

**The Plymouth**  
Established 1882.

12 Leading Outfitting Stores at The "Plymouth Corner."  
1 Men's Clothing. 6 Shoes. 9 Millinery. 12 Trunks and Bags.  
2 Boys' Clothing. 7 Fur. 10 Custom Tailoring.  
3 Hats and Caps. 8 Cloaks and Wraps. 11 Shirts and Collars.  
4 Haberdashery. 5 Furnishings.

**Bargain Basement.**  
**\$12 and \$15 Men's Suits, \$7.50.**  
So great has been the demand for these remarkable suits that we have been compelled to take 200 more suits from our \$12 and \$15 tables on the main floor. In this lot we have included many stouts and slims as well as regulars, so that economical dressers can be well fitted. It seems almost needless to repeat that not one suit in this entire lot has been in the house over 60 days, so that your selection is made from absolutely new merchandise. Bargain Basement price \$7.50. No old styles or trash at any price.

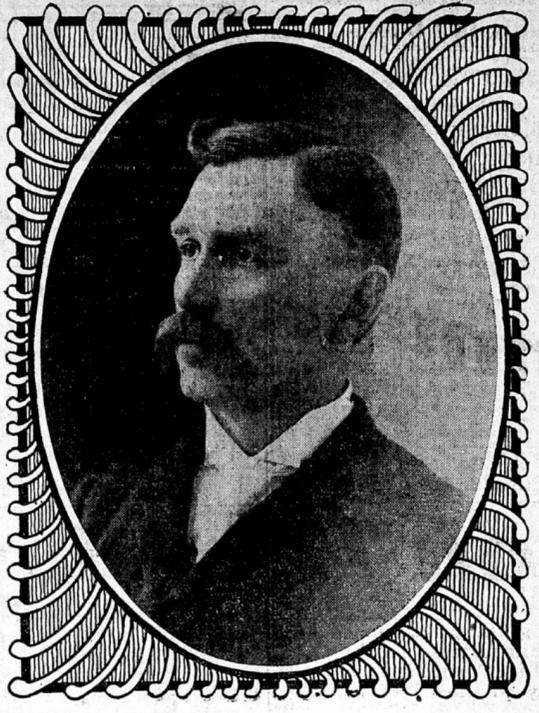

**\$2 and \$2.50 Men's Pants for \$1.**  
Besides offering almost a complete line of all-wool chevot and cassimere pants, particularly desirable for outdoor and heavy work, we have added several lines of fashionable patterns in business men's trousers, chiefly in grays and dark stripes. All are absolutely well made. Price \$1.00.

Men's Suspenders—Extra fine webbing, some with leather ends, some with silk ends, some the French kind, all well worn 35c and 25c. Bargain Basement price 10c.

200 Men's Box Calf Shoes, a special lot of stock and good styles, all laced, sizes 6 to 8 1/2. Boys' blue chevot suits, long pants, single and double breasted, good value at \$5. Bargain Basement price \$3.

**Bargains for Women and Children.**  
Children's Jaeger fleece lined Vests and Pants, sizes 16, 18, 20, 22; regular 25c ones. 10c.  
\$2 Children's Leggings 50c—About 35 pairs of leggings and 50 pairs of child's felt shoes, all we have left to close out quickly, only 50c.  
\$3.00 Women's Hosiery \$3.25—Some lace and some are button, heavy soles, new round toes, admiral last. A rare bargain. \$3.25.  
\$5.00 Women's Enamels \$3.75—About 100 pairs left, in heavy sole, double deck extension sole, Polyonic last, lace shoes, strictly up-to-date. \$3.75.  
\$3.50 Women's Shoes \$1.95—All we have left from several different lines of heavy and light weight shoes; good sizes; only narrow widths. \$1.95.  
\$15.00 English Bear Boas, 3 yards long. Bargain Basement price \$7.50.  
\$8.00 Women's seal flat Boas, ornamented with tails. Bargain Basement price \$4.00.  
\$1.50 choice quality French Coney Muffs, full size. Bargain Basement price 75c.

