HENRY NEWELL'S SECOND PURCHASE.

Pays \$850 Per Front Foot for Land Near Federal Building.

Progress on the Postoffice Has Created a Lively Demand for Adjacent Real Estate.

Henry Newell yesterday made his second purchase of Main street property within a fortnight, when he bought from Herman Hill forty-nine feet frontage on Main street immediately south of Walker Bros. Dry Goods store. The consideration paid was \$14,550, or \$295 a front foot.

The deal was made through the agency of W. J. Halloran. The lot is 165 feet deep, with a right of way to Market street, and it contains a two-story building occupied by stores on the ground floor. While the property is well rented at this time, it carries an important prospective increase of value on account of its close proximity to the new Federal building.

Demand Is Lively.

With the assurance of the early completion of the Federal building there has sprung up in the last few weeks a lively demand for property on lower Main street, and there is prospect for a marked extension of business in that direction during the coming year. The contractors feel sure now that the new building will

THE VALUE OF CHARCOAL

Few People Know How Useful It Is in Preserving Health and Beauty.

Nearly everybody knows that charcoal is the safest and most efficacious disinfectant and purifier in nature, but few realize its value when taken into the human system for the same cleansing purpose.

Charcoal is a remedy that the more you take of it the better. It is not a drug at all, but simply absorbs the gases and impurities always present in the stomach and intestines and carries them out of the system.

Charcoal sweetens the breath after smoking, drinking, or after eating onions and other odorous vegetables.

The complexion it whitens the teeth and further acts as a natural and eminently safe skin cleanser.

It absorbs the injurious gases which collect in the stomach and bowels; it distinguishes the mouth and throat from the poison of catarrh.

All druggists sell charcoal in the best form and at the lowest price. It is in Stuart's Charcoal Lozenges, which are composed of the finest powdered Willow charcoal, and other harmless antiseptics in tablet form or rather in the form of large, pleasant tasting lozenges, the charcoal being made up with honey.

The daily use of these lozenges will soon tell in a much improved condition of the general health, better complexion, sweeter breath and purer blood, and the beauty of it is, that no possible harm can result from their continued use, but on the contrary, great benefit.

A Buffalo physician, in speaking of the benefits of charcoal, says: "I advise Stuart's Charcoal Lozenges to all patients suffering from gas in stomach and bowels, and to clear the complexion and purify the breath, mouth and throat; I also believe the liver is greatly benefited by the daily use of them, they cost but twenty-five cents a box at drug stores, and although in some sense a patent preparation, yet I believe I get more and better charcoal in Stuart's Charcoal Lozenges than in any of the ordinary charcoal tablets."

DISCRIMINATING LADIES

Enjoy Using Herpelids on Account of Its Distinctiveness.

The ladies who have used Newbro's Herpelids speak of it in the highest terms, for its quick effect in cleaning the scalp of dandruff and also for its excellence as a general hair-dressing. It makes the scalp feel fresh and it always that itching which dandruff will cause. Newbro's Herpelids effectively cures dandruff, as it destroys the germ that causes it. The same germ causes hair to fall out, and later, when the hair is growing again, it is also an ideal hair dressing, for it lends an aristocratic charm to the hair that is quite distinctive. Sold by leading druggists. Send 10c. in stamps for sample to The Herpelids Co., Detroit, Mich.

be ready to turn over to the Government in August, 1905, and it is said that the paving of Market street will be attended to as early in the spring as the work can be safely done. That work on the new home of the Federal offices is progressing nicely is shown by the fact that the glass is up and the interior of the building is being finished.

Strengthens the Market.

The real estate purchases recently made by Mr. Newell and other prominent capitalists, indicating, as they do, that Salt Lake's wealthy citizens have implicit confidence in the city's future, are operating to strengthen to a noticeable degree the general real estate market.

"THEY ARE BUSY NOW"

Business Men Have Taken A Tip From the Telephone Girl.

Petitions for the proposed mass meeting of business men to be held at the Commercial club next Monday night were circulated yesterday, and were very generally signed. The meeting is to be held for the purpose of making an organized protest against the alleged exorbitant telephone rates maintained by the Bell system. The Retail Grocers' association took the lead in the matter of circulating the petition, and it is said that not a single member of the association refused to sign. Committees representing other lines of business were almost equally zealous in the present campaign, and are that the meeting will be a very large one, with the attendance unanimously in the belief that the cause of lower telephone rates is better served.

The committee appointed at the Monday night meeting to circulate the petition relative to the rates in vogue in this and other cities is also progressing with its work. It called yesterday upon the officials of both telephone companies and was accorded by them every facility for securing the desired information. It was found that the Bell company has a wide range of rates in different cities, the range being all the way from \$48 to \$125 a month for a single line.

The committee also learned that the Bell company charged in some of the leading cities are as follows: Milwaukee, \$96; St. Louis, \$125; Omaha, \$84; Denver, \$125; Portland, \$100; Burlington, \$48; Cedar Rapids, \$48; Minneapolis and St. Paul, \$81. The rate in Salt Lake is \$20.

It is found that the average rate charged by independent companies is \$48, the same as that established by the Utah Independent Telephone company, and that where the lower rates are charged by the Bell company it has invariably been the result of a special arrangement.

The movement for lower rates has occasioned a great deal of comment among the classes of telephone patrons, and varying views, as to where relief is most needed. One household presents the idea that nickel-in-the-slot phones for residential use would be a great improvement over the registry system, for the reason that one's neighbor could thereby be required to pay for the use of one's telephone without affronting them.

To Develop Mexican Lands.

Articles of Incorporation of the Mexican Land & Sugar company of Utah were filed with the County Clerk yesterday morning. The amount of the capital stock is \$100,000, divided into 500 shares. W. W. Clark is president, James Chipman vice president, R. W. Young, secretary, and Frank J. Knox, treasurer. The object of the company, as stated in the articles, is to buy, sell, hold, improve, colonize, lease and otherwise deal in land to be located in tropical zones, and to operate tramways, steamboats and steamship lines, to acquire and develop and exploit patents and licenses.

HALF INTEREST SOLD.

A. B. Greeson Will Succeed W. H. Korns on the Mining Review.

W. H. Korns's one-half interest in the Mining Review of this city was purchased yesterday by A. B. Greeson, who will succeed Mr. Korns as business manager of the publication. Will C. Higgins retains his interest and will continue in the position of editor. Under the management of Mr. Korns and the editorship of Mr. Higgins the Review has taken a position in the front rank of mining publications of the country and it is now expected that the paper will continue to do good work with Mr. Greeson at the head of the business department. The manager is by no means a stranger to Salt Lake. He was for ten years connected with the advertising department of The Tribune, but for two years past has lived in Indianapolis, Ind. Mr. Korns has not yet made definite plans for the future, but he expects to engage in some other business in this city.

Exchange Advances Corn Meal.

Members of the Salt Lake Flour and Grain Merchants' exchange enjoyed luncheon at the Commercial club yesterday, followed by the regular weekly meeting. Aside from the regular purchases and sales which consume a part of every meeting, the only business done yesterday

by the exchange was to advance the price of cornmeal to \$2 a hundredweight, this price to apply to jobbers who buy in small quantities.
