A Show of Strength Near the Close, but Not Much Ac-

tivity Thruout.

Local Supply and Demand Situation Favorable to Price Maintenance.

But Traders Disposed to Wait Until After September Delivery Day.

Wheat kicked up at the close.

Minneapolis Chamber of Commerce, nug. 28.—The surprising thing about wheat at the opening today was its dullness and indifference. There were a number of things that were strengthening, but the market showed no response. For three days this week 750,sponse. For three days this week 750,-000 bushels was drawn out of local ter-minals. Meanwhile the movement has minals. Meanwhile the movement has been light and it was especially light here today, only 39 cars appearing compared with 162 a year ago. The southwest fell off, with a St. Louis comparison of 23,000 bushels and 73,000 and Kansas City showed 152,000 and 182,000. Duluth got a standoff, 15 against 16. Chicago was the only American market running over 150 cers American market running over, 159 cars being received against 97. Winnipeg had 52 against 17. The flour market, tho not so active as might be desired, is showing more life and there is a fair delivery to comb deroved a series of the series daily output. Cash demand remains satisfactory and 3½@4c over is heard for new No. 1 northern, and 2c over for new No. 2. On the whole the situation so far as present supply and demand conditions are concerned, is favorable to the price. There is little buying because nearly everyone has the idea in mind of a heavy movement of new wheat to come, and the export situation is not especially bright and so it is thought that present conditions are but temporary, and while they may serve to hold the market firm for a time, declines will again be seen when the new crop movement get fairly started. There is another view that takes in the disappointment of farmers over present low prices and sees the possibility of some holding back of wheat. The weather would have important bearing in this connection. Any rain heavy enough to interfere with the movement would have its effect. At this writing, however, the market is in a deadlock. The bears are standing pat for a return to former low prices. The bulls believe December wheat will not go as low as September went. they are disposed to wait for September delivery day to pass before they do

The early report showed conditions not wholly favorable. At Willmar, Boyd, Madison and Breckenridge it was clear and cool; at Farge partly cloudy; 60 above. Huron, clear and 67 above. Mankato had a heavy rain early this morning and at 10 a.m. it was cloudy and 70 above. Other reports were Win-

at ports increasing, quality improving, but good lots still scarce. Much wheat is still unfit for shipment and is being stored. There is a large fleet of steamers both at Russian and Danubian

THE FLOUR MARKETS BETTER BUSINESS IS PROBABLE AFTER SEPT. 1.

Millers view the situation as promising better things after Sept. 1. Flour, on new crop hasis, is being sold occasionally, but the old idea of a big crop and lower prices later still appears to be entertained by the buyers. At present there is a fair domestic demand but not much business for export. Prices remain unchanged. changed.

Shipments, 44,349 brls.

DOMESTIC PROBLEM SOLVED

A certain club at Lake Geneva, after contending for several seasons with inefficient help, believes it has solved for itself the domestic problem. It em-ploys waitresses who combine science ploys wattresses who combine science with household economics, mingling chemistry with kitchen work, using geometry for the saving of labor and botany in the gathering of flowers for decorations. These young women are undergraduates from eastern colleges, earning a means of livelihood and a vacation in the country at the same in the country at the sam time, with brains trained for any kind of work—or so it would seem.

But this is not all. In the club's em-

But this is not all. In the club's employ there is a kitchen man, a sort of general factotum, who scrubs the floors, builds the fires and, in fact, does anything he is asked. This young man is a college graduate who is about to prepare himself for the ministry, and is taking this manner—both novel and effective, one might say—of getting himself in hand. He is the son of a Chicago bank president, is proud of manual labor, not ashamed of it, and, what is more; as a kitchen men he is a success.

In future years, if he finds himself mediocre as a minister—or, rather, as a preacher of sermons—he can look back and say to himself that, as fire tender, floor scrubber and the rest, he was all that could be desired. And he has an assistant at the Lake Geneva club, another university man, who lights the lamps on the grounds, hauls ice and makes himself generally useful. In the winter this person is a member of a South Side church choir and has aspirations for a grand opera career. Meanwhile he is earning an honest living. certainly it is coming into its own and gaining a long neglected prestige!

A RECORD STUNT

STOCK TOUCHES THE HIGHEST POINT IN ITS HISTORY.

Profit-Takers Disturb the Harmony of the Market in Their Efforts to Hide Their Operations—Prices Generally Decline Following the Noon Hour.

New York, Aug. 28.—Some substan-New York, Aug. 28.—Some substantial gains were made at the opening of the stock market, but a number of stocks were little changed from yesterday's closing. St. Paul, Smelting and Colorado Fuel improved 1 and North-Colorado Fuel improved 1 and Northern Pacific 12. Anaconda exceptionally dropped 5 points, but rallied 7.

