

WILL MAKE AUTOS "BUMP THE BUMPS"

Chicago Suburb Has a Solution of Scorching Problem—Army Has Another.

New York Sun Special Service. Chicago, July 28.—The auto problem has been solved by Glencoe. It is simple, not make the fast-going machines "bump the bumps" and there you are.

Work on the bumps has been begun. They will be made of brick and will be six inches high at the highest point.

Armed Guards Will Shoot. Chicago, July 28.—As a result of the reckless manner in which some of the automobiles have been speeding thru the Fort Sheridan reservation, along the finely macadamized streets, the post authorities have put on extra guards, armed with Krags-Jorgensen rifles, to see that the machines do not run faster than five miles an hour.

MISS ROOSEVELT FETED IN TOKIO

Japanese Capital Showers Honors on the Daughter of America's President.

Tokio, July 28.—Miss Alice Roosevelt, daughter of the president, is being showered with attentions in the capital of Japan. Secretary Taft, of course, is the official head of the visiting party, but Miss Roosevelt's share in the honors of the day is a large one.

Minister Griscom gave a garden party in honor of Secretary Taft yesterday. About 1,000 persons were present, including Princess Fushimi, Jr.; Fushimi, Jr. and Kanin, Princesses Nashimoto, Higashi and Fushimi, Premier Katsura, members of the cabinet and other high officials, besides members of the American colony.

Secretary Taft, Miss Roosevelt, Minister Griscom and the legation staff lunched with Prince Fushimi and a number of distinguished Japanese.

NEW ELEVATOR TO WOMAN'S FLOOR AT THE PLYMOUTH CORNER ENTRANCE. VICE PRESIDENT FACES AN INQUIRY

Fairbanks on Joint High Commission, Which May Be Investigated by Congress.

Washington, July 28.—There will be a congressional investigation of the affairs of the joint high commission, of which Vice President Fairbanks is the chairman. This commission has been in existence for seven years, and so far it has not been able to do anything whatever except to spend \$50,000.

KAISER'S ADVICE SPURNED. Proposal to Czar for International Re-arrangement Is Rejected.

London, July 28.—The Standard correspondent at St. Petersburg wires: "I am now able to confirm the view already expressed that the kaiser met the czar with the distinct object in the first place of bringing about a rearrangement of the international situation and I have the best authority for stating in this respect that the kaiser's attitude of mind is not so clear, but there are good grounds for apprehension that his advice was that the Russian government rely upon the army and grant a few concessions as possible."

Durnovo Rules in Moscow. St. Petersburg, July 28.—The newspapers today announce the appointment of General Durnovo, a member of the council of the empire, as governor general of Moscow in place of General Kozloff, who is considered to have been too vacillating in his policy towards the czar's congress. Durnovo, who is extremely wealthy, was governor of Moscow in 1872 and 1878. He has had long experience in administrative posts. His son was commander of the Russian torpedo boat destroyer Bekovy at the battle of the Sea of Japan, and subsequently escaped to Vladivostok.

GRAFTER FARM HANDS BILK A VANDERBILT

South Paris, Me., July 28.—George W. Vanderbilt, who has recently arrived at his summer home near Le Moine, Me., is about to abandon his costly farming. He finds it unprofitable and annoying, and, besides, he has learned that a good many of his employees have been working a game of graft on him, both at home and in the summer farm in Maine. Both farms have been carried on in the most expensive fashion. Chickens costing \$5 each were raised, and hogs of an alleged particular stock were said to be worth their weight in silver, besides, the ice which kept the Vanderbilt products cool cost twice as much as the same grade from other places.

It won't do to have that trouble go on. It Means Ruin. Stop Coffee 10 days. Use POSTUM and see the change.

MOVE BY KOREA TO GUARD RIGHTS

Will Recognize No Treaty Affecting Her Interests Unless She Is Consulted.

New York Sun Special Service. Washington, July 28.—Korea has followed the example of China in seeking to preserve the integrity of her territory as well as her independence. Mr. Sin, charge d'affaires in Washington, the Seoul government has notified the United States that it will not recognize any agreement that may be reached by Russia and Japan regarding matters in which it is interested unless it is first consulted.

It is believed in diplomatic circles here that the Korean notification has been made at this time in order to pave the way for the work of Rev. Dr. P. K. Yoon, who is on his way east from Honolulu to represent his country in connection with the peace negotiations. Korea has not asked that she be admitted to take part in the discussion between Russia and Japan, and no intimation has reached the state department that any request of the kind will be made.

So far as President Roosevelt is concerned, he is disposed to permit the exercise by Japan of a protectorate over the peninsula. In view of this disposition, Dr. Yoon likely will get cold comfort when he talks with Roosevelt at Oyster Bay.

KOMURA SEES PRESIDENT

Oyster Bay, July 28.—President Roosevelt entertained at luncheon Baron Jurato Komura, minister of foreign affairs, and Kogoro Takahira, minister to the United States, the Japanese envoys to the Washington peace conference. Subsequently he had a long interview with them, which all phases of the approaching negotiations were considered.

