

MCCUMBER'S BILL FOR INSPECTION

Grain Growers of Minnesota and the Dakotas Will Give It Full Consideration.

Attendance Largely Increased at the Second-Day Session at Fargo.

Special to The Journal. Fargo, N. D., Jan. 20.—There was a greatly increased attendance at the second day's session of the Tristate Grain and Stock Growers' convention here to-day. The weather is ideal and every train brings in large delegations.

One of the issues of the convention will be the report upon the national grain inspection bill of Senator McCumber of this state, and President Johnson appointed a committee composed of D. L. Wellman of Frazee, Minn.; E. D. Childs of Crookston, and J. P. Rance of Webster, S. D., to take it up and report back to the convention.

President Johnson also appointed a committee on the future of the association, as follows: J. H. Shepperd, Fargo; T. A. Hoeverstad, Crookston; S. R. W. Pickett, Niagara, N. D.; F. Greely, Gary, S. D.; M. E. Carnine, Aberdeen, and L. A. Ueland, Edgely, N. D.

A vote of thanks was extended Professor Scofield of the department of agriculture of Washington for his speech yesterday afternoon.

Professor T. A. Hoeverstad of Crookston discussed "Crop Rotation, M. A. Carleton, cerealist of the department of agriculture at Washington, spoke on "Macaroni Wheat," and H. S. Delaney of Valley City discussed "Horse Breeding in the Dakotas."

The chief address this afternoon was by Professor Thomas Shaw of Minnesota on his favorite subject, "The Dual Purpose Cow." The feature to-night will be an address on "Reciprocity" by T. M. Knapp of Minneapolis.

There are nineteen exhibits of butter so far and many shipments are arriving. The judging has been commenced by Professor Collier of Washington and the champion butter-maker, Haugland of Minnesota, is explaining the weakness in the exhibits.

The poultry show has about 1,000 exhibits and the scoring is in progress. Henry Wilson of the department of agriculture at Washington, showed his interest by sending three experts here to assist in the work of the convention.

GOVERNOR COMING HOME

HE WANTS TO BE HERE FOR MEETING OF THE PARDON BOARD.

From The Journal Bureau, Colorado Building, Washington. Washington, Jan. 20.—Governor Van Sant will start for home to-night in order to be present at the board of pardons meeting at Denver. He will also be present at the appeal of the Nelsons, the youthful Owatonna murderers, for clemency. To-day the governor completed his round-up of Minnesota members of the house and secured their unanimous assent to his plan, as outlined in these dispatches yesterday, to have the state committee officially designate a set of names for the congressional district campaign committees, those now serving to call the conventions this spring for the election of delegates to Chicago. In or state committee, members of the delegation will write letters to the chairman asking him to have the state committee designate a set of names. They send him as a campaign committee for each district.

BATTLE MOUNTAIN PARK

Laws to Be Set Aside at Hot Springs, S. D.—Other Reports. From The Journal Bureau, Colorado Building, Washington. Washington, Jan. 20.—The house committee on Cheyenne river at Edgemoor, in connection with the purchase of land around the Hot Springs, S. D., soldiers home as a national park, to be known as Battle Mountain national park. The committee also ordered a favorable report on the bill to purchase a grove of big trees in California, owned by J. W. Whiteside of Duluth. The purchase price is fixed at \$200,000, notwithstanding Whiteside's protest that the grove is worth more.

The committee also ordered a favorable report on the Mondell bill providing that forest reserve land scrip shall not hereafter be located on land chiefly valuable for timber. The passage of timber land in Minnesota to lumbermen who are said to be trying to locate them with forest reserve scrip.

WASHINGTON NOTES

Capital City Doings of Interest in the Northwest. From The Journal Bureau, Colorado Building, Washington. Washington, Jan. 20.—Representative Marshall has received information that about two hundred entries for land in North Dakota have been held up by the general land office because proof was made in land offices in districts other than those in which the land is situated. There used to be a law allowing such procedure, but it was repealed. New legislation will be needed to validate the entries and to make the acceptance of proof legal, and Representative Marshall has introduced a bill for that purpose.

The president to-day sent to the senate the nomination as assistant paymaster of the navy of Neal P. Farwell of Minnesota.

New Postmasters. The following changes have been made in fourth-class postmasters: Minnesota—Culver, St. Louis county, Neal Mack, vice Bernhard Wintergerst, resigned. North Dakota—Sturby, Walsh county, William A. Sturby, vice Paul Williams, resigned; Erzeuge, Emmons county, Eugene Muller, vice P. Wolfe, resigned.