**AN EDUCATIONAL LEADER IN S. D.**  
**Dr. John W. Heston, the New President of the State Educational Association.**

John W. Heston is a native of Pennsylvania and was born Feb. 1, 1854. He received his early education in the public schools of Bellefonte, Pa., and at 20 years entered the state college in the same city. Having but little means he earned most of his way through college by teaching in the preparatory department. Dr. Heston was principal of the department for several years, and in 1890 went to Seattle, Wash., to recuperate his failing health. While at Seattle he organized the high school and had charge of the same for nearly three years. He was then called to the presidency of the Washington State Agricultural college, where he remained the two years organizing the work. While on his way to Utah to accept the position of director of the experiment station, at the suggestion of a friend he came to Brookings, S. D., and after looking over the field decided to accept the position of president of the South Dakota Agricultural college, and began his duties in May, 1896.

He has raised this institution to a high standard until it ranks among the best educational institutions in the northwest. He has endeared himself to the patrons and students of the college. He is an earnest and enthusiastic worker along all educational lines, and his recent election to the presidency of the State Educational association insures that organization the full benefit of his wide experience.

**HERBERT SPENCER**

Smokers who like a High Grade Smoke, always call for

**THE Herbert Spencer** 100 CIGARS

They are made from the Finest Havana that experts can buy and by the best workmen in the world.

**THEY ARE ON SALE AT THE FOLLOWING PLACES:**

Havanna Cigar Store, 327 Nicollet av.  
West Hotel Cigar Stand, West Hotel.  
Scott's Cigar Store, 27 S. 4th st.  
Union Depot Cigar Stand.  
C. E. Harkins, Cigar Store, 227 3rd st S.  
Dewey Theater Cigar Store.  
Bijou Theater Cigar Store.  
Nicollet House Cigar Stand, Nicollet House.  
Holmes Club Cigar Stand.  
Powers Mercantile Co., late S. E. Olson Co.  
W. H. Sweet, Drug Store cor. Chicago av. and 18th st.  
Geo. A. Rose, Drug Store, 363 Central av.  
H. Rauch, Drug Store, 13th av. NE. and Main st.  
F. Yost, Drug Store, cor Hennepin and 22nd st.

**CORPORATIONS IN OHIO**  
**GOV. SHAW HAD TO WAIT**  
**SUGGESTIONS FROM GOVERNOR**  
**He Recommends Also a New System of Home Rule in Local Taxes.**

Columbus, Ohio, Jan. 6.—The legislature convened to-day in biennial session. Both branches elected the officers nominated at the republican caucuses. Notwithstanding the talk of fusion with the minorities, the Hanna candidates in the house were elected with their respective full party votes and there was no indication of bolting or even of disaffection.

The message of Governor Nash was noted for its recommendations of a new system of taxation under which all taxes for state purposes are to be raised from corporations, franchisees, the liquor traffic etc. and all direct taxation for county, municipal or other purposes are to be left to the counties. It is a system of home rule in local taxes. Governor Nash said about corporations:

"Because they are created by the state and possess certificates bearing the impress of her seal, people are led to believe that they are safer to do business with and are more entitled to credit than are private partnerships and individuals. In very many cases they are less worthy of confidence. They are authorized by the state to do business before one dollar of capital stock has been paid. This is an unfortunate condition of affairs. The state, before she gives these corporations her approval and permits them to do business, should be required to make annual reports, showing how much of the capital stock has been paid, how the money is invested, what the assets are, the amount of liabilities and the names of the stockholders. There should be such a record of every corporation that the people may know at all times whether it is worthy of credit and confidence. The publicity which would be given by such a record could not be by any possibility injure a really worthy or sound corporation."

**WORK OF NERVES**  
**Prof. Loeb Thinks He Knows How It Is Done.**  
**A DISCOVERY OF IMPORTANCE**  
**Something That Seems to Explain the Action of Anesthetics and of Alcohol.**

Chicago, Jan. 6.—The secret of the work of the nervous system to have been discovered by Professor Jacques Loeb of the University of Chicago, explains the action of anesthetics, alcohol and like phenomena. He has made a colloidal solution, it becomes fairly easy of comprehension. In the first place, it is necessary to understand that physicists, and especially physiological chemists, deal nowadays not so much with atoms of matter as with ions, which are the atoms combined with mysterious positive or negative charges. These charges are, themselves called electrons. Metals commonly have positive charges and the nonmetals negative, though the same atom at different times may have both. The atom and its ions may be compared to the earth with its moon, and, like the latter, it is merged in the solid system of the molecule.

