

# GARNERINGS OF NEWS FROM THE GREAT NORTHWEST

## ROMANTIC CAREER ENDS IN POORHOUSE

Jacob Seeman, Gifted Writer, Musician and Composer, Falls Upon Evil Days.

Special to The Journal. Madison, Wis., June 16.—A man who in his day edited newspapers in both the Norwegian and German languages and wrote poems in three tongues, who was a companion and confidant of Bjornstjerne Bjornson, a musician and composer to the great Ole Bull, was pleased to listen, has gone to spend his last days in the Dane county poorhouse.

This unusual man, for such he is, is Jacob Seeman, better known as "Judge" Seeman, one of the most prominent lawyers of Madison. His life story is a romantic one and because of his prominent family connections the fate that has overcome him is the cause of much gossip here.

His father was a German, who three-quarters of a century ago moved to Norway and made a fortune there by introducing German windmills, being the first to build one in that country.

Bjornson was a frequent visitor to the Seeman home and became engaged to the daughter of the household. She was a brilliant pianist who had studied in Denmark and Germany and was observed to be gifted. His young people were engaged, and during that time Bjornson spent his vacations at the Seeman home and the young man wrote and dreamed dreams together of future fame.

But Bjornson and Miss Seeman never married. The young lady found her gifted fiancé a nervous, thin, and erratic disposition, his love of fighting and the many scraps into which it led him caused her to break off the engagement and marry a soldier, but a more potent motive was that her former lover. She became the wife of an army surgeon.

Disaster came upon the Seeman home. The father lost his property and the young man, like many another of spirit whom adversity had overtaken, resolved to come to the land of greater opportunities—America. Landing at New York he started west, but at Buffalo was seized with cholera, then raging in this country, and nearly died of the disease, besides having all his effects stolen, including a cherished violin.

Becomes Editor and Lawyer. Coming on to Port Washington, Wis., he obtained employment as a copyist in the county clerk's office. There he became the editor of a Norwegian paper there and was commissioned to translate the first volume of the Wisconsin historical collections into Norwegian. From 1853 to 1858 he was the state land office from 1856 till 1860, when he established a German newspaper at Madison, known as the Star. This was his position in a Norwegian newspaper of which he also was editor.

In the meantime he dealt in real estate and studied law, being admitted to the bar. From 1853 to 1858 he practiced law in Minneapolis, when he returned to Madison, which has since been his home. He was also for many years a justice of the peace and because he was frequently called in by other judges to sit in their absence, became known himself as "a judge."

Victim of Poverty. Retiring from practice some ten years ago he became reduced and has been in want. Of a proud and eccentric disposition, he refused to make his home with relatives and became a familiar character about the cheaper restaurants and hotels where he lived. Recently it became necessary to take him to the poorhouse.

During the period that Ole Bull lived at Madison Seeman was one of the choice spirits of the Norwegian aristocracy that the great violinist loved to associate with. He was an excellent violinist himself and a superior musical critic. He also contributed to many publications, and poems in three languages have appeared over his name.

## IOWA WILL TURN LIGHT ON INSURANCE METHODS

Commission Appointed by the Legislature Will Begin Work Next Week.

Special to The Journal. Des Moines, Iowa, June 16.—Examination of witnesses in the investigation of Iowa life insurance companies by the legislative commission will begin here the first of the week. For some time the commission has been at work on the records in the office of the auditor of state, gathering information from the reports filed by the various companies. Now witnesses will be summoned and it is possible some companies will be asked to present their books for investigation. The active work of examination promises to cause a stir in life insurance circles here.

The commission, which must report Dec. 1, and not spend more than \$10,000, has limited duties under the Warren law. It has power to investigate the system, character, practice and policies of all insurance companies doing business in the state; to examine their methods and relation to other corporations, the salaries paid to their officers and employees, their securities and investments, the relation of the officers and members to such investments, their relation to or with other corporations transacting business with such insurance companies, the amount of taxes paid by them, their liability to their policyholders, the cost of insurance, the expenditures of the companies and relation of said companies to subsidiary corporations.

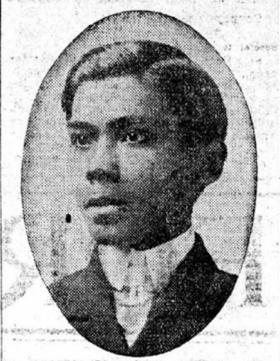

The commission will make such recommendations in reference to perfecting the insurance laws of the state as the investigation and the judgment of the commissioners shall approve, and the report will contain all recommendations concerning a uniform policy of policies of insurance, and the form of such policy or policies recommended.

