

CUTTER FIDES ON AMERICAN SHIP

Canadian Revenue Officials Get Very Gay and May Have to Explain Their Course.

Attack an American Fishing Boat and Use Their Deck Cannon

Accurately. Erie, Pa., Aug. 13.—Silver Spray, a fishing boat owned here, came into port yesterday in a badly battered condition, due to an encounter in midlake with the Canadian revenue cutter Petrel.

For years the Canadian authorities have had trouble with gunboats of this type who were poaching on their side of the lake, and the Petrel is kept constantly on the lookout for them.

At noon she came on the Silver Spray on the Canadian side of the lake and she at once ordered Captain Chau to stop.

The Petrel is a strong steel craft, and it is said that she attempted to ram the American boat before the latter could comply with the Petrel's order.

Captain Chau was ordered to fire several other boats from this side, which had been captured and confiscated—two from Erie only last season—decided to try to escape and started westward at full speed.

Canadian Open Fire. The captain of the Petrel, when he saw that the Silver Spray was trying to escape, opened fire with all the guns he had on board and before he ceased firing some twenty shots had struck her. One passed through the smokestack into the cabin house, in which Captain Chau stood at the wheel, and two more struck the pilot house, one of which came within a few inches of Chau, scattering splinters around his head.

Two shots entered the water close to the stern, two split the roof and three swept the deck. The Petrel, while other boats were firing at her, was kept up for some time and Captain Chau was nearly in despair, as his cold water pump refused to work and he feared that his boat might be struck below the water line. He finally crossed the international line and the Petrel gave up the pursuit.

The Silver Spray is a double-decker and for twelve years has been in service at Buffalo as a pleasure steamer.

Will Inform Washington. Captain Chau will report the affair to the state department at Washington, as he says he was only looking for some of his nets which had drifted from this side toward the Canadian shore.

The only man injured on the Silver Spray was Frederick Cuijver, who was hit in the leg by a shot. He is now in the hospital. The fishermen say the Petrel used her small deck cannon.

Minister Will Investigate. Ottawa, Ont., Aug. 13.—The minister of marine and fisheries is without advice of the attack yesterday on an American fishing steamer by a Canadian revenue cutter.

A FIENDISH DEED

Drunken Man Throws Acid Into the Faces of Three Women.

Cleveland, Ohio, Aug. 13.—Intoxicated and angered because he was to be ejected for non-payment of room rent, Peter McCarty, a cobbler, 49 years old, hurled a half pint of carbolic acid into the faces of three women at 62 Walnut street.

The women are respectively Mrs. Anna Haslam, the landlady, may die. Even should she recover, she will be totally blind. She previously had lost the sight of one eye. The acid destroyed that of the other. Her face is terribly burned and the flesh is eaten away on her shoulders, arms and breast.

Agnes Lee, 17, and Bessie Farris, 18, who were visiting Mrs. Haslam, were badly injured.

JUNIATA ON THE BOTTOM Bronson & Folsom Line Boat Sinks in the St. Croix.

Special to The Journal. Stillwater, Minn., Aug. 13.—The steamer Juniata of the Bronson & Folsom line sank on the bank of the St. Croix river this morning and only the pilot, cabin house and smoke stacks are out of water.

MANITOBA RESIGNED TO THE FACT THAT IT WILL HAVE BUT 50,000,000 BUSHEL OF WHEAT.

Average Yield Placed at About 15 Bushels—Money to Move the Crops Is Ready.

Special to The Journal. Winnipeg, Man., Aug. 13.—The general weather conditions have been against a bumper crop for this year. Too dry weather after the seed was in caused many of the crops to be thin and short.

Then in many districts the weather lately has been cold and wet, and only a good average crop may be looked for, despite the increased acreage.

South Manitoba shows the worst results in wheat crops. Careful inquiries prove that it is in many places a failure and if it averages ten bushels it will come up to export calculations.

Other parts of Manitoba and the northwest, however, show better results, and setting one district against another a fair average yield may be expected.

