Believes in Strikes and in Lockouts

Neither Side Must Surrender Either One of These, Says John Mitchell.

NEW YORK, May 7.—"The idea of a joint trade agreement is the essence of trade-unionism," said John Mitchell today, to the Civic Federation. "We have now 350,000 men working under conditions which are fixed by joint agreement. We adjust all differences by agreement, we leave no question to arbitration—arbitration is preferable to strikes, that is all. The outsiders called in have said they did not understand conditions and the result of the arbitration has been unsatisfactory both to employers and employees.

PARTY LEADERS CHANCE NOTHING

Aggressive Campaign to Be Planned.

Republicans Will Try to Deal Ancient Enemy a Body Blow.

Democrats to Raise a Monster Slush Fund and Attempt to Carry Four of Pivotal States for Parker.

Special to The Tribune. WASHINGTON, May 7.—National leaders of the Republican party are not intending to depend on the shattered condition of their opponents to carry the party to victory next fall. They mean to plan for the campaign as though it were certain to be a life and death struggle.

They will chance nothing. They contend that victory in future years will be made easier of accomplishment if the ancient enemy is followed around the ring while it is trembling from the weakness of the last two great battles, and knocked completely through the ropes. They will be satisfied with nothing short of a body blow that will, if possible, knock out their combatant for all time.

Thorough Campaign Planned. The work planned by the sub-committee of the National committee this week was as thorough as ever before attempted. It covers a large range of details that not only have to do with the convention which meets six weeks from next Tuesday, but which will be important in the organization work of the campaign proper.

While several prominent party men were in Washington this week many conferences have been had as to the national platform. It was tacitly agreed to make the tariff an important issue, whether the Democrats chose to discuss it or not. It is quite generally admitted that the party is always "long" on the tariff and can reach an overwhelming element of independent business votes when that issue is laid before them.

Canadian reciprocity will probably be urged, though it is not at all certain the party will agree to any entanglements. Trusts that violate the law will be made onslaught on despite objection of many to take up the subject, and many matters of lesser importance will be incorporated. It is conceded that the building of a platform will be a comparatively easy matter.

Vice-Presidential Possibilities. Second place on the ticket has been very earnestly discussed by the leaders this week. Of those mentioned Vice-President, Speaker Cannon, Congressman Hitt, Secretary Shaw and Senator Fairbanks have the greatest prominence.

But since Speaker Cannon has been so angry because of the use of his name and is so earnest in his declaration that he will not accept if nominated, it may be said he has eliminated himself.

Secretary Shaw, because of his hold on the business interests of New York, where the President is considered weak, is a very much discussed prospect, but it is contended that no bet-

ter thing could be done than to bring him in the Cabinet and to nominate some other man in whom New York business men have confidence. This brings prominently the name of Indiana's senior Senator before the country. Senator Fairbanks is supposed to be largely interested in business affairs of New York, and has a powerful following in many of the East and Middle West, and nomination would please the President and some say it is now practically assured.

Democratic Campaign Fund. Prominent New York Democrats are backers of Judge Parker, and certain that their candidate will be nominated that they are already planning to raise a \$5,000,000 campaign fund in New York for use in California. They are August Belmont, William B. Hill, Senator Fairbank, William Sheehan and Cord Meyer.

Belmont is expected to take the lead in raising the fund and Hill and Sheehan will direct its expenditure. It is intended to make this expenditure larger than was used for the 1896 election and it is said that many of the wealthiest men of New York are willing to contribute to the fund. The anti-trust policy of the Roosevelt administration has developed and antagonism that it is believed will movement for a great slush fund. These astute political managers believe that money will be raised in little stock in the opposition of the President and believe the anti-trust settlement will easily offset Bryan-Hearst defection.