**BAPTISTS MEET AT BEMIDJI.** Bemidji, Minn., June 16.—The Northwestern Baptist association will close a four-day session here tomorrow evening. One hundred delegates were in attendance. Rev. W. B. Riley of Minneapolis was an inspiring figure in the convention and delivered several addresses.

**CANDIDATE FOR THE ASSEMBLY.** Menominee, Wis., June 16.—D. C. Coledge of Downing has announced his candidacy for member of the assembly to succeed O. G. Kinney, who is running for member of congress.

## FILIPINO BOY LEADS AT IOWA UNIVERSITY

Ungson, a Ward of the Nation, Wins Prize in Mathematics at Iowa City.

RAFAEL G. UNGSON, Philippine Government Student, Who Wins Honors in School Competition.

Special to The Journal. Iowa City, Iowa, June 16.—Rafael G. Ungson, the Filipino, who won the Lowden prize of \$50 in mathematics in the University of Iowa, as announced in The Journal this week, is a native of Lingayen, Pangasinan, Philippine Islands. He is not yet 20.

He attended the college of Vigan, the school of Padre Rical Estrada and other schools in the islands, and took English in the Pangasinan high school from 1902 to 1904, when he was appointed, after a competitive examination, as a Philippine government student. He landed in San Francisco in 1905, and has since attended the University of Notre Dame, Chicago university and the University of Iowa.

He is taking a course in civil engineering and, as his prize-winning indicates, is one of the brightest, best and foremost young mathematicians in the University of Iowa.

## GOVERNMENT CANAL AT SOO WILL BE WIDENED

Sault Ste. Marie, Mich., June 16.—The project of widening the government ship canal has reached that point where the specifications have been completed and bids will be received from contractors up to July 24, on which date the proposals will be opened at Detroit.

The proposed improvement will give the canal at the upper approach to the locks an added width averaging 125 feet, extending 3,000 feet from the upper gate of the Poe lock. The widening will all be done on the north side. This means that the approach will be practically double its present width. The work now shortly to be undertaken is provided for in what is known as the project of 1904. The estimated cost at that time was \$1,020,000, but may run up to \$1,500,000. The improvement has long been urged as necessary by the marine interests. Work is to start not later than Oct. 1, and is to be completed on or before Aug. 31, 1908.

A. M. CHRISTIANSON, TOWNER, N. D. Candidate, Republican Nomination for Attorney General.

**ABERDEEN, S. D., LIKELY TO HAVE FARMERS' LINE—COUNCIL CONSIDERS FRANCHISE.** Aberdeen, S. D., June 16.—If a franchise can be secured, an interurban railroad will be built by a syndicate already organized for that purpose. The matter was submitted to the city council last fall, and is now in the hands of a special committee. As no report has been made, the promoters will send a communication to the council urging speedy action.

Those interested in the proposed enterprise are all local men, some of whom are farmers. All the details of the new road have been completed with the exception of the motive power to be used. The plans include the construction of a track some ten miles from the city, the direction to be determined by the farmers from whom the right-of-way privileges will be required. At the temporary terminus, a signal station will be established and from that point the tracks will extend into the country as the demand requires. A telephone system will be used in connection with the

operation of the line, the intention being to adopt this means of quick communication in reference to the telegraph.

The syndicate promises to haul grain to this city for 3 cents a bushel and save the farmers 2 cents, besides the cost of elevator storage. A central bureau will be established through which farmers can order supplies and have them delivered without having to come here to purchase them. The cost of construction is estimated at from \$2,000 to \$3,000 a mile. Electricity is not favored as the motive power, as it is thought a cheaper and more serviceable plan can be adopted. The promoters say the operation of this line will double the size of the city in a short time.

As submitted to the city council, the franchise provides that the city can acquire possession at any time by purchase.

**FIVE HUNDRED WILL SING.** La Crosse, Wis., June 16.—The official program for the sangfest of the Northwestern Scandinavian Singing association to be held in this city on July 6, 7 and 8, has been completed. Over 500 singers will take part, which means a total attendance of about 2,000. The program is as follows: July 6, 7:31 a. m., reception; 2 p. m., grand parade of 10,000; 8 p. m., grand concert. July 7, 9 a. m., rehearsal; 2 p. m., matinee concert; 8 p. m., grand concert; 10 p. m., banquet. July 8, 9 a. m., business meeting and election of officers; 2 p. m., excursion to the Mississippi.

