

Golden Key Will Open St. Louis Fair

President Roosevelt to Touch the Instrument Starting Machinery in Motion.

ST. LOUIS, April 27.—All arrangements have been perfected for the Postal Telegraph company for transmitting to St. Louis the electric current to be started by President Roosevelt at the White House, which will formally open the Louisiana Purchase exposition on April 30th. Two separate currents will be used to guard against possible interference by storms in any particular section of the country. The first will run from Washington through Cumberland, Baltimore and Indianapolis to St. Louis, and the second from Washington through Baltimore, Philadelphia, Harrisburg, Pittsburgh, Cleveland and Chicago to St. Louis.

The key to be used by President Roosevelt to start the current on its western journey is of gold, and after it has been used by President Roosevelt it will be presented by the Postal Telegraph company to President D. B. Evans of the World's fair.

The telegraph wires will be brought through underground conduits to the Louisiana Purchase monument at the World's fair grounds. Mr. Gray will handle the key at the St. Louis end of the wires. Mr. B. P. Montgomery, formerly secretary to President McKinley, will handle the key at the Washington end. Both circuits will be used. Conversation will be conducted preparatory to sending the message.

President Roosevelt closes the machinery on the World's fair grounds in St. Louis. Both circuits will be used. Conversation will be conducted preparatory to sending the message.

Ignorance Almost Kills Eight Men

Chinese Employee of Theater Opens Wrong Draught in a Coking Heater.

VICTORIA, B. C., April 27.—Eight members of a hotel company who were booked for a performance at the Victoria theater last night almost sacrificed their lives owing to the ignorance of a Chinese employee of the coking-heater which permitted poisonous gases to fill the dressing-rooms and corridors of the theater. The minds of the eight members of the troupe that became unconscious in their rooms only the prompt action of the stage manager and his assistants were able to summon and after working on the men for several hours pronounced all but one out of the coking-heater.

Religious Revival Suspends Business

Meeting Characterized by Remarkable Outburst in an Illinois Town.

CHICAGO, April 27.—As the climax of a religious revival unprecedented in the suburb, people of Oak Park in a union meeting, lasting all day and night, have subscribed a total of \$25,000 to wipe out the debt on Oak Park Y. M. C. A. building. The revival was characterized by a remarkable outburst of religious fervor. Oak Park was a closed town practically for twenty-four hours. Business was suspended. Stores were closed, and thought was given to the work of revivals, the Rev. Biederman and Harry Maxwell, the evangelistic singer. Beginning with services at 10 a. m. in churches, there was scarcely an interruption for fifteen hours in the prayer and singing services.

Indiana Republicans Name Their Leaders

State Convention Selects Ticket and Adopts Platform Indorsing Roosevelt.

INDIANAPOLIS, April 27.—At the second session of the Indiana Republican convention today the platform was adopted and unanimously adopted. It is in part as follows: We heartily and unreservedly in the wise and patriotic administration of Theodore Roosevelt. The President has borne the tremendous responsibility of his great office upon the highest level of national duty and national honor. His administration has been thoroughly Republican and genuine American. It has advanced prosperity at home and maintained our national prestige abroad. The laws have been wisely and impartially enforced as they were enacted by Congress. Evil influences have been driven from the public service. The people demand a continuation of the present stable and prosperous condition, and we therefore favor the nomination and the re-election of President and hereby instruct our delegates chosen by this convention to support the candidacy of Theodore Roosevelt.

Money for Canal Paid to Company

Purchase Price for the Isthmian Waterway Advanced by Paris Bankers.

WASHINGTON, April 27.—The Attorney-General has received cables from Messrs. Day and Russell, who went to Paris as his representatives to conduct the closing negotiations for the Panama canal property, to the effect that the deeds of the property, archives and all other papers and documents which will belong to the United States under the transfer, have already been turned over to them, and that the purchase price of \$40,000,000 has been advanced to the canal company by a Paris syndicate of bankers. This syndicate, it is understood, offered to pay over the money with a view to expediting the consummation of the sale on the assurance of the Attorney-General that the draft of the syndicate of the United States for the \$40,000,000 would be honored on presentation at the treasury at Washington.

