oct. 23.—President Don H. Bacon, late of the Tennessee Iron company, but now of the Tennessee Coal, Iron & Railway company, the greatest steel and iron making and coal mining concern in the south, has been visiting old friends here and at Ishpeming a few days lately. Mr. Bacon can see nothing but prosperity in the sky for the iron and steel trades for some time. He looks for 1902 to be a greater business year than this country has ever had. He considers the formation of the United States steel corporation a good thing for the trade and for outside concerns like his own.

The Tennessee Coal, Iron & Railway company is the first company to make steel out of southern high-phosphorous ores. It is making 1,200 tons of basic open hearth steel daily that finds a ready sale. In fact, the company cannot fill its orders and is now preparing, Mr. Bacon says, to largely increase its facilities for steel manufacture. He expects open hearth to gradually replace the Bessemer steel for all except the cheapest and coarsest work, and thinks open hearth can be made as cheaply in the south as anywhere. This company employs 15,000 men, mines 4,000,000 tons of coal and more than 2,500,000 tons of iron ore yearly; makes 700,000 tons of pig iron and ships to Europe 1,000 tons of pig iron every day. It ships to the centers of pig iron production in England, as well as to more remote localities.

SCHOOL TO BE ENLARGED

Congressman Martin Looks Over a Gov't Institution at Rapids.

Special to The Journal. Rapid City, S. D., Oct. 23.—Congressman Martin has made an investigation of the government Indian school in this city and has made a report on the same. The school is in a flourishing condition. The Indian school was originally built with a capacity of eighty, but the enrollment is now 115 and is steadily increasing. An appropriation was made by the last congress of \$20,000 for a girls' dormitory and a cottage for the superintendent, both of which will be erected in the early spring. Other improvements will be made and the capacity of the school will be increased to 300. The school seems to be a favorite of the Indians, as they prefer it to any other in this part of the country, the principal reason being that it is situated in the Black Hills, which has been their favorite hunting grounds for centuries.

THIEVES TRACED BY HOUNDS

Black Hills Sheriff's Dogs Do Some Practical Work.

Special to The Journal. Belle Fourche, S. D., Oct. 23.—Three bloodhounds are in the possession of Sheriff Moses of Butte county, at the county jail in this city. They were purchased to be used in trailing escaped prisoners and criminals. An incident occurred a few days ago which proved to prove the ability of the hounds. A quantity of hay had been stolen from a farm near this city, and the hounds were given a scent at the hay stack and then liberated. They followed the path of the thieves and located them at a neighboring farm. Two young men were arrested and confessed the crime. A man was hired to take a dummy for a certain distance and then conceal it. He went a distance of two miles and put the dummy in a tree. When the hounds were let out, they never stopped until they had covered the two miles taken by the fugitive dummy, and when they arrived at the tree where it was perched, they kept up a constant cry until the keepers overtook them.

GOLD AROUND KNAPP

Tufts Says He Wouldn't Take a Million for Four 40-Acre Tracts.

Memphis, Wis., Oct. 23.—The people living in this county, have recently discovered gold while excavating on their land. Recently Sam Tufts sent a panful of dirt to Minneapolis which assayed \$3, and also contained silver and copper. Mr. Tufts thinks there is gold in paying quantities around the village, and has purchased four 40-acre farms, for which he says he would not take a million dollars.

GAS JET WAS OPEN

Life of a Vaudeville Performer at Madison Barely Saved.

Special to The Journal. Madison, Wis., Oct. 23.—Tom Hardy, a Chicago actor who is doing a tramp specialty at the vaudeville theater here this week, left a gas jet open when he retired at the Avenue Hotel last night. An hour or two later another guest passing the room noticed a strong smell of gas. The room was broken open and Hardy found unconscious. Physicians were summoned and succeeded in reviving him. Hardy says his act was accidental. The room has both gas and electric light and he says he turned on the gas by mistake and neglected to turn it off. The electric light was burning when he was found.

Arm Caught in a Pulley.

Special to The Journal. Cavalier, N. D., Oct. 23.—John Kimble, a thrasher, while working the arm of Sam Gibney, caught his arm in a pulley and before he could be rescued the member and three of his ribs were fractured. It is feared the arm will have to be amputated.

