

BEWARE OF COUGHS AND CATARRH AT THIS SEASON OF THE YEAR.

How to Prevent and Cure Them

People who are subject to coughs or suffering from catarrh even in its mildest forms, should protect themselves against catching cold now for more cases of consumption are contracted in October and November than at any other time during the year. Just at this season the spouts of consumptives expectorated in the streets of every city and town during the summer, has become thoroughly dried, and teeming with germs of the disease, is taken up into the air by wind and inhaled by every living person.

If the air passages are in a healthy condition there is no danger, but let them become inflamed by coughs and catarrh, then these germs find lodgment on the inflamed surfaces, multiply with astonishing rapidity and the disease consumption is contracted.

Heretofore the public as well as the medical profession have been at a loss to prevent this terrible disease, but now that government statistics and health reports have shown there is a way, and only one, every person who contracts the disease has only himself to blame for the consequences.

It has now been settled beyond all dispute that the new Dry-Air Germicide, HYOMEI will cure consumption, and that coughs, catarrh, bronchitis and other diseases of the respiratory organs can be cured by destroying the germs which cause the disease, and which cannot be reached by stomach medicines. Every weak lunged or catarrh affected person should use it daily.

HYOMEI is sold by all druggists or sent by mail for the following prices: HYOMEI Outfit complete \$1. Trial Outfit, 25c. HYOMEI Balm, 25c. Send for a free sample and our book on respiratory diseases. It may save your life.

FORTY YEARS IN MEXICO.

The rubber tree is the king of the vegetable kingdom. Its yield continues to increase and, when properly cared for, it will yield steadily up to its fortieth year and in some instances as long as fifty or sixty years. As many as two hundred trees to the acre may be grown permanently and in the seventh year after they are planted these trees will produce from one to two pounds of crude rubber, worth today on an average about eighty cents per pound at the plantation. The trees will yield increasing quantity of rubber for forty years or more. It costs but a few cents a pound to gather and coagulate it into commercial crude rubber, and no figures are needed to demonstrate the unusual profits that this industry is today paying. It gives an assured permanent income within the reach of the moderate means. What is a safe investment for men who are not rich.

The Tabasco Plantation company have chosen a seven thousand-acre plantation in Mexico, unsurpassed for the purpose and every facility exists, including provision of labor for carrying on the enterprise. The management of this company embraces men of financial standing in Minneapolis and the northwest, and includes men experienced in the rubber business since the earliest practical development of this industry in Mexico. Members of this company have invested their own means to a liberal extent and when they invite the co-operation of the investing public and propose the investment become interested in this enterprise, it is for the purpose of providing additional capital. The stock is old on installment, as the money is needed in developing the property until the plantation, as a whole, becomes productive. It is not a speculation, but a legitimate business undertaking, managed by men who enjoy the highest reputation for responsibility and reliability.

Improvements now on the plantation yield handsome dividends every year. The demand for rubber the world over has probably tripled in the last few years. It is beyond the range of possibility that the demand will ever be less; at the same time the natural resources are being narrowed down at a rate which points to the necessity of opening rubber plantations as the only protection against ultimate exhaustion of the supply. The plantation of this company is a solid investment, based on real estate, actually owned, and producing rubber, cacao, sugar cane, etc., and yielding a profit of from fifty to one hundred per cent each year. If you are interested, full information and various books, descriptive of this industry, may be had by writing or calling at the offices of the Tabasco Plantation Co., 918 Lumber Exchange, Minneapolis, Minn.

TEXAS GEYSER OIL CO.

OF BEAUMONT.
President: HON. DAVID SECOR, Of Minnesota.

SHARES NOW SELLING AT 25c. (PAR \$1) FULL PAID AND NON-ASSESSABLE.

Simply Cannot Equal the Demand.

