

Dorothy Dodd
TRADE-MARK

Opening Display
September 6th and 8th.

Dorothy Dodd
TRADE-MARK

[Extract from Adv. in September Ladies' Home Journal.]

"I will kill thee one hundred and fifty ways," said Touchstone in "As You Like It." That is just what the average shoe tries to do to its wearer. I have always made a distinction between a shoe fitting the foot and the foot fitting the shoe. It is the shoe that must yield. Let the foot remain as Nature made it. When I began designing my own shoes, I insisted that faultless fitting must be to my shoe what the keystone is to the arch—the chief element of the whole. Faultless-fitting means a shoe that follows the lines of the foot, allowing free, natural action, fitting very closely under and about the instep, and easy and flexible at the ball and toes, thus giving elasticity and better poise in walking. It is the slipping forward of the foot at every step that makes walking so tiresome.

My shoe is THE ONLY SHOE that overcomes this difficulty. It holds the foot firmly at the waist and instep and supports the arch. It is a totally different construction from every other shoe made.

A "Dorothy Dodd" Shoe has that subtle something in beauty and style that means individuality and lifts it above the commonplace.

Sincerely yours,
Dorothy Dodd

Excepting a few special styles which cost an additional fifty cents, all

"Dorothy Dodd" Boots are \$3.00
"Dorothy Dodd" Oxfords are \$2.50

We are pleased to announce that we have completed arrangements by which we are made exclusive agents in our city for the new "Dorothy Dodd" Shoe that is now causing so big a sensation all over the country. "Dorothy Dodd" Shoes are remarkable for more than "distinctive beauty" and "faultless fit"—they are built upon specifications furnished by a woman who has made a study of woman's requirements. They are a woman's idea of "the perfect shoe." All the knowledge and facilities of this house have been exerted with a view to testing the claims of the "Dorothy Dodd" Shoe. We find that it not only possesses "that subtle something that lifts it above the commonplace," but that it is so easily superior in all the points of beauty, of fitting qualities and of value that we give it our unqualified endorsement.

Our first "Dorothy Dodd" Opening Display will be made on Saturday and Monday, September 6th and 8th.

Your attendance upon that occasion will afford us pleasure and you the opportunity to see these much talked-of shoes.

\$4,000 are to be distributed in prizes to wearers of "Dorothy Dodd" Shoes.
ASK FOR PARTICULARS.

S. D. ARTESIAN BASIN

Report of Well Borings Over the State Attracts Much Attention at Washington.

Great Pressure Secured from Spouters Used to Drive Machinery and Pump Sewage.

Washington, Sept. 5.—According to a recent list of well-borings over 400 feet deep in South Dakota, published by the United States geological survey, out of 350 borings, sixty-five are over 1,000 feet deep and two reach a depth of 2,500 feet, or about half a mile. The majority of these wells have strong artesian flows, with sufficient head to raise the water in open pipes from 100 to 500 feet above the surface. This great pressure is used to furnish power for a variety of purposes. At Aberdeen the sewage is pumped away by power derived from an artesian well and elsewhere in the state electricity is generated for light and power purposes. The power from the wells can be controlled easily and greatly adds to their value. Its use does

not interfere with subsequent use of the water for other purposes. The geological survey also has issued a chart showing the quantity and value of the mineral productions of the United States for the ten years ending with 1901, which will be sought widely because of its convenience for reference purposes. Without attempting analysis of the statistics presented, it is noticeable that the value of the total output of metallic ores—such as iron, copper, gold, silver, etc.—in 1901 was \$524,873,284, against \$307,936,189 in 1892, and that the value of the non-metallic products, including coal, petroleum, natural gas, building materials, etc., was \$556,351,096 in 1901, against \$339,958,842 in 1892. From the compact arrangement of the metallic and non-metallic resources on a single sheet it is possible to follow the yearly change in the production of about sixty of the important mineral products of the country during the decade. The chart is issued in advance of the report, "Mineral Resources of the United States, 1901," which will be ready for distribution in the fall. **End of Week Excursions—Low Rates.** Tickets on sale every Saturday and Sunday via Chicago Great Western railway, good to return by any train on following Monday. Rates for the round trip: Red Wing, \$1.52; Cannon Falls, \$1.17; Northfield, \$1.18; Faribault, \$1.57; Morris-town, \$1.89; Waterville, \$1.96; Elystan, \$2.14; Madison Lake, \$2.35. For further information inquire of L. C. Raina, agent, Cor. Nicollet ave. and Fifth st., Minneapolis.