At the time the money was paid over to the canal company in Paris, Maj. Mark Brooke of the engineer corps of the army, now in Colombia, was authorized to formally receive the papers on the isthmus in the name of the United States. Whether this transfer has actually been made by the republic of Panama the Department of Justice has not been advised, but it is assumed it will be made within a day or two. Messrs. Day and Russell are expected to return to Washington within the next ten days.

Queer Accident Caused by Air Brake

Peculiar Casualty Occurs on Pennsylvania Railroad in New Jersey.

NEW YORK, April 27.—Of the twenty-seven passengers injured in yesterday's rear-end collision near Elizabeth, N. J., between the Long Branch express and the Florida special on the Pennsylvania railroad, one, the Rev. Mr. Kelley of Asbury Park, N. J., will probably die. He sustained concussion of the brain and internal injuries.

The accident was a peculiar one in railroad history. Eight Pullman cars made up the Florida train. Soon after it passed Elizabeth station the air brake pipe connecting the engine and first coach popped. That caused the automatic air brakes to be applied at once to the train. The strain on the engine causing the coupling between the engine and first car to break, and the engine started ahead, while the cars stopped within a short distance.

The engineer at once applied the brakes to the locomotive and started back to pick up his train. At that time the coupling was being made the Long Branch express, running at high speed, rounded a curve. The engineer threw on the air brakes, but the rear coach of the stalled train, which fortunately was empty, was split in two. All those hurt were in the two forward cars of the Long Branch express.

The fireman of the Long Branch train lost his life by jumping against a fence. His body rolled back beneath the train.

MRS. BOTKIN IS HELD TO ANSWER FOR MURDER

SAN FRANCISCO, April 27.—Police Judge Conlan today held Mrs. Cordelia Botkin to answer to the Superior court for the murder of Mrs. Joshua D. Deane by means of poison, candy mailed from this city to Dover, Del. A request by her attorney that she be admitted to bail was refused, the judge stating that he believed the evidence against her was conclusive.

The fun you can have for a dollar.

The department store is with us and always will be. It will annually grow in importance. Each succeeding year will find its hold on the buying public firmer and firmer.

In large cities the department store has assumed great proportions. In cities of ordinary size it is full of immense possibilities, striking terror to the old line store of high prices.

The department store's diversified lines may be likened unto the arm-reaching propensities of an octopus—but how different, the grasp being almost loving in its beneficial influence, affording as it does an opportunity for economical buying.

Via Rio Grande April 30th.

Leave Salt Lake 9:00 a. m. Returning leave Provo 10:00 p. m. All invited. Athletic sports and fair tracks meet on the L. D. S. and B. Y. Universities.

HARRIMAN PARTY EASTWARD BOUND

President Harriman's stay in the city was shorter than was anticipated. The party spent the greater part of the morning visiting the smelters at Murray, and seemingly no railroad business was transacted.

At any rate no official information was forthcoming, and Mr. Harriman had no further statement to make beyond what he told The Tribune Tuesday evening. It is expected that the changes will not be announced at headquarters until the return of General Manager Bancroft and General Superintendent Buckingham from Omaha, where they have gone with President Harriman and the other officials.

STATISTICS DEPARTMENT CREATED ON SANTA FE

TOPEKA, Kan., April 27.—Following the announcement of the creation of the tie and timber department of the Santa Fe road, with E. O. Faulkner as head, comes the news that the Santa Fe is about to create a department of statistics, to be in charge of all the statistical work of the road. The headquarters of this office will be in Chicago, and James Peabody has been selected to be in charge. This means that about thirty statistical clerks, employed at the Santa Fe offices here in the various departments, will be concentrated at the chief statistician's office in Chicago.

STRIKE IN SANTA FE SHOPS GOES ON QUIETLY

LOS ANGELES, Cal., April 27.—At Santa Fe headquarters in this city it was stated today that there had been no further defections among the machinists at the San Bernardino shops of that company. Everything is reported to be quiet there and work in the shops is progressing without serious delay. The Santa Fe management does not anticipate an immediate spread of the trouble among the machinists, but states that it is prepared to carry on the work under any circumstances.

Smith Goes to the Northern Pacific

ST. PAUL, April 27.—General Passenger Agent A. J. Cleland of the Northern Pacific today appointed Arthur B. Smith assistant general passenger agent of that company. Mr. Smith is at present auditor for the Yellowstone Park company.