It is unfortunate, however, that so many English settlers have come out this year with exaggerated ideas of the condition of the crop. British newspapers have been led to believe that average crops in the west run 40 to 55 bushels an acre.

The truth is that no district in western Canada shows average over 40 bushels in the most favorable years. Twenty to 35 bushels is nearer the mark.

The Manitoba Production. Manitoba prospects are brighter than in general supposed. Against the shortage in the south, where in some cases farmers are looking for a crop of only 10 bushels, the northwestern part of the province, where the yield will be almost if not up to the average of last season, has been very few places a little above. A careful estimate gives the south 10 bushels, north 12, northwest 25; general average 15. Last year the Manitoba crop amounted to \$2,000,000 bushels with an average of about 20 bushels an acre.

This year, under the most favorable weather conditions from now on, the crop will be 50,000,000 bushels with an average of about 15 bushels.

Hugh McKellar, deputy minister of agriculture, estimates the number of harvest hands required this year at about 8,000, and the estimate for the Northwest territories is 12,000.

Mr. McKellar says his department has ceased issuing a forecast in August of the crop yield. He made the only use for such a document was to aid bankers and railroads in their estimates for providing facilities for handling the crop, and he has not issued any such forecasts since.

Mr. McKellar says his department has ceased issuing a forecast in August of the crop yield. He made the only use for such a document was to aid bankers and railroads in their estimates for providing facilities for handling the crop, and he has not issued any such forecasts since.

Plenty of Money on Hand. Inquiries in local banking circles show that the banks are ready with all the necessary funds for moving the crop, and things have much improved. In the last year, when their resources were fairly taxed, all the money needed will be forthcoming and no exceptional strain is expected.

Mr. McKellar says his department has ceased issuing a forecast in August of the crop yield. He made the only use for such a document was to aid bankers and railroads in their estimates for providing facilities for handling the crop, and he has not issued any such forecasts since.

ROBBER BAND KILLED ONE OF THEIR NUMBER WHILE ATTACKING TRAVELING HARVESTERS.

Two of the Letter Were So Badly Injured They May Not Survive.

Special to The Journal. Glendive, Mont., Aug. 12.—A bloody battle occurred near here yesterday between robbers and harvesters on an eastbound freight train and as a result two men lie in the hospital, one of them fatally, and one is dead.

The robbers were shot through the right lung, and William R. Mensing, Fern, Minn., shot in the neck and wrist. The other two were shot through the chest and abdomen by a man known as W. B. Foster who held an inquest.

McGowan and Mensing belonged to a party of six and were on the way to the harvest fields of North Dakota. They were beating their way on a freight train, but had some money.

They had heard of holdups on freight trains between Bozeman and Glendive, as only recently holdups fired a shot at a Conductor Martin Graham.

The harvesters were shadowed by three men yesterday so when they entered a box car of a freight train they took inside a lot of rocks.

When the train was leaving the yards the would-be robbers attempted to enter the train, but they were fastened on the inside. They then broke open the end door and one stood guard while two entered the car.

They fired revolvers and lighted candles and attempted to enter the pockets of the harvesters. Resistance was offered and a battle ensued, the robbers firing their revolvers and the harvesters throwing rocks.

One of the desperadoes caught. Berry returned yesterday afternoon with a prisoner who refuses to divulge his name. He was found in a dug out with his face bruised and discolored.

He says a brakeman threw the injuries when he threw him off the train. He says he came from the east, but he was seen at Glendive the night before and is identified by Mensing.

Coroner W. B. Foster has returned from Wibaux where he held an inquest on the body of the man found in the car. There was nothing upon him to identify him. He had a broken heart, the doctor says.

He had a broken heart, the doctor says. He had a broken heart, the doctor says. He had a broken heart, the doctor says.

He had a broken heart, the doctor says. He had a broken heart, the doctor says. He had a broken heart, the doctor says.

MURDERER'S BONES FOUND IN OHIO.

