Northwestern Mines FIGURES TOO HIGH

Late Eastern Estimates of the Ore Production of 1902.

MINES CAN FURNISH MUCH MORE

But Lower Lake Dock Room Has Its Limits—Old Minnesota Dredging Well.

Special to The Journal.

Duluth, Minn., Jan. 31.—Estimates quoted at the lower end of the lake for the ore production of 1902 are running from 25,000,000 to 27,000,000 gross tons. These, it is almost needless to say, are too high. They are in large part based on individual estimates from mining and shipping concerns and are for what these concerns think they can separately do. It is very sure that most of them are far too high and that the aggregate total will be much less than these figures. It is not impossible for the mines to produce far more ore than has ever been shipped, but it will be hard to get lower lake dock room for more than 10 to 15 per cent above the receipts of 1901. Upper lake railroad accommodations have never been tested and it will probably be possible for the roads of Minnesota alone to haul to Lake Superior 13,000,000 gross tons, but it is not likely they will be called upon to do so much as they are not, it is manifestly impossible for the average ranges to get out any 25,000,000 tons.

The Ontario Mining company (Union Steel company), that has been examining the Barasa mine at Negaunee and Littleton, Mich., (Republic) (Republican Steel company) have been put on one shift, and will work so through the year. They will produce in single shift all the ore required from the Breitung lands is progressing steadily now that it is starting. The Cleveland Cliffs company is slow in starting to sink its new mine, but the Negaunee and is likely to perfect its plans a little differently on account of the accident at the former property.

On the Michigan side, the small property, in Crystal Falls city, has been taken by Corrigan, McKinnon & Co., and is to be opened on a considerable scale. The firm has been working for some time in the Crystal Falls group of three mines, the Armenta, Dunn and Kimball and the Groveland and Quinnessee. At the old mine, in section 27, the Kansas company, the Oliver Iron Mining company has met such improved conditions that an important equipment is now under consideration and it is probable a mine will be a shipper the next season.

The old Minnesota mine, the first property opened in the state and a shipper since 1884, is looking better than for years, and has a larger reserve than for a long time. Several leases of ore of fairly good quality, though not so fine as the Minnesota's early shipments, have been found by diamond drill working at great depth, and these will continue the mine's career several years longer than was expected.

It is reported that the Hawkins-Kinney property, in section 32, township 57, range 22, on which a very large deposit of mixed ore has been shown, has been sold to large interests around Duluth, Minn. The report is denied, but may be true, just the same. M. L. Fay and others will open two small ore bodies near Hibbing, Minn., which are being mined. Fay claims to be able to put out 50,000 tons at each place this year. Some 2,500 acres in the northwest part of township 58, range 14, at least a mile south of where the Virginia states are supposed to bound the ore-bearing formation, have been taken for exploration and crews have just started in there.

BOOKS.

Here are a few titles of late and popular books, all of them published at \$1.50 a volume. Our price for Saturday will be 65c.

TOO MUCH SLEET

Damages in the South May Aggregate Millions.

Special to The Journal.

Chicago, Jan. 31.—Later reports from the sleet storm in the south swell the amount of damage. At Paducah and Lexington, Ky., business is practically paralyzed, wires are down in eleven directions, trains are late and the cities are without light or motive power. The streets are a mass of tangled wires, hundreds of poles having been broken down. Similar reports come from Arkansas, where it is said six inches of sleet fell. Many towns are completely isolated and it is believed the damage will foot up in the millions. Southern Illinois towns report great damage to fruit trees and streets filled with broken wires and poles. Kansas farmers welcome a fall of ten inches of snow, which will prove the salvation of the wheat crop.

ARMS PUNCTURED

Whole Trainload of People Vaccinated in Michigan.

Bay City, Mich., Jan. 31.—A Michigan Central train coming from Mackinac City was held up at Grayling three hours. There was a case of smallpox on board and the health officer would not allow the train to proceed until every person on board had been vaccinated.

ONE OF GAGE'S OPPORTUNITIES.

New York, Jan. 31.—It is stated that Secretary Lyman D. Gage will visit this city Monday to confer with the directors of the International Banking Corporation, the presidency of which, it is reported, the directors are urging him to take.