The demand for oil has always been many times greater than the supply, but the oil production of the world has been so small that it has hardly been taken into consideration as a fuel. To-day, owing to the splendid supply discovered in the Texas fields, oil has taken its place in the list of fuel materials; needless to say, to those who have followed the history of the past six months, that it has taken first place. In ECONOMY, CLEANLINESS and the SAVING OF LABOR, oil is beyond comparison with coal.

In the first place, it costs but little over half what coal does. The United States treasury department gives the average cost of coal exported in 1899 at \$2.85 per ton. Estimating 3 1/2 barrels of oil as the equivalent of a ton of coal, there is a difference in Texas of about \$1.50 a ton in favor of oil. At any point within 1,000 miles of Texas, transportation raises the price 60 cents a ton, or oil is \$1 a ton cheaper than coal. This brings oil as far north as St. Louis for less than coal. At any point within the United States on the sea coast the saving is at least 85 cents per ton over the very cheapest coal. But this is not the only economy.

In consumption the saving is enormous. Oil burns with a steady, even flame, giving a heat with a superior calorific value as the light from a Welsbach burner is superior to that from a common burner. The fact that all railroads and factories that have been able to secure oil for their use have hastened to do so, shows in a measure the economy in labor. No dust, no smoke, no work, but a strong, steady fire, easy to start and quick to heat up. The demand increases in great leaps.

The prospects of the Texas Geyser well, drilling on Spindletop Heights, are the very brightest. The well is reported to have down 607 feet and drilling nicely. The indications are the same as with the other wells that have been so successful. If you are interested call or write.

TEXAS GEYSER OIL CO.

Black Boys Being Supplanted

The Great Northern is replacing its colored waiters on the dining cars of that system with white men as rapidly as possible. The tendency in northwestern railroading is in this direction. The fact that white waiters are in such demand everywhere alone prevents other systems from doing the same. Experiments have

A MOTHERS' MEETING

Principal Farmer's Interesting Talk at the Seward School.

As the pupils of the Seward school were dismissed yesterday afternoon, the mothers of the district were gathered in the "A" room for a mothers' meeting. The program was opened by a class of bright little people from the baby room, who sang in childish tones a little song about the flag, which each carried. Then Mr. A. N. Farmer, principal of Seward school, gave a talk dealing with the development of character. He said that teachers fully appreciated that each individual had within him a hidden power for some great good, and that it was the aim of the school system to develop the purpose and beauty of each life. To effect this result there are certain essential lessons, of which the first is obedience. Promptness and order follow, and the fact was brought strongly out that if the child hangs back and argues, parental influence is being undermined. Truthfulness is an important trait, and the child's work is judged to be right or wrong in proportion as it shows truth or untruth. There is no place where consideration for others can be taught to such good advantage as the school, where children are tempted to do little acts, not wrong in themselves, but wrong in that they infringe upon the rights of others. One of the great evils exist where it is used, HYOMEI protects and cures by destroying the germs which cause the disease, and which cannot be reached by stomach medicines. Every weak lunged or catarrh affected person should use it daily.

HYOMEI is sold by all druggists or sent by mail for the following prices: HYOMEI Outfit complete \$1. Trial Outfit, 25c. HYOMEI Balm, 25c. Send for a free sample and our book on respiratory diseases. It may save your life.

HIS WILD ANIMAL FRIENDS

Ernest Seton-Thompson Soon to Tell About Them.

That famous personifier of wild animals, Ernest Seton-Thompson, has been engaged to give, as previously stated, two of his fascinating lectures as preliminary to the course proper of the New Century lectures, which is not to begin until Dec. 13, when Mrs. Sarah Grand appears. These lectures, but necessarily first lectures, will prove a most welcome addition to the program, for there is not a more popular and delightful lecturer before the people today than Mr. Seton-Thompson. Although the course proper is to be given in the auditorium of Plymouth church, these special lectures will be given in the Lyceum theater because of the difficulty of finding the church for the afternoon lecture.

BUILT BY H. C. AKELEY

Memorial Building at Stowe, Vt., for Civil War Soldiers.