His Name and the Motive for Shooting McLaughlin Are Buried in Ohio.

Special to The Journal. Virginia City, Mont., Aug. 13.—A murder mystery of nearly forty years' standing was cleared up when two small boys, playing in a corner of wild ground known as the "Raspberry patch," a mile and a half northeast of the city, found the skeleton of the murderer of James McLaughlin whose death here in 1868, in the Alder gulch days of the gold excitement, was one of the sensations of the time.

The name of the man who shot McLaughlin has never been learned. McLaughlin kept a dive in what was then the negro quarter of the city, but is now upon Jackson street. One night a stranger came to town and without apparent cause shot straight to McLaughlin's place and killed him. He then threw the body over his saddle and rode out of town with it.

The body lay in an old prospect hole and the clothes had all rotted away, but by the side of the bones lay a revolver, with which the murderer had rotted. The weapon identifies the remains. It was of curious make and was described by witnesses as the murder. The remains will be buried to-day.

HE LIVES THO HANGED

Negro Is Rescued Alive From Mob, Altho He Had Been Strung Up.

Whitesboro, Tex., Aug. 12.—An attempted assault on Mrs. Hart yesterday caused the arrest of eight negroes, seven of whom were released. The other was held for identification.

Last night a mob played in a corner of wild ground known as the "Raspberry patch," a mile and a half northeast of the city, found the skeleton of the murderer of James McLaughlin whose death here in 1868, in the Alder gulch days of the gold excitement, was one of the sensations of the time.

JOKE PROVED SERIOUS

It Results in Two Attempts at Suicide and Much Suffering to Married Pair.

Little Rock, Ark., Aug. 13.—E. S. Loper of Chicago and Gertrude Anthony of Siloam Springs, were married at the latter place on July 28 and left the following day for Springfield, Mo.

A few days later Mrs. Loper received a letter from a friend, in which some complimentary remarks were made about her husband, but she refused to divulge more than to say that she had disgraced herself and her. She told him that she proposed to leave him and return home, and she threatened to commit suicide if he did so.

When she showed that she was determined to leave, Loper took several morphine tablets, but his wife summoned physicians and a doctor of much skill and the use of a stomach pump his life was saved.

Then she repeated her determination to leave him and he went into his room, locked the door, turned on the gas and retired. A porter detected the gas escaping. He opened the door and summoned a physician and once more Loper's life was saved.

About this time Mrs. Loper received a telegram from her friend who had caused all the trouble, saying: "Oh, my; can you take a joke?" Then all was explained. There was a reconciliation and the wedding journey was resumed.

HARMONY IN NEW YORK

Sheehan and Murphy Said to Have Buried the Hatchet.

New York, Aug. 13.—John C. Sheehan, leader of the Greater New York democracy, will, according to dispatches from New York, where several conferences recently have been held with Leader Murphy of Tammany Hall, re-enter that organization, over which he once ruled.

It is said that the rift between the Tammany leaders and the seceders has been patched up by democratic leaders with a view to securing co-operation in the next presidential campaign.

FITZ TELLS ALL ABOUT IT

Says Jeffries Will Win From Corbett in Ten Rounds—His Fine Condition.

Bob Fitzsimmons thus sizes up the Jeffries-Corbett bout: Jeffries will do. He will win the fight and win it in six rounds.

I have had an excellent opportunity to look the big fellow over, and I have no hesitancy in saying that he is in the condition of a great deal better than when he fought Sharkey or myself. I doubt if it were possible for a man to be finer physically than Jeffries is to-day.

I had the good fortune to see him in a fight with Jeffries, and I know what I am talking about. Mark my words—Corbett will have some difficulty in getting to Jeffries, and what if he does? Will Corbett start Jeffries? You might just as well talk of a rabbit hurting a grizzly bear. You can't hurt that fellow Jeffries. You may cut him up and leave a mark here and there, but you are not hurting him.

You are just making him mad, and when he's that way, watch out. A punch from either party is liable to put you out of the business.