THE TRUST PLANK

The President's Feet Are on Firm Timber, Says Secretary Hitchcock.

Washington, Sept. 4.—Secretary Hitchcock of the department of the interior is satisfied that President Roosevelt's policy regarding trust legislation will be approved by the people of the country. "The secretary has just returned from a six weeks' vacation spent at his summer place in New Hampshire. He has been watching the president's course closely, and has full confidence in the latter's popularity. Mr. Hitchcock believes that the next house of representatives will have a safe working majority of republicans. In response to an inquiry to-day as to whether President Roosevelt's attitude on the trust question had excited antagonism from financiers, Mr. Hitchcock said: "I would not use such a strong word as antagonism. There are people who differ from him yet at the same time they approve his sterling honesty, integrity and sincerity. President Roosevelt has been misunderstood. There has been an idea that he intends to destroy great financial interests and corporations, but in his recent speeches he has set at rest any misunderstandings of that sort, as he has declared he does not regard it necessary to kill a patient in order to cure him. "As I understand the purpose of the president, he simply means to enforce the strict compliance with the laws as they stand. I don't think there is the slightest occasion for fear or anxiety for the commercial interests of the country. The president is going to do his duty as he sees it, and he sees it from the very highest standard of citizenship." As to the attitude of the people of the country toward the president, the secretary said: "There is no question, in my judgment, that the people of the country are absolutely behind the president, and I believe he will be the republican nominee of the party two years hence. I firmly believe he will be elected, and I believe he ought to be." Representative Grosvenor of Ohio came to Washington to-day and is chipper and confident of republican success this fall. As to the situation in his own state, the general declared this afternoon: "We are going to have a democratic hippodrome performance, in which Tom L. Johnson and John R. McLean will be the star actors. This will only help to make the campaign interesting. Our democratic friends are still clinging to the old free silver, anti-progressive doctrines of the past. They are very much dissatisfied when there is prosperity, and growl when there is not. I think, however, the majority of the people in the state of Ohio are pretty sound in their judgment, and I expect a good, old-fashioned republican victory this year."

NOTHING BUT CONFUSION

Some of the Reasons Why We Should Annex Haiti.

Kingston, Jamaica, Sept. 5.—Letters received from Haiti, dated Sept. 1, say that the situation in that republic is becoming more complicated. In the chamber of deputies as now constituted M. Pierre, one of the candidates for the presidency, had a majority over his rival, M. Fouchard, while M. Firmin's revolutionary party is making headway in the field. No settlement of the difficulties is in sight, business is entirely suspended in the chief towns and the public employes are leaving their work because they have not been paid since General Sam resigned the presidency and left the island. According to these advices those who are guilty of burning the town of Petit Goave have sought refuge on Curacao and are bound for Jamaica. **Free Government Lands and Cheap Rates to Montana and Washington, Via Great Northern Railway.** Daily during September and October the Great Northern Railway will sell cheap Colonist Tickets to Montana, Idaho, Washington, British Columbia and Oregon points, also round trip homeseekers' rates on sale first and third Tuesdays in September and October. Write for full information regarding rates and bulletins, giving description of free government lands, F. I. Whitney, General Passenger and Ticket Agent, St. Paul, Minn. If you lose your pocketbook or find any article of value, advertise in the Journal's lost and found column.

"SCAT, YOU DEVILS"

Terrific Onslaught Made by Henry Watterson on the Smart Set.

Louisville, Ky., Sept. 5.—Henry Watterson in the Courier-Journal to-day makes a scorching attack on the New York "400," referring to them as a flock of unclean birds. The editorial occupies two columns of space and says in part: "The term 'smart set' was adopted by society to save itself from a more odious description. The distinguishing trait of the 'smart set' is its moral abandon. It makes a business of defying and over-leaping conventional restraints upon its pleasures and amusements. It sets itself above the law, both human and divine. "Its women are equally depraved with its men. They know all the dirt the men know. They talk freely with the men of things forbidden the decent and virtuous. They read the worst French fiction. They see the worst French plays. "The women of this 'smart set' no longer pretend to recognize virtue, even as a female accomplishment. Innocence is a badge of delinquency, a sign of the

VIRCHOW IS DEAD

Demise of the Celebrated Pathologist at Berlin.

Berlin, Sept. 5.—Professor Rudolph Virchow, the pathologist, died here at 2 o'clock this afternoon. E. W. Grove.
