ICE FOR COUPONS

Smaller Companies Suffer by the System - Larger Ones Profit. The smaller ice companies have discovered that the coupon system of selling ice from the wagon which went into effect this summer has cut into their receipts materially, while it has worked to the advantage of the larger companies. Instead of selling for cash from the wagon and pocketing the proceeds, as in years gone by, drivers have had to take coupon tickets on which ten cents of ice, twenty-five cents each in weight, may be obtained for \$1.

Most householders in other seasons gave bought ice on the \$2.50 a month plan. Many thus secured more ice than they needed while others secured more than they were entitled to buying direct from the wagons. Most people are now content to buy a piece of ice for 10 cents every two days. In a majority of cases money is saved by buying ice on this plan. As a result the smaller companies want the system abolished. The larger companies insist that all losses incident to the coupon system are more than made up for by the cash received for extra ice for which there was formerly no accounting.

Sentiment Among Business Men for D. P. Jones for Mayor Still Strong.

The Jones mayoralty boom will not down. The solid, substantial business men who urged him to become a candidate for the republican mayoralty nomination some time since have not yet given up hope of persuading him to enter the race. While it is realized that Mr. Jones did right in declining to be a candidate when he entered upon the discharge of his duties as mayor upon his return from the east, when such an ambition might have strongly hampered him in his work of reorganizing the demoralized police department, they are again insisting that he shall consent to the use of his name. A movement to put the matter up to Mr. Jones in such shape that he cannot refuse is said to be forming.

ANOTHER SOO HIGH POINT

COMMON 74%-PREFERRED 137

Return of J. Pierpont Morgan and Bank Statement Lift the Market.

Soo stock made another phenomenal run today, broke all previous records and set a new record for the New York stock exchange common touched 74%, and preferred 137. A good many realizing and profit-taking orders went out of Minneapolis, indicating easy money and encouraging the New York bull speculators to activity. Notwithstanding the fact that it has been officially stated that there will be no dividend this year on Soo, the manipulators succeeded in advancing it, aided by the covering of shorts, who thought that 70 was to be the top and sold freely around that figure.

BISHOP I. W. JOYCE SPEAKS

An Interview on the Present Situation - The Remedies He Believes In.

The charge frequently made in debate between capital and labor that the church too often takes the part of the employer and ignores the rights of the employee is constantly being refuted by prominent churchmen. Within the last week, Bishop Potter, the eminent head of the Episcopal church in this city, has been invited to discuss the relative merits of the controversy between the mine owners and operators in the anthracite coal region of Pennsylvania. Start from upholding the employers in the course which they have pursued, Bishop Potter criticized the mine owners for not having compromised matters on the proposed basis of arbitration which was put forward by the strike leaders. He discussed the situation generally and in the main upheld the strikers in the course which they have pursued.

Without question, I believe that labor has a right to organize, to protect its own interests, to have a voice in the determination of its own conditions of work, and to be recognized as the laborer or the man who employs that labor. Justice and righteousness should be the basis of all measures in any way should be used to secure those ends. In this enlightened day and advanced age of the world, there ought to be a cheerful submission to the laws of the land, and a hearty obeying of the highest dictates of reason and conscience.

A Right to Organize.

"The laws of the state should be such as to guard every right and interest and promote the same, whether it be the man who is recognized as the laborer or the man who employs that labor. Justice and righteousness should be the basis of all measures in any way should be used to secure those ends. In this enlightened day and advanced age of the world, there ought to be a cheerful submission to the laws of the land, and a hearty obeying of the highest dictates of reason and conscience.

HONORARY TITLES DROPPED

Captains McAllister and Gallagher Are Now Sergeants, While Captain Dudley Resigns.

Acting Mayor Jones continues to earn his title with the accent on "acting." The police department received a few finishing touches this morning. Some honorary titles overlooked in yesterday's house-cleaning were tossed into the waste basket. Captain George McAllister and "Captain" Tom Gallagher will henceforth draw pay as sergeants, but will still act as "plain clothes" policemen.

Sergeant Samuel Olson of the Central station will have to take a beat again, as he also was reduced to-day. The resignation of Captain E. W. Dudley will remain open a few days.

In addition to the above changes in the police department it was announced this afternoon that Louis Hanson had been reduced from lieutenant to patrolman. The resignation of Fred Conner, bicycle inspector, which was expected has been filed.

HE SAVED MONEY.

April 1st, 1867, a young man in an Eastern state took a ten payment, 34 year endowment policy for \$6,000 in the old STATE MUTUAL LIFE OF WORCESTER, MASS. The policy matured April 1st, 1901, and its complete record is as follows:

Gross cost, 10 premiums, \$301.74 each.....\$3,017.40 Less cash dividends, 1868 to 1901, inclusive..... 1,826.81 Net cost.....\$1,190.59

An investment of \$1,190.59, which gives insurance protection of \$6,000 for 34 years and then yields a cash return of \$6,000 requires no comment, so far as the investment feature is concerned.

The large dividends and the splendid results under this policy were obtained throughout the entire period under the aegis of the Massachusetts insurance law. This means that the returns were not the result of forfeitures. The policy holder was not required to run the risk of losing his equity in case of lapse throughout the 34 years. We don't gamble in life insurance in Massachusetts.

One feature about such an investment can not be over-emphasized. That feature is the salutary incentive to systematic saving. The holder of the above policy would not have saved and invested \$3,000 if he had not contracted to pay \$300 a year. IT WAS THE POLICY WHICH SAVED THE MONEY.

Would you like to see what the old State Mutual will offer you now? Its policies are unsurpassed, and your age and address to either of the undersigned will secure a specimen with full particulars.