## SYNOICATE IS READY TO BUILD INTERURBAN

Aberdeen, S. D., Likely to Have Farmers' Line—Council Considers Franchise.

Special to The Journal. Aberdeen, S. D., June 16.—If a franchise can be secured, an interurban railroad will be built by a syndicate already organized for that purpose. The matter was submitted to the city council last fall, and is now in the hands of a special committee. As no report has been made, the promoters will send a communication to the council urging speedy action.

Those interested in the proposed enterprise are all local men, some of whom are farmers. All the details of the new road have been completed with the exception of the motive power to be used. The plans include the construction of a track some ten miles from the city, the direction to be determined by the farmers from whom the right-of-way privileges will be required. At the temporary terminus, a signal station will be established and from that point the tracks will extend into the country as the demand requires. A telephone system will be used in connection with the

operation of the line, the intention being to adopt this means of quick communication in reference to the telegraph.

The syndicate promises to haul grain to this city for 3 cents a bushel and save the farmers 2 cents, besides the cost of elevator storage. A central bureau will be established through which farmers can order supplies and have them delivered without having to come here to purchase them. The cost of construction is estimated at from \$2,000 to \$3,000 a mile. Electricity is not favored as the motive power, as it is thought a cheaper and more serviceable plan can be adopted. The promoters say the operation of this line will double the size of the city in a short time.

As submitted to the city council, the franchise provides that the city can acquire possession at any time by purchase.

**FIVE HUNDRED WILL SING.** La Crosse, Wis., June 16.—The official program for the sangfest of the Northwestern Scandinavian Singing association to be held in this city on July 6, 7 and 8, has been completed. Over 500 singers will take part, which means a total attendance of about 2,000. The program is as follows: July 6, 7:31 a. m., reception; 2 p. m., grand parade of 10,000; 8 p. m., grand concert. July 7, 9 a. m., rehearsal; 2 p. m., matinee concert; 8 p. m., grand concert; 10 p. m., banquet. July 8, 9 a. m., business meeting and election of officers; 2 p. m., excursion to the Mississippi.

Winnipeg, Man., June 16.—Mail advices from Dawson City say: Tests which have been made here by a local company headed by T. G. Wilson show that white channel tailings are charged with gold. Miners have been throwing them away for years in the belief that they were worthless, but they can be saved by the cyanide process, yielding from \$4 a ton upwards, outdoing the Rand and many other big reefs.

It is asserted that this discovery will quadruple the Klondike's output and will make it the greatest gold-mining camp in the world. Mr. Wilson is now in Ottawa completing arrangements for the organization of his company. He has applied for a site for a camp where he will handle 200 tons of tailings daily and expects to produce over \$10,000 a day in gold.

## KLONDIKE'S OUTPUT TO SHOW A BIG INCREASE

The Gold in the Tailings Will Be Saved by the Cyanide Process.

Special to The Journal. Winnipeg, Man., June 16.—Mail advices from Dawson City say: Tests which have been made here by a local company headed by T. G. Wilson show that white channel tailings are charged with gold. Miners have been throwing them away for years in the belief that they were worthless, but they can be saved by the cyanide process, yielding from \$4 a ton upwards, outdoing the Rand and many other big reefs.

It is asserted that this discovery will quadruple the Klondike's output and will make it the greatest gold-mining camp in the world. Mr. Wilson is now in Ottawa completing arrangements for the organization of his company. He has applied for a site for a camp where he will handle 200 tons of tailings daily and expects to produce over \$10,000 a day in gold.

With everything taken into consideration there is every evidence that the record output of \$21,000,000 will be surpassed in the near future.

## GRADUATING CLASS OF ST. OLAF COLLEGE AT NORTHFIELD, MINN.

Rear Row, From Left to Right—Oscar Storli, Martin Anderson, A. O. B. Mollidrew, E. Ellingson, W. O. Wilhelmson, J. G. Vigeland and A. Jacobson. Second row, E. J. Boe, N. T. Tosseland, L. O. Torblaa, J. R. Telle, E. L. Michaelson, Oscar Hougen, W. C. Benson, Olaf Lind. Third row, Emil Johnson, C. G. Nelson. Ada Johnson, H. Lysne, Minnie Johnson, C. E. A. Jensen, C. B. Runsvold, P. B. Hulebak and P. M. Skartvedt. Last row, Reguld B. Quien, J. Brown, Minnie F. Quillikson, B. J. Retsem, Clara E. Kirkwood, K. Rygh, Petra A. Hagen, R. R. Syrdal and H. M. Dale.

