CRAWFISH IN THE WATER

Tap in Down-town Building Stopped by Lively Crustacean. A plumber was called to a down-town building late yesterday afternoon to remove an obstruction from a water tap...

Circus Netted About \$400. Reports from the business management of the circus show the profits of the undertaking to be between \$400 and \$500...

PRaises Philharmonics

MURIEL FOSTER SAYS SHE HAS SELDOM HEARD AMATEURS SING WITH SUCH EXPRESSION.

"I am delighted in your people; they are so awfully quick, do everything so easily and have such a delightful sense of humor," said Miss Muriel Foster at the West hotel this morning...

The famous English contralto had just finished a successful rehearsal with the Philharmonic club, and after singing all her numbers in "Samson and Delilah," was fresh and bright.

Miss Foster is a fine type of the Englishwoman, tall, broad of shoulder, with big, expressive eyes and regular features.

"This is my first visit to America," she added, "and Minneapolis is the first city we have visited; so you see, we haven't quite got our land legs on yet. But we think it all delightful, except that you haven't any snow, and we are very sorry for that."

Miss Harriet Fifield's friends and patrons can find her at E. E. Atkinson & Co.'s, where she has assumed management of their millinery department.

DEATH WAS DUE TO STARVATION

Poor, Old Charles Johnson Dies Neglected in a City of Plenty.

He Was Too Infirm to Work and to Proud to Beg.

In a city of plenty, Charles Johnson, aged 65 years, died last night of starvation.

He had become infirm thru age and a slight attack of paralysis and was unable to work, except occasionally. Too proud to beg, he struggled on as best he could, sleeping in cheap lodgings, eating when he could, but more often going without.

His death was called, his ailment was diagnosed as bronchitis, paralysis and starvation. Nothing is known of Johnson's relatives.

BOLD HOLD UP OF STREET CAR

Stray Horse Balks on Track and Delayed Traffic for Twenty-five Minutes.

There was a bold hold-up of a street car at the intersection of Chicago avenue and Fifteenth street S this morning at 8 o'clock.

A horse named the criminal. The animal was attached to a grocer's delivery wagon, and, dragging its hitching weight, deliberately planted itself directly in the path of the street car. It defiantly faced the approaching car and held its ground, although the car approached within five feet.

Finally an urchin with a bit of bearing and courage tempted the animal to the curb.

FOUNTAINS FOR FIDO

JOHN BURNS WANTS TO INSTALL PUBLIC WATER TROUGHS FOR DOGS AT HIS OWN EXPENSE.

John Burns of 2510 Fillmore street NE is a friend of the dog. Mr. Burns has observed with regret for some time that while provision has been made for furnishing drinking water to horses at public fountains, no arrangement has been provided by which the thirsty Fido may get his throat cooled.

This is a bad thing for Fido and for the public, and out of consideration for both Mr. Burns proposes to provide drinking places for the dogs in connection with the horse fountains.

Mr. Burns proposes to take care of the expense himself. He has said to the city council that he will furnish the money, and that the citizens will have to stand for it.

GARYING THE SEWER FUND

COUNCIL COMMITTEE SPENDS DAY APPORTIONING MONEY AMONG TWELVE OF THE CITY'S WARDS.

The council committee on sewers has put in the day striving to make an equitable division of the sewer fund among the wards. There is available for sewers this year about \$250,000, and the committee has divided this among twelve wards.

NEW ADDITION TO THE CITY HOSPITAL

More Room to Be Provided on Sixth Street Side—\$40,000 to Be Expended on the Improvements—Beds Will Be Called for at an Early Date.

The addition to the city hospital planned by Lowell A. Lamoreaux, the architect, will face Sixth street and will stand immediately back of the administration building, which eventually will be erected, between two ward wings and on the site of the present Brackett house.

The addition is to be two stories, with a half basement. It will be 45 by 125 feet, of St. Louis light brick and thoro fireproof construction. It will be connected, on the basement level with the buildings now standing.