The general market became heavy after the first few minutes and the opening advances were wiped out. Smelting sold a point below yesterday's close and Reading nearly as much.

Much of the irregularity in the market arose from the efforts of the professional traders to conceal their profittaking in certain stocks by advancing others. The list at no time moved with great uniformity and was alternately above and below yesterday's closing prices. The Harriman stocks and Reading seemed to yield most readily nately above and below yesterday's closing prices. The Harriman stocks and Reading seemed to yield most readily of those in which there was any great volume of business, while St. Paul and Atchison offered good resistance at times. Canadian Pacific was unusually active and 4 points higher. Sugar and Great Northern preferred suffered temporary losses of 1 and 1½ respectively. At 11 o'clock the market was rising steadily with St. Paul, Atchison, the Harriman stocks, United States Steel and Amalgamated Copper at the top.

Buying orders were increased in all quarters of the market, especially for those stocks in which dividend probabilities are under discussion. Atchison was taken in round amounts and reached 108½—the best price on record and 1½ above yesterday's final. Among the other grain carriers a good display of strength was shown, and there was also a decided improvement in the prices of some of the soft-coal roads. 'A decline of 1½ in Brooklyn Transit was ignored; St. Paul rose 3; North-Western and Consolidated Gas 2½, Chesapeake & Ohio 1½, Locomotive 1½. Northern Pacific and Missouri Pacific 1½, Great Northern preferred and Norfolk & Western 1. Bonds were irregular at noon.

The best prices of the morning were

and Norfolk & Western I. Bonds were irregular at noon.

The best prices of the morning were made at noon, the market thereafter reacting on realizing. St. Paul and North-Western ran off 1½ from the highest, and Union Pacific, Reading and Smelting I. Pennsylvania was sold in large amounts on transfer of 7000 in large amounts, one transfer of 7,000 shares being at 141.

Various reasons were assigned for the extensive selling of the afternoon. Stop-loss orders were uncovered in a number of stocks, and prices fell away perceptibly. Concern over the outlook for money and the evident absence of for money and the evident absence of inside support in certain stocks were cited as influencing the selling. St. Paul lost all of its 3½-point rise. Great Northern preferred and Sugar were forced 3 points under last night. Colorado Fuel 2¾, Northern Pacific and Pennsylvania 2¼, Brooklyn Transit and Reading 2, and Union Pacific, Southern Pacific, Amalgamated Copper, Smelting, United States Steel and New York Central a point.

Stock quotations reported for The Journal by Watson & Co., Chamber of Commerce, Minne-apolis. Closing figures are bid.

LONDON STOCKS, Aug. 28.—American securi-LONDON STOCKS, Aug. 28.—American securities advanced at the opening of the stock market today. Atchison led the upward movement with a gain of % over yesterday's New York closing. Other shares were %@% higher, but Southern Pacifics and Union Pacific later declined %@% below parity.

Irregularity developed on the receipt of the New York opening prices, but the market reacted sharply and prices closed firm at near the best quotations of the day. Canadian Pacific was the feature on good American buying.

SEA SEEMS ABLAZE

Phosphorescence Simulates Waves of Liquid Fire for Miles and Miles. Los Angeles Herald. San Pedro.—Ocean viewers of this city and Terminal are again being presented with the beautiful sight of a phosphorescent sea.

This phosphorescence formerly came

along the coast only at great intervals, but the past three years it has been a regular visitor every summer. The technical term for it is peridinium, and it is really the work of animalcule so 18 Fearly the work of animated so find in the that it takes millions of individual specimens to fill a square inch of water. They are seen now in the sea to the east of San Pedro and south of Terminal. The little sea animals are filled with

phosphorescence and the waves often present a thrilling sight at night similar to waves of liquid fire. If the night be dark, the whole sea seems to be ablaze, and even the sands from which the water has receded sparkle like molten gold.
Peridinium is a native of tropical

waters but often in midsummer seems to drift along the coast, gradually dy-ing out until it reaches Santa Cruz, seldom being seen above that latitude.

Three years ago it was the brightest along this coast ever seen. At that time the whole sea seemed ablaze and many visitors came from afar, one professor coming from the Atlantic coast, where it is unknown. It became a nuisance at last, as the

It became a nuisance at last, as the little fellows seemed to be unable to get around Point Firmin, and as a result, died along the shores, leaving a nauseating odor. The poison in the phosphorescence killed fish, clams and abalongs.

For several days no one dayed est