W. W. Jermame.

Catarrah

Whether it is of the nose, throat, stomach, bowels, or more delicate organs, catarrah is always debilitating and should never fall of attention.

It is a discharge from the mucous membrane when kept in a state of inflammation by an impure, commonly scrofulous, condition of the blood.

Hood's Sarsaparilla

Cures all forms of catarrah, radically and permanently—it removes the cause and overcomes all the effects. Get Hood's.

CLIMATE HARD ON COLOMBIANS

Camp Hospitals Are Crowded and Panama Campaign May Be Abandoned.

Panama, Jan. 20.—That there will be a war between Panama and Colombia is the opinion of Bishop Jungulla, who has just returned from Cartagena and Barranquilla. The bishop journeyed to Colombia to see the situation. He is en route to Rome. He declares that many of the soldiers who went to the front along the Panama border have returned in ill health. Soldiers from the interior, he says, cannot stand the climate.

There are no facilities for getting supplies and there is great suffering among the soldiers. The hospitals are reported crowded, and discontent was expressed everywhere. The troops are not anxious to start on a hard land journey to the isthmus, and the sentiment along the coast favors the abandonment of the idea of a campaign rather than risk serious troubles. The government junta here has let it go from Boca del Toro and other points showing that there has been no further advance of the Colombian army.

CANT GET TOGETHER

Democratic Senators Caucus, but Fail to Agree.

Washington, Jan. 20.—A conference of the democratic senators to discuss the Panama situation was held to-day at the committee room of Senator Gotch. More than 200 hours were consumed in consideration of the various plans suggested of getting full information concerning the alleged participation by United States officials in the revolution of the isthmus. Nearly every senator spoke and it was the unanimous opinion that the republican senators are in possession of facts which have been withheld from the democrats.

It was admitted that a number of democrats must vote for ratification of the convention, as their geographical positions demand it. The action of republican members of the senate foreign relations committee, in adopting the Lodge resolution to report the treaty of Panama to the senate, and several democrats, notably Senators Morgan, Daniel, Bailey and Pettus, predicted that, if goaded by republican precipitancy, the democrats might become a unit in voting for a rejection of the convention.

Other senators said that this was impossible, and after the meeting admitted that it is plain to every eye that the treaty will be ratified.

No plan was adopted and another conference will be held at the call of Senator Gotch.

Will Drop Amendments.

Washington, Jan. 20.—It has been practically determined to drop all amendments to the Panama treaty. Assurances have been received that the senate will not insist on the amendments provide in regard to the harbors, sanitation and the limitation of the cities of Panama and Colon.

AN IRRIGATION REPORT

RAYMOND F. WALTER TELLS OF NEEDS IN WESTERN PART OF SOUTH DAKOTA.

From The Journal Bureau, Colorado Building, Washington. Washington, Jan. 20.—Raymond F. Walter, engineer in the reclamation service, engaged in irrigation work in South Dakota, has made the following recommendations for rating stations on the streams of western South Dakota for 1904:

Continuance of a gaging station on the Belle Fourche at Belle Fourche, the data to be used in connection with the Belle Fourche project.

A station on Rapid Creek at Rapid City, as information concerning the available flow there is needed for irrigation and power propositions contemplated on Box Elder creek at Blackhawk, on Cheyenne river at Blair ranch, and on Redwater at Belle Fourche, this station also to be used in connection with the Belle Fourche project.

He recommends the discontinuance of the gaging station on Cheyenne river at Edgemoor, and the establishment of a new station on Highway bridge near Buffalo Gap; the discontinuance of the station on Elk creek at Piedmont, and the establishment of a new station at Hermosa. He recommends also that examinations be made along the Grand, Moreau, Bad and White rivers in South Dakota west of the Missouri river.

All these streams can be reached by stage or mail routes. Their conditions are little known at the present time, but there is said to be much good land along their courses capable of reclamation. Mr. Walter recommends that a study be made of the ditches taken out of creek and taken into the places there.

The cost of the work, if taken in connection with the reclamation work, it is thought will not exceed \$3,000. Mr. Walter's recommendations have been approved by Chief Engineer Newell.