While Minister Takahira was chatting with the newspaper men before their train left Oyster Bay, Baron Komura stood on the platform of his car, smiling interestedly. A photographer asked the minister to pose an instant with Baron Komura on the car platform, but the diplomat shook his head emphatically and both he and the baron entered the car rather precipitately.

It is expected that soon after the arrival of M. Witte, the principal envoy of Russia, he, too, will make formal call on President Roosevelt in advance of the presentation to the president on Aug. 5 of the two sets of plenipotentiaries and their suites.

NEW WITNESS IN CASE AIDS KOCH

Chicago. The body of Mrs. Marie Welcker Hoch was exhumed. A coroner's jury found she had died of arsenical poisoning. Hoch was indicted, and after a trial lasting a month and replete with unique features, was found guilty.

He had been to his office early in the evening on Nov. 1 and had conversed with Dr. Gebhardt for half an hour before leaving for home at ten or fifteen minutes before 9 o'clock. It was about 10 o'clock when he had been called up by telephone and informed of the murder and that the murderer was hiding in his office or had jumped out of the window. He had gone directly to his own office, without waiting to fully dress; had unlocked it and, turning on the light, had noticed the open window and broken screen where the murderer had escaped. Then he had gone into Dr. Gebhardt's office, but had not recognized the body for ten minutes. He was familiar with Dr. Gebhardt's tools and said the hammer in evidence was not the murdered dentist's.

The state objected to the questions which had brought this out, on the ground that the defense could not impeach its own witness, and for other reasons, but the court overruled the objection.

"You looked at the hammer that evening when it was handed around, didn't you?" asked Mr. Abbott.

"I did," replied the witness. "Didn't you examine it thoroughly?" "No, sir."

"Weren't you interested in the hammer?" "Not so much in the instrument as in the doctor."

The witness was given an opportunity to explain how he had thought for a time that the hammer was Dr. Gebhardt's. In the excitement of the moment, and when assured by Asa P. Brooks that it was Dr. Gebhardt's hammer, the witness said he had become confused regarding a conversation with the dentist, and had agreed with Brooks until he had time to think it over. While he was relating this he broke down, and the examination was shortened. He said he had written the alibi statement to prevent himself from being suspected as Dr. Koch had been.

Miss Mary Fitzpatrick of Winona was recalled and testified that she had gone with Dr. Gebhardt but one time, and that was during the winter preceding his death, but she did not remember just when.

WOMAN RESPITES BLUEBEARD HOCH

York then began. He was arrested in New York Jan. 30, on information given by a woman at whose home he was boarding and to whom he is said to have proposed marriage after an acquaintance of scarcely twenty-four hours.

Meanwhile Hoch's alleged marriages and crimes received wide publicity and in various parts of the country women were reported as having been his victims.

PLOT TO MURDER SULTAN REVEALED

At Kustenji, Famous as Russian Mutiny Refuge, a Conspiracy Is Bared.

Bucharest, Rumania, July 28.—A plot against the life of the sultan of Turkey has been discovered by the authorities at Kustenji. A search of houses occupied by Turks disclosed large quantities of revolvers, rifles, cartridges and compromising documents. The Rumanian police subsequently discovered cases of rifles hidden in the hold of a Turkish steamer now at Kustenji.

SCIENTIST HELPED WIFE: RESIGNS

Geo. T. Moore, Whose Helpmate Owned Shares in Concern He Aided, Steps Out.

Washington, July 28.—George T. Moore, physiologist and algologist of the department of agriculture, today tendered his resignation to Secretary Wilson and it was accepted.

BUSINESS GROWS AS CROPS RIPEN

Dispatches Show Increasing Volume of Trade at All Big Centers.

New York, July 28.—Dispatches to Dun's Review indicate that retail trade in seasonable lines is of satisfactory volume, and wholesalers and jobbers are actively engaged preparing for the future, in which confidence grows with the crops. A good feeling prevails at Boston. Wholesale and manufacturing lines are more active at Allentown than they were a year ago, and improvement is noted in the iron and steel industry. Carpet manufacturers at Philadelphia are getting out samples for fall trade, and there is little idle machinery at hosiery mills. Retail trade is quiet and collections irregular. The usual mid-summer quiet prevails in general merchandise at Pittsburg. Baltimore reports the business outlook favorable.

Louisville reports trade about the same as it was a year ago. Orders for future shipment at Nashville are larger than last year. Trade is unusually good for the season at New Orleans, and little disturbed by the fever, except as regards country orders. Wholesale trade is active at Kansas City. Collections vary with the locality. Attendance of outside buyers in the St. Louis market is fair.

Trade developments at Chicago are satisfactory. Distribution of seasonable merchandise at Cincinnati is large. Manufacturers of knit goods at Cleveland are busy on fall orders, and clothing manufacturers report liberal purchases. Favorable crop prospects at Minneapolis promises a heavy fall trade. Advance sales of wearing apparel at St. Paul are much in excess of last year's and collections fair. Trade is good at Omaha and collections satisfactory. Clothing and dry goods houses at St. Paul are shipping fall orders freely. San Francisco reports heavy exports to Japan, while bank exchanges are the best ever recorded.