The addition will contain a clinical operating-room. Bids will be invited about March 20. The addition is to be two stories, with a half basement. It will be 45 by 125 feet, of St. Louis light brick and thoro fireproof construction.

COLON BACILLUS TAKES FLIGHT

GERM NOT FOUND IN SOME CITY WATER MAINS.

In Others He Is Making Himself Scarce—No Deaths from Typhoid Reported to Health Department Today—Seven New Cases, However, Are Reported.

Recent bacteriological tests of East Side water show that the contamination caused by water from the East Side pumping station is being rapidly removed. Reports submitted to Health Commissioner H. H. H. this morning by Dr. J. Frank Corbett, city bacteriologist, indicate that the dangerous colon bacilli have disappeared from the mains in the vicinity of the Sheridan and Tuttle schools.

The sample from the Sidney Pratt school was imperfectly taken, and another one will be required to give the water a clean bill. A few colon bacilli were found at Webster school. Several samples taken near the East Side station, which has been closed since Feb. 19, reveal that that part of the city is also free from contamination and the reservoir water has now replaced the dangerous East Side station water.

The situation at Webster school will receive special study, and, if possible, the mains in that section will receive another thoro flushing.

Water has been turned into the Twentieth avenue N main and East Side is thus supplied with an additional quantity of reservoir water. This does not mean that the typhoid epidemic will be suppressed at once, as contaminated wells are a great source of infection.

No deaths from typhoid were reported from the department today, but there have been six thus far this month and this number is much larger than the health officials care to see. Seven new cases were reported this morning, but as the period of incubation in typhoid is from three to four weeks, the new cases originated when the epidemic was at its height they appear to be at present.

WILL HELP CANADA GROW

THEODORE M. KNAPPEN LEAVES THE JOURNAL TO BECOME SECRETARY OF WESTERN CANADA IMMIGRATION ASSOCIATION.

Theodore M. Knappén, who has been with the editorial department of The Journal for nine years, the last two or three as associate editor, has resigned to accept a position as secretary of the Western Canada immigration association, and has taken offices at 223-225 New York life building.

The Western Canada immigration association was formed in St. Paul in the latter part of January by a large gathering of Americans and Canadians interested in various ways in the development of Western Canada. It is especially felt that, owing to the various advertising campaigns carried on by various railroads and other agencies in different parts of the United States, it was necessary for those interested in Western Canada to unite their efforts to some extent, if they hoped to get their share of the population movement.

The chief function of the association will be to get publicity for Western Canada in every profitable and suitable manner. Mr. Knappén has made a study of Canada and Canadian affairs for several years, and is thus well prepared to take up his new work.

BETTER WATER SUPPLY

Commercial Club Thinks It's Time to Begin Educating Public.

Commercial club committees are working on two big public questions. One is music for the parks this summer and the other is a better water supply. The club believes that the public should be educated to know that a better distribution is absolutely necessary for the city, and that it will cost money, and that the citizens will have to stand for it.

Mr. Knappén has made a study of Canada and Canadian affairs for several years, and is thus well prepared to take up his new work.

GAGER IS CAPTURED

Bar-tender Accused of Assaulting Charles Youngquist Caught.

Percy Gager, the bartender who is said to have assaulted Charles Youngquist, a schoolkeeper, in the "Hub of Hell," Sunday night, has been arrested at Albert Lea, Minn., and will be brought back by Detective Joseph Choates. Gager is said to have confessed the assault, but remains non-committal as to the motive.

NO FLOOD THIS YEAR

Weather Man Doesn't Look for One in Upper Mississippi.

Section Director Outram of the weather bureau does not expect that the Mississippi will rise indiscreetly this spring and attempt to rise the Bohemian flats for New Orleans. There thus remains \$115,000 for new work and of this only \$30,000 can come from the permanent improvement fund to pay for the city's proportion. This means that only small sewers for which the greater portion of the cost comes from assessments will be constructed.

On last year's list, are the sewers on Twenty-second avenue NE on Twenty-sixth avenue N to Girard, on South Aldrich avenue and on Humboldt avenue in the Lowry Hill district. The thirteenth ward asks for no sewers.