These hunting trips of Jeff's, while they look to some like loafing, are nothing of the sort. They make him and improve his condition in a manner that is something surprising.

When Jeff is on the road he is running half the time and climbing the next. He has no sleep, and he is improved that he could fight for 200 rounds.

You can't hurt this mountain of muscle and energy. I tried to Saturday in our little bout, and I very soon gave up the idea.

There is this about it, that Corbett seems to overlook: One punch from Jeffries is worth about forty from Corbett, and that is no exaggeration. Corbett may be able to hit a whole lot harder, but as is generally admitted, what he gains in hitting he loses in speed. Corbett may be able to hit a whole lot harder, but as is generally admitted, what he gains in hitting he loses in speed.

The only way Corbett could keep away from this fellow at Congo Island was by doing the dancing master's act. It was not a genuine give-and-take battle, as everybody knows. That will happen to Mr. Corbett if he drops that swift "get-away" program and stands up for a "set-out" and hearing of the news of Jeff's exit from that fellow's right will crush everything in its path. I don't like to pose as a prophet, but the fight this time won't go to ten rounds.

NINE DOCTORS FAILED.

Systemic Catarrh Was the Trouble—Pe-ru-na Cured.

Another Happy Home Due to Pe-ru-na.

Mr. Charles Schmidt, 442 15th ave, Newark, N. J., writes:

"I feel better than I ever did before. I was sick for a year and a half. Had nine doctors but none of them could help me. My wife makes Pe-ru-na also. I had pain in the lungs, heart and liver, then in the sides, chest, kidneys and stomach. I had headache so much that I could hardly do my work. No doctor would help me any more, and my money for nothing until I began to take Pe-ru-na. I have now taken half of the seventh bottle, and I shall not have to take any more, for I am now well. I express to you my sincerest thanks. I feel good and am getting my wife's health back Pe-ru-na also."

Systemic catarrh is often called by many other names. Few doctors realize the cause of this condition. They call it stomach trouble or kidney trouble and

doctor for these diseases without once realizing the cause of the trouble. Catarrh is the cause. That is, catarrhal inflammation of the mucous membranes lining all of the internal organs. The catarrh may have begun in the head or throat, and being neglected has pervaded the whole system.

Something to soothe and cleanse the inflamed mucous membrane is what is needed and all that is needed to correct the many disagreeable symptoms of systemic catarrh.

Catarrh May Permeate the Whole System. Mrs. Mary E. Sampson, West Derry, Rockingham county, N. H., writes: "I had terrible headaches, both ears run and I was nervous all the time, also had trouble each month; was deaf in one ear and my stomach was all at sea. I took Pe-ru-na and one of Manalin and am happy to say that it is the best medicine that I ever used. I am not so nervous, my appetite is good, everything I eat agrees with me, and I am feeling better in every way. I think Pe-ru-na is a Godsend to women and a blessing to suffering humanity."

If you do not derive prompt and satisfactory results from the use of Pe-ru-na, write at once to Dr. Hartman, giving a full statement of your case, and you will be pleased to give you his valuable advice gratis. Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, Ohio.

MANY KILLED BY STORM

List of Fatalities Resulting From Hurricane Which Devastated Jamaica Will Be Large.

Kingston, Jamaica, Aug. 12.—It is feared that the loss of life from the hurricane has been heavy. Thirty fatalities have been reported, principally among seamen. The death list probably will reach fifty, and hundreds of persons were injured.

The entire eastern end of the island has been devastated. Villages have been wiped out and public buildings and churches were demolished. Thousands of the poorer people were homeless and destitute, are wandering about, seeking food and shelter. The destruction of the banana plantations has been complete and the fruit trees which were engaged in the ripening process have been brought to bankruptcy and ruin.

The western end of the island, which was first supposed and expected, also suffered considerably, but not to the extent which the eastern part did. New banana plantations planted there were partly destroyed and the orange and coffee crops were also injured.

SOUTH DAKOTA

Excursion to Bonesteel. Gable of the North-Western Road Will Attempt to Arrange It.