Railway Notes

J. A. Edson, general manager of the Denver & Rio Grande, started on his way back to Denver yesterday. H. M. Cushing, traveling passenger agent for the Denver & Rio Grande, has gone to Denver to make arrangements for the transportation of a theatrical troupe.

Beggar to Receive a Large Fortune

Awarded Prize of a Hundred Thousand Dollars for Inventing a Successful Device.

NEW YORK, April 27.—Members of the Charity society here express the belief that Alexander McKenzie, a professional beggar, who was once an electrical engineer, has invented a successful device for the protection of the third rail on the elevated tracks, and will receive the prize of \$100,000 offered by the Interborough company for that achievement.

Mr. McKenzie is the member of the society of the success of Mr. McKenzie's invention that the matter has been placed in the hands of a patent solicitor, and a practical test of the device will be made as soon as the patent is perfected in Washington.

On the police records McKenzie is classified with the harmless mendicants, usually cripples, who sit silently in the street or wherever crowds are passing, and hold out their hats or a tin box with mute appeal for aid. For several years McKenzie has been a conspicuous figure on the platforms of the elevated stations. He has but one leg, and always sat on the floor with his crutches lying in his lap and his hat stretched out for coins.

For weeks at a time he would be seen every afternoon during the rush at the stations along the Sixth avenue line, and then some one would enter a complaint and he would be arrested and sent to the island. There he always was a welcome prisoner, for his mechanical genius found great opportunity about the shops and buildings. During his various periods of confinement he perfected the models for protecting the third rail, and, distrustful of every person who attempted to examine them, finally called upon the charity organization for help. The officials at once took charge of the matter. They say McKenzie was almost starved when he finally asked for aid.

John Bull Loses Lands in Africa

Valuable Salt Deposit Claimed by Him Found to Belong to Congo State.

LONDON, April 27.—The Associated Press understands that one of the most important results of the work in East Africa, along the Anglo-German-Congo frontier, west of Victoria Nyanza, is the discovery that the whole of Albert Edward Nyanza, belongs to the Congo independent state. As a result, Great Britain loses an oblong strip of territory including the valuable salt deposits north of Lake Albert Edward. It is also announced that the mouth of Kagera river is in German territory. Hitherto it had been believed to be in the German territory.

Court Notes

Mary D. Currie filed suit in the District court yesterday against the heirs and administrators of the estate of James Currie, deceased, to a quiet title to a piece of property, 4 by 15 rods, in lot 2, block 22, in A. Salt Lake City survey. The plaintiff prays that the defendant is forever barred from asserting any claim or interest in the premises.

Louis E. Harpinger is made defendant in an action brought in the District court yesterday by the Bank of Commerce, to recover \$6281, which amount is alleged to be due on a promissory note for \$1922, executed by the defendant on or about February 1, 1903.

In the case of the Oregon Short Line Railroad company against A. M. Buchanan, et al., the trial of which was concluded before District Judge Stewart yesterday, the jury has been instructed to return into court with a sealed verdict at 12 o'clock this morning.

Judge Hall rendered a decree yesterday in the case of Spencer Clawson & Co. vs. Lindsay E. Sprague, et al., quieting title in the plaintiff to the following described piece of property: 25 by 36 feet in lot 8, block 3, plat A, Salt Lake City survey. The court also bars the defendants from exercising the eurytelic right of way over the land. E. C. Malloy, a clerk of Ogden, was yesterday adjudged a bankrupt by Judge Marshall of the federal court, on a petition filed last December. His debts were given as amounting to \$733, and assets were limited to \$25. New petitions in bankruptcy were filed yesterday by Charles J. Coddington, a miner of Bingham, with debts of \$191.49 and assets of \$123.95, and by T. Montgomery of Helper, with liabilities of \$285.04 and assets of \$46.

Beggar to Receive a Large Fortune

Awarded Prize of a Hundred Thousand Dollars for Inventing a Successful Device.

NEW YORK, April 27.—Members of the Charity society here express the belief that Alexander McKenzie, a professional beggar, who was once an electrical engineer, has invented a successful device for the protection of the third rail on the elevated tracks, and will receive the prize of \$100,000 offered by the Interborough company for that achievement.

Mr. McKenzie is the member of the society of the success of Mr. McKenzie's invention that the matter has been placed in the hands of a patent solicitor, and a practical test of the device will be made as soon as the patent is perfected in Washington.

On the police records McKenzie is classified with the harmless mendicants, usually cripples, who sit silently in the street or wherever crowds are passing, and hold out their hats or a tin box with mute appeal for aid. For several years McKenzie has been a conspicuous figure on the platforms of the elevated stations. He has but one leg, and always sat on the floor with his crutches lying in his lap and his hat stretched out for coins.

The officials at once took charge of the matter. They say McKenzie was almost starved when he finally asked for aid.

Paid Money to Secure an Office

New York Man Incarcerated in the City Prison to Answer a Very Serious Question.

NEW YORK, April 27.—Emil A. Sonner has been placed in the city prison on an execution secured by a man who says he paid the prisoner \$25 to be appointed a policeman. Sonner, a few hours previously, had made a statement to District Attorney Jerome along the lines of that made a few days ago by William Duke, who asserted that at least \$300,000 had been collected by him and paid to certain persons "higher up" for positions in the service of the city. Sonner's statement is said to have actually named men connected with the Civil Service commission. Until his statements have been verified, however, the District Attorney says he will rest in the belief that Duke and Sonner were simply engaged in the business of getting money from job-seekers without rendering them any service.

GOOD SHOWING OF GOLD AND SILVER-BEARING ORE

SPECIAL TO THE TRIBUNE. CALIENTES, Nev., April 27.—Location work on the Venus, San Pedro and Japan claims has been completed and filed with the district recorder. A forty-foot ledge on the Japan has been stripped, showing a fine body of gold and silver-bearing ore of low-grade quartz and talc, cropping throughout the entire extent of the claim.

Several fine lead claims have been located this week eighteen miles north from Calientes, from which assays of 20 per cent lead and 16 gold have been taken from a two and one-half-foot ledge.

Five claims adjoining the Grand View group at Twenty-Mile station, south of Calientes, were located April 23rd by San Pedro railroad men.

McQuaid and Hill, part owners in the Grand View group of mines, have homesteaded an acre each along the line of the San Pedro railroad and between it and their mines. They intend mapping out a ledge near the Washington Springs claim, which is one of the claims of the Grand View group.

The construction of the Western Union telegraph line from Calientes toward Los Angeles will begin this week. The line will be pushed ahead as rapidly as flag and money permit, so as to make connections with its western terminus at that point when the San Pedro reaches that point.

Nearly 150,000 tie plates have been received at Calientes for the construction of the line. The ties were put out last week and are being run through the big tie-plater at Calientes and sent to the front.

Two "phony" jewelry men from Ogden came to grief here on Tuesday. First they ran against a saloon man and one of them had his head laid open; then he was hauled into several cabins, zearing the women by his coarse language, and wound up with a first-class thrashing at the hands of a railroad man. Then they were ordered to hit the trail, which they wisely did, and disappeared toward Salt Lake City in the darkness.

Hans Olson, one of Calientes' most prosperous business men, who was formerly a Park City miner and now owns one of the best gold mines in Cherry Creek, Nev., has secured a one-third interest in a recently located gold mine. He will receive a quarter of a mile from Calientes, and will begin development work in a tunnel to be run in a ten-foot ledge next week.

NIP IT IN THE BUD

First Appearance of Dandruff a Forerunner of Future Baldness.

That such is the case has been conclusively proven by scientific research. Prof. Unna, the noted European skin specialist, declares that dandruff is the burrowed-up cuticle of the scalp, caused by parasites destroying the vitality in the hair bulb. The hair becomes lifeless, and in time, falls out. Newbro's Herpicide kills this dandruff germ, and restores the hair to its natural softness and abundance. We put you on Herpicide is now used by thousands of people—all satisfied that it is the most powerful hair preparation on the market today. Sold by leading druggists. Send 10c in stamps for sample to The Herpicide Co., Detroit, Mich.

YOUR OFFICE

Should be as well furnished as you can make it. It counts. Probably no article of furniture adds as much to the appearance of this room as a handsome desk.