H. C. Akeley of this city is erecting a city hall and library building at Stowe, Vt., in honor of the soldiers of the civil war who were born in that little town. Akeley himself first saw light at Stowe.

When in Stowe last year, Mr. Akeley was asked to contribute to a monument for these soldiers. He replied that he believed it would be wise to build something for the living, and that he had offered \$25,000 to erect a memorial hall with library, auditorium and city offices, the rent to the building self-sustaining. The village already had a library of 3,000 books.

The building is of red brick and white stone in colonial style, two stories in height. The basement will contain cafe, kitchen, barber shop, bathrooms, steam plant and cells. The auditorium will be placed on the second floor.

The memorial tablet on the walls will contain the names of the soldiers born in Stowe, wherever they may have enlisted. Minnesota sent five Stowe men to the civil war. Captain Ellet Perkins, who carried Company D colors, First Minnesota volunteers, at Gettysburg; Ellet P. and Frank M. Pacher, Company E, Eighth Minnesota; Cassius P. Camp, Company A, Third Minnesota; Fred Perkins, Company I, Third Minnesota; and Corporal E. Pacher was killed, Corporal Camp is dead, also Fred Perkins. Mr. Akeley enlisted in Michigan. H. G. Thomas of Stowe, a son of Mr. Akeley, who is erecting the building, is a former Minneapolis man. He is commander of the Stowe G. A. R. post.

NOT A BELIEVER IN TRANSMIGRATION.

Chicago Tribune.

The persistent correspondent was working a biography out of the reluctant statesman.

"I suppose it is true, Senator, as everybody understands," he said, "that you began life as a poor plowboy?"

"No," growled the statesman. "I began life as a red-faced, flat-nosed, squalling baby."

Black Boys Being Supplanted

proved, according to the dining car superintendents, that the white man as a waiter is the equal of two colored gentlemen as the general run of the colored color average. The Chicago lines have been discussing the change for some time but have not progressed to any extent on account of the scarcity of the class of help required.

A FLAG AND A PICTURE

Presented With Appropriate Exercises at Adams School.

Roosevelt chapter of the Adams School Self-Government League held an open meeting yesterday afternoon. The regular business of the chapter was transacted and in addition Alice de Krofft presented to the room a Journal Junior prize picture which she recently won, and Melville Borgmann presented a large flag on behalf of the A eighth grade class, which will leave the room at the end of the year. The class expected to present this fall, and gave its class memorial last June, so that this flag makes a double memorial from the class of 1901. The prize picture, which is a reproduction of a copy of "The Windmill" by Van Ruysdael, the great Dutch painter.

Dr. Jordan had been specially requested to be present to see the working of the chapter, the paper having already learned enough of parliamentary law to conduct the chapter meetings without coaching.

Dr. Jordan recalled his first experience as principal of Adams school, adding enough "local color" to delight his hearers. Professor Painter made a short address in his usual earnest, happy manner, and then the meeting adjourned.

Adams school in general is very proud of the record as Journal Junior prize winners made by successive classes in the A room. Including the picture presented yesterday and beginning in 1898, the pupils have won a total of 100 prizes. The Journal Junior work. Seven pictures represent these prizes, three of them being double prizes. In addition, the class of 1898 gave a life-size bust of Lincoln, the boys making a beautiful pedestal for it; the class of 1900 a large, handsomely framed picture; the class of 1901 gave in January a bas-relief of the ride of Paul Revere and in June added a frame for it and a large bust of Apollo.

Pride in the room has also resulted in a scrap book containing all of the Junior papers from the room which have been printed since 1898, also the topics and everything pertaining to the school, which has appeared in the local papers.

STANLEY HALL LECTURES

Events of Real Value Scheduled—Dr. Vincent To-night.