THE MURRAY CURE for the Drink and Opium Habits

WHY, do you ask?—FOR SIX VERY GOOD REASONS:

- Reason 1: Because the Murray Cure is a safe cure---no casualties have ever occurred to a man taking the Murray Cure for the drink habit. Reason 2: Because the Murray Cure is a sure cure---it completely and permanently cures in every case and practically all stay cured through life. Reason 3: Because the Murray Cure is an easy cure---its vapor baths, massage, etc., help the patient to get rid of the alcohol and its effects without pain or suffering. Reason 4: Because the Murray Cure is a speedy cure---it takes but a few days to get rid of the desire for liquor, the better part of the treatment is principally to guard patient from the power of habit, and build him up in mind and body. Reason 5: Because the Murray Cure is a tried cure---it has stood the test of time; thousands have been cured and everybody ought to know that it is a genuine cure. Reason 6: Because the Murray Cure is reasonable in price---it costs less than any other treatment. And remember, it is not a "Gold Cure" and leaves no bad after effects.

The Murray Cure was officially endorsed by the Minnesota inebriate law. Investigate it. If you are going to make a new start send for booklet to The Murray Cure Institute, Edwin Murray, 1819 Nicollet Av., Minneapolis, Minn., Manager.

MURDER TRIAL IN SO. DAK.

GLOVER CASE AT GETTYSBURG

Witnesses Describe the Assassination of Daly—One Impeached on the Stand.

Special to The Journal. Gettysburg, S. D., Oct. 23.—In the trial of Rome Glover for shooting Almer Daly, Dr. S. E. Hurley testified as to the wound causing Daly's death. The next witness was A. E. Converse, who had been employed to make drawings showing the scene of the tragedy. These were ruled out, the witness swearing they were not correct. J. A. Lake related a conversation held with Rome C. Glover, the defendant, last January. Glover said: "I could kill any Daly and no jury would ever convict me for it." A. D. McMaster of Gettysburg testified to meeting Glover on the street near the latter's saloon, and asked him if he was badly used up in the fight with Daly the day before, and that Glover said: "Not bad, only a few cuts on my head; Daly is in Johnston's store, near by, and I will see him again."

Manganese Ore Found.

Special to The Journal. Buhl, Minn., Oct. 23.—Manganese ore has been struck here, its value running about \$15 a ton. The mine is owned by the Buhl Manganese and Stratton company, which has the shipping contract, expects to run its steam shovel all winter. At present it is running night and day. Wrecks are frequent here. One night a car of coal broke loose and left the track, dumping the coal into the ore pit, where several men were at work. No one was hurt. The mine ships about forty-five cars of ore daily.

Mr. and Mrs. Field Surprised.

Special to The Journal. Langford, S. D., Oct. 23.—A farmer's wife saved the Milwaukee train between Spain and Langford from a possible wreck. Having discovered an obstruction on the track she ran her horses to a crossing, getting there just ahead of the train, and planting her team squarely before it induced the engineer to stop. She reported that a farmer who was trailing a plow behind his wagon got the implement caught in the rails while crossing the tracks and had gone away and left it. The obstruction proved to be an ugly one, the strength of several men being required to remove it. Passengers on the train made up a purse of \$25 for the woman and reported the facts to the railroad company.

REDS GOT THEIR MONEY

"DEAD AND DOWN" PAYMENT MADE

Stood Out for It at Red Lake, and Washington Ordered Mercator to Pay.

Special to The Journal. Cass Lake, Minn., Oct. 23.—The Cass Lake Indians were supposed to receive their annuities yesterday, but owing to the fact that it was impossible for Captain Mercer, acting Indian agent at Leech Lake, and his corps of helpers to reach here in time, the payment was postponed till Friday. The delay was occasioned at the Red Lake agency, where the Indians refused to accept their regular annuity, amounting to about \$5 a head, unless they were paid in addition the amount claimed to be due them on "dead and down" logging operations last winter. This sum would amount to \$10 additional. Captain Mercer telegraphed to Washington and received in return an order to pay the amount requested by the Indians. This was done, and no trouble ensued. The amount to be paid the Cass Lake Indians on Friday will be about \$5 per capita. Edwin L. Chalcraft, supervisor of Indian schools, arrived in Cass Lake on Sunday from Washington. He has paid official visits to the Cass Lake and Bena Indian schools and commends very highly the work being done at these institutions by Benjamin Caswell and Henry Warren, superintendents.

HE BLAMED THE WOMAN

JURY COULDN'T SEE IT THAT WAY

Full-Blood Sioux Indian Tries His Own Case in Court and Is Worsted.

