

THE JOURNAL
LUCIAN SWIFT, J. S. McLAIR, MANAGER, EDITOR.
SUBSCRIPTION RATES BY MAIL.

THE JOURNAL is published every evening, except Sunday, at 414 North First Street South, Minneapolis, Minn.
M. L. STARR, Mgr. General Advr. Tribune Building, Chicago Office.
W. W. JERMANE, Representative, Washington Office, 414 Post Building.

supply her own people with such goods from her own mills. England buys our raw cotton, manufactures it and in the shape of cotton goods sells it in Central and South America, the whole of whose cotton goods demands we should supply.

Books and Authors
STUCK TO HIS LAST
Charles Dickens once responded to the earnest soliloquies of some friends and became editor of the London News.

LITERARY NOTES
The book publishing firm of Elder & Shepard, San Francisco, has been succeeded by Paul Elder & Co., Mr. Shepard having retired.

THE NONPAREIL MAN
Casually Observed.
The president expressed an admiration for "men who do things." And then when a few of them tried to do the postoffice, he turned on 'em.

The Minneapolis Journal from January 1st to June 1st, 1903, carried 73 per cent more advertising than the daily Tribune.
The Minneapolis Journal from January 1st to June 1st, 1903, carried 74 per cent more want advertising than the daily Tribune.

It would evidently be more profitable to make the cotton goods Europe makes out of our raw cotton and export them for our own advantage. We hold the primacy of the world as to raw cotton.

A New York banker, alarmed by the sedulous hunt of the depositor by the New York banks, fears that the day of "large banks will finally separate their divisions organized to respond to every conceivable wish that depositors may express."

TO TRY SALYCILIC ACID
This Will Be the Next Preservative Fed to Dr. Wiley's Boarders.
New York Sun Special Service.

Montague Vernon Ponsby, an Englishman, has just issued a book called "The Preposterous Yankee," in which he says that we all lie. Our English inheritance is still somewhat too much.

Treasury Operations.
The ability of the American people to continue rolling up surpluses of a formidable character thru the process of taxation, is again shown in the report for the fiscal year published to-day.

Opposed to Wider Markets.
It is rather amusing to see how eager some of the eastern Canadian papers are to protect the western Canadian farmer from larger markets.

THE PUZZLE'S POWER.
By Louise Betts Edwards. Philadelphia: N. T. Coates & Co.
This is a story of rather turgid times in China and of two conspicuous figures.

GORDON KEITH.
By Thomas Nelson Page. New York: Charles Scribner's Sons. Minneapolis: Nathaniel McCarthy. Pp. 113.
Mr. Page has taken time to plan and write his novel, palming it off as a historical romance.

TO DISCUSS TREATY
Conger Will Talk Matters Over With Prince Ching.
New York Sun Special Service.

Lowell Otis Reese in the San Francisco Bulletin makes complaint of the man who tells you the fearful story of his life. It is generally agreed upon, now that every life has more or less of tears and of sackcloth, and that the best way to handle this state of affairs is to shut up about it and not to try to dump it on your neighbor.

Certain Primacies.
The Atlanta Constitution, discussing the rapid progress of the cotton manufacturing industry in the south, shows that a decade ago we exported to Europe over three-fifths of the southern cotton crop of 7,140,857 bales.

AT THE LYCEUM
Two large audiences were present at the Lyceum yesterday afternoon and evening to see Dick Ferris and his company in the delightful romantic comedy, "Heart and Sword."

THE MAGAZINES
Records of the Press contains an interesting illustrated paper on "Antiquities of the United States," by Rev. H. M. Baum, D. C. L., who details some interesting facts in northeastern Arizona, where as yet no topographical survey of the canyon has been made by the government.

WEEK IS BEGUN
Keel Blocks for Battleship Minnesota on the Ways.
Washington, July 1.—Word comes from Newport News that the keel blocks for the new battleship Minnesota, recently contracted for by the navy, have been placed on the ways from which the cruiser West Virginia was some time ago launched.

TOLD IN A LINE
The thirty-third annual convention of the German-American Teachers of the United States is in session here today.

THE CALF'S ERROR
Walt Mason in Nebraska State Journal.
Nature has so constructed the calf that it is always making frantic lunges. If you have had no experience with cattle, you cannot understand how much suffering this causes.

As a means of protection to the wheat fields along its line the Columbia River & Northern railroad which began its train service in the first part of June, has begun to substitute oil-burning locomotives for coal-burners. It seems that the grain fields in the Klondike valley become very dry and inflammable during the summer months, and even before the road was built it was determined to use oil in order to avoid the danger of fire from cinders and sparks.

PROOF OF LOVE OF MUSIC
Philadelphia Inquirer.
The United States not a musical center when it is the means of all the highest priced artists the world produces, when it has grand opera every year which costs more than it does anywhere else, when it has permanent orchestras to beat the band and when there are amateurs who are ready to pay \$70,000 for a year's instruction just for the love of the gentle art? We are not musical. This country is not a musical center. We should like to know.

THE MILWAUKEE FREE PRESS
The Milwaukee Free Press points to the recent action of the Minnesota railroad and warehouse commission in compelling a reduction of coal and lumber rates in this state as proof of the desirability of an efficient railway commission in Wisconsin. The point is well taken.
