

GOING! GOING!! GONE!!!

Herpicide Will Save It. Herpicide Will Save It. Too Late for Herpicide.

NEWBRO'S HERPICIDE

The ORIGINAL remedy that "kills the Dandruff Germ." The Rabbit and the Guinea-Pig Prof. Uman, the world's greatest dermatologist (ask your doctor about him) was the first to discover the microbe and contagious nature of true dandruff. His discovery was verified by Dr. Sabourand of Paris, who dandered a rabbit with human dandruff scales. Also by Lassar and Bishop, who took dandruff from St. Louis, stamps to HERPICIDE CO., Dept. H, Detroit, Mich., for sample. **VOEGELI BROS.,** Cor. Hennepin and Washington Aves. and Cor. Seventh St. and Nicollet Aves. Applications at prominent barber shops.

CITY NEWS
HUMANE SOCIETY
FACES A DEFICIT

FIELD OF USEFULNESS MUCH LARGER THAN FORMERLY.

Originally Organized to Prevent Cruelty to Animals, the Society is Now Doing a Great Work for Neglected Mothers and Children—A Special Campaign to Be Made.

Because of greatly increasing its field of labor, the Humane Society in Minneapolis is finding itself in danger of a deficit. Harlan P. Roberts, president of the society, said today:

"The Humane Society was originally formed for the prevention of cruelty to animals. The work has gradually been enlarged so that cruelty to and neglect of women and children has become an important feature of the work. As the public has learned more of the society's work, the society's demands upon the public have increased. A large number of cases of non-support by husbands have been taken up by the society and in many cases the trouble rectified. Probably a dozen men are now permitting all their wages to pass thru the office of the Humane society and be paid to their families.

"The rescuing and saving of young girls from immoral surroundings and practices has received much attention. The society has a woman agent devoting all her time to this work.

"The public has paid in about \$4,000 a year the past two or three years to the society. The present year has added about \$1,000 a year to this. The society now has at work four agents besides employing the necessary office expenses. At the present rate of expenditure it will require at least \$1,500 a year more than the society is receiving.

"An animal home was established about two years ago, and involved an expense of \$300 a year. The society has not been able to support the animal home for the present and discharge one agent. Another will probably be let out in a few days unless the funds needed can be secured.

President Roberts today issued the following formal statement of facts to the public in a circular letter:

"The work of the Minneapolis Humane society has more than doubled during the past year. More cases have been taken up during the first months of this year than were attended to during the whole of 1904. A large amount of work has required a substantial increase in the help and expenses.

"The society is supported by voluntary contributions and there has been no material increase in its income. The inevitable result has been that the society finds itself embarrassed. It is already in debt and its income will not pay expenses. The force is being reduced and the animal home will need to be closed.

"To save a deficit, the society needs about \$1,500. A special solicitor will be put in the field to collect this amount. It is believed the public will do the work curtailed and a generous response is expected. Any interested persons may send their contributions to the society at its offices in the courthouse and they will be furnished membership cards."

NEW COMPANY COMING IN.

The Conservative Life Insurance company of Los Angeles, Cal., contemplates entering the city field, establishing offices in Minneapolis and St. Paul. N. Russell, Jr., assistant superintendent of agencies, is in Minneapolis to investigate the situation. Wilbur S. Tupper, a former well-known agent of Minneapolis, is president of the company.

THE VALUE OF CHARCOAL.

Few People Know How Useful It Is in Preserving Health and Beauty.

Nearly everybody knows that charcoal is the safest and most efficient disinfectant and purifier of the water, but few realize its value when taken into the human system for the same cleansing purpose.

Charcoal is a remedy that the more you take of it the better it is. It is not a drug at all, but simply absorbs the germs and impurities always present in the stomach and intestines and carries them out of the system.

Charcoal sweetens the breath after smoking, drinking or after eating onions and other odorous vegetables.

Charcoal effectually clears and improves the complexion, it whitens the teeth and further acts as a natural and eminently safe cathartic.

