

WOMEN WHO CHARM

HEALTH IS THE FIRST ESSENTIAL

Helps Women to Win and Hold Men's Admiration, Respect and Love

Woman's greatest gift is the power to inspire admiration, respect, and love. There is a beauty in health which is more attractive to men than mere regularity of feature.

Mrs. Chas. F. Brown

To be a successful wife, to retain the love and admiration of her husband, should be a woman's constant study. At the first indication of ill-health, painful or irregular menstruation, headache or backache, secure Lydia E. Pinkham's Vegetable Compound and begin its use.

Mrs. Chas. F. Brown, Vice-President Mothers' Club, 21 Cedar Terrace, Hot Springs, Ark., writes:

Dear Mrs. Pinkham:—For nine years I dragged through a miserable existence, suffering with inflammation and falling of the womb, and worn out with pain and weariness. I once noticed a statement by a woman suffering as I was, but who had been cured by Lydia E. Pinkham's Vegetable Compound, and I determined to try it. At the end of three months I was a different woman. Every one remarked about it, and my husband fell in love with me all over again. Lydia E. Pinkham's Vegetable Compound built up my entire system, cured the womb trouble, and I felt like a new woman. I am sure it will make every suffering woman strong, well and happy, as it has me.

Women who are troubled with painful or irregular menstruation, backache, bloating (or flatulence), leucorrhoea, falling, inflammation or ulceration of the uterus, ovarian troubles, that "bearing-down" feeling, dizziness, faintness, indigestion, or nervous prostration may be restored to perfect health and strength by taking Lydia E. Pinkham's Vegetable Compound.

RAILROADS

WHY CHICAGO IS LOSING

TRAFFIC STUDENT SAYS IT SEEKS TO DIVERT GRAIN FROM NATURAL ROUTES.

While congestion of freight yards may have something to do with the diversion of freight traffic of which Chicago is complaining, natural transportation laws are the chief cause of the increasing loss of traffic supremacy by Chicago. This is the view of a Minneapolis man who is thoroughly acquainted with traffic conditions, and who is a student of rates and route maintenance.

"All legislation that is not natural is useless," said he. "New York has lost the business of Chicago has lost it, and Minneapolis must be careful or it will lose the business also."

He made a comparison of the trend of freight traffic with water. The natural route of the grain traffic is by the Gulf of Mexico. Distances being equal from any point to the Atlantic seaboard and the Gulf, the latter is the natural route and this route has asserted itself. It is the old story of commercial development over again. Whenever the natural trend is toward a point the traffic took that direction. There has been a contest in every instance from the point that loses the supremacy, but the natural trend has always won.

This traffic expert also believes that at the present time in making many regulations for the grain traffic Minneapolis is likely to injure itself. Regulations to oppose opposition to be applied when needed are all right, but the door should be left open for progress. No matter what the regulations made will go where it ought to go and much making of regulations is a mistake.

IOWA FALLS-FORT DODGE LINE Why Rumors of It Appear to Be Plausible.

Special to the Journal. Iowa Falls, Iowa, Jan. 23.—A report from New York city refutes the opinion expressed by the press of Iowa Falls that the effect that the proposed electric line from Fort Dodge to this city was a "paper road" and cites as a basis for believing that the road will be built, that the Westinghouse Electric & Manufacturing company is getting out plans, specifications and estimates for the complete electrical equipment of a trolley line from Fort Dodge to Webster City and Iowa Falls. It is claimed that the object in building this line is to give the Rock Island and North-Western systems entrance into Fort Dodge with its big cement and plaster industries.

Perry, Coffin & Burr, well-known bankers, are said to be organizing a syndicate to finance the enterprise.

The Illinois Central will parallel the Illinois Central between the above cities.

Firms "Try Burrelle" to Watch Employes.

In one of the largest publishing houses in New York the other day, the president of the concern sat reading over a number of newspaper clippings, when a business friend called. "What do you think of these?" asked the publisher.

"Very interesting," said the friend as he looked over the items, "but I can't see what they have to do with the publishing business."

"And still," remarked the president, "there is one clipping here that is worth dollars to me."

"Well, here's the idea. We have general agents in all the big cities. They have to be reliable men, not only because they have the name of one of my men gets in the paper anywhere, the item is sent to me. Thru this system, I have more than once been advised that one of my men in some far off city was becoming a factor in his community, in a social and business way. That was better than his telling me himself. In some cases I have discovered that my valued representative was addicted to drink; in some other cases I have found him mixed up in a scandal. I've found out lots of other things about my men, and put it up to them so they are beginning to think I'm a wizard. You'd better try Burrelle."

"My friend, look here! You know how weak and nervous your wife is, and you know that Carter's Iron Pills will relieve her, how why not be fair about it and buy her a box?"