The Stanley Hall Lyceum work for this season offers courses by Dr. Richard Burton and Professor F. J. E. Woodbridge in January, February and March. The most interesting of these is given by Dr. George E. Vincent, professor of sociology in the University of Chicago. The Saturday evening course is on "Public Opinion" the subject for to-night being "Growth and Guidance of Public Opinion." The syllabus and supplementary reading indicate that his thought will be principally along the line of the great forces of society and the "genesis of genius"—the "great man."

The Sunday afternoon course is on "Social Utopias," the subject for to-morrow afternoon being Bacon's "New Atlantis," a philosophical romance of ideal community living. Dr. Vincent calls the attention of students of modern economical problems to the fact that the same problems have always existed and that the thoughts of great minds formulated by him are always ahead of their times—are valuable to the seekers now. Lord Bacon was a statesman of large experience and mastery mind. His ideals and methods of accomplishing them must be suggestive of help.

Dr. Vincent presents the subjects with so much charm and enthusiasm that his audiences find him greatly entertaining as well as instructive.

THE ALFRED MILLENARY

S. R. Thayer Attended the Great Celebration at Winchester, Eng.

S. R. Thayer, former United States minister to the Netherlands, has just returned from a visit abroad. Mr. Thayer says that there is much sympathy for the Boers in Holland, although the government, of course, is neutral. Much money, he adds, has been raised in the little kingdom for the use of the South Africans.

In September, Mr. Thayer attended the Alfred Millenary exercises at Winchester, England, which he describes as the most important celebration, attended by thousands of visitors from all over the English-speaking world. He witnessed the unveiling of the Thayer memorial statue, heard Lord Rosebery's address and was an interested spectator of all the public exercises held in memory of England's first great king.

ASYLUMS ARE CROWDED

Board of Control May Remove Certain Incurable Patients.

Steps may be taken by the state board of control to relieve the congested condition of the hospitals and asylums for the insane. Members of the board think that persons suffering from senile dementia could in most cases be as well cared for at home, when their relatives are in a position to do so.

At the present rate of increase the additions to the Anoka and Hastings asylums will afford no relief, and the hospitals are too crowded to afford proper care for the patients. Something will have to be done, and it may be a wholesale discharge of mild incurables.

EVENT AT NEW ULM

Forty-fifth Anniversary of the Local Turner Society.

Special to the Journal.

New Ulm, Minn., Nov. 8.—A noteworthy celebration will take place in this city Monday night at Turner hall, it being the forty-fifth anniversary of the founding of the society in this city. Ex-Representative Helmreich, the president of the society, will deliver the leading address. At the conclusion of the services at the hall there is to be a magnificent banquet and after-dinner speeches. The celebration to close with a grand ball.

The New Ulm Turnverein was founded Nov. 11, 1856, in a little log cabin that had been built in the edge of the woods. Next what is now the farm of William Pfander. There were only twelve people present. With this nucleus the society was started. William Pfander was made president, Eugene Gerstenhauer, secretary, and A. Seiter, treasurer. From that small beginning the society has had a steady growth until it is now a power in the social affairs of the city.

Of the original twelve members but two remain—William Pfander of this city, and Eugene Gerstenhauer of Winona. Both of them will be present at the celebration.

LANE'S SURPRISE

Stolen Chickens Were Not His, but He Has Them Just the Same.

Special to the Journal.

Excelsior, Minn., Nov. 9.—E. A. Lane of Choven Corners had an encounter with a chicken thief which had ludicrous termination. He was aroused by a thief yesterday morning and rushed out doors just as a man was making tracks for a light wagon to drive away. There were several well-filled sacks in the wagon, and Mr. Lane naturally thought they contained his fowls. He made a grab for them and was assaulted by the stranger, who struck him across the face with his whip, set to followed and the thief was knocked down and lustily pummeled. Mr. Lane dumped out the rest of the chickens and the thief drove away. The sacks were opened. Mr. Lane found twenty-nine fine birds, none of which came from his henry, and could have been knocked down with a feather, and was in a hurry to get away. L. F. Sampson and Winnie Dyer, arrested for shooting in the village limits, were discharged on hearing. Mr. Sampson was not in town the day of the offense was alleged to have been committed.