It absorbs the injurious gases which collect in the stomach and bowels; it disinfects the mouth and throat from the poison of catarrh.

All druggists sell charcoal in one form or another, but probably the best charcoal and the most for the money is in Stuart's Charcoal Lozenges, they are composed of the finest powdered Willow charcoal, and other harmless antiseptics in tablet form, or rather in the form of large, pleasant-tasting lozenges, the charcoal being mixed with honey.

The daily use of these lozenges will soon tell in a much improved condition of the general health, better complexion, sweeter breath and purer blood, and the beauty of it is, that no possible harm can result from their continued use, but on the contrary, great benefit.

A Buffalo physician, speaking of the benefits of charcoal says: "I advise Stuart's Charcoal Lozenges to all patients suffering from gas in stomach and bowels, and to clear the complexion and purify the breath, mouth and throat. I also believe the liver is greatly benefited by the daily use of them; they cost but twenty-five cents a box at drug stores, and although in some sense a patent preparation, yet I believe I get more and better charcoal in Stuart's Charcoal Lozenges than in any of the ordinary charcoal tablets."

COTTAGE CHEESE
ECONOMICAL FOOD

DIGESTIBILITY, NUTRITIVE VALUE AND COST REMARKABLE.

Bulletin Issued by State Experiment Station Shows that Cottage Cheese, Rice, Peas and Bacon Are Among the Most Economical Foods and Are High in Nutritive Value.

Bulletin No. 92, written by Professor Harry Snyder of the agricultural division of the state experiment station, contains many new and interesting facts on the digestibility and nutritive value of cottage cheese, rice, peas and bacon.

These investigations form part of a series commenced in 1895 to determine the digestibility, nutritive value, relative cost and loss in the preparation of the more common human foods and the bulletin contains the results of five series of digestion experiments carried on during 1904 with workmen as subjects. The following is the method used in preparing the cottage cheese: "Separator skim milk was allowed to curd in a warm room. The milk was then heated to a temperature of about 100 degrees Fahrenheit, and hot water 175 degrees Fahrenheit added at the rate of about one pint per gallon of milk. The addition of the hot water resulted in more complete coagulation of the milk. After stirring for one or two minutes, the coagulated mass was allowed to settle, and then the whey was drained off and the curd collected by straining thru cheesecloth. If too much water is used, a tough curd results; if the milk is not sour enough, the curd will not properly curdle. A curd of medium acidity and favorable temperature, a soft, fine-grained curd is secured. The curd was salted and mixed with cream. The cottage cheese prepared in this way was found to be very palatable and contained a large amount of nutrients in the form of proteins and fats."

The average of the three experiments in which cottage cheese formed an essential part of the ration shows the cheese to be highly digestible. Over 95 per cent of both protein and fats and 97 per cent of the carbohydrates or starchy matter of the ration were digested and utilized by the body. The results show that cottage cheese has the same digestibility as milk. A pound of cottage cheese prepared as described above contains as much nutritive material as is found in the edible portion of a pound of meat, but not as much as is found in meats containing large amounts of fat.

Where skim milk can be procured at a low cost, cottage cheese is one of the most economical foods that can be used," says the bulletin. "Upon the farm, where milk is produced, cottage cheese is one of the cheapest foods that can be used. Under such a condition it is more economical to use cottage cheese made with cream than it is to make the cream into butter and purchase meat."

Experiments with Rice.

In the second experiment rice was substituted for one of the ingredients of the ration. When well cooked, rice is easily digested, but it is not as completely digested as wheat. When extensively used for food, rice should be combined with foods of high protein content, as meat, cheese and the legumes. In these experiments, when the rice was combined with the cottage cheese, milk and sugar, the ration gave entire satisfaction, and the rice supplied over 36 per cent of the total energy of the ration.

In the third series of experiments, peas were substituted for cottage cheese. "The proteins of peas are not as completely digestible as the proteins of the legumes of wheat flour. A pound of peas, however, contains 'as much digestible protein as is found in the edible portion of any of the meats.'"

