ENCOURAGED IN WORK FOR PROPOSED HOSPITAL

THE PROPOSED NORWEGIAN LUTHERAN HOSPITAL.

Forty representative men of the city are at work collecting funds for a new hospital for the Norwegian Lutheran Deaconess institute at Fifteenth avenue S and Twenty-third street. This was established in 1888 and has since graduated 100 deaconesses for charitable work throughout the northwest. It supplies nurses for two hospitals and two orphan asylums, and its influence could be greatly extended if additional provisions are made. A gift of 400 acres of land worth between \$6,000 and \$7,000 from a friend of the cause at Westby, Wis., has greatly encouraged the canvassing committee. The deaconesses are highly regarded by physicians and surgeons as nurses. Altho devoting themselves to charitable work, the deaconesses are free to retire from the order at any time. Their expenses are borne by the mother house.

There is great need for a new hospital. The present building can accommodate only thirty patients. Nevertheless it stands well among the physicians for the skillful and attentive work of the nurses. Moreover, there are in Minneapolis and the state a large number of Norwegian-born citizens who have not been in the country long enough to master the language. It is essential to their comfort when they are sick or injured to be placed in an institution where they can make their wants known. Their recovery is hastened and their comfort increased by having about them people with whom they can converse and in whom they have confidence.

Fifty thousand dollars will build a commodious modern hospital with accommodation for about seventy patients. Plans have already been prepared for the proposed building. It will be two stories with a high basement and contain twenty private rooms, five larger wards, two small wards, a children's ward and a few rooms for isolation. Ample provision is made for the operating and dressing rooms.

PRESIDENT DIVES IN A SUBMARINE

He Fools Around on Bottom While a Heavy Storm Rages On the Surface.

Oyster Bay, L. I., Aug. 26.—President Roosevelt made a descent in Long Island sound on board the submarine torpedo boat Plunger. He was aboard the vessel about three hours. At one time the little boat was submerged for fifty minutes and in that time was put thru all of the submarine feats of which she is capable. The president expressed his delight at the novel experience and said that he was immensely impressed with the boat.

A stiff northeast breeze, which had been blowing since last night, kicked up a heavy sea in the sound, but the Plunger behaved beautifully.

The mechanism of the craft was explained minutely to the president by Lieutenant Nelson, so that he afterward experienced no difficulty in understanding the maneuvers.

While the president was resting on the bottom of the sound, a storm forty feet above him was raging, unnoticed. From the bottom, porpoise diving was tried; that is, the boat would ascend to the surface of the sound for several seconds, long enough to enable her commander to sight any warship that might be within view, and then dive again immediately.

After this maneuver had been repeated a few times the Plunger was sent down a distance of twenty feet below the surface and her engines stopped. Then the engines were reversed and the boat ascended to the surface backwards.

Lieutenant Nelson made his boat perform the remarkable feat of diving to a depth of twenty feet and, while going full speed at that depth, reversing her course. The complete turn occupied only one minute. Subsequently the engines were stopped and the vessel was submerged to a depth of twenty feet. There she was kept motionless, a demonstration of her ability to remain in that position for hours while awaiting an opportunity to launch one of her torpedoes.

Lieutenant Nelson then ordered all lights on board to be extinguished to demonstrate how thoroughly the members of his crew knew their business. They worked perfectly in the inky darkness, evidently with as much skill and ease as they performed their duties in the glare of the electric light.

The president shook hands with all the crew as he left the vessel to return to Sagamore Hill.

Nobody, not even the members of his family, were aware of the president's intention to make the descent in the Plunger, except, of course, Lieutenant Nelson. One result of the secrecy maintained by the president was that the Plunger had practically the entire Long Island sound to herself.

Palpitation of the heart, nervousness, tremblings, nervous headache, cold hands and feet, pain in the back and other forms of weakness are relieved by Carter's Iron Pills, made specially for the blood, nerves, and complexion.

THE VALUE OF CHARCOAL

Few People Know How Useful It is in Preserving Health and Beauty.

Nearly everybody knows that charcoal is the safest and most efficient disinfectant and purifier in nature, but few realize its value when taken into the human system for the same cleansing purpose.

Charcoal is a remedy that the more you take of it the better; it is not a drug at all, but simply absorbs the gases and impurities always present in the stomach and intestines and carries them out of the system.

Charcoal sweetens the breath after smoking, drinking or after eating onions and other odorous vegetables.

Charcoal effectually clears and improves the complexion, it whitens the teeth and further acts as a natural and emollient face cathartic.

It absorbs the injurious gases which collect in the stomach and bowels; it disinfects the mouth and throat from the poison of catarrh.

All druggists sell charcoal in one form or another, but probably the best charcoal and the most for the money is in Stuart's Charcoal Lozenges; they are composed of the finest powdered Willow charcoal, and other harmless antiseptics in tablet form or rather in the form of large, pleasant tasting lozenges, the charcoal being mixed with honey.

The daily use of these lozenges will soon tell in a much improved condition of the general health, better complexion, sweeter breath and purer blood, and the beauty of it is, that no possible harm can result from their continued use, but on the contrary, great benefit.

A Buffalo physician, in speaking of the benefits of charcoal, says: "I advise Stuart's Charcoal Lozenges to all patients suffering from gas in stomach and bowels, and to clean the complexion and purify the breath, mouth and throat; I also believe the liver is greatly benefited by the daily use of them; they cost but twenty-five cents a box at first cost, and although in some sense a patent preparation, yet I believe I get more and better charcoal in Stuart's Charcoal Lozenges than in any of the ordinary charcoal tablets."