Special to The Journal. Sioux Falls, S. D., Oct. 23.—An incident in the United States court here Tuesday furnished the only case in the history of the United States court of South Dakota in which a full-blood Sioux Indian defended himself before a jury. The trial of Herbert Plute, a Sioux belonging on the Lower Brule reservation, on the charge of stealing a horse from Henry Useful Heart, one of his brethren, developed this unusual and unique feature. The accused declined the offer of the court to furnish him an attorney, and although he could not speak a word of English he decided to act as his own attorney. He conducted his defense through Alexander Rencontre, the official interpreter of the federal court. Plute eloped with the wife of a neighbor, and the horse was taken for the purpose of aiding them in their flight. The accused stated in his argument that the Indian woman with whom he eloped told him she had traded a shawl for the horse; that he was to go and take the animal and ride it away, and that if trouble resulted she would take the blame herself, as he was "her brother"—a favorite term of endearment among the Sioux.

SMITH LAKE FIRE

Incendiaries Again at Work in the Village.

Special to The Journal. Smith Lake, Minn., Oct. 23.—The firebug has again applied the torch to Smith Lake property. The latest to go up in smoke is the residence but recently completed by Levi Cochran. The fire was discovered about 1 a. m. and in time to save the contents of the building. The loss is covered by insurance of \$300. Some three weeks ago the Great Northern coal sheds at this point were burned and early in the summer the general store of Coolen Brothers, while at short intervals for years past the insurance companies have been called upon to pay losses in this village. There is no clue to the guilty persons at this time.

ORDER RESCINDED

Ex-Sheriff of Freeborn County Will Retain Jailor's Fees.

Special to The Journal. Albert Lea, Minn., Oct. 23.—The county commissioners are in session and are transacting a lot of routine business. One important action was the rescinding of the resolution passed in July, 1900, ordering the county attorney to begin an action to recover the amount paid W. C. Mitchell, then sheriff, for jailor's fees from Jan. 7, 1891, until Feb. 3, 1900, as the man appointed for the position never discharged the duties and the salary was drawn by Mr. Mitchell, A. E. Rolfsen, the man appointed, being a brother-in-law of the sheriff. The commissioners decided that inasmuch as the work was well done and the county had not been called upon to pay only what it had expected to for the services given, there was no ground for an action. The controversy involved \$5,450 without the interest that has accrued. Consideration of the petition for the big drainage ditch in the towns of Rice land, Moscow and Geneva came before the commissioners, but no definite action has yet been taken. P. D. McMillan of Minneapolis and the local men interested are on the ground, and it is more than probable the big ditch will be ordered constructed, as almost everybody owning property adjacent to the land affected has signed the petition. Another petition is to be presented asking that a tract of land in the township of Bath be ordered drained. This would affect several hundred acres and require a drain about three miles in length. Senator Knute Nelson was here yesterday on his way to Northwood, Iowa, where he spoke last night.

TEXAS STANDARD OIL CO.

Our Gusher Will Be One of the Largest on Spindle Top—100,000 Barrels of Crude Oil a Day—Think of It.

The well being bored on the land we own in fee simple in Block 38, Spindle Top Hill, Beaumont, Texas, has reached the cap rock with a 10 1/2-inch hole. We are now setting an 8-inch pipe in this cap rock. Unless some unexpected and very unusual accident happens, we should bring in an 8-inch gusher the fore part of next week. There are less than five other 8-inch wells on this hill, the others being only 6-inch and 4-inch wells. This will give us a daily producing capacity of 100,000 barrels and one of the largest producing wells on this famous hill, consequently in the world. For the purpose of obtaining funds to build pipe lines and tanks we will continue to sell stock at 25 cents a share, par value \$1 per share, until our gusher comes in. It will afterwards be withdrawn; consequently, if you want any, you had better order at once.

LAWRENCE & LITTLE,

208 Bank of Commerce Building, MINNEAPOLIS, MINN., Agents for TEXAS STANDARD OIL CO.

STORE WILL BE READY IN ABOUT A WEEK.

Goods Are Now Coming By the Carloads.

We are the first and only firm in this country that buy goods from first hands and sell direct to the consumer at wholesale prices. We sell you goods cheaper than the wholesale grocer can afford to sell to the retailer. This means we save you 30 to 40 per cent.

Our sales in the city of Boston the first year of our advent was a million dollars; the second year a million and a half. Watch the papers for complete price list.

GINTER GROCERY CO., 25 SIXTH STREET SOUTH. Next to St. Mark's Church.

WANT TO BUY AT FACTORY PRICES? GINTER PIANOS. As Manufacturers we are in a Position to sell a Piano direct to the consumer, thus evading all the necessity of Paying Middlemen's Profits. FACTORY WAREHOUSES: 335 Wabasha St., St. Paul. 8th St. and Nicollet, Minneapolis.
