This dried the surface of the ground, and the dust in the air gave the impression that crops were certainly suffering from moisture. This was not the case, however. The ground has been full of moisture, and the warm weather was exactly what was needed to start all growth nicely.

Democratic Paper Reports That Root Will Ask the President to Take This Step.

Secretary of War Is Known to Have Scant Respect for the General.

New York Sun Special Service.
Chicago, May 18.—A Washington special to the Chronicle, (democrat) says: The latest Miles episode is likely to have a sensational sequence when a growing belief in the return of General Miles to the presidency of the United States is being fostered by the indignation of Secretary Root, that the president will exercise his authority under the law and peremptorily retire the lieutenant general. Secretary Root only the other day gave an exhibition of his anger and resentment toward General Miles by neglecting to invite him to a dinner at the navy department. He had not devised an uglier snub. It amounted to the same thing as advising to the army that the secretary of war did not deem the lieutenant general a proper person to be his guest.

He is a man of high position and high character, and he is a man of high position and high character."

RUSSIAN BEAR WILL ULTIMATELY CONTROL THE PROVINCE AND ITS BUSINESS INTERESTS.

Why United States Will Secure the Bulk of Its Trade as Against Britain.

From The Journal Bureau, Room 45 Post Building, Washington.

Washington, May 18.—A bit of characteristic misinformation, from a British consular officer in China to an American consular officer in the same country, forwarded by Minister Conger to the state department in Washington, regarding the alleged purpose of Russia, immediately after the Manchurian incident, to attach it to the Russian empire by force, if need be, served to set the American press and public by the ears for a space of ten days; but the storm has blown over.

John Hay's Attitude.
The United States, in any dispute between these two great powers, would probably incline to the side of Great Britain. This will be particularly true as long as John Hay is secretary of state, for while the stories of his yielding to British official opinion are untrue, and do a great injustice to one of the most patriotic and most intelligent men who have been at the head of the American state department for many years, it is a fact that by reason of his ripe scholarship, his literary prejudices and his training as a public man, he is a convert to the theory that the United States and Great Britain, at bottom, are natural allies, and must some day stand together in a tremendous struggle for the supremacy of the English speaking race.