WHAT SOLDIERS MAY WEAR

The official sartorial journal of the United States army, otherwise yclept, "Regulations and Decisions Pertaining to the Uniform of the Army," made its appearance at the Army building, St. Paul, yesterday. The little pamphlet is the arbiter of fashion in military dress, and its behests may not be disregarded with impunity. Its word is law, and we to the soldier, be he officer or commissioned man, who does not heed its prohibitions.

The little book bears the "O. K." of numerous officials and functionaries, and Adjutant General Corbin has said that it is good. According to its authority, waistcoats are no longer de rigueur, but vests may be substituted instead. When

Black Boys Being Supplanted

The New Turkish Minister Finds American Women Interesting.

THE MEMBERS OF HIS FAMILY

Gossip Declares That Checkik Bey Is Looking for an American Wife.

"What do I find most interesting to your country?" said Checkik Bey, the newly appointed minister from Turkey. "The American woman, of course. The fame of the continent, the great American nation, has traveled into my land and I am anxious to see the women of whom I had heard and read so much. I have been here too short a time and I have traveled only from New York to the capital. It is my intention to express an opinion, but I can say that the glimpses I have had of the feminine part of Washington's population have not been disappointing."

Rumor credits the gallant Turkish envoy with having said that he would like to marry an American wife, but the minister modestly refused to verify this statement, at least at the present time. Perhaps he will wait until he can make a more definite announcement in regard to an American partner of his joys and sorrows.

Checkik Bey is about 45 years of age and is a man of fine presence and affable manner. He is fascinating in conversation and possesses that subtle quality known as magnetism. Foreigners of less attraction and of smaller claim to prominence have won American brides, so the envoy of the sultan has no need to fear for the success of his hopes in this regard. The minister is a handsome, well-to-do man and the koran allows him four. This woman, whom he married about twelve years ago, is dead, and his household is now governed by his mother, a slightly woman equivalent for lady or madam. There are two children, both boys. Suraydar, aged 9, and Halidar, who is 6.

Checkik Bey's household is the most interesting feature of Washington diplomatic life. The Turkish legation is situated in Cleveland park, one of the prettiest suburbs of the city. The house is large and airy looking and is surrounded by nearly an acre of ground. A formidable looking wall surrounds the rear of the grounds—and here the women of the harem get their only glimpse of the world. The mistress of the present harem is the mother of the minister, an old woman, who was the nurse of the minister and now performs the same office for his motherless sons, and two sisters. Turkish custom whose status is not defined. A Moslem resents the slightest attempt to learn anything of the women of his household, so beyond the fact that "Hani," the mistress of the house, brought with her two young girls from Constantinople, the curiosity of the public will not be satisfied about these mysterious details. Those who live near the legation will tell you that the Turkish women are very shy, like frightened birds at the approach of a stranger. Of the old woman the envoy speaks with great affection. "Turkish women have no names as understood by the western world. They have terms of endearment in the seclusion of the home, but these names to strangers. This lady is an old and valued retainer of my family and now acts as companion to my mother as well as a governess and caretaker of my children." The minister has expressed surprise that the word "harem" has a sound not shared by American ears. Harem, he explained, is only the private apartments of the women of the household and is used whether that woman be the mother, sister, daughter or wife of the man of the house.

This gallant and accomplished Moslem has an interesting history. He has been in the diplomatic service Turkey since he was a young boy and as he belongs to the branch of the government which has the sultan's support he is assured of a brilliant future. Several years ago he was sent on a special mission to assist in London. To the great surprise of every one who took his wife to the English capital and she saw much of the life of Christian women. He was also sent on similar missions to Bucharest and Sofia. In recent years he has been chief of the cipher bureau in Constantinople.