## JOBS FOR MINNEAPOLITAN.

Menominee, Wis., June 16.—E. J. Umbal has resigned the presidency of the Globe Iron Works company and J. J. Flather of Minneapolis has been elected to succeed him.

E. J. UMBAL, PRESIDENT OF THE GLOBE IRON WORKS COMPANY, WHO HAS RESIGNED HIS POSITION.

Special to The Journal. Menominee, Wis., June 16.—E. J. Umbal has resigned the presidency of the Globe Iron Works company and J. J. Flather of Minneapolis has been elected to succeed him.

Special to The Journal. Devils Lake, N. D., June 16.—The North Dakota Chautauqua opening here on June 30, and closing on July 17, will be greater and better this year than ever before. Never in all its history has a program been offered that included musicians so high in their profession, artists so skilled in technique, entertainers so rich in versatility and lecturers so marked in their field of thought.

To the great intellectual repasts provided is added the pleasure of bathing, boating and swimming. The Chautauqua is especially interested in the children. The boys' and girls' clubs are for the little men and women who attend the assembly. No feature of Chautauqua is more fruitful in results than the work of the kindergarten. No tuition is charged, only a small fee being collected for the materials used. The Misses Maud and Ruella Stevens are in charge of this department and are assisted by Miss Alice Thompson, a pupil of the Chautauqua school of kindergarten.

The Chautauqua park is one of ideal romantic beauty. The forest has been cleared as near to nature's design as possible. The aquatic pleasures are unsurpassed. The great body of water which the Indians called Minnewakan, meaning "Spirit Water," is the last remnant of the great inland sea of post-glacial ages.

Several thousand full-blooded Indians, many of them having been participants in the Indian wars and outbreaks against the whites, will be camped on the shores of Devils Lake and will again put on the war emblems and live over again the days preceding a war expedition against their enemies. Unless a change of date becomes necessary, the Indian celebration this year will be held on July 12. Other special days are Grand Army day, July 10; Scandinavian day, July 14; field day, July 11. The W. O. Wilhelmsen, R. R. Syrdal, held an annual institute at the Chautauqua. This year it will be held on July 3 to 12 inclusive, and the national organizer and lecturer, Mrs. Mary E. Kopper, will be present. Dr. Edward L. Parks will have charge of the Bible school again, and Margaret J. Blair of the University of Minnesota will again conduct a two-weeks' course in domestic art.

A physical culture department and literary and scientific circles are among the features.

**Entertainers and Lecturers.** The entertainers in part will be the Byron Troubadours; the O'Callahans, popular dramatists; Edwin Brush, magician; Theobald Man Robert, reader; Elma B. Smith, child impersonator; Pitt Parker, humorist; the D. W. Robertson moving picture company; Professor Parnassus's fifty animal actors; William N. Nolan, humorist; Miss Anna M. Samuel, impersonator.

## SCHOOL FOR INDIANS GRADUATES 3 BOYS

First Class Is Turned Out From Famous Training Institution at Pipestone.

WILLARD S. CAMPBELL, Who as Superintendent Presented the Diplomas to the Graduates.

Special to The Journal. Pipestone, Minn., June 16.—The first graduation in the history of the Pipestone Indian Training school was celebrated this week. A class of three completed the course and was graduated from the institution yesterday. The graduates were Willie Coffey, Willie McIntosh and Clem Fairbanks.

The exercises opened on Wednesday evening with the presentation by the juniors of a class play entitled, "Our Aunt from California." On Thursday evening an excellent program was given by all grades of the school. The commencement exercises proper were held yesterday, the graduates contributing the following numbers to the program: Salutatory and essay, "Japan's Progress"; Willie Coffey, essay, "Is Hunting Cruel?"; Willie McIntosh, valedictory and essay, "My Hero in History"; Clem Fairbanks.

Rev. O. T. Langfit of the First Presbyterian church addressed the class, and the diplomas were presented by Superintendent Willard S. Campbell. Yesterday afternoon was devoted to field sports and a baseball game between the rival teams of the Pipestone and Flandreau Indian schools. A reception in the evening closed commencement week.

The Pipestone Indian training school is under the superintendency of Willard S. Campbell, who is assisted by a corps of twenty-two instructors. The past year 215 pupils enrolled, and with the new buildings soon to be erected and the additional equipment to be installed, many more pupils will be accommodated the coming year. Of the 215 pupils fifty have just completed their three-year term at the school, and soon after commencement will leave for their homes.

