

GATES' OPERATIONS

How the Systematic Bulling of Stocks Is Done.

MANY STOCKS OUT OF MARKET

Carried by Big Institutions and Trust Companies—Fears of Corners.

New York On Special Services

New York, July 30.—The bull market in stocks has been causing much astonishment on the street. A fact which Mr. Gates and his associates have been prompt to take advantage of is that the stock market for a long time has been practically bare of stocks. Nearly all the stocks are being carried by big institutions, banks and trust companies and big men, and they can afford to hold them until the prices for them more nearly approximate their actual worth.

On the other hand, our manufacturers all over the country are doing all the business they can and naturally the railroad receipts are continually growing. Even the prolonged anthracite coal strike, the steel litigation and gold exports cannot keep the market down. As a matter of fact, the gold exports are really a bull card. It is easy for a clever man like Mr. Gates, with all the capital that he needs, to take advantage of the present conditions. Briefly, he and his friends are taking advantage of the present prosperous conditions and strategic positions of certain properties that they think are worth more than they are now selling for. It can also be said with certainty that Mr. Gates is working in harmony with all the leading financial interests in this city in promoting increased values, and it would be no exaggeration to say that he directly represents many of them in all his present operations.

"THE BABY ACT"

Oats Shorts Appeal to Caesar—Gates' Corn Profits.

Chicago, July 30.—Traders on the Board of Trade who are short of oats made a long, threatened move yesterday against their opponents, the bulls, and the maneuver proved an apparent success. Application was made to the board of trade directors for a "marginal price" on new July oats, and, after a hearing, the officials fixed 45 cents as a fair figure for marginal purposes, although the new July option closed at 50 cents to-day, and had sold at 72 cents only a few days ago. The bull crowd, therefore, is applying a measure of "pleading the baby act." Profits of more than \$500,000, supposed to be in the pocket of John Cudahy, were shifted to-day to the strong box of Harris, Gates & Co. John W. Gates was said to have been the principal beneficiary among those for whom the firm was acting. Mysteries of recent operations in corn were revealed when Mr. Cudahy sent around word to various commission-houses this afternoon asking them to transfer to the account of Harris, Gates & Co. his short line of September corn. The total amount sold by Mr. Cudahy is supposed to be about 12,000,000 bushels, of which there is an average profit of \$1.50 a bushel, or \$600,000. The maize sold above 62 cents during the latter days of the July squeeze.

GRAIN FROM CANADA

NO PREFERENTIAL TREATMENT

Or a Very Slight One at the Best—Canadian Steamship Line.

New York Special Service

London, July 30.—The Canadian ministers have abandoned hope of obtaining preferential treatment for Dominion grain. They say that even the smallest concession would be worth much as an advertisement of their agricultural resources and would be helpful to immigration. There have been consultations between the ministers and the treasury officials respecting the possibility of rendering the preference now enjoyed by British shippers more valuable than it has been heretofore. Mr. Fielding and Mr. Patterson have made a close study of statistics and are seeking to open a way for preference in return which will be useful to the dominion. The margin for anything like a mutual preference arrangement is narrow under the existing customs and registration duties of the United Kingdom. Canadian Steamship Line.

Reports printed here and in America

respecting the Canadian offers for the establishment of a steamship line on the Atlantic and Pacific are so circumstantial that the ministers assembled at Hotel Cecil have been compelled to issue a short statement disclaiming the offers. They are denying that any definite conclusion has been reached. They do not conceal the fact that proposals have been received which are making strenuous efforts to make a working arrangement with the British. They have evidently been annoyed by the controversies raised by the offers and exaggerated statements of the amounts of subsidies required by the anti-Morgan shipping combination. These have not been worked out. Certain interests are striving to commit the Canadian government prematurely to costly policies.

Canadian Steamship Line.

Montreal, July 30.—A meeting of the board of trade was held to-day and a resolution passed practically approving the awarding of the contract for a fast Atlantic steamship service between Canada and Great Britain to the Canadian Pacific railway. The resolution demanded that the service be of the order of at least twenty-three knots and objected to the subsidizing of a freight service. A resolution objecting to the awarding of the contract to a railway company, to a combination of railways was moved as the main motion, but was not voted upon, as the amendment on the lines indicated above was carried by a large majority.

"BABY BEGGARS"

The Chicago Police Gather In Forty of the Little Folks.

Chicago, July 30.—Under direction of the probation officer the police made a tour of the principal downtown retail streets last night and gathered in as many as they could of the scores of little children who are sent into the streets nightly to beg and peddle. Forty children, boys and girls, all between 4 and 7 years of age, were gathered in. Each "wait-and-stand wagon" was preceded a half block by two policemen who picked up the little ones and put them into the wagons. Many others escaped the officers. The children are held at the Harrison street police annex pending an investigation in the case of each child by the Visitation and Aid Society. The carts will be kept up until the streets are cleared of baby beggars.

FOREIGN SHIPS ARE HARMLESS

War Department Experts Invent an Explosive of Great Power.

New York, July 30.—A new time fuse for use on armor-piercing shells loaded with a recently discovered secret explosive of great power has been invented by war department ordnance experts and will, according to a dispatch from Washington, revolutionize foreign warship building.

Tests of the explosive and fuse have been made and so long as the United States government holds the secret, foreign battleships either must double their steel walls or be as wooden frigates against the new destroyer.

General Crozier, chief of ordnance, is quoted as having said that a test of the new explosive has been conducted with eminent success at the Sandy Hook proving grounds, that the shell carried its contents through the thickest armor, and that the fuse lived long enough to ex-

WHEAT FOR SO. AFRICA

HEAVY PACIFIC SHIPMENTS

More Than Double the Usual Amount Is Already Sent Out.

Portland, Oregon, July 30.—The shipments of wheat (flour included) from the Pacific northwest to South Africa since January 1 shows a total of over 2,000,000 bushels. This is more than double the amount ever shipped before in an entire season and there is enough tonnage still under charter to load for the Cape at Portland and Puget Sound ports to bring the total by the end of the calendar year up to approximately 3,000,000 bushels.

The wheat shipments from Portland have amounted to 655,607 bushels and from Tacoma and Seattle to 568,792, and from the three ports over 200,000 barrels of flour have been shipped.