A colloidal solution is nothing more formidable than common jelly that has not yet jelled. When the housewife takes a lot of dry gelatin and pours hot water on it she makes a colloidal solution, known more commonly as a hydrosol, or "sol." When this "jells" it becomes a hydrogel or "gel." Now the nerve is nothing more or less than a colloidal solution in a long slender tube, though, of course, it is more complex than commercial gelatin and is formed of proteids.

W. B. Hardy of Cambridge, England, showed some time ago that the colloidal solutions carry on their particles negative or positive charges of electricity, and can be precipitated by the opposite charges. For instance, when a piece of dry nerve was made of proteids and that whenever a nerve impulse was transmitted it was accompanied by a current of negative electricity. Recently Dr. Jacques Loeb and his colleagues have shown that sodium chloride solution would stimulate the heart to increased action, and who has been working to determine how the sodium accumulated that and turned his attention to the study of the valence ion, and began investigation into the influence of ions on muscle stimulus.

Dr. Loeb, at once began a series of experiments with the nerves of frogs and other animals, which quickly showed that not the positive but the negative charge of the chloride ion was the determining factor. He was led by his experiments to form the hypothesis that the nerve stimulus was similar to the action of the colloidal solution by the same substances as described by Hardy, and at once found his hypothesis satisfying every condition. He found, in short, that what happens in the nerve when it is stimulated is nothing more than that it has a tendency to "jell."

Finding then that the particles of colloidal solution in the nerve had positive electric charges, he next discovered that they induced in the water which holds them in solution negative charges of the same nature. When these charges are far from each other two or more colloidal particles coalesce as raindrops on a window do when it is struck by a blow, and, instead of these, which are held together, instead of these, some of the negative charges are released and attract to themselves some of the positive charges on the neighboring particles, causing these in turn to coalesce in order to reduce their surface, and thus, in turn, free other negative charges which affect the next layer. Thus is created that negative current or negative variation.

Dr. Loeb, taking up these experiments, at once found them fitting in with his, and knowing that muscles are made of nerve, he found that what happens in the nerve when it is stimulated is nothing more than that it has a tendency to "jell."

The Chicago Great Western Railway offers the choice of three through routes for cars, one week, through Texas with connections for Mexico. On Tuesdays via the Santa Fe, a central route; on Saturdays via the Katy, a southern route, through Texas with connections for Mexico. On Tuesdays via the Rock Island, a northern route, through the Grand Canyon of Colorado by daylight. Information and booklets from A. J. Aicher, City Ticket Agent, Cor. Nicollet Ave and 5th St., Minneapolis.

**LED THE NIGHT'S GAITY**  
**THEN ORCHARD KILLED HIMSELF**  
**Society Man of Omaha Dies of Morphine Poisoning in a City Resort.**

Special to The Journal.  
Omaha, Neb., Jan. 6.—Charles Orchard, a well-known clubman, took a fatal dose of morphine last night in a resort at 1811 Leavenworth street. Orchard had spent the evening with a party of friends and had the gaity until a late hour, when he left his companions abruptly and sought a bedroom, where he locked himself in. He had been dead for several hours when found.

Orchard had been depressed since the death of a sister several months ago. He was the son of Samuel Orchard, who was a pioneer mercantile firm, the Orchard-Wilhelm company, and had prominent family connections.

**GRAFTON'S LIGHT PLANT**  
**New Corliss Engine of 110 H. P. Is Installed.**

Special to The Journal.  
Grafton, N. D., Jan. 6.—The installation of the new Corliss engine at the electric light plant was completed Saturday afternoon and the city is now properly lighted. The new engine has 110 horse power. The school opened this morning with an increased enrollment. The attendance in the high school will reach 120, which is exceptionally large for a city of this size.

The county commissioners are in session to-day, and the vexed question of the appointment of commissioners to succeed Messrs. Southard and Spencer will come up. It is the opinion that the courts will not sustain the law and attorneys advise the present commissioners to hold on.

**JUDGE FISK CALLED IN**  
**He Will Try Several Cases for Lauer at Wahpeton.**

Special to The Journal.  
Wahpeton, N. D., Jan. 6.—The district court sits in regular session Tuesday. About 100 cases are on the calendar, against most of which affidavits of prejudice appear. These require Judge Lauer to call in another judge. Judge Lauer has secured Judge Fisk of Grand Forks, who will hear the prejudice cases first. Some of these have been on the calendar for years. The session promises no cases of great interest.

