Progress of the War.

To-day's war news records nothing Japanese would return to Port Arthur preserving the forest as a whole is and endeavor to destroy the crippled Russian fleet has not so far been fulfilled. At this distance it seems strange that the victorious Japanese did not follow up their first demoralizdestruction of Russia's naval strength in the east. Possibly, tho, satisfied that they had put the Rusisan fleet out of offensive work for some days at least, the Japanese have decided to insure the landing of a large army in Korea and possibly Manchuria before undertaking the destruction of the Russian fleet, in doing which there is a chance that they might themselves suffer heavy losses. A few chance shots or well directed torpedoes might turn the tables of the naval game.

The most interesting part of the day's news is the confirmed statement that the Japanese have blown up an important bridge on the Manchurian railway. It thus appears that there was some foundation for antebellum statements that the Japanese had already perfected arrangements for cutting the railway line upon which Russia must depend for the hope of success in land operations.

Korea appears already to be firmly within the Japanese grasp. Thus the little brown men have provided themselves with a firm foothold for launchin Manchuria. Northern Korea appears already to have been invaded by the Russians. It may not, therefore, be very long before a stiff land battle will be fought, tho an important combat is hardly to be expected within a few days. It took the Japs about five months from the beginning of the war with China to take Port Arthur. and they are not likely to advance much faster when confronting the

Mr. Dunn's Explanation.

Mr. R. C. Dunn, a candidate for the republican nomination for governor, comes from leaving the womanly things s out with a long statement in which he endeavors to put himself right on the merger question. He cites a former interview as proof that his attitude is correct and in line with the

The "fight" he referred to was the prosecution of the suit against the merger, inaugurated by Governor Van Sant. In effect, therefore, Mr. Dunn said that an attempt to enforce law was merely a phase of railway rivalry, any learning, keep it a profound secret In the whole interview, which the candidate so boldly cites, there is not a single word of approval or praise ing a land attack against the Russians of the state administration for doing

Every party man has a good right to sacrifice his personal views to those of the party. We have, therefore, no fault to find with Mr. Dunn's emphatic, the late, declaration that he indorses the merger clause of the last republican state platform, that he is opposed to railway monopoly, that he will enforce the laws if elected, and that if judicial interpretation makes those laws ineffective, will move for new and effective legislation.

At the same time we venture to suggest that it will occur to many people that if Mr. Dunn had been in harmony with the state's position as to the merger, there would be no occasion for explanations now.

We would hate to see a Russian victory now. It would be so embarrassing to the

AT THE THEATERS

"A Homespun Heart," a pastoral comedy drama in five acts, by Hal Reid, will be the offering at the Metropolitan, com-mencing to-night. A feature will be the introduction of a new singing and dancing trapeze act by the Otora family of Jap anese aerial artists.

"The Red Feather," which will be seen at the Metropolitan next Sunday evening, is one of the most gorgeous comic opera productions made this season. The plece was written especially for the starring tour of Grace Van Studdiford, who is called the Melba of light opera. Her work with the Bostonians was a revelation. De Koven, who wrote the music for "Robin Hood," is also the composer of "The Red

"The Bonnie Brier Bush" will be the attraction at the Metropolitan for three nights and matinee, opening next Thursday. The veteran actor, J. H. Stoddard, is still playing his original role of Lock playing his original role of Lachlan Campbell, and Reuben Fax will be seen as "Potsy."

"Foxy Grandpa," at the Bijou this week is a whirlwind of melody and fun. A special matinee will be given to-morrow Lincoln's birthday.

In "The Factory Girl," at the Bijo next week, the feature is the great factory scene, where over a hundred people are engaged in actively operating the great machines of an aluminum plant.

There will be a special matthee to the not show that there was an unuerstance row, Lincoln's birthday, as well as the not show that there was an unuerstance row, Lincoln's birthday, Maisle Cecil will among the persons paying the money, as regular one Saturday. The Opportunity of a Lifetime to Invest Your Savings in Little Gold Brick Radium Stock-Treasury Stock Now Worth \$100,000 a Share, to Be Sold During February at Two Cents a Share to Raise Money for Development Purposes.

Do you want to get a few shares of stock in the Little Gold Brick Radium mine? It is easily worth \$100,000 a share, out, during February only, the development stock will be sold for two cents on the share. There is no question that we have the radium ore in immense quantities, but in order to get money for development, a million shares of treasury stock has been appropriated and will be sold to the public at the merely nominal price of two cents. After March 1 the price will be raised to ten cents a share. If the radium deposit is tapped the stock will easily jump to \$100,000 a share before March 1, as every one knows that radium is selling in every market of the world at \$2,000,000 a pound. We have the facilities to turn out tons of it. Any man who will do a little figuring will see

Our Professor Frank A. Millington, a graduate of the Pittsburg Technical School of Practical, Theoretical and Applied Mineralogy, has tested our ore and writes us

Little Gold Brick Radium Company—Gents:
The ore I received from you last week was assayed and tested in the college laboratory at once. The first test gave \$1,500,000 radium, \$2 in cold steel filings and a trace of coal ashes to the ton. The second test gave \$100,000 in radium, with traces of brick dust, aluminum and iron. I should say that there was every evidence that you have in prospect a great mine. I should like to note for myself the dip of the ore bodies. If it is as you say, I do not see low your stock at 2 cents can fail to prove a winner. Very truly yours,
—Frank A. Millington, Ph. D., F. P. Q.
