Men's Team—Standing, Professor Travis; kneeling, right to left, Elmer Nelson, Wilhelm Tenney, Ole Dolve; sitting, right to left, Aaron Levin, Ole Tretlow and Oscar Erickson.

"An ill cut garment offends the ear Robinson, for it is never in harmony." —Beau Brummell to his Valet.

OUR Fancy Loose Overcoats are not mere bags with sleeves; they have precisely the right cut. Coverts in the popular shades and with just the proper hang. \$12 to \$30.

New Spring Hats and Furnishings.

BROWNING, KING & CO. 415-419 Nicollet Av.

C. J. GUTGESELL, Manager.

BOY CRUSHED TO DEATH

Young Smith of Butte Caught Between a Wall and a Boiler.

Special to The Journal.—Butte, Mont., April 4.—Adra W. Smith, aged 19, met almost instant death to-day by being crushed against a brick wall by a boiler which was thrown against him by the breaking of a shaft. Smith and half a dozen others were placing the boiler in the basement of the Blaine school in Centerville at the time of the accident. From the street level outside skids had been placed, running at a sharp pitch into the cellar, and from there to the wall was another set. The boiler had been brought to the place wanted and was being turned so that the braces would fit in a wall built for the purpose, when one of the timbers snapped. Smith was standing beneath, and as the support gave way the incline threw the heavy weight against him, sending him against the west wall and pinning him there.

besides them is survived by two brothers in Butte and a married sister who lives in Maine.

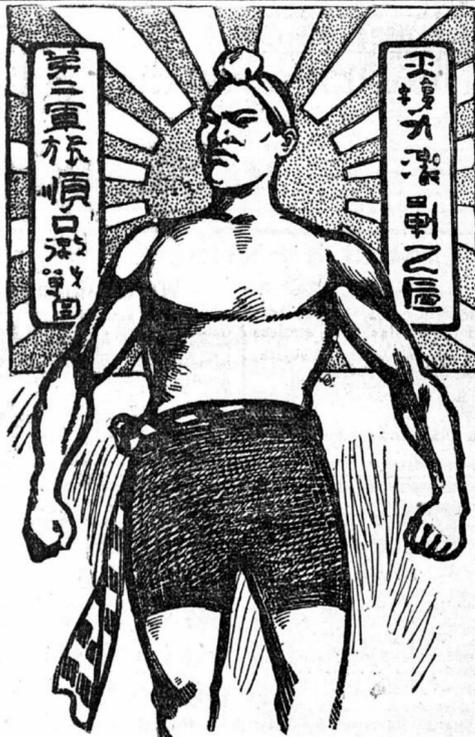

AIRSHIP RACES

St. Louis, April 4.—The world's fair management has announced the following changes in the rules governing the airship contest: The minimum speed required in the race for the grand prize of \$100,000 is 15 1/2 miles an hour, instead of 20 miles. Formal entries will be received until June 1. Instead of closing May 1. The prize for the highest altitude attained is withdrawn because of the great danger in such contests. There will be only eight races for spherical balloons instead of ten, and they will begin the second and fourth Mondays in September. Prizes of cups, medals and other trophies are offered for amateur balloon races, to be held the second and fourth Mondays in September. The exposition company will furnish free hydrogen gas for all contestants.

IN THE PRIZE RING

Young Corbett was given the decision over Tommy Moratt, the fighting street car conductor, after six rounds of fast fighting at the Waverly Athletic club, in Chicago, last Saturday night.

Bob Fitzsimmons marked the last day of his visit at Boston by a unique kindness in behalf of the former champion John Sullivan, by hammering out a big steel horseshoe which is to be sold at public auction and the proceeds applied to a fund for the benefit of Sullivan.

The Strength of the Japanese.

JAPS VS. RUSSIANS.

FOR centuries the Japanese have practiced athletics. They have hereditary wrestlers under government protection, by which the male members of each succeeding family are trained to wrestling. Although the Japs are small in stature, yet they are alert, quick and possess so much science in wrestling that they can throw the best wrestlers of any other country, though twice their weight. Some years ago a little Japanese wrestler threw the terrible Turk, Yousoff, who was twice his size and weight. The Japanese quickness of mind and alertness may yet cause the Russian giant to sue for peace. It is a proverb of Japan that a healthy stomach is the basis of all strength. The Japanese as a people are remarkable for their health, endurance, patience and skill. They have a system of physical training which is universally used. It is called the Jiu Jitsu, and by this they regulate diet, bathing, clothing, breathing, muscular development and boxing. No man is stronger than his stomach. Let the greatest athlete have dyspepsia on his muscles would soon fail. Physical strength is derived from food. If a man has insufficient food he loses strength. If he has no food he dies. Food is converted into nutrition in the stomach. It depends on the strength of the stomach to what extent food eaten is digested and assimilated. People can die of starvation who have abundant food to eat, when the stomach and its associate organs of digestion and nutrition do not perform their duty. Thus the stomach is really the vital organ of the body. If the stomach is "weak" the body will be weak also, because it is upon the stomach the body relies for its strength. And as the body considered as a whole is made up of its several members and organs, so the weakness of the body as a consequence of "weak" stomach will be distributed among the organs which compose the body. If the body is weak because it is ill-nourished that physical weakness will be found in back and knees, in hands and feet equally. So also will the weakness be equally distributed among the organs, heart, liver, kidneys, etc., being proportionately weak according to the amount of the reduction of their daily ration of nutrition. If then no man is stronger than his stomach and physical strength is created in the stomach and distributed from it, the very first question that a weak man

should ask is, "What is wrong with my stomach?" If there are weak lungs, the condition also points to "weak" stomach. All physicians know that the cure of consumption is but a question of nutrition. If you can put flesh and fat on the body the lungs will take care of themselves. The one thing which baffles the physician in the cure of lung and other diseases is "weak" stomach. If the stomach was strong he'd feel sure of a cure. In fact, then, any condition of physical weakness at once suggests weak stomach. When the stomach is made strong, the whole body regains strength and every organ of the body, heart, liver, lungs, kidneys, etc., shares in this newly gained strength. It is because Dr. Pierce's Golden Medical Discovery cures diseases of the stomach and other organs of digestion and nutrition that it gives strength to the whole body. When the weak stomach is made strong by "Golden Medical Discovery" then food is perfectly digested and assimilated, the nutrition derived from food is distributed to the several organs of the body, and the "weak" heart which was weak because it was not well fed becomes strong again. So with the weakness of the other organs of the body, it is cured when the stomach is cured. "I am pleased to tell you that three bottles of Dr. Pierce's Golden Medical Discovery has cured my husband of liver complaint and indigestion," writes Mrs. G. Hall, of Novar, Ontario. "He suffered for a long time with pain in his right side and had to leave off work several times. Tried three doctors here but they did not do any good, also tried several kinds of patent medicines but received no benefit. Then I wrote to you and you advised us to try your 'Golden Medical Discovery.' We got a bottle at once and before my husband had taken all of this one bottle he was feeling ever so much better and able to work again. He continued with the 'Discovery' until he had taken three bottles and is now feeling better than for years. We both thank you, and, if you think by publishing this it will benefit other sufferers, you are at liberty to do so. We have got several friends to try your 'Golden Medical Discovery' for different complaints and I am pleased to say that it has never failed. We wish you every success."

MILLERS BLANK DECATUR TEAM

WIN SECOND EXHIBITION GAME, SCORE 3 TO 0.

Good Pitching by Thomas and Owens —Minneapolis Dropped Both Games Saturday—Dave Martin Signs with Crookston—Lefty Davis Sizes Up National League Teams.

The millers managed to shut out the Decatur team of the Three-I league yesterday, chiefly thru the good pitching of Thomas and Owens. The score was 3 to 0. The millers showed good judgment in running bases, and the fielders displayed lots of ginger. McNichol distinguished himself with the stick, and Conlter and Maloney did some deadly throwing from the outfielding to the plate.

The millers lost both exhibition games Saturday. At Decatur the Three-I leaguers beat out the association crew by a score of 4 to 1. Thomas pitched the first five innings for Minneapolis and did not allow a hit. Koukalki succeeded Thomas, and Decatur bunched hits off him in the seventh and eighth innings. The millers made only five hits off the Decatur twirlers.

At Champaign the university players defeated the millers by a score of 19 to 5. The day was cold and raw, preventing sharp play. For once, well, but when Lockertsen succeeded him he was batted hard. Sullivan and Oyer distinguished themselves in the field, and Fox and O'Leary executed a neat double play.

William Lycan, owner of the Crookston club in the Northern league, was in Minneapolis Saturday, and succeeded in signing Pitcher Dave Martin, who has been claimed by both Crookston and Kansas City. Lycan expressed confidence that Crookston would have a winning team this summer. "I have Novack of last year's team and Henry of the Pacific National league for catcher," he said. "and besides Martin I have two first-class pitchers from the American association, whose names I cannot give out just now. Bucks, formerly of the Springfield team of the Three-I league will play first base for us. The pitcher, George Capron, of the Minneapolis amateur, and Howells will make an fast outfield as there is in the league. Fox and O'Leary anticipate a most successful season."

Lefty Davis, who was on the New York American league team last year, picks New York as a likely winner in the National this season. "The giant loomed stronger than they did last season," he said. "Ames and Milligan have strengthened the pitching staff wonderfully, and when you consider that McGraw finished in second place last year, going thru the season with only two pitchers he could depend upon, you can understand what this means. I should not be surprised to see Pittsburgh finish as low as third. The pirates are shy on pitchers. Lee, whom they secured from Washington, is a good man, and so is course Philippe. Leever is an uncertain quantity, in view of the way his arm gave out last fall, and the other twirlers have yet to prove their mettle. The infield and outfield could hardly be improved, however, and may carry the team along even with poor pitchers. St. Louis has been improved more than any team in the league, and ought to be in the first division, while Chicago will show up well."

Frank Kellen of Boston, a dyed-in-the-wool fan, is in Minneapolis on business. He predicts that Jimmy Collins' men will make a strong bid for the pennant again this year. "Collins' men stand out in the old infield and outfield, which could hardly be bettered," he said. "The Boston fans think the team has been strengthened by the acquisition of Fannin in place of Hughes, whose work last year was brilliant but erratic. The Boston Nationals have been improved little, and will hardly finish in the first division." Mr. Kellen exhibited to his friends in this city a remarkable set of photographs, including all the American and National league players, each league framed in a group by itself.
