A meeting Saturday night seemed to show that the various suggestions are being considered, which will mean an expenditure of at least \$50,000.

CUTS FEES HARD

Revised Statute Reduces Fees for Examining Life Insurance Companies.

Legislators are making something of a stir over the fact that the statute revision fixes the fee of the actuary who examines life insurance companies at one cent per \$10,000 of insurance in force instead of 1 cent per \$1,000, as reads the old law, thus cutting down the fee 90 per cent. The change is naturally satisfactory to insurance companies whose representatives claim the old law made the fees unreasonably large. Members of the legislature, however, are inclined to favor the new law on the ground that the new one would cut down the state's income too much.

A Strict Prohibitionist and Opposed to the Use of Tobacco Under Any Circumstances, Benjamin Wallace Felt Like the Stork at the Dinner Given by the Fox.

Benjamin Wallace, son of Dr. James Wallace of Macomber college and winner of the Rhodes scholarship for Minnesota, now at Oxford pursuing his studies, was introduced into the social life of Oxford in a way that to him was most disconcerting. Mr. Wallace inherits strong views in opposition to the use of liquor, alcoholic in any degree, for any purpose whatsoever. He has as little use for cigarettes as for the demon drink. These views were not uppermost in his mind, however, when shortly after his arrival at the ancient seat of learning in England, he was invited to a luncheon by one of his fellow students, an Englishman. The invitation was accepted by Mr. Wallace with the feeling that the British cousins of the Rhodes scholarship boys from American were seeking to do the right thing and make the Americans feel at home.

In the month before the capitol was occupied, the employees were paid by the capitol commission out of the general appropriation.