Checkik is in every respect a progressive Turk and his ideas do not seem to exclude the women of Turkey from the same keeping pace with the times. Those who observe the signs of the times say that the hour of emancipation will soon strike for the Moslem women of the little kingdom who have recently come here from the land of the crescent it would seem that this hope is well founded.

The last minister, Ali Ferrough, brought his wife and sister to this country, and he showed them the wonders of the western world as far as he could. On Sundays and legal holidays when men were shut out from the public buildings he escorted them together and explained their uses in the governmental scheme. Hevelly veiled and in close carriages they saw the great American sports, bicycle races, and baseball games and meetings at the jockey club. The new minister proposes to outdo his colleague in progressiveness. He wants an American wife who can accompany him to Constantinople and who can teach the women of Turkey some of the things which even the Moslems are beginning to admire in the daughters of Uncle Sam.

In this connection it is interesting to know that while no American girl has up to this time married a Moslem several high Turkish officials have Christian wives. It is usual under the circumstances for the Moslem to promise to contract no other legal marriage. The wife of the first secretary of the Turkish legation in this city is a Christian woman, while the secretary, Sidky Bey, is a devout believer in the prophet. He has no other wife and no other children. He and his wife in one household has been happy enough to encourage some enterprising American girl to make the experiment with the gallant Turkish minister, Checkik Bey.

SWANSON'S "5-DROPS" THE HOUSEHOLD REMEDY

A BOTTLE SENT ABSOLUTELY FREE TO ANY READER OF THIS PAPER.

It will cost you nothing to test the merits of this wonderful remedy. We are so positive of the remarkable curative properties of "5-DROPS" that we have decided to distribute absolutely free of charge 100,000 trial bottles, in order that it may be given a test by sufferers without any expense to them whatever. It has never failed to do all and more than we claim for it, and we know that if you will but give it a trial you will acknowledge that "5-DROPS" is the medical wonder of the century.

"5-DROPS" will be mailed to you at once. All that we ask you to return is the coupon attached, and you will find it all that we claim. You need not feel under any obligations whatever in securing the trial treatment which we offer. Here is an opportunity to test a remedy without any expense to you. Certainly nothing can be fairer than this. Send for a bottle today.

"5-DROPS" CURES RHEUMATISM.

It never fails to cure Rheumatism in any of its forms or stages of development. It makes no difference whether you are suffering from Inflammatory, Nervous, Muscular or Articular Rheumatism. "5-DROPS" if used as directed will give instant relief and effect a permanent cure. Unlike other preparations, "5-DROPS" is an internal and external remedy combined, and will afford early relief to the sufferer by application to the afflicted parts, while a cure is being effected by its use internally. Rheumatism is a blood disease, nothing more or less, and it is an utter impossibility to drive it out of one's system by simply an external application. Liniments, oils, etc., may give relief, but the disease will return at the first opportunity unless the cause (uric acid in the blood) is destroyed, and the blood is thoroughly cleansed of this poisonous matter. Any physician will tell you that the only way to cure Rheumatism is to remove the cause. That is exactly what "5-DROPS" does.

PROOF OF THE CURATIVE POWER OF "5-DROPS"

I got more relief from a bottle of "5-DROPS" than I got from \$25.00 worth of medicine from doctors. I am satisfied that doctors cannot cure Rheumatism. I have had it for nine years, and have spent a great deal of money, but got no relief until I got "5-DROPS." It did me more good than all the other medicines I took. Yours truly, R. A. NEVINS, Ventura, Cal.

I have been afflicted for ten years with Rheumatic pains. Nothing ever did me any good until I began using your "5-DROPS." Before I had used the first bottle I was greatly relieved, and I can heartily recommend it to all needing such a remedy. Yours truly, J. A. MORRISON, Webb, Miss.