For the Children

To Keep Their Digestion Perfect Nothing is So Safe and Pleasant as Stuart's Dyspepsia Tablets.

"Thousands of men and women have found Stuart's Dyspepsia Tablets the safest and most reliable preparation for any form of indigestion or stomach trouble. Thousands of people who are not sick, but are well and want to keep well, take Stuart's Tablets."

Tablets after every meal to insure perfect digestion and avoid trouble.

But it is not generally known that the Tablets are just as good and wholesome for little folks as for their elders.

Little children who are pale, thin and have no appetite, or do not grow or thrive, should use the tablets after eating and will derive great benefit from them.

Mrs. G. H. Crotsley, 538 Washington street, Hoboken, N. J., writes: "Stuart's Dyspepsia Tablets just fill the bill for children as well as for older folks. I've had the best of luck with them. My 3-year-old girl takes them as readily as candy. I have only to say 'tablets,' and she drops everything else and runs for them."

A Buffalo mother, a short time ago, who despaired of the life of her babe, was so delighted with the results from using the tablets that she went before the notary public of Erie county, New York, and made the following affidavit:

Gentlemen: Stuart's Dyspepsia Tablets were recommended to me for my 2-months-old baby, which was sick and puffy, and the doctors said was suffering from indigestion. I took the child to the hospital, but there found no relief. A friend mentioned the Stuart Tablets and I procured a box from my druggist and used only the large, sweet lozenges in the box, and was delighted to find that they were just the thing for my baby. I feel ready to say that Stuart's Dyspepsia Tablets saved my child's life.

MRS. W. T. DETHOPE.

Subscribed and sworn to before me this 12th day of April, 1897. HENRY KARRIS.

Notary Public in and for Erie Co., N. Y.

For babies, no matter how young or delicate, the tablets will accomplish wonders in increasing flesh, appetite and growth. Only the large, sweet tablets in every box. Full-sized boxes are sold by all druggists for 50 cents, and no parent should neglect the use of this safe remedy for all stomach and bowel troubles if the child is ill in any way regarding food and assimilation.

Stuart's Dyspepsia Tablets have been known for years as the best preparation for all stomach troubles, whether in adults or in

STRIKE ALLUVIAL GOLD

Sumas, B. C., Excited Over an Old Miner's Find.

Special to The Journal.

Vancouver, B. C., Jan. 31.—No little excitement exists here, in New Westminster, and near the town of Sumas, B. C., over the alleged discovery of alluvial gold in considerable quantities near Sumas, which is situated a few miles from the international boundary line and fifty miles from Vancouver. An old Klondike miner, named William Davis made the first discovery while sinking a hole for staking a claim.

In the bottom of the hole he found nuggets, and also other traces of gold in the vicinity. The find is supposed to be in the former bed of the Fraser river. Claims were immediately staked in the vicinity of the find and many Vancouver people, business men as well as miners, are staking as near to the original find as possible.

On the mountain side near by, free milling gold quartz has been found, worth, it is claimed, \$500 to the ton. This find, too, is attracting many persons.

Plant of the Horseshoe Company is Being Made Over.

Special to The Journal.

Deadwood, S. D., Jan. 31.—The Klondike chlorination plant at Pluma, belonging to the Horseshoe Mining company, is being converted into a cyanide plant. It is expected to have the mill running by April 1. It will start with a capacity of 100 tons a day, and if it is found that the rate of output is not satisfactory, the capacity will be increased to 500 tons a day. E. B. Sawyer is chemist for the Horseshoe company, and is in charge of the reconstruction of the Klondike mill.

The Baltic tunnel of the Lead Hill Fortune Mining company on north Lead Hill is 1,115 feet long, and is advancing at the rate of four or five feet a day. Two Ingersoll-Sergeant drills have been in use, and a third has just been added. A suction fan and over a thousand feet of pipe have been put in the tunnel recently for ventilating purposes. The face of the tunnel is beginning to show ledge matter. The Highland Chief Mining company is treating forty-five tons of ore daily at the combination stamp mill and cyanide plant, a mile and a half from Deadwood. The ore is taken from the north fork of the Lead Hill. It is hauled in wagons to the top of the hill above the mill, and is there loaded into cars running on a gravity tram system. The ore is being taken from four different openings, situated some distance apart, proving that the ore deposit covers a large area.