MAN'S BED WAS SCRAP IRON HEAP

Ole Olson, Octogenarian, Was Glad When Committed as a Vagrant.

Ole Olson, 84 years old, sentenced himself to the workhouse this morning for thirty days. He is without friends and too old to do much work, and has more than once been allowed to name his own sentence. In the autumn he usually takes a sentence that will carry him well thru the winter. This year he failed in his calculations and late in February he was let out of the workhouse with no employment and no place to sleep.

Last night Patrolman George Hamilton found the old man asleep in an old shed in the milling district with a pile of scrap iron for a bed. He had covered the bed with rags from a junk wagon and was suffering from the cold when the officer found him. He told the court this morning that a thirty-day sentence would carry him thru till spring, when he can make a living.

WHEAT AND RAZORS

Seem to Be Favorite Articles Among Petty Thieves.

Petty larceny cases have been numerous for the last week, most of the complaints being for the theft of wheat and razors. Three more cases were disposed of this morning in the police court, making twelve for the week.

Horace Hoff, a newsboy, was arraigned on a charge of stealing wheat from the railroad yards. He pleaded not guilty and his case was continued.

Robert Margulis, another boy, was sentenced to the state training school for stealing razors from a department store and selling them to the proprietor of a barbers' college. He was released on probation for one year.

Frank Lambert was arraigned on a charge of stealing wheat and razors from Henry Garrigan. He pleaded not guilty and his case was continued.

SMALLPOX IS IMPORTED

Lumberjacks Bring in Disease, and Lodging Houses Are Thoroughly Fumigated.

With the typhoid fever epidemic already keeping the health officials on the jump, an influx of "lumberjacks" from the northern part of the state is likely to spread smallpox. Seven cases have been located and quarantined this week, and the lodging-house district is being forced to undergo a thoro housecleaning and fumigation, while vaccination is epidemic.

The plan of the health department is to make a descent on the lodging houses to make the "guests" are in bed. All exits are closely guarded and every inmate is vaccinated. For several nights this work has been going on and it is hoped that such heroic methods will prevent a smallpox outbreak.

SMITH IS HELD

Alleged Hold-up Man Waives Preliminary Examination.

John Smith, accused of holding up Miss Mollie Jackson, cashier of the Hennepin restaurant and securing \$15, was arraigned in police court this morning. He waived examination and was held to the grand jury, with bail fixed at \$1,000.

CAR SERVICE IS MUCH IMPROVED

ADDITIONAL POWER MEANS LESS TIME BETWEEN CARS.

New Coaches Are Being Turned Out at the Rate of One a Week—Many Improvements Are Made—Driver's Mirror is Among the Most Important.

Great improvement in the street car service is noted by patrons of the Minneapolis lines. It is especially noticeable for the fact that the cars are being turned out at the rate of one a week. From Fourth and Central avenue on the East Side to Lowry Hill cars run at less than four minute intervals all day long. The conditions are such that at the new power house when the rush is on 5,000 horse power can be added and this capacity increased, as the power house nears completion, making it possible for the company to improve service along lines laid down a long time ago.

Thirty-six cars are now on the floor at the shops in the process of building. It is possible to turn out a new car each week. In line with its policy of making new improvements in design, the last lot will have several changes. The most important is the motorman's mirror, which is proving successful. The floor of the motorman's cab will be dropped to a level with the rear platform, or about five inches below the floor level. This accommodates tall drivers and keeps them getting round shouldered. The rail separating the "out" gate from the "in" gate is to be eliminated. It has been found an impediment rather than an aid to ingress and egress.

The new cars will be extra strong to guard against telescoping in accidents. The men are much pleased with the new workings. It is hoped that the motorman's rig and enables him to see the rear gates. This will help in making time, as in a crowded car the conductor cannot always see the platform, and it will relieve the rear end patrons from assisting the conductor in yelling "All right." It will enable the driver to make crossings better on muddy days, and will insure the passengers against accidents from closing gates.