The approximate drainage areas of the principal streams of the Black Hills, South Dakota, above the rating stations of the United States geological survey are as follows:

Spearfish river above Toomey ranch, 220 square miles.
Belle Fourche river above Belle Fourche, S. D., 2,250 square miles.
Red water river above Belle Fourche, 1,615 square miles.
Cheyenne river above Edgemoor, S. D., 7,350 square miles.
Rapid creek above Rapid City, S. D., 40 square miles.
Box Elder creek above Holmes ranch, 157 square miles.
Spring creek above Blair ranch, 205 square miles.
Battle creek above Hermosa, S. D., 175 square miles.
French creek above Fairburn, S. D., 118 square miles.
Elk creek above Piedmont, S. D., 100 square miles.
Little Missouri river above Camp creek, S. D., 1,900 square miles.

W. W. Jermame.

DES MOINES, IOWA

While sticking his head far out the window of a passenger coach, Walter Cheney was scalped by a train that was passing in an opposite direction.

"BLUE BLOOD LIMITED" IS REINSTATED

Special Street Car for Use of Aristocratic Patrons of Private Schools in Cleveland Resumes Its Trips.

New York Sun Special Service. Cleveland, Ohio, Jan. 20.—The Cleveland electric railway company has resurrected the "Blue Blood Limited." The car, which was used to carry girls from the aristocratic schools made its run according to schedule

GUESS ON THE TICKERS

SCORES OF GUESSES ON WHEN THEY WILL STOP ARE ALREADY IN, BUT THERE'S A CHANCE FOR ALL.

"When will they stop?" The Journal has propounded a query in the matter of the watches it will give the two young people who are good guessers, which promises to put the matter of Ann's age in the shade.

If you have not yet read about The Journal watches, look on the back page of this issue and see if you can guess when the watches will stop.

To-day's answers deluged the watch editor. Guesses began coming in as soon as the paper was out last night, and this morning the guesses are like the festive snowflake in a storm. Still that does not cut you out from a good chance. There is such a wide latitude in the matter that there is no reason to believe that the watches will stop on Friday. But what time on Friday? That is for you to guess.

Then how long will the two watches shown in the picture at the window, at 513-520 Nicollet avenue, run before finally stopping? That is another nice matter of speculation.

Some of the questions show all kinds of figuring. Some think the watches will only run an hour, and others three days.

The first question is: When are the watches apt to be found? The second question is: How long does the average watch run with one winding?

As a matter of fact, few people can answer as common a question as the time their watches run with one winding, and they "wind up" every day. This little test may cultivate your bump of observation.

OFFERS FOR HOSPITAL

Owners Willing to Sell Site—Money Promised for Building.

New York Sun Special Service. Chicago, Jan. 20.—The offer of the site of the Iroquois theater for the erection of a hospital as memorial to those who lost their lives in the fire was made tentatively yesterday by Arthur E. Hull, as the representative of the Iroquois Memorial association.

One of the foremost surgeons in Chicago has agreed to contribute \$5,000 to the hospital fund in connection with the association undertook to carry out the project. His idea is to erect a skyscraper, fireproof and modern in construction, to be used solely as a hospital for the Iroquois building. Such an idea in the downtown portion of the city.

The plan will be considered at a meeting of the friends of the hospital of those who lost their lives in the fire on Saturday.

INQUEST PROCEEDINGS

Manager of "Mr. Bluebeard" Says Inspectors Were Derelict.

Chicago, Jan. 20.—Edwin H. Prince, manager of "Mr. Bluebeard, Jr.," at the Iroquois inquest to-day showed up the witness who says that inspectors in a bad light, compared with inspectors of other cities.

Manager Prince said he frequently has seen inspectors examining exits in other places during the progress of performances, but never at the Iroquois.

The manager's evidence was designed to exonerate Klav and Eschango from all responsibility for the fire and to lay the blame on the theater management.

"In other cities," he said, "we often were annoyed by inspectors who came around during performances to see that the exits were open, but never in Chicago."

Valuables Recovered.

Up to the present, an average of over \$100 a day has been extracted from the debris of the Iroquois fire.

True bills against Louis Wilson, Charles Conlay and Thomas McCarthy, the indicted burglars, who robbed the body of the Iroquois, were voted by the grand jury yesterday.

WILL COST \$500,000

Repairs Required Will Keep Theaters Closed Many Months.

Chicago, Jan. 20.—Nearly two months of work and \$500,000 expenditure for repairs will be required, under the new theater building ordinance for the opening of Chicago playhouses. This is the estimate of theater managers, and it does not include the amount which will be expended for the entire rebuilding of at least one theater. Three theaters will be closed permanently, and several may be forced to suspend. Few theaters will be able to use more than two floors for many months, and many may abandon the gallery permanently.