**Attractive Programs of Music and Literary Features—Wholesome Sports.**

Special to The Journal. Devils Lake, N. D., June 16.—The North Dakota Chautauqua opening here on June 30, and closing on July 17, will be greater and better this year than ever before. Never in all its history has a program been offered that included musicians so high in their profession, artists so skilled in technique, entertainers so rich in versatility and lecturers so marked in their field of thought.

To the great intellectual repasts provided is added the pleasure of bathing, boating and swimming. The Chautauqua is especially interested in the children. The W. O. Wilhelmsen, R. R. Syrdal, held an annual institute at the Chautauqua. This year it will be held on July 3 to 12 inclusive, and the national organizer and lecturer, Mrs. Mary E. Kopper, will be present. Dr. Edward L. Parks will have charge of the Bible school again, and Margaret J. Blair of the University of Minnesota will again conduct a two-weeks' course in domestic art.

A physical culture department and literary and scientific circles are among the features.

**Entertainers and Lecturers.** The entertainers in part will be the Byron Troubadours; the O'Callahans, popular dramatists; Edwin Brush, magician; Theobald Man Robert, reader; Elma B. Smith, child impersonator; Pitt Parker, humorist; the D. W. Robertson moving picture company; Professor Parnassus's fifty animal actors; William N. Nolan, humorist; Miss Anna M. Samuel, impersonator.

Among the lecturers engaged are President Worst of the North Dakota Agricultural college; Dr. A. W. Lamar, Professor D. Lange of St. Paul, Belle Kearney of Mississippi, Bishop Hartzell, President James J. Hill of the Great Northern road, Major General O. O. Howard, United States Senator Elmer J. Burkett of Nebraska, Frank H. Leonard of Boston, Mass., Christian Scientist Alton Packard, pianist; and B. H. Haugen of Minneapolis.

Among the vocalists are Mrs. C. H. Bronson, lady of Berlin; Edna F. Hall, the Sappho ladies' quartet and the Lincoln W. O. Wilhelmsen, R. R. Syrdal, E. L. Michaelson, C. G. A. Jensen, K. Rygh and several others who will probably enter the United Church theological seminary.

## MINES OF MICHIGAN HAVE RECORD MONTH

Production of Copper in May Surpassed That of Any Previous Month.

Special to The Journal. Calumet, Mich., June 16.—Michigan mines produced 20,000,000 pounds of refined copper in May, which sold for approximately \$3,760,000. This is the largest output secured in any month since the red metal was first mined in the Lake Superior region. It indicates an annual production of 240,000,000 pounds at present prices, however, it is likely that the district will be making even more copper than that in a short time.

Operations at the Victoria stamp mill were begun a few days ago and it is now treating rock during the day shift. The plant is running satisfactorily. Compressed air is the motive power.

Keijiro Nakamura, chief metallurgist for the Besshi Mining company of Japan, was a visitor in the lake copper country this week. He is on a tour of the world, studying mining and concentrating methods in various countries, and came to the copper district from Duluth, where he had examined the mines on the nearby iron ranges.

Sinking in the Tecumseh's No. 1 shaft has reached a depth of 675 feet. Excellent rock is coming to the surface. The lode so worked is mineralized and shows a gratifying amount of copper.

The Ida-Montana Development company, capital stock \$500,000, in 80,000 shares of \$10 each, has been organized in Calumet, with main offices here. A lease and bond on the Ida and "A," and "B" claims at Butte, Mont., has been taken and the properties will be developed.

Mohawk broke its record by turning out 1,202,500 pounds of mineral last month. The mine is now producing at the rate of 1,000,000 pounds of fine copper a year.

A crew of ten men is employed cleaning out and unwatering some of the old openings on the Carp lake property, in the Porcupine Mountain district of Ontonagon county. It is planned to conduct some exploratory work. A mass of native copper weighing three tons was uncovered a few days ago.

Allouez made more copper since it became a producer. The present yield is at the rate of 5,000,000 pounds of refined copper annually. The present yield is producing at the rate of slightly more than 2,000,000 pounds of refined copper yearly and is gaining steadily.

It is interesting to note that the production of the Wolverine mine in May was even larger than for the same month the year before, notwithstanding the fact that only one-half of its mine was available for rock shipments. The production of the Wolverine mine in May was even larger than for the same month the year before, notwithstanding the fact that only one-half of its mine was available for rock shipments. The production of the Wolverine mine in May was even larger than for the same month the year before, notwithstanding the fact that only one-half of its mine was available for rock shipments.
