CHINESE NOW GET THE LATEST NEWS

Continued From First Page. erty, and the highest officials in Japan may be Christians. That is not so in China, and the Japanese influence will be helpful in that way. Then Japan has recognized the Christian religion, and for the first time has a weekly day of rest, which is much appreciated. That helps Christian work, and it will come in China. There are many factors in the problem. The government is having trouble in revising the educational system, and the elite requiring candidates for admission to pass examinations in the modern sciences is bitterly opposed. The old men who have spent their lives in the classics are now unfitted for service, and of course they are hostile to the new movement. This is the situation, as bitterly hated as the Jews are in Russia. They are suspected of stirring up trouble between China and foreign nations, and for the overthrow of the dynasty. This is the element in the problem. Another is found in the young men who have been sent to Japan to study, and who are trying to do the same treatment for their own country. The same stage of progress as Japan has reached with this difficulty. The new problems of China are wonderful, but they offer great opportunities for the Christian mission. About the boycott? Well, it is a favorite weapon of the Chinese, and they know how to use it. China is entitled to the same treatment for her merchants and students entering this country as we give to England or Germany, or any other favored nation. China has a grievance and no mistake. If congress would not simply allow the educated men seeking entrance here, the matter could be straightened out.
