OUTLOOK GOOD IN CANADA

WINNIPEG MEN SAY REPORTS OF HIGH WATER IN THE WEST ARE EXAGGERATED.

D. W. Bole, G. F. Carruthers, James Scott and W. J. Christie, of Winnipeg, are at the West hotel. They are in the city to attend the meeting of the executive committee of the Western Canadian Immigration association.

They state that the reports of high water in western Canada have been somewhat exaggerated, and that one Winnipeg newspaper man confessed to having sent out a false report that appeared in a St. Paul paper.

Mr. Bole, who is the liberal candidate for parliament in the Winnipeg constituency and is engaged in the wholesale drug business, says that business conditions and the general outlook in western Canada are very satisfactory.

"We have a great country up there," he said, "and all we need is population. We think the United States is the best field on which we can draw for immigration, and American settlers are highly prized in western Canada. Our association was organized to keep up the present satisfactory influx of Americans, and we have every reason to believe that we shall be able to accomplish a great deal."

"I see nothing incompatible with the interests of the United States in the emigration of a considerable number of Americans to western Canada. Certainly this movement will make for friendship, mutual respect and good feeling between the two countries."

The application of the former chief of police was formally denied, without comment of any kind. SPINAL CURVATURE AND ITS NEW CURE. "Spinal curvature is a deformity that cannot of its own accord right itself. It is a defect of that part of the bony structure of the human anatomy that requires the highest skill to properly treat." Parents having children of young or advanced age, whose deformity or defect is daily growing upon them, should call upon Dr. L. J. Cooke, Kanes building, Minneapolis, Minnesota, and enclose stamp for reply. "The new cure is mild, gentle, persuasive and painless, giving nature just that aid she so much desires, and the deformity yields in the most effective, pleasing and satisfactory manner." "When the vertebra is made straight, it remains so, in perfect line, as then the muscles of the back are so equally developed as to insure its permanency." "In my private practice I have successfully treated a large number of very pronounced and obstinate cases of spinal curvature, that came to me from different parts of the country, and I now have a number of cases under treatment." "To what may be done in each individual case can only be determined by a careful and thorough examination, for which I make no charge." "Dr. Cooke's private institute, on the sixth floor of the Kanes building, is fully and completely equipped for the treatment and cure of every deformity and defect, such as spinal curvature, bow legs, low shoulders, prominent hips, weak back, lumbago and other kinds of rheumatism, sciatica, neuralgia, abdominal protrusion, obesity, the results of accident, disease, habit, or weakness; weak heart action, retarded circulation, lack of lung capacity, contracted chest, stoop shoulders, totting in, and other defects that result in deformities.
