RAILROAD RATE LAW PROVES A GOLD BRICK

EASTERN ROADS PROFIT AT WESTERN EXPENSE.

New Measure Enables Established Lines in Settled Portion of Country to Reduce Fares, While Northwest Are Prevented from Giving Land-Seekers' Excursions.

As construction of the clauses in the new railroad law progresses, western railroad men are beginning to discover that the law itself is discriminatory.

Apparently, the westerners have been caught asleep, or were outgeneraled by representatives of the eastern lines.

The passenger rates in the settled portion of the country, while the same provisions in many cases, are detrimental to a rapidly growing country where different conditions exist and different rates must apply to carry forward the progressive work that must go on to develop the resources of the new regions.

Conditions in the west, where new lines are being built and where initial expenses are enormous, are entirely different from the section of the country traversed by the three lines named.

Land Business Suffers. Western lines are particularly hard hit in the matter of colonization and homeseeking rates.

In the east the country is thickly populated and local landseekers' rates are an unknown thing.

The motive of the eastern people can readily be seen as they found that the special land rates of the western lines were draining their territory, with no due return.

UNIVERSITY OF MINNESOTA READY FOR A RECORD YEAR

WAITING TO REGISTER AT THE LIBRARY BUILDING.

WITH the ringing of the gong in lecture rooms on Tuesday morning the 1906 year at the University of Minnesota, according to catalogs and faculty, will be ushered in on the campus.

New Buildings. To the student who has not visited the university during the summer, the campus will present a new aspect.

VILLAGERS MUST HAVE LEGAL HEALTH OFFICER

State Board of Health Notifies Municipalities that Law Must Be Complied with in Matters of Sanitation.

The state board of health is taking steps to see that villages throughout the state have properly organized boards of health and health officers.

If you have no medical health officer in your village, says the notice, you have no legal health officer.

Work on four new buildings has been progressing rapidly and many of the traditional loafing and "fussing" places of the students have given way to new buildings.

The changes on the campus will be especially welcome to university girls, for Alice Shevlin hall, on the site of the "Old Main," is practically complete.

health officer. Your board of health can appoint a resident clerk or secretary who can give attention to the local sanitary conditions.

POWER FROM ST. CROIX

Big Electric Current from Taylors Falls to Be Turned On.

The Minneapolis General Electric company is about ready to begin delivering electrical power from its mammoth power development at Taylors Falls, on the St. Croix river.

Electricity will arrive at the Minneapolis substation in Northeast Minneapolis from the Taylors Falls plant at 50,000 volts.

girls on the campus has been provided in the new building.

Between the medical building and the library stands the Institute of Public Health and Pathology, the latest addition to the equipment of the medical college and one of the most slightly buildings on the campus.

Over across the railroad tracks on the site of the old Coliseum building has been erected the plant building of the department of botany.

With the exception of an addition to the university heating plant, situated back of the mechanics arts building, there are no other important changes on the campus.

In university work there have been few changes made by the regents.

A LONELY FRESHMAN AT THE PILLSBURY STATUE.

will prevail again and the plan of one-hour periods, commencing at 8:30 in the morning, has not been altered.

Probably the most important change from an academic standpoint will be in the English department.

WILSON SAYS HE'S IN MEAT BUSINESS NOW

Secretary of Agriculture Too Busy to Come to Minnesota for the Campaign.

The republican state committee has been trying to get Secretary Wilson of the department of agriculture at Washington to come out for one or two speeches in Minnesota.

There has never been a time, until now, since I have been in Washington, that I could not have accepted such an invitation and been glad to do it.

university after a year's leave of absence in Europe. Dr. Burton will have charge of the English department, and already the students who have renewed acquaintance with the university campus, are talking of Burton's work and Burton's courses.

From an attendance viewpoint, the year will be the greatest in the history of the university.

CIRCULARS CAUSE TROUBLE

Political circulars are coming into the postoffice in such large numbers and so poorly addressed that it has been necessary to add ten clerks to the regular force to sort and readress them.

Postmaster W. D. Hale estimates the total number of these circulars at between 30,000 and 40,000.

Evidently those sending them out are working with a list of names procured two years ago or else an obsolete directory, as a large percentage of the circulars are misdirected.

When he saw the difficulty confronting his force, Major Hale at once wired to Washington for authority to take on ten more clerks.

COMMERCIAL MILK TO BE OFFICIALLY TESTED

Health Commissioner Hall Will Establish Bacteriological Standard for All Milk Offered for Sale.

As an additional protection against the sale of impure milk, Health Commissioner P. M. Hall is preparing to establish a bacteriological test.