"5-DROPS" INSTANTLY RELIEVES AND QUICKLY CURES

Sleeplessness, Kidney and Liver Troubles, Nervousness, Malaria, Rheumatism, Catarrh, Gout, Asthma, La Grippe, Neuralgia, Lumbago, Sciatica, Heart Weakness, Dyspepsia, Toothache, Earache, Backache, Headache and all other Diseases of the Blood, Nerves and Muscles.

No other remedy in the world so effectually as "5-DROPS." It removes all the poisonous matter from the blood at the same time acting as a tonic, building up the whole system, not as a stimulant, but in a gradual and natural way. It feeds every portion of the body, gives strength, vigor and vitality to the weak and worn out. It will restore the vital forces quicker than any other remedy. It acts on the heart powerfully, yet harmlessly, causing it to increase its action, and do its work in a natural manner. Weak, irregular heart action is frequently the cause of blood diseases, the blood becoming sluggish and impure if the heart fails to do its work properly.

"5-DROPS" WILL CURE LIVER AND KIDNEY TROUBLES

"5-DROPS" co-operates with the stomach actions, and a healthy digestion is therefore certain. It restores the liver to its normal condition quicker than any known remedy. It cleanses the kidneys removing from the blood the impure matter produced in it through improper action of the kidneys. It never fails to remove the poisons which are invariably the cause of the disease.

FOR SALE BY ALL DRUGGISTS.
Large size bottle (300 doses) for \$1.00. If it is not obtainable in your locality order from us direct and we will send it prepaid.

SWANSON RHEUMATIC CURE CO., 160 Lake St., Chicago.

A SMALL THING.

Teacher—So sickness in the family kept you away yesterday. Nothing serious, I hope? Jimmy—Oh, no, ma'am. Me father's just got de spinalax.

CONDENSATION.

Boston Transcript.

Norman—I got a letter from my son today. It's the same as all his letters. He writes a long rignarole about nothing in particular, and winds up with a request for money.

French—My son is more considerate than that. He asks for money in the first line, and that saves me the trouble of reading the rest of his letter.

REFORMED.

Chicago Tribune.

"Well, Bill," asked the man from the city, who had returned to his old home in the Bitter Creek settlement for a short visit, "have you boys licked the school teacher this term?"

"Huh!" grinned the young tough of school district No. 14, "you bet we ain't! We're fightin' for the priv'lege of kissin' her."

"THE SECRET OF MY STRENGTH IS PERFECT DIGESTION I USE JOHANN HOFF'S MALT EXTRACT AND FIND THAT IT GREATLY AIDS ME IN THE PROPER ASSIMILATION OF FOOD"

JOHANN HOFF'S MALT EXTRACT builds up the weak and debilitated. It is a muscle builder; a strength giver. It imparts energy; creates appetite; cures dyspepsia and insures perfect digestion.

JOHANN HOFF'S MALT EXTRACT is especially recommended for women. It relieves the distress of nature when taken regularly with meals. It will keep the bowels and the entire system in good working condition.

It is an Extract made of pure Malt and Herbs, and is in fact NATURE'S REMEDY. Do not take any of the cheap substitutes offered as "just as good." Insist upon JOHANN HOFF'S EXTRACT and you will not be disappointed.

One dozen bottles of Johann Hoff's Malt Extract contain more strengthening and nutritive properties than a whole case of oil or porter, without any intoxicating effects.

For further particulars write to
EISNER & MENDELSON CO., Sole Agents, New York.

WHAT SOLDIERS MAY WEAR

not on duty, officers are to be permitted to wear a buff, white or blue vest; but, as the children say, "king's ex" on reds, browns, greens and the other popular shades.

To compensate for this restriction, however, not even the bugler is compelled to wear "panta's." From the general down, all army men are instructed to increase their lower extremities in "trousers." Another "don't" which has been enforced heretofore, but which has caused many heartburnings to dapper West Point graduates, is a prohibition against neckcravats, presumably of the pattern known as "made," with an elastic fastener in the rear. For this the regulation may substitute a similar cravat of white.