BONESTEEL, S. D.—J. H. Gale, general traveling passenger agent for the North-Western, has been selected by the club members for the purpose of ascertaining the wishes of the citizens of Bonesteel relative to a proposed excursion from Rapid City to Sioux Falls during the month of August.

Mr. Gale gave the club assurance he would place the matter before the officials of the road in a favorable light and that he would endeavor to be able to have the excursion granted.

If the company acts favorably upon the proposition, Bonesteel will provide Indian and hearing of the news of Jeff's exit from that fellow's right will crush everything in its path. I don't like to pose as a prophet, but the fight this time won't go to ten rounds.

Only seven new tires had to be obtained, which fact speaks well for the perfection of the art of tire making in this country.

These are the bare facts of the journey. It can be imagined, however, that it required a great deal of luck and endurance to make the trip. Several times Dr. Jackson had doubts whether he could possibly accomplish the task, so difficult was the traveling in the southwest. He had many adventures while en route, but none was of a serious nature.

The doctor made a careful study of the land as he plodded along, and believes that it is entirely feasible to build a automobile road from Maine to the Golden Gate. With such a road he believes that the journey could be easily made in fifteen days.

MORA, MINN.—Arrangements are being made for market day on the 25th inst., over \$200 having been subscribed by the business men for the occasion. Excessive rains have drowned out some of the potato fields, but otherwise a large yield is expected.

ELK RIVER, MINN.—Bradley L. Hall of Monticello has bought out Joseph McDonald at Oatago. The former has been living on a farm near Monticello. McDonald has run a country store at Oatago for ten years. The building and stock sold for \$2,500.

WESTINGTON, S. D.

A 15-year-old daughter of one James was accidentally shot at a neighbor's by a son of E. W. Simmons. The boy was fooling with a gun which was supposed to be unloaded. The girl was killed instantly.

PARKER, S. D.—Wilson Rattburn had a remarkably narrow escape from being shot at a neighbor's by a son of E. W. Simmons. The boy was fooling with a gun which was supposed to be unloaded. The girl was killed instantly.

SCOTLAND, S. D.—Les & Falkenberg, publishers of the Scotland Journal, have sold their plant to G. E. Prouty of Yankton.

COTTONWOOD, MINN.—A. A. Hellockson, a liverman, was held up and robbed of about \$10 and a gold watch while on his way home from Marshall about 2 o'clock in the morning. The robbery was the liverman's passenger, being engaged the rig and driver during the afternoon. On the way home he presented a revolver and went thru Hellockson's pockets.

GLENCOE, MINN.—Michael Waldron, an old-time resident of Green Isle township, died at his home here, on the M. E. Sunday school picnic at Oak Grove park Wednesday afternoon.

THE MAN IN ARMOR

Was no match for the microbe. Giants he might slay but this microscopic organism defied him, and in many a campaign more men were destroyed by camp diseases than by the enemy's sword.

The one way to arm against microbes is to keep the blood pure. Impure blood both breeds and feeds disease.

The signs of impure blood are easy to detect. It is a yellowish color, boils, and eruptions generally proclaim the blood to be impure. Scrofulous sores and swellings, blood and skin diseases, etc., are other signs of a corrupt blood.

Doctor Pierce's Golden Medical Discovery purifies the blood and cures all blood and skin diseases caused by the blood's impurity. It cures scrofulous sores, boils, pimples, eczema and other defiling and disgusting diseases.

It gives me great pleasure to express my faith in the virtue of Dr. Pierce's Golden Medical Discovery," writes Mr. Ezekiel Floro, of Graytown, Ottawa Co., Ohio. "I suffered every thing I could suffer with humor on my face, which baffled the skill of some of the most noted physicians. Was at once advised to go to the hospital; was doctored there for three months without success. Came home discouraged. Then I bought a bottle of Dr. Pierce's Golden Medical Discovery, with humor on my face, which baffled the skill of some of the most noted physicians.