In the last two experiments bacon was investigated. It was found that lean bacon in a ration supplies a large amount of digestible nutrients and available energy. Lean bacon contains as much protein and about twice as much digestible fat as other meats, making it at the same price per pound cheaper food than other meats.

Another important result which favors milk in a ration is seen from the following quotation: "The actual digestibility of rations in which milk is used is higher than the calculated digestibility of the individual foods, showing that, when combined with other foods, milk exerts a favorable influence upon digestibility."

TRAGEDY IN THE
OLD KITTSON HOUSE

Gertrude Butler, a domestic at the Kittson boarding house, on Dayton and Summit avenues, St. Paul, was drowned in the eastern under the old mansion last night, and it was evidently the dying struggle, for when the boarders came there was no sound. One of the men dived into the water and rescued the body, but life was extinct.

Miss Butler came from Canada a short time ago. She was 25 years old and has relatives in St. Paul.

WILL ENTERTAIN SIELER

Local Macabees Will Greet Their Supreme Record Keeper.

Dr. L. E. Sieler, supreme record keeper of the Knights of Macabees, O. T. W., of Port Huron, Mich., will be entertained in Minneapolis Tuesday, Oct. 3, by prominent members of the order here. There will be a luncheon at the Odin club, after which the guests will be taken on an auto ride about the city. In the evening, Dr. Sieler will address a mass meeting of Macabees on matters pertaining to the order at the hall, 17 Seventh street S.

Wonderful Results in Compound Interest.

A banker has made the calculation as to how much one cent deposited in a savings bank at the beginning of the Christian era would now amount to at compound interest, and finds it would today amount to over \$100,000; at simple interest only \$1.25.

Deposits made in the Hennepin County Savings Bank from now to Oct. 5th draw interest from the 1st. Interest compounded four times a year.

California Tourist Cars And Cheap Tickets.

Weekly personally conducted tourist service to Los Angeles has been resumed by the Minneapolis & St. Louis routes. The Pioneer Tourist-Car Route—Cars via the "Scenic" and Southern Routes. Tickets only \$34.90. Call on J. G. Rickel, City Ticket Agent, 424 Nicollet avenue.

JOURNAL NEWSIES GUESTS

Boys Will See Big Vaudeville Bill at the Lyceum.

There will be music by the band to-night when The Journal's newsies "take off der lids" in the Lyceum theater and settle themselves to enjoy the big vaudeville bill which is being presented this week.

Miss Tenie Murphy will sing a pretty little song for the special benefit of the boys, if they're good, and Washer brothers, the comedy midget boxers, will introduce a number of new things in their funny stunt.

A feature of the bill which the boys are "just dying to see" is the "upside down" dancing of Constantineau and Lawrence, a novelty clog act of much originality. Then there is Baby Hawkins, the precocious little entertainer; Joseph Callahan, the famous impersonator, and Frosini, the Italian boy, will play some grand music for the special delectation of The Journal's "Newsboys' band, which will be a bright feature of the entertainment.

DR. CHARLES FLESH FOOD

For the Form and Complexion

Has been successfully used by leading actresses, singers and women of fashion for more than 25 years.

Wherever applied it is instantly absorbed through the pores of the skin and its wonderful nutritive feeds the wasting tissues.

REMOVING WRINKLES

As if by magic, one application often showing a remarkable improvement.

Dr. Charles Flesh Food is positively the only preparation known to medical science that will remove wrinkles in the neck and produce firm, healthy flesh on the cheeks, arms and hands.

For Developing the Bust

or breasts, abundant from nursing; it has the highest indorsement of physicians. Two boxes are often sufficient to make the bust firm, large and beautiful.

SOLD BY DEPARTMENT STORES AND DRUGGISTS.

Regular price, \$1.00 a box, but to all who take advantage of this SPECIAL OFFER and send us one dollar, we will send two (2) boxes, in plain wrapper.

FREE A sample box and our book, "Art of Massage," fully illustrated, will be sent free to any lady sending 10 cents to pay for cost of mailing. Address:
