A BAND TRIMMED WALKING SUIT

It is the height of the style to-day to adorn fancy mixtures in walking suits with bands of plain cloth, these, as a rule, being rather wide, and usually in the body color. This suit is a rough effect with snow-drop cloth trimmed with bands of smooth cloth in black. The coat, it will be noted, gives that well wasted effect now so popular, and is held tightly to the figure by the use of featherbone, while the skirt is made absolutely plain. The collar is of fancy braid in a fashionable military mode.

THINGS WORTH KNOWING

Bits of Scrapbook Wisdom on Various Household Topics.

An expert in stationery says that writing is at its best on heavy paper that is not smooth to glossiness, but is slightly rough. This holds the ink most satisfactorily.

To clean fancy denim or cretonne sofa pillow covers, where soap and water cannot be used, make a thick paste of starch and water and cover the soiled and stained surfaces; let it remain till perfectly dry, when it can be brushed off. Repeat the operation if the stains have not entirely disappeared.

Pongee curtains are effectively used with oak book shelves. If the curtains are shirred on two rods, one at the top and the other at the bottom, the protection to the books is quite as efficient as if glass doors are used. The curtains should run very easily, however, as otherwise access to the books is somewhat difficult.

Pretty Christmas gifts are individual salted-almonds, which would seem to be a small bunch of absorbent cotton makes a splendid powder puff for baby's morning bath, and is desirable as it will be discarded for a fresh one often than a regular puff would be.

On the subject of children's diet, it may be stated, on the authority of a physician, that the proverbial "sweet tooth" of a child has a reason for being, and may be gratified without harm if pure sweets are suitable times are given. Candy is harmful only when it is impure, when it is partaken of unreasonably, or between meals when the stomach is empty. A little good candy may appear fairly often as a dessert at the family table, and it will be found that this method often satisfies the child's craving for sweets. Even two or three cubes of loaf sugar given after a meal will often equal the sweet tooth.

A bit of kitchen economy is that cold fried or scrambled eggs, which would seem to be no longer useful, may be chopped and mixed with mince-meat, to the latter's improvement. A poached egg, too, that was not needed, may be broken, broken, be returned to the water and boiled hard and used to garnish or mix with a salad.

A very convenient nut dish is of glass, and is divided into compartments, each holding a different variety of nuts.

In making an omelet, try using hot water in the proportion of a tablespoonful to each egg instead of the milk usually advised. It will be found that the omelet is much more tender when made in this way.

A young chicken should be washed in warm water after picking, that the pin-feathers may be removed easily. Cold water contracts the skin, the pores of which have been expanded in scalding.

Haricot Salad—Three medium-sized red beets cleaned, then boiled tender and skinned and cooled. Press through a fine sieve and add six tablespoonfuls of malt vinegar, and gradually beat in one cupful of olive oil. Add a pinch of salt and paprika, a few drops of nutmeg, cloves, celery, cinnamon and onion tincture. Beat to a smooth cream, then toss over one quart of steamed slender green beans. Heap in pyramid on salad plate and garnish with crisp greenery.

A Modern Diving Rod.
For centuries there has existed a superstition that hidden treasure, springs of pure water, and other things could be located by a hazel twig of correct form. This superstition has at last been utilized by a clever inventor to suggest a form of real diving-rod. The fact that earth containing gold, silver and copper will better conduct electricity is used as a basis. Two rods electrically connected are driven into the earth and the resistance of the intervening medium determines whether or not any of the metals exist. To determine the presence of gold on great belt beer, first examine the table, then the cellar, then in case no trace is found, telephone 485 main and we will deliver a case at once.

ASTHMA.

Medical authorities throughout the country, including names like those of Dr. C. F. Beard, South Framingham, Mass.; Dr. L. D. Knott, Lebanon, Ky.; Dr. M. L. Cuffey, St. Louis, Mo.; Dr. F. E. Brown, Sanborn, Iowa; and Dr. J. C. Curry, of St. Paul, Minn., now agree that the Whetzel system of asthma treatment affords an actual and absolute cure for the disease. The efforts of physicians heretofore, have been to ease the breathing and keep the distressing symptoms under control, leaving the disease itself alive, but latent, and asleep in the system. Under the Whetzel treatment the germ of the malady is eradicated and the patient made exempt from further attacks.

FREE TRIAL FOR ALL APPLICANTS.

Dr. Whetzel will for a time send a test course of treatment free to all applicants who will give a short description of their case and list in the humane work by sending the names of two other persons having asthma.