The cost of the work, if taken in connection with the reclamation work, it is thought will not exceed \$3,000. Mr. Walter's recommendations have been approved by Chief Engineer Newell.

CITY NEWS. BETTER RULES FOR THEATERS

ST. P. CITY ENGINEER SUGGESTS BUILDING CODE CHANGES.

Weekly Fire Drill by Employes, He Says, Should Be Held—One Theater Reported to Be in Very Bad Condition—Another Needs Careful Management.

St. Paul's city engineer has made a report on St. Paul theaters in substance as follows: Metropolitan and Grand Opera-houses found in good shape and only minor changes recommended.

Star theater should be permitted to do business only under careful management, and important alterations should be made within a year.

Empire theater found to be in very bad condition and is recommended to be closed, unless suggested improvements are carried out without delay.

Mozart hall should have double its present exit capacity, and should not be used for theatrical purposes until this is done.

Theatrical managers generally are reported to have shown a hearty spirit of co-operation and willingness to do all in their power to remedy existing defects.

Amendments to building code with reference to theaters are recommended as follows: Building inspector should have power to make rules that he considers necessary for the public safety, with power to suspend licenses and close theaters if they are disregarded; action to be reported to city council, which may reverse it on a two-thirds vote.

Building inspector should have right to order tests of asbestos curtains and any other apparatus liable to get out of order, except fire apparatus, which should be under supervision of officer of fire department.

Building inspector should cause monthly inspections of theaters to be made and a written report of conditions found existing. Orders, if any are necessary, should be communicated to management of the theater.

Should be a criminal offense to obstruct the aisles of theaters or to sell more tickets than seating capacity can accommodate. Violation of this rule should be punished with a fine of at least \$100 and imprisonment.

Exits should be distinctly lettered in letters at least six inches high, and a list of such exits should be printed on official programs, together with instructions to audience how to act in case of fire.

It should be obligatory for employes of theaters to be trained to meet fire alarm emergencies and a weekly drill should be conducted by a member of the fire department.

Sprinkling systems should be installed on all theatrical stages, so that scenery may be instantly drenched by opening a valve.

All theaters should be connected with fire alarm system.

WOLF NUMBER FOUR

John Larson Kills It Near Hillside Cemetery.

John Larson, of 209 Lincoln street N.E., brought the body of a big timber wolf to the city clerk's office this morning to claim the state bounty of \$750. This is the fourth wolf whose death City Clerk Lydard has certified this winter, and all previous records are broken. The last animal was an unusually large and fine specimen. It was killed near Hillside cemetery while Larson was hunting rabbits.

Each corner of the city has furnished a wolfery this winter. The first one was killed by a boy named Lake Harriet. The next one came from just beyond Minnehaha Falls. Then some one shot a wolf on Penn avenue out toward Crystal Lake. The last one was killed in the extreme northeastern part of the city.

Wolves are frequently seen near the reservoir and there has been some talk of organizing a hunt for them.

WORK FOR HIGHWAY BILL

County Surveyor Cooley Goes to Washington for Good Roads Association.

County Surveyor George W. Cooley left last evening for Washington, D. C., where he will represent the good roads in interests of this state, at a meeting of the national association committee, with the committee of agriculture, and an appropriation of a bill now pending before congress, providing national aid in highway construction. This bill, known as the Brownlow bill, provides for the establishment of a bureau of highways, and an appropriation of \$24,000,000, to be expended in three years, each state to receive an amount proportional to its population. Minnesota's share would be \$500,000.

MONTANA DEMOCRATIC

Governor Toole Promises That His State Will Remain Constant.

Governor K. Toole of Montana, who passed through the twin cities yesterday, declared positively that Montana belongs in the democratic column, and will be found there whether the silver wing or the conservative element make the next candidate. He declined to say whether he would be a candidate for a third term as governor.

FATAL NOSEBLEED

A Little Boy at St. Paul Dies from Nasal Hemorrhage.

Pe-ru-na Saved Her Life.

By the Doctors. (It was Catarrh of the Lungs so Common in the Winter Months)

Mrs. Col. Gresham Was Given Up

St. Paul's city engineer has made a report on St. Paul theaters in substance as follows: Metropolitan and Grand Opera-houses found in good shape and only minor changes recommended.

Star theater should be permitted to do business only under careful management, and important alterations should be made within a year.

Empire theater found to be in very bad condition and is recommended to be closed, unless suggested improvements are carried out without delay.

Mozart hall should have double its present exit capacity, and should not be used for theatrical purposes until this is done.

