## There is Money in Mining Says Jasper With Men Who Know Mining

Greater fortunes have been made on smaller investments in the mining of precious metals than in any other field of human endeavor. That the men who know mining find it extremely profitable is proven by the history of such properties as the DALY-WEST, SILVER KING, etc., each of which has earned away into the millions. And so the figures run—always in the millions—telling their own story of the profit in mining for those who use discretion and judgment. Jasper, in Leslie's Weekly, May 18. One of the directors and original incorporators and owners of the SILVER KING mine referred to by "Jasper," is W. V. Rice of Salt Lake City. The SILVER KING has paid, during a period of less than eight years, dividends in excess of ten million dollars. It is now paying dividends at the rate of \$1,300,000 per year. The Silver King is the greatest known silver-lead mine in the world. The DALY-WEST, also referred to in the foregoing, is a combination of properties that were merged five years ago. One of these, known as the Quincy mine, at the time of the merger, had produced \$2,000,000 worth of ore in a period of fifteen months, and had paid dividends of \$1,300,000. James Farrell was the principal owner of the Quincy and he is now part owner of the DALY-WEST.

## Gibraltar Mines Syndicate Has the Men and the Mines

W. V. RICE, of the SILVER KING, is president of the Gibraltar Mines Syndicate of Bullfrog, Nevada. JAMES FARRELL, of the DALY-WEST, is a director. The Gibraltar Mines Syndicate has just been formed to operate three great gold mining properties on Bonanza Mountain in the Bullfrog district that have been paid for in full by James Farrell and W. V. Rice, and turned over to the company for stock. Of a capitalization of 1,500,000 shares, 500,000 have been placed in the treasury, and 100,000 of these are offered for public subscription at 55 cents per share. The money realized from the sale of treasury stock will go into the treasury of the company and be used for developing the properties. The shares are fully paid and non-assessable. The company owns 135 acres. The claims are known as the Equitable group, Morris and Phillips group, and Ugly Duckling and Comet claims. Mining Engineer J. H. Shockley says of the properties: "In an experience of 20 years active mining throughout the west, no series of gold veins have come under my observation which had better showings with like development and like area." It is YOUR opportunity. Can you avail yourself of it? Reservation of shares can be telegraphed or mailed to Wm. E. Pierrard, Broker, Direct Representative, 418 Guaranty Building, Minneapolis, Minn., or W. H. Clark, secretary, Gibraltar Mines Syndicate, Goldfield, Nevada. Prospectus, maps, mining engineers' reports, photographs and other particulars mailed on application.

## MINNESOTA ITALIANS GLAMOR FOR MORE WORK

STRIKE FOR LONGER DAYS ON THE GREAT NORTHERN.

Permission to Work Twelve Hours a Day, Instead of Ten, Denied Them—About a Thousand Men Involved in the Trouble—New Crews Will Be Brought In.

Special to The Journal. Crookston, Minn., June 22.—All of the Italian laborers along the Great Northern line between this city and Winnebago, who are employed on the extensive improvements being made on that line, struck today, not for more wages, but for fewer hours, but for permission to work twelve hours a day instead of ten hours, as they have been doing. This unusual state of affairs threatens to tie up all of the work along the road, as the Great Northern officials in this city are averse to allowing the men their own way in the matter and insist that the ten-hour-day schedule be lived up to. Twelve hundred men, however, are the foremen of the gangs, came to this city to confer with Great Northern officials, and threats were made that unless the twelve-hour work was allowed all of the men would be called out and the work tied up. Officials of the road will not accede to the demands of the men and are making arrangements to fill their places with new crews of Italians from the east, and a strike center has been organized at the men's headquarters here to St. Vincent. The company pays the men \$1.40 a day and provides them with cars in which to sleep. Nearly a thousand men are involved in the strike proposition and are scattered from here to St. Vincent. The Northern Pacific conference of Congressional churches in session here at Crookston, Minn., ceases to preach, valid for one year, were granted to H. C. Simpson, Francis Leslie and Dwight Mower. Leslie has refused a lucrative position as a decorator and art designer to enter the ministry. He has been called by the Congressional church of Detroit.

## WINDFALL FOR MANKATO \$1,500 Will Be Paid Into Its Treasury on a Forfeit.

MANKATO, MINN.—The city of Mankato will be paid \$1,500 by the Fidelity Deposit company of Maryland, because the Practical Gas & Construction company of North Dakota failed to carry out the provisions of the franchise granted it to construct and operate a gas plant in this city. The Practical Gas & Construction company gave a bond for \$2,000 that it would have the plant ready by last week. The bond was forfeited because the company failed to complete the work. Tuesday night the city council met with H. E. Hamilton of Chicago, attorney for the company, and it was agreed to accept \$1,500 in full settlement of the bond. The city is now in possession of the property and will have a gas plant in operation by the end of the month. The city treasurer has secured a verdict in the district court against the Chicago & North-Western Railway company for \$200, for the death of two of her horses on the defendant's track.

## MICHIGAN GOGEBIC FEELS A STRONG BOOM

MANY OLD PROPERTIES WILL BE REHABILITATED.

Colby Is Looking Better Than Ever, and Ironton and Old Jackpot, Once Abandoned, Are Doing Well—Preparations for Active Mining All Along the Line.

Special to The Journal. Ironwood, Mich., June 22.—The Gogebic range is falling into line with other districts in the exploration of new properties and the reopening of old. Reference has been made to the work in the near vicinity of Ironwood, in the Schlesinger betterments at Newport and others. The Jones & Laughlin Steel company is at work at old Hennequin and Pence, as has been stated, and it will be but a short time before ore is coming out of the two shafts now on the corner. Diamond drills are working there and an attempt is under way to explore the mine at greater depths than have ever been reached. There is great hope that deposits of ore at greater depth may give to these old and long idle mines a permanence that has been gained for other Gogebic properties in the same way. East from Bessemer much new work has begun, and the development of the mine at Bessemer, which was abandoned by Jones & Laughlin a few years ago, are both looking well. At Eureka, two miles east of Bessemer, drilling seems to have disclosed ore and pumps are going in to invert the old openings and prepare for active mining. At Wakefield old Comet and Joliet are both to be overhauled and revived, and both may send out ore this year. There is to be exploration at the western end of the range over in Wisconsin near Melles. Some of this work is under way. The progress of mining on the active portion of the Gogebic is more rapid than before and the total tonnage is sure to be large.