Bank exchanges continued to show a large volume of settlements thru the banks for midsummer. Total exchanges this week at all leading cities in the United States are \$1,000,994,569, a gain of 21.1 per cent over last year, and 8.3 per cent over the corresponding week of 1903.

23 PERISH IN COLLISION IN ENGLAND

Liverpool, July 28.—An electric express train on the Lancashire & Yorkshire railroad, bound from Liverpool to Southampton, collided last evening with an empty stationary train at the Hall Road station, causing the death of twenty-three persons and the injury of many. The first car of the express, which was crowded, was smashed to pieces and only six of its occupants escaped.

The collision lifted the first car of the express completely off the steel frame and crashed it down again on the unfortunate passengers, twenty of whom were killed outright.

More of them would have been killed but for the presence of mind of a Liverpool architect, who, seeing that a collision was inevitable, shouted to his fellow passengers to throw themselves upon the floor of the car.

Almost immediately after the crash the wreckage burst into flames. This is the first serious accident that has occurred on an electric railway in England, and it filled with horror the numerous waiting passengers standing at the Hall Road station, who were spectators of the disaster.

NORWAY MAY SUBMIT UNION TO REFERENDUM

Christiania, Norway, July 28.—A special committee of the storting, to which was referred the government proposal for a referendum on the dissolution of the union with Sweden, has unanimously decided to recommend the acceptance of the proposal.

The proposal for a referendum was received by the storting yesterday and was at once referred to a special committee.

WASHINGTON NOTES

Frank A. Hancock of Morris, Minn., was today notified that the state of Minnesota has granted a portion of the new Indian school buildings at Wahpeton, N. D., at \$50,450.

Latvian Bureau Quits. The world-wide cold cure, removes the cause for the full name and look for the signature of E. W. Grove, 20c.

NEW WITNESS IN CASE AIDS KOCH

Continued from First Page.

was a schoolmate of Dr. Gebhardt's, said that they had exchanged dental work, and he had supposed that he had done all that Dr. Gebhardt needed for his teeth. He had done the last of this work in March, 1904. He also related a conversation with Mr. Brooks, had on Thursday morning following the homicide at New Ulm, at which time Mr. Brooks had said that he would have to see Dr. Koch in the same position as the murderer before he could tell whether it was he.

THE QUESTION OF BLOOD AGAIN.

Dr. C. F. Warner of Mankato gave some testimony that differed very greatly from that given by the physicians called yesterday by the defense. He said that blood might coagulate in half a minute, but that the average time required was five to ten minutes. He thought that a pool of blood such as was found near Dr. Gebhardt's head would all be coagulated in five to ten minutes, as stated, to be rubbed off as reduced, as by a blow on the head, the coagulation of the blood is much more rapid. Blood might be on a person's hand for several hours and come off on a post in the night when the temperature was 41. It would stay on clothing longer. Blood placed on a post under such conditions might remain in a condition so that it could be rubbed off for eight or ten hours. It would not dry by evaporation and absorption perhaps for some hours. It might be possible for blood placed on a post in the night when the temperature was 41 to be rubbed off the following morning on a person's hand. Dr. Warner said that he would expect that blood five to ten minutes old, placed on a post Nov. 1, would be entirely obliterated by contact with the elements by March 17. This was the date that a test was made at the top of the post for blood.

TO ANALYZE THE KOCH HANDKERCHIEFS.

When court convened this morning, the jury was sent out and the state asked for an order of the court for permission to have various handkerchiefs in evidence examined by a chemist. In order to do so the state said that it would be necessary to cut strips from them.

The defense objected on various grounds, but the court overruled the objections and granted the request of the state to have the right to have an attorney present when the strips were cut.

The court reporter started to cut the strips in the presence of the court, but the defense raised so many objections that the court finally ordered the state to waive the matter of chemical analysis. The defense was finally given the same right to make an analysis, but its request to have its expert present at the state's test was denied.

H. N. Somsen identified his own two overcoats, one a grayish cravenette, and G. W. Murfin, Watertown, S. D., testified that he had seen a man in June he thought Dr. Gebhardt had an old claw hammer. He was not sure and did not know whether it had a homemade handle or a broken claw.

L. L. Brown, one of the attorneys for the defense testified to and identified an offer of evidence given by Ole Ulen, General Childs objected because Ulen could not read English and had not read the offer of evidence. The objection was sustained.

and his voice shaken with emotion, Dr. G. F. Reinecke, the friend and office mate of the late Dr. Gebhardt, explained how he had made a great mistake on the night of the murder and at the coroner's inquest next day in declaring that the hammer that was used in committing the murder was Dr. Gebhardt's property.

He had been to his office early in the evening on Nov. 1 and had conversed with Dr. Gebhardt for half an hour before leaving for home at ten or fifteen minutes before 9 o'clock. It was about 10 o'clock when he had been called up by telephone and informed of the murder and that the murderer was hiding in his office or had jumped out of the window.
