

Russians and Germans Continue Their Great Struggle

South of the Franco-Belgian border, perhaps in the vicinity of Arras. Following the capture of the city, the Germans inflicted on the Russians in September, comes the announcement through Paris that the German cruiser Lirba has been sunk in the Baltic. There also are rumors that the German battleship Kaiser Wilhelm der Grosse has been torpedoed in the Baltic. Both these reports lack confirmation.

CAVALRY HORSES ARE SENT FROM VIRGINIA
(Continued From First Page.)
is a good market, and its central location and excellent facilities as a shipping point are advantages not to be overlooked.

HAS ALREADY BOUGHT 20,000 HORSES FOR EUROPE
Mr. Kelham stated last night that he had already purchased 20,000 horses for use in the foreign armies, and that he expects to purchase many more. While inspectors and others have assisted him in making the purchases, he stated that the actual buying has been done by his company, which has a large contract with the government of the allied powers for furnishing horses and supplies. French inspectors have been with Mr. Kelham to make suggestions to him in the actual selection of horses, because such men are naturally better informed as to the needs of the government of their own country than any one else could be. Those who have been on the various stock markets in the United States are Captain A. P. Dupont, Count Rene de Montjou, Dr. Picard, Captain Paul Boyer, Lieutenant Gaston Roy, Captain Perret Alard and Dr. Cayron. Mr. Kelham has bought horses in Virginia, West Virginia, Kentucky and other States. He left last night for Mobile, Ala., where, on Monday, he will superintend the loading of 16,000 head of horses onto the steamer Rowan, which will constitute the largest single shipment yet made. Mr. Kelham expects to return to Richmond in a few days, and within the next two weeks another shipment of horses will be sent from Newport News to the war zone.

The starving people, seeing quantities of food were ready, are holding meetings nightly, where the chances of success in attacking the German garrison and taking possession of the food are seriously discussed."

Shall It Be Hair or No Hair
It's Your Choice Cuticura Soap
You CAN'T BRUSH OR WASH OUT DANDRUFF
The Simplest and Quickest Way is to Dissolve It.
The only sure way to get rid of dandruff is to dissolve it, then you destroy it entirely. To do this, get about four ounces of ordinary liquid arvon; apply it at night with retiring, use enough to moisten the scalp and rub it in gently with the finger tips. Do this to-night, and by morning most, if not all, of your dandruff will be gone, and three or four more applications will completely dissolve and entirely destroy every single sign and trace of it, no matter how much dandruff you may have. You will find, too, that all itching and digging of the scalp will stop at once, and your hair will be fluffy, lustrous, glossy, silky and soft, and look and feel a hundred times better. If you want to preserve your hair, do by all means get rid of dandruff; for nothing destroys the hair more quickly. It not only starves the hair and makes it fall out, but it makes it stringy, straggly, dull, dry, brittle and lifeless, and every one who has it can get liquid arvon at any drug store. It is inexpensive and never fails to do the work.—Advertisement.

GET THE STAGE SECRET OF HEALTHY HAIR
Though wigs are often used in special parts played by actresses, it is a notable fact they all have beautiful, natural hair which is the result of sensible care only. Their only secret is care. Not strenuous, but regular. In washing the hair it is not advisable to use a make-shift, but always use a preparation made for shampooing only. You can enjoy the best that is known for about three cents a shampoo by getting a package of canthrox from your druggist; dissolve a teaspoonful in a cup of hot water and your shampoo is ready. After its use the hair dries rapidly with uniform color. Dandruff, excess oil and dirt are dissolved and entirely disappear. Your hair will be so fluffy that it will look much heavier than it is. Its lustre and softness will also delight you, while the stimulated scalp gains the health which insures hair growth.—Adv.