Theatrical managers generally are reported to have shown a hearty spirit of co-operation and willingness to do all in their power to remedy existing defects.

Amendments to building code with reference to theaters are recommended as follows: Building inspector should have power to make rules that he considers necessary for the public safety, with power to suspend licenses and close theaters if they are disregarded; action to be reported to city council, which may reverse it on a two-thirds vote.

All theaters should be connected with fire alarm system.

USEFULNESS OF THE LAKE TYPE OF TORPEDO CRAFT DEMONSTRATED AT NEWPORT.

New York Sun Special Service. Newport, R. I., Jan. 20.—A board of army officers, consisting of Major A. Murray, Captain Parker and Captain Bailey, from Fort Totten, N. Y., were in Newport yesterday for the purpose of making a thorough inspection of the submarine torpedo boat Protector, of the Lake type, with a view of finding out her usefulness as an adjunct to military coast and harbor and mine defenses.

The Protector was taken out in the bay and sunk to the bottom. With Major Murray in the diving-room, the telephone cable was picked up and the motions of cutting it performed. The submerged boat then ran thirty feet below the surface, during which the signal mast was carried away by waves. From five to ten inches of ice was encountered, but the Protector cut thru it with ease.

DISTRICT K. P. CONVENTION

Grand Chancellor Cromwell Arranges for One in Stillwater.

Special to The Journal. Stillwater, Minn., Jan. 20.—James Cromwell of Duluth, grand chancellor of the Knights of Pythias, and other grand officers were here last night and arranged for a district convention of the order in Stillwater on Feb. 23. It is expected local knights will entertain about 100 guests on that occasion.

George M. Clark of Oak Park was before the municipal court this morning on complaint of Poor Commissioner Clarke for neglecting his family and leaving them in a destitute condition. The defendant had contributed but \$12 toward the support of his wife and children in three months. The prisoner was contrite, and sentence was suspended on a promise to do better.

The Kenyons were too strong for the Swansons in last night's bowling contest and won all three games.

Adolph Lawson will start for St. Louis to-day to remain for some time. The city council adjourned last night without transacting any business.

Professor Larkin Declares that Curative Properties of Hot Springs Can Be So Accounted For.

New York Sun Special Service. Hot Springs, Ark., Jan. 20.—Professor Larkin, a well-known chemist and scientist of St. Louis, advances the startling theory that the well-known curative properties of the waters of

Pe-ru-na Saved Her Life.

By the Doctors. (It was Catarrh of the Lungs so Common in the Winter Months)

Mrs. Jennie Driscoll, 870 Putnam Ave., Brooklyn, N. Y., writes: "If people knew how efficient Peruna was in the cure of catarrh, they would not hesitate to try it. I have all the faith in the world in it, as it cured me, and I have never known of a case when the person was not cured in a short time."—Jennie Driscoll.

Mrs. Col. E. J. Gresham, Treasurer Daughters of the Confederacy and President Hernden Village Improvement Society, writes the following letter from Hernden, Fairfax Co., Va.: Hernden, Va. The Peruna Medicine Co., Columbus, Ohio:

Gentlemen: "I cannot speak too highly of the value of Peruna. I believe that I owe my life to its wonderful merits. I suffered with catarrh of the head and lungs in its worst form, until the doctors fairly gave me up, and I despaired of ever getting well again. I noticed your advertisement and the splendid testimonials given by the people who had been cured by Peruna, and determined to try a bottle. I felt but little better, but used a second and third bottle and kept on improving slowly. It took six bottles to cure me, but they were worth a King's ransom to me. I talk Peruna to all my friends and am a true believer in its worth."—Mrs. Col. E. J. Gresham.

A PLAIN TALK

On a Plain Subject in Plain Language.

The coming winter will cause at least one-half of the women to have catarrh, colds, coughs, pneumonia or consumption. Thousands of women will lose their lives and tens of thousands will acquire some chronic ailment from which they will never recover.

Unless you take the necessary precautions, the chances are that you (who read this) will be one of the unfortunate ones. Little or no risk need be run if Peruna is kept in the house and at the first appearance of any symptom of catarrh taken as directed on the bottle.

Peruna is a safeguard, is a preventative, a specific, is a cure for all cases of catarrh, acute and chronic, coughs, colds, consumption, etc.

If you do not receive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case, and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, Ohio.

LEAD'S SHOTGUN ENDS IN DEATH.

Special to The Journal. Lead, S. D., Jan. 20.—George Tallman shot yesterday by George Northam, died this morning. Northam has been arrested, charged with murder, and committed without bail.