The plan of establishing a bacteriological standard has been adopted by one or two eastern cities and is recommended by the best scientists.

It is likely that a count of 100,000 bacteria in a cubic centimeter will be observed as the limit for safe milk, although a much higher count would not necessarily indicate a dangerous article.

Minnesota has a milk inspection ordinance which is a model of its kind. The penalty for skimming, water and adulterating milk, or for using dangerous or deleterious preservatives, or allowing the percentage of fat to fall below a certain percentage, is a heavy one.

LET FLY BOTH BARRELS INTO CHARIVARI PARTY

Young Man of Manitoba Feels Wrath of Bridegroom and Picks Duckshot From His Legs.

Snowflake, Man., Sept. 15.—A young farmer by the name of Wallace got married and several young men went out to charivari him.

A young man named Phipps received a charge of duckshot in his leg and had to be carried to town to secure the services of a physician.

The North Star Limited

This beautiful train is becoming very popular with experienced travelers to Chicago. It is new and up-to-date, having buffet library cars, electric lighted sleeping cars, unacquainted dining car service.

For Congress--William Henry Eustis

BUSINESS IS POLITICS POLITICS IS BUSINESS

Unwise legislation by Congress directly affects business conditions of the country and the wages of the toilers.

YOUR VOTE FOR CONGRESSMAN IS THE MOST IMPORTANT VOTE YOU WILL CAST.

The public and private record of William Henry Eustis is a guarantee to every class and interest as to what he will do in Congress for the people of this District.

His record is in great part the history of Minneapolis.

CONGRESS NEEDS MEN OF HIS STERLING INTEGRITY, ABILITY AND FEARLESSNESS. HENNEPIN COUNTY NEEDS EUSTIS IN CONGRESS.

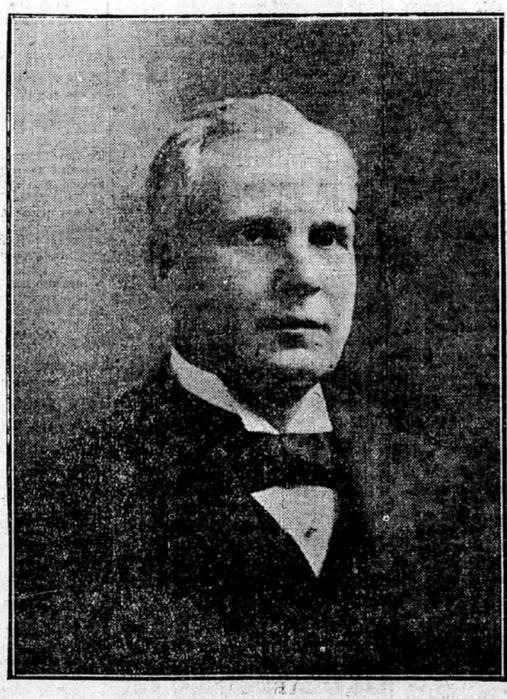

He is a successful business man. He has invested his money here. He has induced others to invest here.

He has stood at the front in the great movements which have aided in making Minneapolis the biggest city in the Northwest.

As a private citizen he has helped to make Minneapolis great. As a public officer he made the city famous.

As Mayor of Minneapolis he gave the city the best administration that had been known up to that time. There was less drunkenness, less crime, less immorality, and this during the strenuous period of the panic of 1893.

He settled in a few hours the Street Car Strike of 1893, and the men secured all they demanded from the company.

The buildings which have been erected in this city through his efforts have added millions to the wages of her people.

The Corn Exchange, the Flour Exchange, the Elks' Hall, the Masonic Temple, the great Third street warehouses and the Exposition building are a few of the monuments to his loyalty for Minneapolis.

In early days railroad rates were high. There was no competition, and he helped organize the Soo railroad.

St. Paul terminal railroads discriminated against Minneapolis during the progress of the State Fair.

He helped to found the New Brighton Stock Yards, pioneer of the great packing industry which Armour is now to establish.

WILL THE VOTERS ANSWER THIS QUESTION? WHO OF THE FOUR CANDIDATES FOR CONGRESS WOULD YOU CHOOSE, AS A PRIVATE CITIZEN, TO SECURE SOME GREAT PROJECT FOR MINNEAPOLIS?

THEN SEND HIM TO CONGRESS. HE IS NO STRANGER AT WASHINGTON.

HE HAS NEVER WAVERED FROM REPUBLICAN PRINCIPLES. HE IS ONE OF THE FOREMOST MEN OF THE PARTY. HE SECONDED THE NOMINATION OF JAMES G. BLAINE FOR PRESIDENT.

Vote for Eustis and Continued Prosperity