The Gold Hill Mining company has a

WAGES HIGHER

Independent Glass Companies Give 10 Per Cent Advance.

Pittsburg, Jan. 31.—Acting independently of the combines, the D. O. Cunningham Glass company, the largest manufacturer of window glass outside of the American Window Glass company, has voluntarily advanced the wages of all unskilled labor 10 per cent. Similar action was immediately taken by S. McKee & Co. and Cunningham & Co., who are also members of the independent glass company. It is expected that the other plants of the company will follow suit. The advance will affect 2,000 men.

Standard Oil and Chicago Men Have Surrendered It.

Special to The Journal.

Calumet, Mich., Jan. 31.—Nathan F. Leopold of Chicago, has surrendered his option on the Belt mine, in Ontonagon county, owing to the present demoralized condition of the copper mining industry and all work on the property will be stopped. The mine was taken over by Standard Oil and Chicago capitalists who were instrumental in floating the Arcadian mine, located seven miles south of this city. It was the intention of the Standard Oil interests to develop and explore the belt and if the showing warranted it a stock company was to have been organized with a capital of \$2,500,000.

Work was commenced when 12-cent copper was in force and with copper at that price the property was certainly an attractive one, but now the metal is selling for a little over 1 cent. The mine was last worked in 1884 by an English corporation.

The Atlantic Mining company is using four heads at its stamp mill, reserving the fifth for emergency. Work on section 15 continues at the same rate.

All shipments of copper from the Lake Superior district continue heavy, despite the apparent apathy in the copper market. The greater part of the metal goes to the central part of the country and little reaches the extreme eastern markets.

It is reported that the Baltic company

Hot Springs, Ark.

Low rate excursion tickets to this famous resort on sale daily at Minneapolis 7:25 p. m., arrive Hot Springs 8 a. m.

To get relief from indigestion, biliousness, constipation or torpid liver without disturbing the stomach or purging the bowels, take a few doses of Carter's Little Liver Pills; they will please you.

Death of a '55 Pioneer.

Fairbault, Minn., Jan. 31.—Thomas Hortop died yesterday of catarrhal fever aged 82 years. He was born in England and came to Minnesota in 1855. His wife, three sons and two daughters are living. The funeral will be held Saturday from the house at 3 p. m.

Atty.-Gen. Fyfe No Better.

Huron, S. D., Jan. 31.—Dr. Alfred says Atty. General Fyfe is no better; that he slept well during the forenoon and had a fairly comfortable day—all things considered. There was little delirium to-day. No particular change is expected for the next day or so.

MALTA-VITA FOOD

For Athletes

Malta-Vita is the great muscle-building, bone-forming, blood invigorating food of the new century. No other food is so nourishing or so easily digested.

A teaspoonful of Malta-Vita eaten with cream or fruit juice furnishes more nourishment to the system than a pound of prime beef.

A Muscle Builder

Sold by all grocers. 15 meals for 15 cents.

Made by Battie Creek Pure Food Co., Ltd.

WEDDING SILVER and CUT GLASS

Starling Silver and Cut Glass are the most popular Wedding Gifts today. The demand for both is growing from year to year. Reason is plain. The high prices of years gone by have been obliterated, and it is within the province of the moderately situated, as well as the rich, to provide themselves with these luxuries at a reasonable cost. It is a well known fact that we carry the best assortment of Sterling Silver, Flat and Hollowware, and Cut Glass in the Twin Cities, and as soon as new things are created, we are the first to show them.

We have just added the "Carnation" to our line of silver; a most beautiful design in French gray finish and exclusive with us. The Magnolia design is a recent addition in our cut glass department. We respectfully invite your inspection of both. Our card engraving department is another strong feature and is growing rapidly, as the quality of our work brings us new patrons every day. The most popular styles now are the shaded old English in wedding invitations and visiting cards. Call and examine our work and prices.