A tax tow-mill was started last week at Foxhome, fifteen miles east of Wahpeton. The mill employs fifteen men and can take care of forty tons of fax straw daily. It runs day and night, and is provided with a dynamo whereby the village may have electric lights during the active milling season.

**Bad News Causes Apoplexy.**  
Special to The Journal.  
Doiland, S. D., Jan. 6.—Mrs. D. P. Bannister, aged 72 years, suffered a stroke of apoplexy yesterday and is now in a precarious condition. Her illness is the result of the news of the sudden death of a grandson in Washington. The weather here is more like that of the close of the year and the thermometer registered 60 degrees above zero yesterday.

**Other Tall Valuations.**  
Special to The Journal.  
Fergus Falls, Minn., Jan. 6.—Auditor Linn completed the county abstract sheets for the year. The valuation of other tall property is \$7,284,223. Of this amount, \$1,861,963 is in personal property, \$4,922,260 in farm lands and the remainder in city and village real estate.

**ECZEMA'S**  
**ITCH IS TORTURE.**

Eczeema is caused by an acid humor in the blood coming in contact with the skin and producing great redness and inflammation; little pustular eruptions form and discharge a thin, sticky fluid, which dries and scales off; sometimes the skin is hard, dry and fissured. Eczeema in any form is a tormenting, stubborn disease, and the itching and burning at times are almost unbearable; the acid burning humor seems to ooze out and set the skin on fire. Salves, washes nor other external applications do any real good, for as long as the poison remains in the blood it will keep the skin irritated.

**BAD FORM OF TETTER.**  
For three years I had Tetter on my hands, which caused them to swell to twice their natural size. Part of the time the disease was in the form of running sores, very painful, and causing me much discomfort. Several doctors said they could do nothing for me. I took only three bottles of S. S. S. and was completely cured. This was fifteen years ago, and I have never since seen any sign of my old trouble.—Mrs. J. B. Jackson, 144 McGee St., Kansas City, Mo.

S. S. S. neutralizes this acid poison, cools the blood and restores it to a healthy, natural state, and the rough, unhealthy skin becomes soft, smooth and clear.

cures Eczema, Salt Rheum and all skin diseases due to a poisoned condition of the blood. Send for our book and write us about your case. Our physicians have made these diseases a life study, and can help you by their advice. We make no charge for this service. All correspondence is conducted in strictest confidence.

**THE SWIFT SPECIFIC CO., ATLANTA, GA.**

**LOVE WORKS CURE**  
**Aged Man's Reason Restored by Reunion With Former Wife.**

Special to The Journal.  
Port Scott, Kan., Jan. 6.—Love worked a subtle change on the mind of D. W. Thurston which medical science was powerless to encompass.

Thurston is 70 years of age. Recently he became insane and was on the eve of his departure for the state insane asylum when his divorced wife, from whom he had been separated more than thirty years, arrived. His mind became clear at the sight of her and he is now entirely recovered. The woman, whose name had become Mrs. Sarah Maymber, had been a widow fourteen years and Thurston's second wife had been dead about the same length of time. It is believed that his former wife was widowed and living in the old Michigan home near Sheboygan.

Prompted by memories of happy days and a love which has never died, she wrote her asking her to come to Kansas and live with him again. She consented and a day later she was in Kansas, and the thing happened to cause a post-nuptial divorce and it is said the disappointment preyed upon his mind, causing it to become unbalanced. Yesterday she returned and he is as happy as they were the day they plighted their troth as youth and maiden.

**Home-seekers' Excursions.**  
Tickets to nearly all points in the United States are on sale at all ticket offices of the Chicago Great Western Railway on the first and third Tuesdays of January and February, at the low rate of 75c for the round trip. Good to return in twenty-one days from date of sale. For detailed information, address A. J. Aicher, City Ticket Agent, Cor. Nicollet Avenue and Fifth Street, Minneapolis.

**Electric Lighting and Power Plant for Sale.**

Description—Two American Ball engines, 14x12, each 100-horse power, direct belted to four-pole 50-kilowatt 110-volt lighting generators. Possession given January 15 and February 15, 1902. These equipments are in full operation and may be inspected at THE MINNEAPOLIS JOURNAL Plant.
